2. *Change in the procedure for calculation of cargo volume of hatchbacks.* Currently, the cargo volume of hatchbacks is determined by calculating a rectangular volume roughly bound by the back of the second seat, the side walls, the cargo floor, the rear door and a horizontal plane at the height of the rear seat. This is not an adequate measure of volume. In some cases it is larger than the usable space whereas in others it may be smaller. EPA believes that changes need to be made to the hatchback cargo volume calculation

procedure so that the index better represents the total usable space.

In the June 6 NPRM EPA suggested that a hatchback is more like a sedan in terms of its cargo carrying capacity than a station wagon; and that therefore the same procedure should be used to characterize the cargo space of hatchbacks as is used for the trunk volume of sedans. This premise rested on the following argument: (1) a hatchback is more suitable for carrying small parcels or luggage than large boxes, etc. and (2) certain hatchbacks are available with cargo area covers at the height of the back seat which makes the cargo area like the trunk of a sedan. Comments to the June 6 NPRM were few and equally divided for and against the proposal. No alternative was suggested. Therefore, EPA is repropounding that the cargo volume of hatchbacks be determined in accordance with the SAE procedure established for the determination of the cargo volume of sedans, i.e., the use of a standard luggage set as defined by the SAE.

The SAE procedure that is defined for sedans needs to be modified for use in determining the cargo volume of hatchbacks since the cargo space of hatchbacks is not fully enclosed. EPA proposes that for hatchbacks without a cargo area cover, luggage pieces that are placed directly on the cargo floor may extend above the back of the rear seat if placed so that any dimension of the luggage, except the longest, is the vertical dimension. Luggage pieces that are placed on other pieces must not extend more than 2 inches above the height of the rear seat. This ensures that small parcels simulated in this determination by H-boxes, which are the most likely items to be stacked on smaller pieces of luggage, will be contained by the rear seat so that they will not slide or tumble forward when a vehicle brakes to a sudden stop.

For hatchbacks with a cargo cover, the main cargo area should be loaded like that of a sedan. If the center section of the cargo cover is removable or storable, the cargo area may be packed as if it were an open cargo area, that is, with small luggage protruding up to 2 inches above the height of the rear seat and large luggage extending upward without limit so long as the large pieces are placed on the cargo floor with their longest dimension in a horizontal plane.

EPA seeks comment on the overall applicability of the use of the SAE luggage set to the cargo volume determination of hatchbacks and specifically on the stacking height and treatment of hatchbacks with cargo covers.

3. *Consideration of front passenger leg room in determining the interior volume index.* In the June 6 NPRM, EPA proposed that the front passen-

ger's right leg room be measured in an analogous fashion to the driver's right leg room and the average of the two be used in determining the front seat component of the interior volume index instead of the current procedure which uses the driver's leg room only. Comments were evenly divided for and against the proposal, with most of the negative comments expressing concern that no standard procedure for the measurement exists. Due to the lack of a standard procedure EPA did not adopt this proposal for the 1978 year in the September 12, 1977 final rulemaking. A procedure for measurement of front passenger leg room analogous to the SAE procedure for measuring the driver's leg room is hereby being proposed for use beginning with the 1979 model year. The procedure is fully described in the proposed Appendix to the regulations.

4. *Earlier publication of the gas mileage guide.* Although not a matter subject to rulemaking, EPA is requesting comment in this notice on the feasibility of advancing the date of preparation of the Gas Mileage Guide for 1979 and subsequent model years. The feasibility of earlier publication of the Gas Mileage Guide was a central issue in a report to the Congress published by the General Accounting Office (Convincing the Public to Buy the More Fuel-Efficient Cars: An Urgent National Need) in August 1977. The report recommended that EPA prepare the Guide data in mid-August

rather than in mid-September as has been done in past years.

While agreeing with the GOA in principle that acceleration of the Guide publication and distribution would be desirable, the EPA believes that there are potential risks associated with the usability and credibility of the Guide if the data were less complete as a result of earlier preparation. It would be feasible to advance the date for the preparation of the Guide if manufacturers could (and would) advance their testing schedules accordingly. If manufacturers did not advance their testing schedules, EPA would be faced with the choice of including in the Guide model type fuel economy values that were calculated from an inadequate and thus potentially unrepresentative data base, or limiting the first edition of the Guide to those model types for which complete data has been submitted. (In many cases, several cars must be tested for each model type in order to account for different weights and options.) It was estimated on the basis of comments from manufacturers that inclusion of all model types for which some data existed as of July 31 without an acceleration in testing would result in a Guide containing 10 percent fewer model types than the 1978 Guide with errors of up to 3 mpg. Conversely, an early Guide that included only complete model type fuel economy would contain 33 percent fewer model types than the current first edi-

tion of the Guide, which covers approximately 75 percent of the year's model types, and about 90 percent of vehicles sold. Thus, EPA would choose the latter, a smaller, less complete and therefore less comprehensive Guide (but one which does not include data that were known to be unrepresentative). It must be borne in mind that this would mean that this less complete first edition would be the only one available in the showrooms until the complete second edition was published in February. Naturally, EPA could just retain the present system, but this means that no Guides would be available early in the model year. Thus, the choice may be between providing no Guides early in the model year; or providing less complete data for half of the model year.

The timetable for the preparation of the first edition of the 1979 Guide would have to be advanced at least 3 weeks if the GAO goal is to be met. A suggested schedule for early release of the 1979 Guide is given below. EPA seeks manufacturers' comments on the feasibility of adopting this schedule for the 1979 model year. If insufficient lead time exists to implement such a schedule for 1979, manufacturers should specify the model year for which they believe adoption of such a schedule would be feasible and the impact of its implementation. EPA also seeks public comment on the trade-off between earlier publication and fuller coverage, which are likely to be and remain somewhat conflicting goals.

Schedule for release of fuel economy ranges and guide

Task	Target date ¹	Responsibility
(a) Submit fuel economy data vehicle packages intended to be included in the calculation of model type (i.e., general label) fuel economy values for the first edition of the Guide.	July 10 (Aug. 1).....	Manufacturer.
(b) Submit requests for calculation of model type fuel economy values (per 40 CFR 600.313-78(c)(1)(ii)) to be included in first edition of the Guide.	July 24 (Aug. 15).....	Do.
(c) All EPA fuel economy testing (including emission-data vehicles) pertaining to model type values to be included in first edition of the Guide must be completed.	July 31 (Aug. 22).....	Do.
(d) Complete emission certification requirements (per 40 CFR 86.078-23) for all model types to be listed in the first edition of the Guide.	Aug. 11 (Sept. 2).....	Do.
(e) Complete approval of all model type fuel economy values to be included in the first edition of the Guide.	do.....	EPA.
(f) Compile a list (for each manufacturer) of the manufacturer's vehicle descriptions, fuel economy values, etc., of all model types to be included in the first edition of the Guide, and transmit to manufacturers, for their review.	do.....	EPA.
(g) Complete review of all information provided in (f), above, and notify EPA of necessary corrections or concurrence.	Aug. 21 (Sept. 12).....	Manufacturer.
(h) Release to manufacturers ranges of fuel economy values of comparable vehicles to be used on fuel economy labels, and to DOE the data for inclusion in the first edition of the Guide.	Aug. 23 (Sept. 14).....	EPA.
(i) Include on labels of vehicles produced (or imported) as of this date the range of fuel economy of comparable vehicles as required by 40 CFR 600.311-77(b).	Sept. 8.....	Manufacturer.

¹1978 schedule as set forth in OMSAPC Advisory Circular 67 is shown in parentheses. The 1979 suggested schedule is accelerated approximately 3 weeks.

SUBMISSION AND REVIEW OF COMMENTS

The Agency requests comments on the proposals contained in this NPRM. Manufacturers and other interested parties may participate in this rule-making by submitting comments (in quadruplicate if possible) to the EPA at the address given above.

It is EPA's intention to assure all interested parties an opportunity to study all information which may become the basis of EPA's final action in this proceeding. Accordingly, the Agency will not consider in this rule-making any material which cannot be made available to the public. Parties who wish to submit information in response to this Notice of Proposed Rulemaking are cautioned that EPA will not consider and will return any comments which are claimed, in whole, or in part to be confidential.

A copy of all public comments will be available for inspection and copying at the U.S. Environmental Protection Agency, Public Reference Unit, Room 2922 (EPA Library) 401 M Street SW., Washington, D.C. 20460. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services.

NOTE.—The Environmental Protection Agency has determined that this document does not contain a major action requiring preparation of an Economic Impact Analysis under Executive Orders 11821 and 11949 and OMB Circular A-107.

Dated: February 6, 1978.

BARBARA BLUM,
Acting Administrator.

It is proposed to amend Part 600 of Chapter I, Title 40 of the Code of Federal Regulations as follows:

§ 600.315-79 [Added]

1. By adding a new § 600.315-79 identical to § 600.315-78 except for paragraphs (d)(3) and (g) which read as follows:

- (d)
(3) The average of L34 (Maximum effective leg room—accelerator) and

Maximum effective legroom—front passenger (in inches). L34 is obtained according to paragraph (c) of this section. Maximum effective legroom—front passenger is calculated in accordance with Appendix VI to this Part.

(g) Cargo volume index:

(1) For station wagons, the cargo volume index V2 is the total of the volume of the one foot cubes (boxes or blocks measuring 12 by 12 by 12 inches) and H-boxes (as defined in SAE procedure HSJ-1100a) that can be placed in the cargo area in accordance with section 8.2 of HSJ-1100a substituting the cubes for the standard luggage set plus the hidden cargo volume determined in accordance with subparagraph (3).

(i) The second seat back shall be in the upright position and the standard equipped spare tire, tools, or other vehicle parts normally stored in the cargo area shall be in their normal stored positions during the determination. The cargo area access door must close and lock freely without forcing or excessive slamming when all of the cubes and boxes used in the volume determination are in place.

(ii) The cubes and boxes shall be stacked from the rear of the second seat to the rear access door and from the cargo floor to the ceiling with soft point measurements (except for the cargo floor) used. No cube or box shall protrude into the passenger compartment, that is, above the second seat and forward of the vertical plane that is tangent to the back of the second seat.

(iii) The maximum number of the H-boxes used in the estimation of station wagon cargo volume shall be the number whose volume equals 20 percent of the total cargo volume of the vehicle.

(iv) Computer simulation of the estimate technique described in this subparagraph may be substituted for actual physical measurement.

(2) For hatchbacks, the luggage capacity procedure defined by the SAE for sedans will be used (SAE HSJ-1100a(8)) except that the following additional conditions shall apply: (i) Luggage pieces may protrude above the height of the back of the rear seat provided that the luggage is placed on the cargo floor with the longest dimension in a horizontal plane. The height of all other luggage area shall not exceed the height of the horizontal plane lying 2 inches above the top of the second seat back.

(ii) Hidden cargo volume determined in accordance with subparagraph (3) may be included in the total cargo volume determination.

(iii) For hatchbacks with cargo covers: (A) If the cargo cover is not removable or capable of storage, the cover is to be treated as part of the cargo compartment lid or access door and must close freely without forcing or excessive slamming with all of the luggage in place in the compartment.

(B) If the cover is removable or capable of storage, then cargo measurements may be made as in subparagraph (i) with the cover removed and placed within the cargo area or stored within the cargo area as designed by the manufacturer.

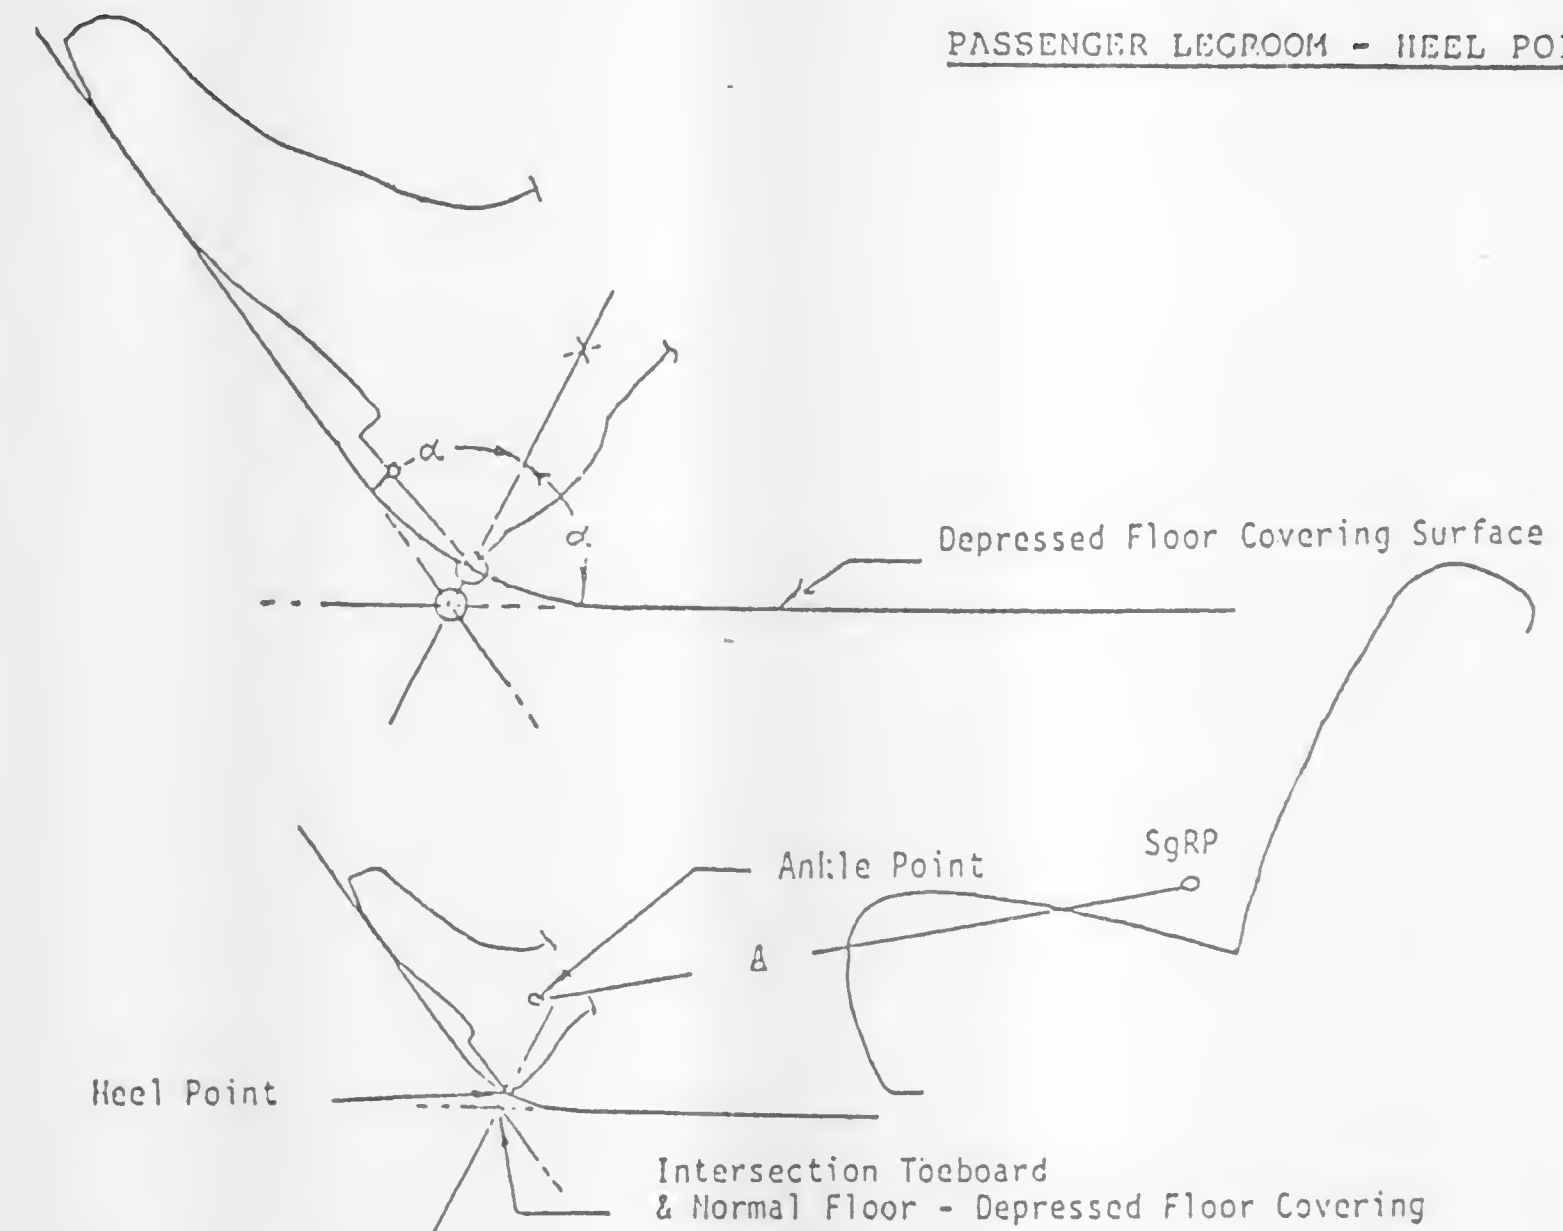

(3) Hidden cargo volume shall be determined by placing one or more H-boxes into each hidden cargo area. A hidden cargo area is any space to the rear of the second seat that is distinct from the main open cargo area which is designed by the manufacturer to accommodate small parcels and which may have a door to separate it from the open cargo area. If a hidden cargo area is completely enclosed, the door must be capable of being closed and latched without forcing when all the H-boxes used in the volume determination are in place.

2. By adding Appendix VI which reads as follows:

APPENDIX VI

FRONT PASSENGER LEGROOM DIMENSION TO BE USED
IN DETERMINING VEHICLE INTERIOR VOLUME INDEX

PASSENGER LEGROOM - HEEL POINT

I.33 - Maximum effective legroom — passenger front.

The dimension measured along a line from the ankle pivot center to the seating reference point (SgRP) -- front (dimension "A" in above sketch) plus 10.0 in. (254 mm), with the front passenger's right foot placed on the depressed floor covering on the toeboard with the back of heel positioned at a line that bisects the angle formed by the extension of the normal toeboard and floor covering surfaces. Standard floor covering is to be used.

PROCEDURE FOR MEASURING FRONT SEAT
PASSENGER LEGROOM

NOTE.—The terms contained herein (with the exception of L33) are contained in the Society of Automotive Engineers procedure HJS-1100a.

The maximum effective legroom—passenger front, L33 is measured with the aid of the standard SAE two-dimensional drafting template or three-dimensional H-point machine in a manner similar to the way L34 (maximum effective legroom—accelerator) and L51 (minimum effective legroom—second) are measured.

The two-dimensional template or three-dimensional H-point machine will be positioned as follows: 1. Adjust the leg segments to the 95th percentile lengths.

2. Place the H-point (pivot center of the torso and thigh) at the seating reference point, SgRP.¹

3. Slide the (right) lower leg and foot forward until the foot reaches the position defined in the illustration.

4. If the foot will not reach the prescribed position with all joints intact, disconnect the foot at the ankle or knee before positioning the foot.

(Section 301, Pub. L. 94-163, 89 Stat. 901 (15 U.S.C. 2003).)

EDUCATION, AND WELFARE

Health Resources Administration

[42 CFR Part 121]

NATIONAL GUIDELINES FOR HEALTH
PLANNING

Proposed Rulemaking; Correction

AGENCY: Public Health Service, HEW.

ACTION: Correction, Notice of Proposed Rulemaking.

SUMMARY: In the Notice of Proposed Rulemaking published in the FEDERAL REGISTER on January 20, 1978, pages 3056-3069, a technical correction needs to be made on page 3065, third column, § 121.203(a)(3), Obstetrical Services, so that the occupancy rate of at least 75 percent applies to units with 1,500, rather than 1,000, births

¹If a two dimensional template is being used it must be used in such a way that it gives the same results as would an H-point machine.

²For vehicles with a bench seat, the SgRP for the right side passenger shall have the same X and Z coordinates as the driver's SgRP. The Y coordinate shall be located symmetrically with the driver's SgRP (about the centerline of the vehicle) or at the centerline of occupant (C/LO) as specified by the manufacturer. For front seats other than bench seats, the SgRP will be established by the manufacturer and will simulate the position of the pivot center of the torso and thigh of an occupant seated on the right hand side of the front seat.

PROPOSED RULES

annually. The document is corrected as follows:

§ 121.203 Obstetrical Services.

(a) *Standard.* (1) Obstetrical services should be planned on a regional basis with continuing linkages among all obstetrical services and with neonatal services.

(2) Hospitals providing care for complicated obstetrical problems (Levels II and III) should have at least 1,500 births annually.

(3) There should be an average annual occupancy rate of at least 75 percent in each obstetrical unit with more than 1,500 births per year.

FEDERAL COMMUNICATIONS
COMMISSION

[47 CFR Part 91]

[SS Docket No. 78-27; RM-2957; RM-2698; FCC 78-54]

NON-CENTRAL STATION COMMERCIAL
PROTECTION ENTITIES

Prohibiting the Operation of Base or Control Stations on the Frequencies 460.900/465.900, 460.925/465.925, and 460.950/465.950 MHz

AGENCY: Federal Communications Commission.

ACTION: Notice of Proposed Rule Making.

SUMMARY: The Central Station Electrical Protection Association petitioned the Commission in Rule Making 2957 to prohibit radio operations by non-central station electrical protection entities on certain business radio service frequencies within 75 miles from the city centers of urbanized areas of 200,000 or more population (1960 U.S. Census). The intended effect is to avoid conflicts and interference problems. In another matter relating to these same frequencies and other frequencies assigned for this industry's use, the Central Station Electrical Protection Association petitioned the Commission (RM-2698) to

permit alarm signalling and other fixed point-to-point operations on a secondary basis by this industry. The intended effect is to accommodate expanding industry requirements. After considering these petitions, the Commission proposes granting these aspects of these petitions.

DATES: Comments must be received on or before April 20, 1978 and reply comments must be received on or before May 22, 1978.

ADDRESSES: Send comments to: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION
CONTACT:

E. C. Bowler, Safety and Special Radio Services Bureau, 632-6497.

Adopted: January 25, 1978.

Released: February 7, 1978.

In the matter of Amendment of section 91.554 of the Commission's Rules to prohibit the operation of base or control stations on the frequencies 460.900/465.900, 460.925/465.925, and 460.950/465.950 MHz by non-central station commercial protection entities within 75 miles from the city centers of urbanized areas of 200,000 or more population (1960 U.S. Census); and to permit alarm signalling and other fixed point-to-point operations on a secondary basis for central station electrical protection entities on the frequencies 460.900/465.900, 460.925/465.925, 460.950/465.950, 460.975/465.975, and 461.000/466.000 MHz.

1. Notice of proposed rule making is hereby given in the above-entitled matters.

2. Section 91.554(b)(32) of the Commission's Rules presently provides that within the boundaries of urbanized areas of 200,000 or more population, as defined by the 1960 U.S. Census of Population, the frequency pairs 460.900/465.900 MHz, 460.925/465.925 MHz, and 460.950/465.950 MHz may be assigned only to persons rendering a commercial central station electrical protection service. The Central Station Electrical Protection Association (CSEPA) has requested, through a rule making petition, that language be added to the rule which would require all non-central station electrical protection radio operations to be located at least 75 miles or more from the center of these urbanized areas. The purpose of this proposal is to avoid conflicts and interference problems. We think that the proposal has merit, and we propose to adopt the rule CSEPA has requested.

3. In a separate matter, but one also involving the use of the three frequency pairs mentioned above plus two additional frequency pairs available exclusively to the central station electrical protection industry nationwide

(460.975 MHz and 461.000 MHz), CSEPA has asked, among other things, that the Commission's Rules be amended to allow central station electrical protection companies to conduct alarm signalling and other fixed point-to-point operations on these frequencies on a secondary basis to their land mobile operations.

4. We considered the latter matter in our Memorandum Opinion and Order, adopted January 25, 1978, in which we granted in part and we denied in part CSEPA's petition for reconsideration of our decision on CSEPA's petition for rule making, RM-2698. We concluded there that there is merit to this aspect of its petition and, therefore, we hereby propose to adopt a rule which would allow central station electrical protection licensees to use their radio facilities authorized on the frequencies 460.900/465.900, 460.925/465.925, 460.950/465.950, 460.975/465.975 or 461.000/466.000 MHz for alarm signalling and for other point-to-point purposes, on a secondary, non-interference basis. Because they are related, the two Petitions, RM-2698 and 2957, have been consolidated.

5. Accordingly, notice is hereby given of proposed rule making on the specific proposed rule changes set out in the attached Appendix. To minimize the effects on existing licensees that will be affected by the 75-mile limitation (Proposed changes to § 91.554(b)(32)), we propose to allow them to continue their operations until March 31, 1983. This should provide adequate time for these licensees

to amortize costs of existing equipment and plan for alternate means for meeting their communications requirements. Authority for the proposed amendments are contained in Sections 4(i) and 303 of the Communications Act of 1934, as amended. Pursuant to applicable procedures set forth in Section 1.415 of the Commission's rules, interested persons may file comments on or before April 20, 1978, and reply comments on or before May 22, 1978.

6. In accordance with the provisions of Section 1.419(b) of the Commission's Rules, an original and 5 copies of all statements, briefs, and comments filed shall be furnished to the Commission. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken. The Commission may also take into account other relevant information before it, in addition to the specific comments invited by the Notice.

FEDERAL COMMUNICATIONS
COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

Part 91 of the Commission's Rules is amended as follows:

1. In Section 91.554, the table and paragraphs (b)(32), (b)(51) and (b)(52) are amended to read as follows:

§ 91.554 Frequencies available.

(a) * * *

Frequency or band	Class of Stations	General reference	Limitations
460.875.....	Base and mobile.....	Permanent use.....	16.35,36,37,38,40
460.900.....	do.....	do.....	10.32,34,35,51,52

466.000.....	do.....	do.....	7.9,10,34,35,41,51,52
466.025.....	do.....	do.....	7.9,10,34,35,38

this frequency may be used only by persons rendering a central station commercial protection service. Central station commercial protection service is defined as electrical protection and supervisory services rendered from and by a central station approved by

one or more of the recognized rating agencies and/or the Underwriters' Laboratories, Inc. (UL). Other stations in the Business Radio Service may be licensed on this frequency only when all base, mobile relay and control stations are located at least 75 miles from the city center or centers of the urbanized areas of 200,000 or more population. With respect to combination urbanized areas containing more than one city, 75 mile separation shall be maintained from each city center which is included in the urbanized area. The locations of centers of cities are determined from Appendix, page 226, of the U.S. Commerce publications "Air Line Distance Between Cities in the United States."

(51) Fixed operations are authorized for tone or impulse signalling by persons rendering a central station electrical protection service, provided harmful interference is not caused to the primary mobile service operations of any other licensee.

(a) Secondary fixed operations may be used only for the following purposes:

(1) Indication of equipment malfunction.

(2) Actuation of a device to indicate the presence of an intruder, fire, or other hazardous condition on the property under the protection of the licensee.

(3) Indication of an abnormal condition in facilities under the protection of the licensee that if not promptly reported would result in danger to human life.

(4) Transmission, as may be necessary, to (i) verify status of equipment; (ii) adjust operating conditions, (iii) correct any abnormal condition, or (iv) to activate devices that alert the public to a condition affecting the safety of life or property.

(5) Confirmation of status, or that an operation or correction has been accomplished or that the alerting device has been activated.

The maximum duration of any one non-voice signal may not exceed 2 seconds and shall not be transmitted more than 3 times.

(b) Systems employing automatic interrogation shall be limited to non-voice techniques and shall not be activated for this purpose more than ten seconds out of any 60 second period. This 10 second frame includes both transmit and response times.

(c) The bandwidth shall not exceed that authorized to the licensee for the primary operation on the frequency concerned.

PROPOSED RULES

(d) Frequency loading resulting from the use of secondary signalling will not be considered in whole or in part as a justification for authorizing additional frequencies in the licensee's mobile system.

(e) A mobile service frequency may not be used exclusively for secondary signalling.

(f) The output power shall not exceed 30 watts (at the remote site).

(g) All A2, A9, F1, or F9 emission, may be authorized.

(h) The transmitter shall be designed to deactivate automatically after 3 minutes of continuous carrier radiation.

(i) Operational fixed stations authorized under this paragraph are exempt from the requirements of §§ 91.54(e)(2), 91.107(e), 91.152, 91.154.

(j) On frequencies above 25 MHz, base, mobile relay or mobile stations may transmit secondary tone or impulse signals to receivers, as provided in this section.

(52) Persons providing a central station commercial protection service may use the frequency, on a secondary basis, to transmit information about alarms received by the central station to police or to fire stations or vehicles, if the frequency is also authorized to the licensee and it is used in a base and mobile system offered by that licensee.

Advance Notice of Proposed Rulemaking

AGENCY: Federal Highway Administration, DOT.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: This advance notice is being issued to solicit comments on proposed additions to the Federal Motor Carrier Safety Regulations. Consideration is being given to adopting a safety regulation which would specify minimum size for the cab portion of the regulated commercial vehicles manufactured after a certain date and operated in interstate or foreign commerce. There is a need to reassess the safety impact of present restrictions imposed by certain States on overall commercial vehicle length as they influence the driver's operating environment.

DATES: Comments must be received on or before July 14, 1978.

ADDRESSES: BMCS Docket No. MC 79, Bureau of Motor Carrier Safety, Federal Highway Administration, Room 3402, 400 Seventh Street SW., Washington, D.C. 20590. All comments and suggestions received will be available for examination at the above address between 7:45 a.m. and 4:15 p.m. e.s.t., Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

Mr. D.W. Morrison, Chief, Vehicle Requirements Branch, Bureau of Motor Carrier Safety, 202-426-1700; or Mrs. K. S. Markman, Attorney, Office of the Chief Counsel, 202-426-0786, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. e.s.t., Monday-Friday.

SUPPLEMENTAL INFORMATION: The Bureau of Motor Carrier Safety (BMCS), an element of the Federal Highway Administration (FHWA), is considering the problems associated with and which would give rise to the necessity for the specification of a minimum size for the cab portion of regulated commercial vehicles. Such specifications would consider the means of achieving safety-related objectives through the regulation of truck and tractor cab size of commercial motor vehicles manufactured after a certain date and operated in interstate foreign commerce.

There are several reasons for initiating proposed rulemaking at this time. First, the need to reassess the safety impact of present restrictions imposed by certain States on overall commercial vehicle length as they influence the driver's operating environment. Second, the National Highway Safety Advisory Committee's report, Vehicle Length Restrictions, March 1977, noted safety benefits in revised vehicle length restrictions to allow more cab operating space. Third, the issue of truck lengths has become a matter of increasing concern to labor interest groups as it impacts upon working conditions of the drivers. Fourth, the Department of Transportation's Steering Axle Study, July 5, 1977, prepared in accordance with section 210 of the Federal-Aid Highway Act of 1976, discussed the effort required to steer a commercial motor vehicle in relation to steering axle weights, placement of the fifth wheel, and the length of the cargo carrying body.

The Bureau is considering minimum cab size requirements which may have a direct effect on cargo carrying capacity or commercial vehicle lengths within the framework of an overall length limitation imposed by States. At present, the maximum length specified by any State for a tractor-se-

mitrailer combination is 75 feet, and most of the States have limits ranging from 55 to 65 feet.

The International Brotherhood of Teamsters (IBT) and the Professional Drivers Council (PROD) have stated that equipment manufacturers, in response to customer requests, have shortened the wheel base and cab dimensions of power units in order to increase, as much as possible, the cargo carrying portion of the vehicle. The following problems have been cited:

Excessive weight on the steering axle.

Improper fifth wheel placement
Deterioration of driver comfort and safety.

Reduced accessibility to the engine for inspection and maintenance.

Increased difficulty in entering and exiting the cab, thereby increasing the likelihood of slips and falls.

Unavailable space to alter the shape of the cab for purposes of reducing wind resistance and improving fuel economy.

Unsafe and uncomfortable sleeping accommodations for driver relay teams.

Short wheel bases and high fifth wheel offsets that adversely affect operating safety.

Overloading of front tires.

The Bureau believes that a severely degraded ride may have an indirect impact on safety by increasing driver fatigue level or reducing the driver's concentration. Currently, the effect of ride quality is one phase of a study being conducted for the Department of Transportation. Results of this contract and others will be considered in the formulation of any regulations affecting vehicle or vehicle component lengths.

In order to obtain data, information and views to assist the Bureau for assessing the need for regulations in this area, we are requesting comments on these minimum cab size parameters:

1. Whether any type or weight class of vehicle be exempted and why.

2. Experience with shortened cab and its effect on driver performance.

3. Experience with shortened cab and vehicle controllability and maneuverability.

4. Cab over engines (COE) and their effect on steering axle weights.

5. Fifth wheel placement resulting from COE configurations and its effect on vehicle controllability.

6. Effect of COE placement on accessibility of engine for purposes of inspection and maintenance.

7. Compatibility of differing sizes of tractor and trailer and the possible effect on safety.

8. In addition, comments are specifically requested on the feasibility of proposing model advisory standards in lieu of regulations with respect to minimum cab space dimensions, as rec-

ommended by the National Highway Safety Advisory Committee Report of March 1977.

Those desiring to comment on this advance notice of proposed rulemaking are asked to submit in writing 3 copies of their views, data, and arguments. All communications received will be considered before any proposals for rulemaking actions are undertaken.

All comments submitted will be available both before and after the closing date for examination by interested persons in the docket room of the Bureau of Motor Carrier Safety, room 3402, 400 Seventh Street SW., Washington, D.C. 20590. If it is determined to be in the public interest to proceed further after summarizing the comments and considering the available data and comments received in response to this advance notice, a notice of proposed rulemaking will be issued.

(49 U.S.C. 304, 49 U.S.C. 1655, 49 CFR 1.48 and 49 CFR 301.60.)

Issued on February 3, 1978.

ROBERT A. KAYE,

Director,

Bureau of Motor Carrier Safety.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 20]

MIGRATORY BIRD HUNTING

Proposed 1978-79 Migratory Game Bird Hunting Regulations (preliminary)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rulemaking.

SUMMARY: The Service proposed to establish open hunting seasons, daily bag and possession limits, and shooting hours for all designated groups or species of migratory game birds for which hunting seasons are being considered for 1978-79 in the contiguous United States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands. The Service annually prescribes migratory bird hunting regulations. The effect of these hunting regulations is to provide hunting opportunity, a form of outdoor recreation, to the public and to aid Federal and State governments in the management of migratory game birds.

DATE: Comments must be received on or before May 16, 1978.

ADDRESS: Send comments to: Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

PROPOSED RULES

John P. Rogers, Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240, 202-343-8827.

SUPPLEMENTARY INFORMATION: The Fish and Wildlife Service proposes to establish hunting seasons, bag and possession limits, and shooting hours for migratory game birds under sections 20.101 through 20.107 of subpart K of 50 CFR 20.

"Migratory game birds" are those migratory birds so designated by conventions between the United States and several foreign nations for the protection of these birds. During the 1978-79 hunting season, regulations are proposed for certain designated members of the avian families Anatidae (wild ducks, geese, brant, and swans); Columbidae (wild doves and pigeons); Gruidae (cranes); Rallidae (rails, coots, and gallinules); and Scolopacidae (woodcock and snipe).

NOTICE OF INTENTION TO ESTABLISH OPEN SEASONS

This notice announces the intention of the Director, U.S. Fish and Wildlife Service, to establish open hunting seasons, daily bag and possession limits, and shooting hours for all designated groups or species of migratory game birds for which hunting seasons are being considered for 1978-79 in the contiguous United States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands.

FACTORS AFFECTING REGULATIONS PROCESS

This is the first notice in a series of proposed and final rulemaking documents for migratory bird hunting regulations, and sets forth proposed season frameworks and shooting hours for the various groups of migratory game birds, as well as proposed daily bag and possession limits for certain groups or species for which these regulations ordinarily do not vary significantly from year to year. The proposals set forth here for certain species, as well as the schedule by which more detailed proposals for these and other species will be developed, are dependent upon a number of factors. Among these are various annual population and habitat surveys, the times when these surveys are conducted and results are available for analysis, times of migration and other biological considerations, and times during which hunting may be allowed. The regulatory process for migratory game birds is strongly influenced by the times when the best and latest information is available for the development of regulations. For these reasons, the overall regulations process for hunting seasons and bag limits is divided into the following segments: (1) regulations

for migratory game birds in the United States, Puerto Rico, and the Virgin Islands for which seasons prior to September 30 are proposed (early seasons); and (2) regulations for migratory game birds in the United States for which seasons opening on September 30 or later are proposed (late seasons). Regulations development for each of the two categories will follow similar but independent lines. Proposals relating to the harvest of migratory game birds that may be initiated after publication of this proposed rulemaking will be made available for public review in a supplemental proposed rulemaking to be published in the FEDERAL REGISTER. Also, additional supplemental proposals will be published for public comment in the FEDERAL REGISTER as population, habitat, and harvest information becomes available.

Because of the late dates when certain of these data become available, it is anticipated that comment periods on proposals dealing with specific hunting seasons, limits and certain other regulations pertaining to migratory shore and upland game birds and waterfowl will necessarily be abbreviated. Special circumstances which limit the amount of time which the Service can allow for public comment are involved in the establishment of these regulations. Specifically, two considerations compress the time in which the rulemaking process must operate: the need, on the one hand, to establish final rules at a time early enough in the summer to allow affected State agencies to appropriately adjust their licensing and regulatory mechanisms, and, on the other hand, the lack before late July of specific, reliable data on this year's status of most waterfowl.

PUBLICATION OF REGULATORY DOCUMENTS

The process relating to the establishment of migratory bird hunting regulations in the United States involves a series of regulatory announcements published in the FEDERAL REGISTER in accordance with the Administrative Procedure Act. The publication of these documents is divided into three phases, as follows:

1. Proposed rulemakings—proposals to amend subpart K (and, when necessary, other subparts) of 50 CFR Part 20, including supplementary proposed migratory game bird hunting regulations, and/or regulations frameworks which prescribe season lengths, bag and possession limits, shooting hours, and outside dates within which States may make season selections.

2. Final rulemakings—frameworks. Final migratory game bird regulations frameworks which prescribe season lengths, bag and possession limits, shooting hours, and outside dates

PROPOSED RULES

within which States may make season selections.

3. Final rulemakings—season selections. Amendments to the various specific sections of subpart K (and, when necessary, other subparts) of 50 CFR Part 20 based on the final migratory game bird hunting regulations and the final regulations frameworks and on season selections made and communicated by the States to the Service.

Major steps in the 1978-79 regulatory cycle relating to public hearings and FEDERAL REGISTER notifications are illustrated in the accompanying diagram.

PROPOSED RULES

1978 SCHEDULE OF REGULATIONS MEETINGS
AND
PUBLICATIONS IN THE FEDERAL REGISTER

All dates shown for frameworks and seasons in this and all following documents are inclusive.

Non-toxic shot proposals and regulations are published separately under § 20.21 of subpart C and § 20.108 of subpart K.

OBJECTIVES OF THE MIGRATORY BIRD HUNTING REGULATIONS

The objectives of these annual regulations are as follows:

(1) To provide an opportunity to harvest a portion of certain migratory game bird populations by establishing legal hunting seasons.

(2) To limit harvest of migratory game birds to levels compatible with their ability to maintain their populations.

(3) To avoid the taking of endangered or threatened species so that their continued existence is not jeopardized, and their conservation is enhanced.

(4) To limit taking of other protected species where there is a reasonable possibility that hunting is likely to adversely affect their populations.

(5) To provide equitable hunting opportunity in various parts of the country within limits imposed by abundance, migration, and distribution patterns of migratory game birds.

(6) To assist, at times and in specific locations, in preventing depredations on agricultural crops by migratory game birds.

The management of migratory birds in North America is international in scope, and involves other nations, notably Canada and Mexico. Within the United States, other Federal agencies, State conservation agencies, national and regional conservation groups, and the public provide much support to the achievement of these objectives.

DATA USED IN REGULATORY DECISIONS

The establishment of hunting regulations for migratory game birds in the United States during the 1978-79 season will take into consideration available population information, data from harvest surveys, and information on habitat conditions. Consideration will be given to accumulated data and trends. The main sources of data result from operational surveys conducted by the U.S. Fish and Wildlife Service and the Canadian Wildlife Service, with substantial cooperation of State and Provincial wildlife agencies, and others. The information from these sources will be analyzed by the U.S. Fish and Wildlife Service in cooperation with State wildlife agencies with an opportunity for the public to participate and provide comments on management rationales and proposed regulations, either in public hearings, by correspondence, or other communications. Comments from the public will be solicited.

Various surveys are used to ascertain the status, condition, and trends of migratory game bird populations. These include annual surveys of major wintering habitats in the United States and in portions of Mexico each January; aerial surveys of major waterfowl production areas in the contiguous United States, Alaska, and Canada in May and early June for breeding population data, and again in July for production information; nationwide surveys in the United States and Canada of waterfowl hunters and the waterfowl harvest, including its geographical and temporal distribution, its species, age, and sex composition; and band recovery information. Aerial breeding pair and production surveys also provide information on the abundance, persistence, and quality of water and other habitat conditions in major production areas. Information on waterfowl populations and habitat conditions outside the aerial survey area is furnished by cooperating State, Provincial, and private agencies. Banding information provides insight into shooting pressures sustained by migratory game bird populations under different population levels and types of regulations. When viewed over many years, harvests and regulations can be useful for predicting approximate harvest levels which may be achieved with various regulation changes.

Many of the surveys conducted primarily for ducks also provide information on geese. In addition, satellite imagery is used to monitor the rate at which snow and ice disappear from subarctic and arctic breeding grounds traditionally used by most species, and the greatest numbers of North American geese. Field observations in the fall and winter of resting or feeding geese also provide information on the production success of the past breeding season. Special surveys are undertaken for many identifiable populations of geese during the summer, fall, winter or spring.

The annual call-count survey conducted nationwide in the United States in late May and early June provides information on the breeding population index of mourning doves. Information from past years and the current year is used to establish population trends. The woodcock singing-ground survey is conducted throughout the breeding range of the species in the eastern United States and Canada. Insight into production success the past year is provided by wing-collection surveys of woodcock hunters in the United States and Canada; data from these surveys indicate the age and sex composition of the harvest and its geographical and temporal distribution. Accumulated and current data are examined for possible long-term trends in population size and productivity. Information on white-

winged dove populations in Texas and the Southwest is provided by cooperating State agencies. Winter and spring surveys of sandhill cranes are conducted annually on major wintering areas and at the key staging area of the species along the Platte River in central Nebraska.

DEFINITIONS OF FLYWAYS

Flyways are biological-ecological units frequently used for reference in setting hunting regulations on many migratory game birds. These are defined as follows:

Atlantic Flyway: Connecticut, Delaware, Florida, Georgia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, and West Virginia.

Mississippi Flyway: Alabama, Arkansas, Illinois, Indiana, Iowa, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Ohio, Tennessee, and Wisconsin.

Central Flyway: Kansas, Nebraska, North Dakota, Oklahoma, South Dakota, and Texas; Colorado and Wyoming east of the Continental Divide; Montana east of Hill, Chouteau, Cascade, Meagher and Park Counties; and New Mexico east of the Continental Divide but outside the Jicarilla Apache Indian Reservation.

Pacific Flyway: Arizona, California, Idaho, Nevada, Oregon, Utah, and Washington; those portions of Colorado and Wyoming lying west of the Continental Divide; New Mexico west of the Continental Divide plus the Jicarilla Apache Indian Reservation; and in Montana, the counties of Hill, Chouteau, Cascade, Meagher, and Park, and all counties west thereof.

HEARINGS

Two public hearings pertaining to migratory bird hunting regulations being considered for the 1978-79 hunting seasons are scheduled. Both meetings will be conducted in accordance with 455 DM 1 of the Departmental Manual. On June 21 a public hearing for reviewing proposed hunting regulations for species for which early (opening prior to September 30) seasons are set will be held at 9 o'clock in the Auditorium of the General Service Administration Building, F Street, between 18th and 19th Streets NW., Washington, D.C. This hearing is scheduled primarily for the purpose of reviewing the status of mourning doves, woodcock, band-tailed pigeons, white-winged doves, rails, gallinules, and common snipe and discussing proposed hunting regulations for these species plus regulations for sandhill (little brown) cranes in some States, migratory game birds in Alaska, Puerto Rico, and the Virgin Islands, mourning doves in Hawaii, September

teal seasons, and special sea duck seasons in the Atlantic Flyway. On August 2 a public hearing for reviewing the status of other waterfowl and consideration of proposed regulations for those waterfowl and other migratory game birds for which regulations were not previously formulated will be held at 9 o'clock in the Auditorium of the General Services Administration Building, F Street, between 18th and 19th Streets NW., Washington, D.C. These deliberations will pertain to seasons commencing September 30 or later. The public is invited to participate in both hearings.

Persons wishing to participate in these hearings should write the Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240, or telephone 202-343-8827. Those wishing to have statements included in the record should file them in writing with the Director before or immediately after each hearing.

PUBLIC COMMENTS SOLICITED

Based on the results of migratory game bird studies now in progress and having due consideration for any data or views submitted by interested parties, the amendments resulting from these proposals will specify open seasons, shooting hours, and bag and possession limits for doves, pigeons, rails, gallinules, woodcock, common (Wilson's) snipe, coots, cranes, swans and other waterfowl; coots, cranes, common (Wilson's) snipe and waterfowl in Alaska; sea ducks in coastal waters of certain eastern States; migratory game birds in Puerto Rico and the Virgin Islands; and mourning doves in Hawaii.

The Director intends that finally adopted rules be as responsive as possible to all concerned interests. He therefore desires to obtain the comments and suggestions of the public, other concerned governmental agencies, and private interests on these proposals.

Final promulgation of migratory bird hunting regulations for the continental United States, Puerto Rico, the Virgin Islands, and Hawaii for the 1978-79 season will take into consideration all comments received by the Director. Such comments, and any additional information received, may lead the Director to adopt final regulations differing from these proposals. Interested persons may participate in this rulemaking by submitting written comments on "Proposed 1978-79 Migratory Game Bird Hunting Regulations (preliminary)" to the Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240. Comments received will be available for public inspection during normal business hours at the Service's office in Room 2243,

Department of the Interior, C Street between 18th and 19th Streets NW., Washington, D.C.

All relevant comments received no later than May 16, 1978, will be considered. The Service will attempt to acknowledge received comments, but substantive response to individual comments may not be provided.

NEPA CONSIDERATION

The "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES 75-54)" was filed with the Council on Environmental Quality on June 6, 1975, and notice of availability was published in the FEDERAL REGISTER on June 13, 1975 (40 FR 25241). In addition, several environmental assessments have been prepared on specific matters which serve to supplement the material in the Final Environmental Statement.

ENDANGERED SPECIES ACT CONSIDERATION

Prior to finalization of the 1978-79 migratory game bird hunting regulations, consideration will be given to provisions of the Endangered Species Act of 1973 (16 U.S.C. 1531-1543; hereinafter the act) to insure that hunting does not jeopardize the continued existing of any species designated as endangered or threatened or modify or destroy its critical habitat and is consistent with the conservation programs for those species. Consultation under section 7 of this act may cause changes to be made to proposals in this and future supplemental proposed rulemaking documents.

This proposed rulemaking was authored by Henry M. Reeves, Office of Migratory Bird Management, under the direction of John P. Rogers, Chief. It is therefore proposed to amend 50 CFR Part 20 as follows.

PROPOSED 1978-79 MIGRATORY GAME BIRD HUNTING REGULATIONS (PRELIMINARY)

The following general frameworks and guidelines for hunting certain waterfowl, swans, cranes, mourning doves, white-winged doves, Zenaida doves, scaly-naped pigeons, band-tailed pigeons, gallinules, rails, coots, common (Wilson's) snipe and woodcock are proposed during the 1978-79 season. Changes or possible changes, when noted, are in comparison to 1977-78 final frameworks or regulations. In this respect, date changes of one or two days, because of the 1978-79 calendars causing dates to fall on different days of the week, are regarded as "no change."

1. **Shooting hours.** (No change.) Basic shooting hours beginning one-half hour before sunrise and ending at sunset are proposed with the option

that more restrictive shooting hours within this framework may be selected by the States or may be established for special seasons.

Shooting hours was the subject of extensive review and discussion during the regulatory process for the 1977-78 hunting seasons. The Service undertook an exhaustive study of information and data in its files and prepared an environmental assessment on shooting hours which was made available to the public in August 1977. The Director concluded, after study of this assessment, that the proposed shooting hours did not constitute a major impact upon the environment, and signed a negative declaration to that effect. Copies of the assessment are still available and can be supplied upon request to the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

The Service adopts and incorporates by reference for purposes of this rulemaking the rationale for the proposed shooting hours set forth in last year's proposed and final regulations for migratory bird hunting. However, because of the interest in the shooting hours issues, the Service plans to continue gathering and analyzing additional data.

2. **Framework dates for ducks and geese in the continental United States.** (No change.) To be generally the same as during the 1977-78 season. From October 1, 1978, to January 20, 1979, for the Atlantic and Mississippi Flyways, and from September 30, 1978, through January 21, 1979, for the Central and Pacific Flyways, with the following exceptions:

(a) Sea ducks: in designated sea duck hunting areas in the Atlantic Flyway—September 17, 1978, through January 20, 1979.

(b) September teal season framework: September 1 through September 30, 1978, in specified areas to be identified in consultation with the States.

(c) Special scaup season framework: October 1, 1978, through January 31, 1979, in specified areas to be identified in consultation with the States.

(d) Pacific Flyway brant season framework: October 22, 1978, through February 22, 1979.

(e) Alaska waterfowl: September 1, 1978, through January 26, 1979.

3. **Black ducks.** (No change.) An environmental assessment on proposed hunting regulations on black ducks was issued by the Service in August 1976. Subsequently, a three-year cooperative research and management program was developed between the Service and States of the Atlantic and Mississippi Flyways. This was reported in the FEDERAL REGISTER dated March 10, 1977; 42 FR 13315, and for informational purposes is repeated as follows:

A research and management program for this species is presently being developed by

the Service in cooperation with States in the Atlantic and Mississippi Flyways. The first phase of this program calls for a three-year intensified winter banding program in these Flyways. The winter banding program is under way now. During this period, restrictive black duck bag limits similar to those in effect in 1976 are to be retained. The winter banding program will be supplemented by pre-season banding of black ducks. In line with this effort, the Atlantic Flyway Council's Eastern Canada Cooperative Banding Program was renewed in 1976 for a 5-year period. Information from these banding programs, and from other sources, will be used to establish values for certain black duck population parameters. Future management programs will be evaluated by measuring the effect of such programs on black duck population parameters developed from the 1977-79 banding programs.

This winter marks the second of a three-year banding program. The Service proposes no changes in black duck hunting regulations in 1978-79 so that a reliable baseline of information can be established by which to measure the effects of regulatory change which may be made in the future.

4. *Wood ducks.* (No change.) Last year's regulations for this species were changed to permit southeastern States the option of an early October hunting season during which no special bag and possession limits applied under conventional regulations; under point system regulations, the species was placed in the mid-point category. The criteria for such seasons were described in the FEDERAL REGISTER dated May 25, 1977 (42 FR 26669), and are repeated for informational purposes:

The FEDERAL REGISTER dated March 10, 1977, noted that the increased population of this species and an analysis of population and banding data suggests that the wood duck population in the southeastern United States could sustain additional harvests, provided that such liberalizations did not increase the harvest of wood ducks from breeding populations in the north. For purposes of this discussion the southeastern United States is defined as Virginia, Kentucky, Tennessee, Arkansas, and Louisiana and all States east thereof in the Atlantic and Mississippi Flyways. Various means of providing for additional harvest opportunities on southeastern wood ducks on a trial basis and evaluating its effects were considered and discussed this spring. Accordingly, the Service proposes to consider regulations aimed at additional wood duck harvest in the southeastern States only within the following guidelines:

(a) In 1977 States in the southeastern United States may split their regular duck hunting season in such a way that a hunting season not to exceed 9 consecutive days occurs between October 1 and October 15.

(b) During this period under conventional regulations, no special restrictions within the regular daily bag and possession limits established for the Flyway in 1977 shall apply to wood ducks, and under the point system, the point value for wood ducks, shall be reduced from the high to the mid-point category. For other species of ducks daily bag and possession limits shall be the same as established for the Flyway under conventional or point system regulations.

(c) In addition, the extra blue-winged teal option available to States in the Atlantic and Mississippi Flyways that select conventional regulations and do not have a September teal season may be applied during the period.

(d) This exception to the daily bag and possession limits for wood ducks shall not apply to that portion of the duck hunting season that occurs after October 15.

(e) This special provision for wood ducks shall be regarded as experimental, and subject to annual and final evaluations by participating States of population, harvest, banding, and other available information.

(f) The experiment shall be conducted for a specified time period to be agreed upon between the Service and participating States.

The Service proposes to retain this option for the 1978 season.

5. *Sea ducks.* (No change.) A maximum open season of 107 days for taking scoter, eider, and oldsquaw ducks is prescribed during the period between September 17, 1978, and January 20, 1979, in all coastal waters and all waters of rivers and streams seaward from the first upstream bridge in the States of Maine, New Hampshire, Massachusetts, Rhode Island, and Connecticut; in those coastal waters of the State of New York lying in Long Island and Block Island Sounds and associated bays eastward from a line running between Miamogue Point in the town of Riverhead to Red Cedar Point in the town of Southampton, including any ocean waters of New York lying south of Long Island; in any waters of the Atlantic Ocean and in any tidal waters of any bay which are separated by at least 1 mile of open water from any shore, island, and emergent vegetation in the States of New Jersey, South Carolina, and Georgia; and in any waters of the Atlantic Ocean and in any tidal waters of any bay which are separated by at least 800 yards of open waters from any shore, island, and emergent vegetation in the States of Delaware, Maryland, North Carolina, and Virginia: *Provided*, That any such areas have been described, delineated, and designated as special sea duck hunting areas under the hunting regulations adopted by the respective States. In all other areas of these States and in all other States in the Atlantic Flyway, sea ducks may be taken only during the regular open season for ducks.

The daily bag limit is 7 and the possession limit is 14, singly or in the aggregate of these species. During the regular duck season in the Atlantic Flyway, States may set, in addition to the regular limits, a daily bag limit of 7 and a possession limit of 14 scoter, eider, and oldsquaw ducks, singly or in the aggregate of these species.

Shooting hours are ½ hour before sunrise until sunset daily.

Any State desiring its sea duck season to open in September must

make its selection no later than July 26, 1978. Those States desiring their sea duck season to open after September may make their selection at the time they select their waterfowl seasons.

6. *September teal season.* (No change.) An open season on all species of teal may be selected by the States of Alabama, Arkansas, Colorado (Central Flyway portion), Illinois, Indiana, Kansas, Kentucky, Louisiana, Mississippi, Missouri, New Mexico (Central Flyway portion), Ohio, Oklahoma, Tennessee, and Texas in areas delineated by State regulations.

Shooting hours are from sunrise to sunset daily. The season may not exceed 9 consecutive days with a bag limit of 4 teal daily and 8 in possession. States must advise the Service of season dates and special provisions to protect non-target species by July 26, 1978.

The Service has received a request from the Iowa Conservation Commission to consider various alternatives which would permit the taking of teal and, in some cases, other species in that State in September. The proposal is still under review and no final action has yet been taken.

7. *Extra blue-winged teal option.* (No change.) States in the Atlantic, Mississippi, and Central Flyways selecting neither a September teal season nor the point system may select an extra daily bag of 2 and possession limit of 4 blue-winged teal for 9 consecutive days designated during the regular duck season. These extra limits are in addition to the regular duck bag and possession limits.

8. *Special scaup season.* (No change.) States in the Atlantic, Mississippi and Central Flyways may select a special scaup-only hunting season not to exceed 16 consecutive days, with a daily bag limit of 5 and possession limit of 10 scaup subject to the following conditions:

1. The season must fall between October 1, 1978, and January 31, 1979.

2. The season must fall outside the open season for any other ducks except sea ducks.

3. The season must be limited to areas mutually agreed upon between the State and the Service prior to September 1, 1978, and

4. These areas must be described and delineated in State hunting regulations.

5. In lieu of a special scaup only season, Vermont may, for the Lake Champlain Area, select a special scaup and goldeneye season not to exceed 16 consecutive days, with a daily bag limit of 3 scaup or 3 goldeneyes or 3 in the aggregate, and a possession limit of 6 scaup or 6 goldeneyes or 6 in the aggregate, subject to the same provisions that apply to special scaup seasons elsewhere.

9. *Extra scaup option.* (No change.) As an alternative to a special scaup season, States in the Atlantic, Mississippi, and Central Flyways, except those selecting the point system, may select an extra daily bag of 2 and possession limit of 4 scaup during the regular duck hunting season, subject to conditions 3 and 4 listed for special scaup seasons. These extra limits are in addition to the regular duck limits and apply during the entire regular duck season.

10. *Mergansers.* (No change.) States in the Atlantic, Mississippi, and Pacific Flyways may select separate bag limits for mergansers in addition to the regular duck bag limits during the regular duck season. The bag limit is 5 daily and 10 in possession. Elsewhere, mergansers are included within the regular daily bag and possession limits for ducks. The nationwide restriction on hooded mergansers of 1 daily and 2 in possession is continued.

11. *Canvasback and redhead ducks.* (No change.) No changes in hunting regulations for these two species are proposed at this time. The management rationales for canvasbacks and redheads were described in an environmental assessment issued in August 1976. Possible changes in hunting regulations are contingent upon results of the current year's waterfowl surveys.

12. *Zoning.* (No change.) Last year, five States in the Mississippi Flyway and one State in the Atlantic Flyway were permitted to establish two zones each where differential hunting seasons having fully allotted hunting days would apply. The criteria for zoning were described in the FEDERAL REGISTER dated May 25, 1977; 42 FR 26671, and for informational purposes are repeated as follows:

The Service will consider the establishment of the proposed zones based on an evaluation of each of the State proposals according to the following criteria:

1. The establishment of any of these zones shall be considered experimental until the effects of the zoning are more clearly defined and understood.

2. The primary purpose of the zoning shall be to provide more equitable distribution of harvest opportunity for hunters throughout a State.

3. Proposed zones and season dates shall not substantially change the pattern of harvest distribution among the States within a flyway.

4. Zoning shall not detrimentally change the harvest distribution pattern among species or populations at either the State or flyway level.

5. Each zoning proposal shall include a detailed evaluation plan describing how changes in harvest will be measured, and what steps will be taken to compensate for any significant changes that might occur.

6. Each zoning proposal shall include an evaluation of anticipated changes due to zoning. If on the basis of this evaluation the Service and the State agree that no significant increase in harvest is likely, the zoning experiment may be conducted without a re-

duction in season length for each zone, pending further evaluation. If the evaluation indicates that a significant increase in harvest is likely, an appropriate reduction in season length compared to what would be permitted without zoning shall be made for each zone.

7. Where two or more adjoining States in a flyway may be involved simultaneously in zoning experiments, consideration shall be given to the possibility of consolidating zones.

Memoranda of Agreement were signed between the Service and each State participating in zoning on an experimental basis. The Service will consider zoning proposals by other States in the Mississippi and Atlantic Flyways on the same basis as last year.

13. *Goose and brant seasons.* (Possible changes.) The Canadian Wildlife Service, State conservation agencies, and the four waterfowl flyway councils traditionally provide population and harvest information useful in setting annual regulations for geese and brant. The midwinter survey, the past season's waterfowl harvest surveys, and satellite imagery for May and June of 1978 will provide additional information later. Consequently, the following proposed general regulations are subject to revision as additional information becomes available.

Atlantic Flyway. Seasons and bag limits are to be generally the same as last year pending receipt of additional information and recommendations from the Flyway Council. The following regulations are proposed:

Between October 1, 1978, and January 20, 1979, Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, West Virginia, New Jersey, Maryland, and Virginia (excluding those portions of the cities of Virginia Beach and Chesapeake lying east of Interstate 64 and U.S. Highway 17) may select 70-day seasons on Canada geese; the daily bag and possession limits will be 3 and 6 geese, respectively. However, in the area comprised of Delaware, the Delmarva Peninsula portions of Maryland and Virginia, and that portion of Pennsylvania lying east and south of a boundary beginning at Interstate Highway 83 at the Maryland border and extending north to Harrisburg, then east on U.S. Highway 22 to the New Jersey border, the Canada goose season length will be 90 days with the closing framework date extended to January 31, 1979. The daily bag limit within this area will be 4 birds with a possession limit of 8 birds. North Carolina, South Carolina, and those portions of the cities of Virginia Beach and Chesapeake lying east of Interstate 64 and U.S. Highway 17 in Virginia may select 50-day seasons on Canada geese within the October 1, 1978, to January 20, 1979, framework; the daily bag and possession limits are 1 and 2 Canada geese, respectively.

The season will be closed on Canada geese in Florida and Georgia.

Between October 1, 1978, and January 20, 1979, concurrent with either the regular waterfowl season or the Canada goose season, States in the Atlantic Flyway may select 60-day seasons on snow geese (including blue geese); the daily bag and possession limits will be 2 and 4 geese, respectively. For snow geese (including blue geese) the Director, U.S. Fish and Wildlife Service, shall close the season within 48 hours should such closure be necessary to avoid excessive harvest.

Because of a reduced population no open season on Atlantic brant is proposed. A closed season will continue until the population has recovered from losses sustained during the winter of 1976-77 to starvation and freezing. Reopening the Atlantic brant hunting season in the future will be determined based on three data sources: (1) Population inventories in February or March after ice disappearance along the Atlantic coast, and in the fall on migration and wintering areas; (2) an evaluation of conditions on the breeding grounds as determined by satellite imagery; (3) an evaluation of breeding ground production.

Environmental assessments made available to the public in 1975 articulate the management rationale being followed for Atlantic brant and greater snow geese.

Mississippi Flyway. Seasons and bag limits to be generally the same as last year for Canada geese. That is, not to exceed 70 days and bag limits not to exceed 2 daily and 4 in possession pending additional information and Flyway Council recommendations. Seasons and bag limits for specific populations of Canada geese and for snow geese (including blue geese) and white-fronted geese are to be determined later when more information is available.

Harvests of the Eastern Prairie and Mississippi Valley Canada goose populations in this flyway are controlled by quota allocations. The size of both populations is well above stated objectives. Specific quotas will be established after population management objectives, recent population information, probable production, and expected fall flights have been taken into consideration. It is intended that the entire quota can be safely taken without detriment to the population and that such harvests are justifiable under the appropriate population objectives. States sometimes select season lengths in quota zones somewhat shorter than those allowed elsewhere in the same State or elsewhere in the flyway. This occasionally results in the season terminating before the allowed quota has been achieved. In 1977, the low harvest rate prompted the Service to extend the season in the

PROPOSED RULES

Swan Lake Quota Zone of Missouri to the full length permitted elsewhere in the flyway. The Service emphasizes that it is desirable that quotas be harvested and that such season extensions, up to the season length allowed in the flyway frameworks, are in line with goose management objectives. Goose seasons in quota areas end when the quota has been achieved and the season terminated by emergency order under provision of section 20.26 of this Title 50 or when the permissible number of hunting days has expired.

Central Flyway. Seasons and bag limits on Canada and white-fronted geese to be generally the same as last year. That is, not to exceed 72 days with a daily bag and possession limit of 2 Canada and white-fronted geese singly or in the aggregate in North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, and Texas east of U.S. Highway 81, and not to exceed 93 days with bag limits of 2 daily and 4 in possession for Canada and white-fronted geese singly or in the aggregate in the remainder of the Flyway. In all States in the Flyway, the bag and possession limits may not include more than 1 Ross' goose. Seasons and bag limits for specific populations of Canada geese, and for snow geese (including blue geese) are deferred pending additional information and Flyway Council recommendations.

Pacific Flyway. (Possible change.) Seasons and bag limits to be generally the same as last year. That is, not to exceed 93 days with bag limits not to exceed 6 daily and in possession, including no more than 3 dark geese daily nor more than 3 white geese daily, including not more than 1 Ross' goose daily and in possession. Seasons and bag limits for most specific populations of geese are deferred pending additional information and Flyway Council recommendations.

Possible regulatory changes in the Pacific Flyway include modifications of areas and times of hunting of Canada geese in order to provide necessary protection to the endangered Aleutian Canada goose. No action will be taken pending assembly and study of population and other data, and completion of consultations under section 7 of the Endangered Species Act. Concern has been expressed about the status of white-fronted geese in the Sacramento Valley of California, and this situation will be studied in more detail before any regulatory changes are proposed. No changes are contemplated in black brant hunting regulations pending completion of the management plan for the species, and receipt of recommendations from the Pacific Flyway Council. U.S.S.R. wildlife officials have expressed continuing concern about the status of lesser snow geese which breed on Wrangel

Island, U.S.S.R., and which winter in the Skagit River Delta of Washington and the Central Valley of California. The United States has been requested to assist in a program to increase the population. The Service will review this matter, in consultation with the States, in the course of developing specific regulatory proposals for 1978.

14. *Whistling swans.* (No change.) In Utah, Nevada, and Montana, an open season for taking a limited number of whistling swans may be selected subject to the following conditions: (a) The season must run concurrently with the duck season; (b) in Utah, no more than 2,500 permits may be issued, authorizing each permittee to take 1 whistling swan; (c) in Nevada, no more than 500 permits may be issued, authorizing each permittee to take 1 whistling swan in Churchill County; (d) in Montana, no more than 500 permits may be issued, authorizing each permittee to take 1 whistling swan in Teton County; (e) permit forms, and correspondingly numbered metal locking seals furnished by the Service, must be issued by the appropriate State conservation agency on an equitable basis without charge.

15. *Migratory game bird seasons in Alaska.* (No change.) In 1977, by mutual agreement, the Service and the Alaska Department of Fish and Game, initiated a study of stabilized hunting regulations for the 5-year period, 1977 through 1981. Background information on this experiment was given in the FEDERAL REGISTER dated March 10, 1977; 42 FR 13317. Regulations proposed to be in effect during the 1978-79 season are as follows:

Between September 1, 1978, and January 26, 1979, Alaska may select seasons on waterfowl, coots, snipe, and cranes, subject to the following limitations:

1. *Shooting hours:* One-half hour before sunrise to sunset daily.

2. *Season lengths:* A. In the Pribilof and Aleutian Islands, except Unimak Island, an open season of 107 consecutive days for ducks, geese, brant, and coots. In the Kodiak (State game management unit 8) area, an open season of 107 days for ducks, geese, brant, and coots and the season may be split without penalty.

B. Exception: the season is closed on Canada geese from Unimak Pass westward in the Aleutian Island chain.

C. In the remainder of Alaska, including Unimak Island, an open season of 107 consecutive days for ducks, geese, brant, and coots.

D. An open season for snipe concurrent with the duck season.

E. An open season for lesser sandhill (little brown) cranes concurrent with the duck season.

3. *Bag and possession limits:* A. Ducks—Except as noted, a basic daily

bag limit of 7 and a possession limit of 21 ducks. Daily bag and possession limits in the North Zone are 10 and 30, and in the Gulf Coast Zone they are 8 and 24, respectively. In addition to the basic limit, there is a daily bag limit of 15 and a possession limit of 30 scoter, eider, oldsquaw, harlequin, and American and red-breasted mergansers, singly or in the aggregate of these species.

B. *Geese*—A basic daily bag limit of 6 and a possession limit of 12, of which not more than 4 daily and 8 in possession may be white-fronted or Canada geese, singly or in the aggregate of these species. In addition to the basic limit, there is a daily bag limit of 6 and a possession limit of 12 Emperor geese.

C. *Brant*—A daily bag limit of 4 and a possession limit of 8.

D. *Coots*—A daily bag and possession limit of 15.

E. *Snipe*—A daily bag limit of 8 and a possession limit of 16.

F. *Lesser sandhill (little brown) cranes*—A daily bag limit of 2 and a possession limit of 4.

16. *Migratory game bird seasons for falcons.* (Possible change.) Last year, for the first time, the Service permitted States to select extended falconry seasons outside the dates of regular hunting seasons. Eight States selected extended seasons. In other States allowing hunting with raptors, falconry could be practiced during the regular hunting season as it is a permissible means for taking migratory game birds.

Considerable confusion arose from last year's extended seasons, especially regarding the daily bag and possession limits which varied depending upon whether the regular hunting season was open or closed.

The Service does not propose specific falconry hunting regulations at this time but intends to do so in a supplemental proposed rulemaking. This delay is prompted by need to receive and review information arising from last year's extended falconry regulations, and the desire to develop simplified regulations relating to extended falconry seasons.

17. *Lesser sandhill (little brown) cranes.* (No change.) Pending evaluation of harvest data from the 1977 season, to be available later, seasons for hunting lesser sandhill cranes may be selected within specified areas in Colorado, New Mexico/Texas, Texas/Oklahoma, North Dakota, South Dakota, Montana, and Wyoming with no substantial change in dates from the 1977-78 seasons and with a daily bag limit of 3 and a possession limit of 6 lesser sandhill cranes. The provisions for the Federal lesser sandhill crane hunting permit is continued.

18. *Coot bag limit.* (No change.) Within the regular duck season, States

in the Atlantic, Mississippi and Central Flyways may permit a daily bag limit of 15 and a possession limit of 30 coots, and States in the Pacific Flyway may permit 25 coots daily and in possession, singly or in the aggregate with gallinules.

19. *Gallinules.* (No change.) States in the Atlantic, Mississippi and Central Flyways may select hunting seasons between September 1, 1978, and January 20, 1979, of not more than 70 days. States in the Pacific Flyway must select their hunting seasons within the waterfowl seasons. States may split their seasons without penalty. Shooting hours may be selected between ½ hour before sunrise and sunset. The daily bag and possession limits may not exceed 15 and 30, respectively, except in the Pacific Flyway where the daily bag and possession limits may not exceed 25 coots and gallinules, singly or in the aggregate of the two species.

States may select their gallinule seasons at the time they select their waterfowl seasons. If their selection is deferred, daily bag and possession limits will remain the same, but shooting hours may not exceed those for waterfowl, and the season length may not exceed that for waterfowl, or 70 days, whichever is the shorter period. Exception: A gallinule season selected by any State in the Pacific Flyway may not exceed its waterfowl season, and the daily bag and possession limits may not exceed 25 coots and gallinules, singly or in the aggregate of the two species.

20. *Rails.* (No change.) The States included herein may select seasons between September 1, 1978, and January 20, 1979, on clapper, king, sora, and Virginia rails as follows:

The season lengths for all species of rails may not exceed 70 days.

Shooting hours in all States for all species may be selected between ½ hour before sunrise and sunset.

CLAPPER AND KING RAILS

1. In Rhode Island, Connecticut, New Jersey, Delaware, and Maryland, the daily bag and possession limits may not exceed 10 and 20 clapper and king rails, respectively, singly or in the aggregate of these two species.

2. In Texas, Louisiana, Mississippi, Alabama, Georgia, Florida, South Carolina, North Carolina, and Virginia, the daily bag and possession limits may not exceed 15 and 30 clapper and king rails, respectively, singly or in the aggregate of the two species.

3. The season will remain closed on clapper and king rails in all other States.

SORA AND VIRGINIA RAILS

In addition to the prescribed limits for king and clapper rails, daily bag and possession limits not exceeding 25,

PROPOSED RULES

singly or in the aggregate of sora and Virginia rails, may be selected in States in the Atlantic, Mississippi, and Central Flyways.

21. *Common (Wilson's) snipe.* (No change.) States in the Atlantic, Mississippi, and Central Flyways may select hunting seasons between September 1, 1978, and February 28, 1979, not to exceed 107 days, except that in the States of Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Delaware, Maryland, and Virginia the season must end no later than January 31. Seasons not to exceed 93 days may be selected in the Pacific Flyway portions of Montana, Wyoming, Colorado and New Mexico between September 1, 1978, and February 28, 1979.

All States in the Pacific Flyway, except those portions of Colorado, Montana, New Mexico, and Wyoming in the Pacific Flyway, must select their snipe seasons to run concurrently with their regular duck seasons. In these Pacific Flyways States, except portions of the four States noted previously, it will be unlawful to take snipe when it is unlawful to take ducks.

Shooting hours may be selected between ½ hour before sunrise and sunset. Daily bag and possession limits may not exceed 8 and 16, respectively. Any State may split its snipe season without penalty.

States or portions thereof in the three easterly Flyways may defer selection of their snipe season until the time they choose their waterfowl seasons in August. In that event, the daily bag and possession limits will remain the same but shooting hours must conform with those for waterfowl.

22. *Woodcock.* (No change.) States in the Atlantic, Mississippi, and Central Flyways may select hunting seasons between September 1, 1978, and February 28, 1979, of not more than 65 days, with daily bag and possession limits of 5 and 10, respectively. *Provided*, That in the States of Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Delaware, Maryland, and Virginia the season must end by January 31. Shooting hours may be selected between ½ hour before sunrise and sunset. Any State may split its woodcock season without penalty, and New Jersey may establish hunting seasons by two zones, as agreed upon in the experiment initiated last year.

23. *Band-tailed pigeons.* (No change.)

West Coast States: California, Oregon, and Washington.

These States may select hunting seasons not to exceed 30 consecutive days between September 1, 1978, and January 15, 1979. The shooting hours may be selected between ½ hour before sun-

rise and sunset. The daily bag and possession limits may not exceed 8 band-tailed pigeons.

California may select hunting seasons of 30 consecutive days for each of the following two zones:

1. In the counties of Butte, Del Norte, Glenn, Humboldt, Lassen, Mendocino, Modoc, Plumas, Shasta, Sierra, Siskiyou, Tehama, and Trinity; and

2. The remainder of the State.

Four-Corners States: Arizona, Colorado, New Mexico, and Utah.

These States may select hunting seasons not to exceed 30 consecutive days between September 1 and November 30, 1978. The shooting hours may be selected between ½ hour before sunrise and sunset. The daily bag and possession limits may not exceed 5 and 10, respectively. These seasons shall be open only in the areas delineated by the respective States in their hunting regulations. *Provided*, That each hunter must have been issued and carry on his person while hunting band-tailed pigeons a valid band-tailed pigeon hunting permit issued by the respective State wildlife agency, and such permit will be valid in that State only.

New Mexico may divide its State into two zones, along a line following U.S. Highway 60 from the Arizona State line east to Interstate Highway 25 at Socorro and along Interstate Highway 25 from Socorro to the Texas State line. Between September 1, 1978, and November 30, 1978, in the North Zone, and October 1, 1978, and November 30, 1978, in the South Zone, New Mexico may select hunting seasons not to exceed 20 consecutive days in each zone.

24. *Mourning doves.* (No change.) Concern was expressed last year by some organizations and individuals about the hunting of mourning doves in September. Accordingly, the Service reviewed and analyzed available information and data on the subject and issued an environmental assessment in July 1977. It was concluded that hunting in September was not detrimental to overall mourning dove populations and that by not permitting September hunting, the opportunities for dove hunting would be curtailed in many areas. A cooperative Federal-State research program to obtain further information on this matter is presently under development for implementation this summer. The results of this investigation will be used in future evaluations of September hunting of mourning doves.

The Service proposes the following regulations for this year.

Between September 1, 1978, and January 15, 1979, except as noted, States may select hunting seasons and bag limits as follows:

Eastern Management Unit: All States east of the Mississippi River, and Louisiana.

PROPOSED RULES

1. Shooting hours between 12 o'clock noon and sunset daily;

2. Daily bag and possession limits not to exceed 12 and 24, respectively, in all States;

3. Hunting seasons of not more than 70 half-days which may run consecutively or be split into not more than three periods.

4. As an option to the above, Alabama, Georgia, Louisiana, and Mississippi may elect to zone their States as follows:

A. Two zones per State having the following descriptions or division lines:

Alabama.—the South Zone consists of the area south of U.S. Highway 84 running east to the Covington County line, and including Coffee, Covington, Dale, Geneva, Henry, and Houston Counties. The North Zone consists of the remainder of Alabama.

Georgia.—U.S. Highway 280 east to Abbeville, thence along Ocmulgee and Altamaha Rivers to the Atlantic Ocean.

Louisiana.—Interstate Highway 10 from the Texas State line to Baton Rouge, Interstate Highway 12 from Baton Rouge to Slidell, and Interstate Highway 10 from Slidell to the Mississippi State Line.

Mississippi.—State Highway 12 from the Arkansas State line to Kosciusko, and State Highway 14 from Kosciusko to the Alabama State line.

B. Within each zone, these States may select a hunting season of not more than 70 half-days which may run consecutively or be split into not more than three periods.

C. The hunting seasons in the southern zones of these States may commence no earlier than September 20, 1978.

Central Management Unit: Arkansas, Colorado, Iowa, Kansas, Minnesota, Missouri, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, and Wyoming.

1. Shooting hours between ½ hour before sunrise and sunset daily in all States.

2. Daily bag and possession limits not to exceed 10 and 20, respectively, in all States;

3. Hunting seasons in all States of not more than 60 full days which may run consecutively or be split into not more than three periods.

4. Texas may select hunting seasons for each of two previously established zones subject to the following conditions:

A. The hunting season may be split into not more than two periods.

B. The North Zone may have a season of not more than 60 days between September 1, 1978, and January 22, 1979.

C. The South Zone may have a season of not more than 60 days between September 20, 1978, and January 22, 1979. In that portion of Texas

where white-winged dove hunting is allowed, the mourning dove season may be held concurrently with the white-winged dove season and with shooting hours coinciding with those for white-winged doves. However, the remainder of the season (60 days less the number of days of the white-winged dove season) must be within the September 20, 1978-January 22, 1979, period.

5. In New Mexico, daily bag and possession limits of mourning and white-winged doves may not exceed 10 and 20, singly or in the aggregate of the two species.

Western Management Unit: Arizona, California, Idaho, Nevada, Oregon, Utah, and Washington.

1. Shooting hours between ½ hour before sunrise and sunset daily;

2. Daily bag and possession limits not to exceed 10 and 20 respectively;

3. Hunting seasons of not more than 50 full days which may run consecutively or be split into not more than three periods.

In the Nevada counties of Clark and Nye, and in the California counties of Imperial, Riverside, and San Bernardino, daily bag and possession limits of mourning and white-winged doves may not exceed 10 and 20, respectively, singly or in the aggregate of the two species.

25. White-winged doves. (No change.) Arizona, California, Nevada, New Mexico, and Texas may select hunting seasons between September 1, 1978, and December 31, 1978, and daily bag limits as stipulated below. Shooting hours between ½ hour before sunrise and sunset may be selected.

Arizona may select a hunting season for the entire State of not more than 25 consecutive days, to run concurrently with the first period of the split mourning dove season. The daily bag and possession limits may not exceed 10 white-winged doves.

California may select a hunting season for the counties of Imperial, Riverside, and San Bernardino only. The daily bag and possession limits may not exceed 10 and 20 white-winged and mourning doves, respectively, singly or in the aggregate of the two species. Dates, limits, and hours are to conform with those for mourning doves.

Nevada may select a hunting season for the counties of Clark, and Nye only. The daily bag and possession limits may not exceed 10 and 20 white-winged and mourning doves, respectively, singly or in the aggregate of the two species. Dates, limits and hours are to conform with those for mourning doves.

New Mexico may select a hunting season with daily bag and possession limits not to exceed 10 and 20 white-winged and mourning doves, respectively, singly or in the aggregate of the

two species. Dates, limits, and hours are to conform with those for mourning doves.

Texas may select a hunting season, the length of which will be determined when information from State surveys is available, for that portion of the State where the species occurs. The daily bag and possession limits may not exceed 10 and 20 white-winged doves, respectively. The season may be split within the overall time frame.

26. Hawaii mourning doves. (No change.) The mourning dove is the only migratory game bird occurring in Hawaii in numbers to permit hunting. Mourning doves may be taken in Hawaii in accordance with regulations set by the State of Hawaii as has been done in the past and subject to the applicable provisions of part 20 or Title 50 Code of Federal Regulations. Such a season must be within the constraints of applicable migratory bird treaties and annual regulatory frameworks. These constraints provide that the season must be within the period of September 1, 1978, and January 15, 1979, the length may not exceed 60 full days; the daily bag and possession limits may not exceed 10 and 20 doves, respectively. Shooting hours between ½ hour before sunrise and sunset may be selected. Other applicable federal regulations relating to migratory game birds shall also apply.

27. Migratory game birds in Puerto Rico and doves and pigeons in the Virgin Islands. (No change.)

PROPOSED FRAMEWORKS FOR SELECTING OPEN SEASON DATES FOR HUNTING MIGRATORY BIRDS IN PUERTO RICO, 1978-79.

Doves and pigeons. A season of 60 days between September 1, 1978, and January 15, 1979, may be selected for hunting. Zenaida, mourning and white-winged doves, and scaly-naped pigeons in Puerto Rico.

Shooting hours may extend from one-half hour before sunrise until sunset daily.

The daily bag and possession limit for doves of the species named herein is 10 singly or in the aggregate.

The daily bag and possession limit for scaly-naped pigeons is 5.

No open season is prescribed for pigeons on Puerto Rico and Mona Islands in order to give the reduced population of white-crowned pigeon (*Columba leucocephala*) a chance to recover.

No open season is prescribed for doves and pigeons on Culebra Island.

SPECIAL CLOSURE FOR PROTECTION OF THE PUERTO RICAN PARROT

No season is prescribed for doves and pigeons in those areas of the municipalities of Rio Grande and Loiza delineated as follows: (1) All lands lying east of Route 186 (from the town of El

PROPOSED RULES

Verde in the north to the southernmost extent of Route 186) to the boundary of the Luquillo Experimental Forest; (2) all lands between Route 186 and Route 956 extending from an east-west line through the town of El Verde, south; (3) all lands lying west of Route 186 for one kilometer from the juncture of Routes 186 and 956 south to the southernmost point on Route 186; and (4) all lands within the Caribbean National Forest boundary, whether private or public lands. The purpose of these closures is to afford protection to the Puerto Rican parrot (*Amazona vittata*), presently listed as an endangered species under the Endangered Species Act of 1973.

SPECIAL CLOSURE FOR PROTECTION OF THE PLAIN PIGEON

The hunting of doves and pigeons of any species is prohibited in the Municipality of Cidra, Puerto Rico, said Municipality being composed of the following Wards: Bayamon, Arenas, Monte Llano, Sud, Beatriz, Ceiba, Rio Abajo, Rincon, Toita, Honduras, Rabanal, and Salto. The purpose of this closure is to protect the Puerto Rican plain pigeon (*Columba inornata*), locally known as Paloma Sabanero, which is known to be present in the Cidra area in small numbers and which is listed presently as an endangered species under the Endangered Species Act of 1973.

Ducks, Coots, Gallinules, and Snipe. A season of 55 consecutive days between December 1, 1978, and January 31, 1979, may be selected for hunting ducks, coots, common gallinules and common (Wilson's) snipe.

Shooting hours may extend from one-half hour before sunrise until sunset daily.

The limits for ducks are 4 daily and 8 in possession except that the season is closed on ruddy ducks (*Oxyura jamaicensis*) and the Bahama pintail (*Anas bahamensis*), which are protected by the Commonwealth of Puerto Rico.

The limits for coots are 6 daily and 12 in possession.

The limits for common gallinules are 6 daily and 12 in possession. The season is closed on purple gallinules (*Porphyrio martinica*).

The limits for common (Wilson's) snipe are 6 daily and 12 in possession.

No open season for ducks, coots, gallinules, and snipe is prescribed on Culebra Island.

PROPOSED FRAMEWORK FOR SELECTING OPEN SEASON DATES FOR HUNTING MIGRATORY BIRDS IN THE VIRGIN ISLANDS, 1978-79.

Doves and pigeons. A season of 60 days between September 1, 1978, and January 15, 1979, may be selected for hunting Zenaida doves throughout the

Virgin Islands and scaly-naped pigeons on the Island of St. Thomas only.

Shooting hours may extend from one-half hour before sunrise until sunset daily.

The daily bag and possession limits are 10 Zenaida doves and 5 scaly-naped pigeons.

No open season is prescribed for waterfowl, ground or quail doves, or other pigeons in the Virgin Islands.

LOCAL NAMES FOR CERTAIN BIRDS

Zenaida dove (*Zenaida aurita*)—mountain dove.

Bridled quail dove (*Geotrygon mystacea*)—Barbary dove, partridge (protected).

Ground dove (*Columbina passerina*)—stone dove, tobacco dove, rola, tortolita (protected).

Scaly-naped pigeon (*Columba squamosa*)—red-necked pigeon, scaly pigeon.

NOTE.—The Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: February 7, 1978.

Food and Nutrition Service AIKEN v. USDA COURT ORDER Retroactive Relief

In compliance with a recent court order issued in *Aiken v. USDA*, a telegram was sent to all State agencies prescribing the procedures for granting retroactive relief. The telegram directs State agencies to provide retroactive benefits to those households whose applications were denied, delayed, or never made after August 5, 1974 because a collateral contact for

certifications pending verification was required or because the household exhausted the number of times it could be certified in a six-month period using the certification pending verification procedure. The court order requires that USDA publish the text of the telegram in the FEDERAL REGISTER. In compliance with this order, and to assure that this information is available to all participating households and other affected persons, the text of the telegram sent to all State agencies is printed below.

Dated: February 9, 1978.

CAROL TUCKER FOREMAN,
Assistant Secretary.

Forest Service

ROADLESS AREA REVIEW AND EVALUATION
(RARE II)

Amendment to Inventory List

Notice is hereby given of amendment to the inventory of roadless and undeveloped areas within the National Forests and Grasslands, as published in the FEDERAL REGISTER, Friday, November 18, 1977, pages 59690-59715.

The inventory is subject to adjustments from time to time as corrected data becomes available, as areas are modified or areas are added or deleted from the list. The amendments are listed by State and National Forest in the same order as the original list.

ALABAMA

National Forest in Alabama, 8,210. Brushy Fork—change gross acres to 4,055 (delete an area which was under contract for timber harvest).

CALIFORNIA

Cleveland National Forest, and 5,017. Caliente—5,900 gross acres (corrects inadvertent omission).

COLORADO

Grand Mesa Uncompahgre Gunnison, add 2,211. Monchego—3,520 gross acres (added to inventory).

Rio Grande, delete 2,210. Cochetopa Dome—4,730 gross acres, add 2,211. Monchego—4,730 gross acres (renamed as part of area also on Grand Mesa Uncompahgre Gunnison National Forest).

Roosevelt-Arapaho, delete 2,097. Sugarloaf DE—36,230 gross acres, delete 2,098. Nipple Creek DD—48,900 gross acres, delete 2,099. Elkhorn Mountain DC—13,440 gross acres (these areas are allocated to nonwilderness uses by the Bears Ears Land Management Plan for which the final environmental statement was filed on November 1, 1977).

White River National Forest, add 2,162. Skinny Fish—1,510 gross acres (area meets inventory criteria, but inadvertently left off published list).

FLORIDA

National Forest in Florida, 8,307. Baptist Lake—change gross acres to 7,565 (corrects miscalculation of acreage).

GEORGIA

Chattahoochee National Forest, add 8,025. South Nantahalas—20,500 gross acres (portion of area previously in supplemental list on page 59,716).

IDAHO

Idaho Panhandle National Forest, 1,125. Selkirks—change gross acres to 110,630 (corrects calculation error).

Nezperce National Forest, 1,857. Kelly Mountain—change gross acres to 800 (corrects calculation error).

1,921. Gospel Hump—change gross acres to 134,330 (reflects that 201,070 acres previously inventoried are now endorsed as wilderness in H.R. 3454).

NOTICES

ILLINOIS

Shawnee National Forest, add 9,104. Clearsprings—4,500 gross acres, add 9,105. Bald Knob—5,630 gross acres (these areas were part of a larger area, Hutchins Creek, which contained developments which had disqualified it as a unit).

MONTANA

Beaverhead National Forest, 1,549. Madison—change gross acres to 152,840 (corrects calculation error).

Custer National Forest, 1,362. Lost Water Canyon—change gross acres to 9,800 (to exclude a road inadvertently included in initial inventory). 1,363—Red Lodge Creek, Hellroaring—change gross acres to 31,458 (to exclude a road inadvertently included in initial inventory). 1,366—Fishtail, Saddleback Mountain—change gross acres to 25,240 (adjusted to reflect relationship to endorsed Beartooth Wilderness boundary and to exclude a road). 1,371, North Absaroka—change gross acres to 22,920 (adjusted to reflect relationships to endorsed Beartooth Wilderness boundary and to exclude a road). 1,912, Beartooth—change gross acres to 2,600 (adjusted to reflect relationship to endorsed Beartooth Wilderness boundary).

Flathead National Forest, add 1,510. Griffin—5,420 gross acres; add 1,511. Tally—6,700 gross acres; add 1,509. Grubb—7,500 gross acres (these areas were overlooked in initial inventory).

Gallatin National Forest, 1,550. Dry Canyon—change gross acres to 3,080 (corrects computational error).

Kootenai National Forest, add 1,509. Grubb—3,600 (area was overlooked in initial inventory).

Lewis and Clark National Forest, 1,726. Tenderfoot, Deep Creek—change gross acres to 104,700. 1,745, Calf Creek—change gross acres to 12,500 (excludes experimental forest lands from both areas).

NORTH CAROLINA

National Forests in North Carolina: 8,025. South Nantahala—14,480 gross acres. 8,058. Linville Gorge Extension—3,503 gross acres (portions of area previously in supplemental list on page 59,716).

NEW HAMPSHIRE

White Mountain National Forest, 9,062. Carr Mountain—change gross acres to 16,400; delete 9,065, Elbow Pond (the two areas were combined and acreage recalculated).

OREGON

Deschutes National Forest, 6,196. North Paulina—change gross acres to 22,200. 6,197. South Paulina—change gross acres to 10,200 (corrects computational errors).

Fremont National Forest, 6,226. Coleman Rim—change gross acres to 10,800 (corrects computational error); Delete 6,228 Buck Creek—10,100 gross acres (erroneously listed—final land management plan allocates to nonwilderness uses).

Malheur National Forest, 6,238. Strawberry Mountain—change gross acres to 44,820. 6,239. Glacier Mountain—change gross acres to 22,823. 6,241, North Fork Malheur River—change gross acres to 15,125 (corrects computational errors).

Siskiyou National Forest, 6,176. North Kalmiopsis—change gross acres to 16,793. 6,181, Fall Creek—change gross acres to 1,703. 6,182, South Kalmiopsis—change gross acres to 29,756 (reflects relationships

to endorsed Kalmiopsis wilderness proposal in H.R. 3454).

SOUTH CAROLINA

Francis Marion Sumpter, delete 8,012. Wambaw Swamp—5,112 gross acres; delete 8,013, Little Wambaw Swamp—2,491 gross acres (these areas are added to the supplemental listing of areas on which land management plans were completed but are having their wilderness potentials reevaluated); delete 8,111, Beachtree—gross acres 720 (experimental forest lands which were not to be inventoried).

TENNESSEE

Cherokee National Forest, 8,151. Citigo Creek WSA—change gross acres to 16,576. 8,277, Little Frog Mountain—change gross acres to 4,800 (corrects computational errors).

VIRGINIA

George Washington National Forest, 8,172. Elliott Knob—change gross acres to 12,075 (corrects computational error). Jefferson National Forest, 8,183. Barbours Creek—change gross acres to 12,912 (corrects computational error).

WASHINGTON

Gifford Pinchot National Forest, 6,068. Amoeba—change gross acres to 73,500; delete 6,501, Amoeba—gross acres 560; delete 6,502, Amoeba—gross acres 12,480 (consolidates three contiguous areas and eliminates 6,580 gross acres erroneously included—clearcuts, narrow tentacles, etc.).

WYOMING

Shoshone National Forest, delete 2,062. NE. Popo Agie—gross acres 5,420; delete 2,063, SE. Popo Agie—gross acres 5,080 (areas already endorsed as wilderness in Popo Agie report sent to Congress in 1974).

The supplemental list on page 59716 of the November 18, 1977, FEDERAL REGISTER Notice is amended as follows:

Arkansas—change area number to 8090 for Bushheap area.

Colorado—Delete area XXX, Cook Creek, as this area is already included in inventory as area 2112 with 7,270 gross acres.

Florida—Change area number to 8309 and change gross acres to 9,650 to exclude land already under contract for timber harvest.

Montana—Change gross acres of area YAG, Allan Mountain to 111,300 to correct computational error. Add areas LAQ, McGregor—Thompson, Kootenai National Forest, 10,600 gross acres and LAQ, McGregor—Thompson, Lolo National Forest, 6,000 gross acres, per congressional committee report on H.R. 3454.

North Carolina—Change area LAM to area 8313, change area LAN to 8314, change LAO to 8315 and area LAU to 8198. Change area 025 to read 8025-So. Nantahala—8,566 gross acres. (This 8,566 acres has been through land management planning and the remaining acreage is now listed in the inventory list, accounting for the full 43,546 acres.) Change area 058 to read 8058—Linville Gorge Ext. 2,925 gross acres. (This acreage has been through land management planning and the remaining 3,503 acres are now in the inventory list.)

North Dakota—change area DBD-Magpie to area DBB-Magpie with gross acreage of 37,240 to correct computational error.

6291

South Carolina—change area MAG to area 8116. Add area 8110—Hell Hole Bay with gross acreage of 6,826. Add area 8012—Wambaw Swamp with gross acreage of 5,112 and area 8013 Little Wambaw Swamps with gross acreage of 2,491; both areas transferred from the inventory list to this supplemental list.

Tennessee—insert number 8033 for Beaverdam area. Change total acreage of supplemental areas to 733,615.

JOHN R. MCGUIRE,
Chief.

FREMONT NATIONAL FOREST, 10-YEAR TIMBER RESOURCE MANAGEMENT PLAN FOR THE LAKEVIEW FEDERAL SUSTAINED- YIELD UNIT

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the 10-year timber resource management plan on the Lakeview Federal sustained-yield unit of the Fremont National Forest, USDA-FS-R6-DES(Adm)-78-4.

The environmental statement concerns a proposed revision of the 10-year timber resource management plan. This plan would bring the timber resource management plan up-to-date reflecting management changes and to comply with the National Forest Management Act of 1976. Constraints on timber production necessary to assure a proper balance of other resource values and uses, and to protect the long-term productivity of the forest as a whole were considered.

The draft environmental statement was transmitted to the EPA on February 6, 1978.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Building, Room 3210, 12th Street and Independence Avenue SW., Washington, D.C. 20013.

USDA, Forest Service, Pacific Northwest Region, 319 Southwest Pine Street, Portland, Ore. 97204.

USDA, Forest Service, Fremont National Forest, 34 D Street North, Lakeview, Ore. 97630.

A limited number of single copies are available upon request to Forest Supervisor John Chambers, P.O. Box 551, Lakeview, Ore. 97630.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public, and from State and local agencies which are authorized to develop and enforce environmental standards,

and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Forest Supervisor John W. Chambers, P.O. Box 551, Lakeview, Ore. 97630. Comments must be received by April 7, 1978, in order to be considered in the preparation of the final environmental statement.

H. W. PARKER,
Budget Officer.

FEBRUARY 6, 1978.

RESOURCE MANAGEMENT PLAN, TIMBER MANAGEMENT PLAN—MENDOCINO NA- TIONAL FOREST

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the proposed revision of the timber management plan, Mendocino National Forest, Calif., USDA-FS-R5-DES(Adm)-78-4.

The environmental statement covers the effects on the environment from carrying out the direction in the proposed new timber management plan for the 10-year period following its approval. Also, a range of feasible alternatives is discussed and a favored alternative indicated. A programmed harvest within this feasible range could vary from 880 million board feet to 998.7 million board feet per decade. Timber would be harvested from Colusa, Glenn, Lake, Mendocino, Tehama, and Trinity Counties, all within California.

This draft environmental statement was transmitted to the Environmental Protection Agency (EPA) on February 7, 1978.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Building, Room 3230, 12th Street and Independence Avenue SW., Washington, D.C. 20250.

USDA, Forest Service, 630 Sansome Street, Room 529, San Francisco, Calif. 94111.

Mendocino National Forest, 420 East Laurel Street, Willows, Calif. 95988.

A limited number of single copies are available, upon request, from Regional Forester Douglas R. Leisz, California Region, Forest Service, 630 Sansome Street, San Francisco, Calif. 94111.

Copies of the environmental statement have been sent to various Feder-

al, State, and local agencies as outlined in the Council on Environmental Quality guidelines.

Comments are invited from the public, from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental effects for which comments have not been specifically requested.

Comments concerning the proposed action, and requests for additional information should be addressed to Forest Supervisor, Mendocino National Forest, 420 E. Laurel St., Willows, Calif. 95988.

Comments must be received within 60 days after transmittal to EPA in order to be considered in the preparation of the final environmental statement.

ROBERT W. CERMAK,
Deputy Regional Forester.

CIVIL AERONAUTICS BOARD

[Docket No. 31808]

CHICAGO-ALBANY/SYRACUSE-BOSTON COMPETITIVE SERVICE INVESTIGATION

Prehearing Conference

Notice is hereby given that a prehearing conference in this proceeding will be held on March 7, 1978, at 9:30 a.m. (local time), in Room 1003, Hearing Room C, Universal North Building, 1875 Connecticut Avenue NW., Washington, D.C., before the undersigned.

In order to facilitate the conduct of the conference, parties are instructed to submit one copy to each party and six copies to the Judge of (1) proposed statements of issues; (2) proposed stipulations; (3) proposed requests for information and for evidence; (4) statements of positions; and (5) proposed procedural dates. The Bureau of Operating Rights will circulate its material on or before February 20, 1978, and the other parties on or before March 2, 1978. The submissions of the other parties shall be limited to points on which they differ with the Bureau, and shall follow the numbering and lettering used by the Bureau to facilitate cross-referencing.

Dated at Washington, D.C., February 8, 1978.

GREER M. MURPHY,
Administrative Law Judge.

CIVIL SERVICE COMMISSION

ENVIRONMENTAL PROTECTION AGENCY AND DEPARTMENT OF THE INTERIOR

Grant of Authority To Make Noncareer Executive Assignment

Under authority of § 9.20 of Civil Service Rule IX (5 CFR 9.20), the Civil Service Commission authorizes the Environmental Protection Agency and the Department of the Interior to fill by noncareer executive assignment in the excepted service the following positions:

Environmental Protection Agency—the position of Special Assistant to the Deputy Administrator, Office of the Deputy Administrator, Office of the Administrator.

Department of the Interior—the position of Deputy Commissioner of Reclamation, Office of the Commissioner, Bureau of Reclamation.

For the United States Civil Service Commission.

JAMES C. SPRY,
Executive Assistant
to the Commissioners.

[6325-01]

ANNUAL COMPREHENSIVE REVIEW OF ADVISORY COMMITTEES

ACTION: Annual comprehensive review of (1) the Committee on Private Voluntary Agency Eligibility, (2) the Federal Prevailing Rate Advisory Committee, and (3) the President's Commission on White House Fellowships.

SUMMARY: Pursuant to the provisions of section 7(b) of the Federal Advisory Committee Act (Pub. L. 92-463), the Civil Service Commission is conducting a comprehensive review of advisory committees.

The review will determine for each committee whether:

1. The committee is carrying out its purpose;
2. Consistent with the provisions of applicable statutes, the responsibilities assigned to it should be revised;
3. It should be merged with other advisory committees; or
4. It should be abolished.

Interested persons are invited to submit comments by March 15, 1978 on the items covered in the comprehensive review as outlined above.

ADDRESS: Comments should be addressed to Donald J. Biglin, Advisory Committee Management Officer, U.S. Civil Service Commission, Room 5554, 1900 E Street NW., Washington, D.C. 20415.

FOR FURTHER INFORMATION
CONTACT:

William C. Duffy 202-632-4597.

SUPPLEMENTARY INFORMATION: Following is a brief description of the purpose and operations of each advisory committee.

COMMITTEE ON PRIVATE VOLUNTARY AGENCY ELIGIBILITY

This committee reviews applications and supplementary financial and accounting data from national voluntary agencies and makes recommendations to the Chairman, Civil Service Commission on which agencies should be authorized to solicit on the job in Federal installations. It also makes recommendations regarding certain other matters relating to fund raising appeals when requested.

During 1977, the committee held one meeting which was open to the public. It is composed of representatives from three Federal employee unions and the management of two Federal agencies.

FEDERAL PREVAILING RATE ADVISORY COMMITTEE

This committee was established by Public Law 92-392. It studies the prevailing rate wage system in the Federal government and advises the Civil Service Commission on such matters as policy for determining pay rates, including the planning of surveys and the gathering and analysis of data. Committee membership is provided for by law and includes management members from Federal departments and agencies and representatives of employee organizations.

Prior to 1978, most meetings of this committee were closed to the public because the committee is exclusively engaged in what is essentially collective bargaining on questions concerning the Federal Wage System. While meetings of this committee may properly be closed under the provisions of the Federal Advisory Committee Act, the committee is currently conducting an experiment during which meetings of the full committee are generally open to the public. At the conclusion of the experiment, there will be a review of the impact of openness upon the ability of the committee to effect meaningful give and take and to reach consensus where possible on its recommendations on Federal Wage System policy.

The committee submitted three reports during 1977 as follows: (1) Establishment of New Environmental Differential for Electrical High Voltage Work; (2) Discontinuance of Special Wage Rates for Patternmakers in the San Francisco, Calif., Wage Area; and (3) Establishment of a New Environmental Differential for Welding, Cutting, or Burning in Confined Spaces.

PRESIDENT'S COMMISSION ON WHITE HOUSE FELLOWSHIPS

This committee provides gifted and highly motivated Americans early in their chosen careers with firsthand experience in the process of governing the nation and a sense of personal involvement in the leadership of the society.

During 1977 the Commission held twelve closed meetings and one partially closed meeting. Those portions of Commission meetings which determine policy are open to the public; those dealing with confidential character references are closed.

The Commission received and processed applications from 1334 persons applying for the 1977-78 program. It recommended to the President fourteen men and women for selection as White House Fellows, and the President accepted the Commission's recommendations and appointed them on May 22, 1977. As part of its mandate, the Commission set policies for the educational program of the Fellows including meetings with over 300 leaders in government, education, and industry. There is no set number of members on the Commission. It includes men and women from government, industry, various professions, and academic endeavors.

DONALD J. BIGLIN,
Advisory Committee
Management Officer.

DEPARTMENT OF COMMERCE

Economic Development Administration

MIAMI FOOTWEAR CORP. AND MARMAN SPORTSWEAR, INC.

Petitions for Determinations of Eligibility To Apply for Trade Adjustment Assistance

Petitions have been accepted for filing from two firms: (1) Miami Footwear Corp., 3455 N.W. 30th Avenue, P.O. Box 420829, Miami, Fla. 33142, a producer of footwear for women, accepted on January 31, 1978; and (2) Marman Sportswear, Inc., 562 Mission Street, San Francisco, Calif. 94105, a producer of men's suits, sportcoats and slacks, accepted on February 2, 1978. The petitions were submitted pursuant to Section 251 of the Trade Act of 1974 (Pub. L. 93-618) and § 315.232 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315).

Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to

total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of the petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

JACK W. OSBURN, Jr.,
Chief, Trade Act Certification
Division, Office of Planning
and Program Support.

National Bureau of Standards
(FIPS PUB 21-1)

FEDERAL STANDARD COBOL
Proposed Interpretations

Under the provisions of Pub. L. 89-306 and Executive Order 11717, the Secretary of Commerce is authorized to establish uniform Federal ADP Standards. Three (3) additional interpretations to Federal Standard COBOL (FIPS PUB 21-1) are being recommended for Federal use. Interpretation 2 pertains to the UNSTRING statement, interpretation 3 pertains to the COPY statement and interpretation 4 pertains to the alpha-beta-name clause.

These proposed interpretations are in accordance with the Interpretation Procedures for Federal Standard COBOL as contained in Federal Information Processing Standards Publication (FIPS PUB) 29, dated June 30, 1974. These proposed interpretations, if adopted, will serve as additional specifications to Federal Standard COBOL, which is an adoption of the voluntary industry standard that has been developed by the American National Standards Institute.

Each of the proposed interpretations contains a definition of the problem, discussion of the issues, recommended interpretation, supporting justification for the proposed interpretation, necessary clarifications to Federal Standard COBOL to effect the resolution, and the effective date of the interpretation.

Prior to the approval of the proposals by the National Bureau of Standards, it is essential to assure that proper consideration is given to the needs and views of manufacturers, the public and State and Local governments. The purpose of this notice is to solicit such views.

Interested parties may submit comments to the Associate Director for

ADP Standards, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C. 20234, on or before May 15, 1978.

Dated: February 8, 1978.

ERNEST AMBLER,
Director.

FEDERAL STANDARD COBOL
INTERPRETATION No. 2

THE UNSTRING STATEMENT

Definition of the Problem. When the UNSTRING statement with the ALL phrase is specified and the data being acted upon by the UNSTRING statement contains two or more contiguous occurrences of the delimiter specified in the DELIMITED BY phrase, how many occurrences of the delimiter are moved to the area referenced by identifier-5?

Issues. Given the following UNSTRING statement:

UNSTRING ID-1 DELIMITED BY
ALL "AB"
INTO ID-4 DELIMITER IN ID-5
COUNT IN ID-6
ID-7 COUNT IN ID-9
POINTER ID-10
TALLYING IN ID-11.

and the following description of the data:

01 ID-1 PICTURE IS X(10)-
VALUE "12ABABABCD".
01 ID-4 PICTURE IS X(8)-VALUE
SPACE.
01 ID-5 PICTURE IS X(8)-VALUE
SPACE.
01 ID-6 PICTURE IS 99-VALUE
ZERO.
01 ID-7 PICTURE IS X(8)-VALUE
SPACE.
01 ID-9 PICTURE IS 99-VALUE
ZERO.
01 ID-10 PICTURE IS 99-VALUE
1.
01 ID-11 PICTURE IS 99-VALUE
ZERO.

What is the content of these data items after execution of the UNSTRING statement, especially as it concerns ID-5?

Recommended Interpretation. This interpretation applies to American National Standard COBOL, X3.23-1974, as it has been adopted as Federal Standard COBOL, FIPS PUB 21-1. The interpretation is that only one occurrence of the delimiter in the data item referenced by identifier-1 is moved to the data item referenced by identifier-5 when the ALL phrase is specified, whether or not the delimiter is contiguous to one or more additional occurrences of itself.

Supporting Justification. References: The following references to American National Standard COBOL, X3.23-1974, pertain to the issues involved in this interpretation:

(a) Page II-92, General Rule 5.21.4(8)—"When the ALL phrase is

specified, one occurrence or two or more contiguous occurrences of literal-1 (figurative constant or not) or the contents of the data item referenced by identifier-2 are treated as if it were only one occurrence, and this occurrence is moved to the receiving data item according to the rules in General Rule (13)d."

(b) Page II-92, General Rule 5.21.4(11)—"Each literal-1 or the data item referenced by identifier-2 represents one delimiter. When a delimiter contains two or more characters, all of the characters must be present in contiguous positions of the sending item, and in the order given to be recognized as a delimiter."

(c) Page II-93, General Rule 5.21.4(13)d—"If the DELIMITER IN phrase is specified, the delimiting character(s) are treated as an elementary alphanumeric data item and are moved into the data item referenced by identifier-5 according to the rules for the MOVE statement."

Discussion: Reference a specifies that, once a delimiter is encountered, that occurrence is moved to the receiving data item for the delimiter. Reference a also specifies that the existence of more than one contiguous occurrence of the delimiter (as in the case "12ABABABCD") is considered as one occurrence and this occurrence is moved. It can be argued that "this" occurrence means all of the contiguous occurrences of the delimiter, however, a careful reading of reference a reveals that the antecedent of "this" is "one occurrence" and therefore only "one occurrence" is moved.

Reference b defines how one delimiter of two or more characters is detected. Given the example above, in the case of a sending data item containing the value "12ABABABCD" with a delimiter specified of ALL "AB", the conditions are correct for encountering the delimiter specified.

Reference c discusses how the movement of the delimiter into the data item referenced by identifier-5 is accomplished.

Therefore, upon execution of the UNSTRING statement specified in the above example, the following will result:

ID-4 = 12bbbbbb
ID-5 = ABbbbbbb
ID-6 = 02
ID-7 = CDbbbbbb
ID-9 = 02
ID-10 = 11
ID-11 = 02

Clarification to Federal Standard COBOL. None.

Effective Date of Interpretation. The effective date of this interpretation shall be 180 days after the date the approved interpretation is published in the FEDERAL REGISTER.

FEDERAL STANDARD COBOL
INTERPRETATION No. 3

THE COPY STATEMENT

Definition of the Problem. In order to determine whether or not the characters "COPY" when specified in a paragraph within the Identification Division cause text to be copied from a COBOL library, it is necessary to determine which characters in a COBOL source program constitute a comment-entry. If implementations of COBOL compilers differ with respect to whether a given instance of "COPY" causes text to be copied, portability of COBOL programs will be adversely impacted.

Issues. A COPY statement may be specified in a COBOL source program where a character-string may be specified; and a comment-entry is a character-string, but one for which the normal delimitation by separators does not apply in the same way as for other types of character-strings. At issue are the following two questions:

(a) What sequence of characters in a COBOL source program constitutes a single comment-entry?

(b) If a sequence of characters beginning with the characters "COPY" appears where a comment-entry may be specified but that sequence of characters is not a valid COPY statement, does an error exist in the program or are the characters considered to be part of a comment-entry?

Recommended Interpretation. This interpretation applies to American National Standard COBOL, X3.23-1974, as it has been adopted as Federal Standard COBOL, FIPS PUB 21-1. The interpretation is in two parts. Each part addresses one of the issues related above.

(a) Any character other than a space character which immediately follows a period separator at a point in a COBOL source program where a comment-entry may be specified is either the first character of the specification of a COPY statement or else the first character of a comment-entry. Once the first character of a comment-entry has been encountered, that character and any succeeding characters up to, but not including, the period separator which immediately precedes the next header in the source program are all part of a single character-string, regardless of the appearance within this comment-entry character-string of any space or period characters. Consequently, in the AUTHOR, INSTALLATION, DATE-WRITTEN, DATE-COMPILED, and SECURITY paragraphs of the Identification Division, a COPY statement may be specified only immediately following the paragraph header or immediately following another COPY statement.

(b) If a sequence of characters beginning with the characters "COPY" appears following a period separator at a point where a comment-entry may be specified, and if that sequence of characters up to the next period character which is followed by a space character is not the specification of a valid COPY statement according to the General Format and Syntax Rules for that statement, the program is syntactically correct with respect to this specification of characters; and the characters in question are within a comment-entry character-string.

Supporting Justification. References: The following references to American National Standard COBOL, X3.23-1974, pertain to the issues involved in this interpretation:

(a) Page I-58, Paragraph 4.2, states the definition of an entry as: "Any descriptive set of consecutive clauses terminated by a period and written in the Identification Division, Environment Division, or Data Division of a COBOL source program."

(b) Page I-74, Paragraph 5.2.1.8, states in part: "Paragraphs within the Identification and Procedure Divisions, and the entries within the Environment and Data Divisions must be terminated by the separator period."

(c) Page I-76, Paragraph 5.3.2.1, states in part: "The rules established for the formation of separators do not apply to the characters which comprise the contents of nonnumeric literals, comment-entries, or comment lines."

(d) Page I-76, Paragraph 5.3.2.2, states: "A character-string is a character or a sequence of contiguous characters which forms a COBOL word, a literal, a PICTURE character-string, or a comment-entry. A character-string is delimited by separators."

(e) Page I-82, Paragraph 5.3.2.2.4, states: "A comment-entry is an entry in the Identification Division that may be any combination of characters from the computer's character set."

f. Page I-94, Paragraph 5.4.3.1, specifies that, where a comment-entry appears, it may optionally be repeated.

g. Page X-2, Paragraph 2.2, specifies the General Format of the COPY statement.

h. Page X-2, Paragraph 2.3, specifies Syntax Rules for the COPY statement. In particular, Syntax Rule (2) states: "The COPY statement must be preceded by a space and terminated by the separator period." Syntax Rule (7) states: "A COPY statement may occur in the source program anywhere a character-string or a separator may occur except that a COPY statement must not occur within a COPY statement."

DISCUSSION

(a) A comment-entry is a character-string according to reference d, but a comment-entry is also an entry according to reference e. In order to be consistent with one another, these referenced language specifications require that, in the case of a comment-entry, the entry in question must consist of a single clause which must, in turn, consist of a single character-string.

(b) A character-string must be delimited by separators according to reference d, and an entry is terminated by a period according to reference a. Because the entry and the character-string consist of identical characters in the case of a comment-entry, the character-string must be terminated with a separator period.

(c) According to reference c, the rules for the formation of separators are not applicable to the contents of a comment-entry which may consist of any characters including space and period characters in any combination. Therefore, the period separator which delimits the comment-entry can only be that period separator which terminates the paragraph according to reference b. Only that particular period separator, because of its preceding a header, can be distinguished from those characters, constituting the comment-entry.

(d) When a COPY statement is specified in place of a comment-entry character-string according to reference h, characters specified following that COPY statement may be a comment-entry because of the repetition allowed by reference f. In fact, this is the only circumstance under which a comment-entry is repeated. If a comment-entry begins immediately after a paragraph header, there can only be a single comment-entry in the paragraph since the rules for the formation of separators do not apply.

Discussion of Examples: In the following examples, assume that ABC, FILE HISTORY, and HIGH-SEC are text-games contained in a COBOL library but that LOW-SEC is not a text-game contained in such a library.

(a) SECURITY. HOW DO WE COPY ABC. ENVIRONMENT DIVISION.

Because of reference c, the space preceding "COPY" is not a separator; consequently, no COPY statement is specified. A single comment-entry has been specified consisting of the characters "HOW DO WE COPY ABC".

(b) DATE-WRITTEN. ORIGINAL PROGRAM WRITTEN JAN. 9, 1975. FILE DESCRIPTIONS. MAINTAINED ON-LIBRARY. COPY FILE-HISTORY. DATE-COMPILED.

Because of reference c, the period and space preceding "COPY" do not constitute a period separator; consequently, no COPY statement is specified. A single comment-entry has been specified.

(c) SECURITY. COPY HIGH-SEC. ENVIRONMENT DIVISION.

A valid COPY statement has been specified according to references g and

V
4
3
3
1

F
E
E
1
4

7
8
UMI

h in a position where a character-string, namely a comment-entry, can be specified. Therefore, the library text with text-name HIGH-SEC is copied into the program.

(d) SECURITY. COPY ABC GERZUN NOT IN LIBRARY. ENVIRONMENT DIVISION.

A syntactically valid COPY statement has not been specified according to references g and h, i.e., a period separator does not immediately follow "ABC". The sequence of characters "COPY ABC GERZUN NOT IN LIBRARY" is a comment-entry according to reference e.

(e) SECURITY. COPY LOW-SEC. ENVIRONMENT DIVISION.

Since there is no library text named LOW-SEC, the characters "LOW-SEC" are not a text-name; a syntactically valid COPY statement has not been specified according to reference g; and the sequence of characters "COPY LOW-SEC" is a comment-entry according to reference e.

(f) SECURITY. COPY ABC. COMMENT SOME MORE. ENVIRONMENT DIVISION.

A valid COPY statement has been specified. Library text with the text-name ABC is copied into the program. The library text logically replaces only "COPY ABC". The source program text following the COPY statement is a valid comment-entry permitted by reference f.

Clarification to Federal Standard COBOL. None.

Effective Date of Interpretation. The effective date of this interpretation shall be 180 days after the date the approved interpretation is published in the FEDERAL REGISTER.

FEDERAL STANDARD COBOL
INTERPRETATION No. 4

THE ALPHABET-NAME CLAUSE

Definition of the Problem. In order to determine what collating sequence has been specified in an alphabet-name clause, and whether that specification is correct, it is necessary to know to which characters the figurative constants HIGH-VALUE and LOW-VALUE refer if they are specified in the clause.

Issues. A figurative constant may be specified in a COBOL source program where a literal may be specified. The alphabet-name clause in the SPECIAL-NAMES paragraph permits the specification of a character in the native character set of the computer by means of a nonnumeric literal. There is no specific restriction upon using a figurative constant of HIGH-VALUE or LOW-VALUE as a specification of a nonnumeric literal in the alphabet-name clause. However, the character in the native character set referred to by one of these figurative constants HIGH-VALUE and LOW-

VALUE is normally defined in terms of the program collating sequence; but the program collating sequence may be established by the definition in an alphabet-name clause. At issue are the following questions:

(a) If specified in the alphabet-name clause for an alphabet-name which is referenced in the PROGRAM COLLATING SEQUENCE clause of the OBJECT-COMPUTER paragraph, do the figurative constants HIGH-VALUE and LOW-VALUE result in unambiguous identification of the collating sequence for that alphabet-name?

(b) What is the collating sequence which is used to determine the actual characters referenced by HIGH-VALUE and LOW-VALUE when these figurative constants are specified in the alphabet-name clause?

Recommended Interpretation. This interpretation applies to American National Standard COBOL, X3.23-1974, as it has been adopted as Federal Standard COBOL, FIPS PUB 21-1. The figurative constants LOW-VALUE and HIGH-VALUE and their equivalent forms LOW-VALUES and HIGH-VALUES, respectively, may be specified in an alphabet-name clause in the SPECIAL-NAMES paragraph of a COBOL source program, whether or not the alphabet-name which is the subject of the clause is referenced in the PROGRAM COLLATING SEQUENCE clause of the OBJECT-COMPUTER paragraph for that program. In all cases where such a specification of LOW-VALUE is made, the character referenced by the figurative constant LOW-VALUE is that character which has the lowest original position in the native collating sequence for the native character set implemented on the computer specified in the OBJECT-COMPUTER paragraph. In all cases where such a specification of HIGH-VALUE is made, the character referenced by the figurative constant HIGH-VALUE is that character which has the highest ordinal position in the native collating sequence for the native character set implemented on the computer specified in the OBJECT-COMPUTER paragraph.

Supporting Justification. References: The following references to American National Standard COBOL, X3.23-1974, pertain to the issues involved in this interpretation:

(a) Page I-81, Paragraph 5.3.2.2.2.3, states in part: "A figurative constant may be used wherever a literal appears in a format, except that whenever the literal is restricted to having only numeric characters in it, the only figurative constant permitted is ZERO (ZEROS, ZEROES)." It further states: "When the figurative constants HIGH-VALUE(S) or LOW-VALUE(S) are used in the source program, the actual character associated with each

figurative constant depends upon the program collating sequence specified."

(b) Page II-6, Paragraph 3.1.2.4, specifies rules for the OBJECT-COMPUTER paragraph. In particular, General Rule (3) states: "If the PROGRAM COLLATING SEQUENCE clause is not specified, the native collating sequence is used." General Rule (4) states: "If the PROGRAM COLLATING SEQUENCE clause is specified, the program collating sequence is the collating sequence associated with the alphabet-name specified in that clause."

(c) Page II-8, Paragraph 3.1.3.3, specifies Syntax Rules for the SPECIAL-NAMES paragraph. In particular, Syntax Rule (2) states: "If the literal phrase of the alphabet-name clause is specified a given character must not be specified more than once in an alphabet-name clause."

(d) Pages II-9 and II-10, Paragraph 3.1.3.4, specifies General Rules for the SPECIAL-NAMES paragraph. In particular, the following General Rules are of interest:

(1) General Rule (3)d, Rule 1 states: "The value of each literal specifies:

"1. The ordinal number of a character within the native character set, if the literal is numeric

"2. The actual character within the native character set, if the literal is nonnumeric"

(2) General Rule (3)d, Rule 3 states: "Any characters within the native collating sequence, which are not explicitly specified in the literal phrase, assume a position, in the collating sequence being specified, greater than any of the explicitly specified characters. The relative order within the set of these unspecified characters is unchanged from the native collating sequence."

(3) General Rule (3)d, Rule 5 states: "If the ALSO phrase is specified, the characters of the native character set specified by the value of literal-1, literal-3, literal-4, . . . are assigned to the same position in the collating sequence being specified."

(4) General Rule (4) states: "The character that has the highest ordinal position in the program collating sequence specified is associated with the figurative constant HIGH-VALUE. If more than one character has the highest position in the program collating sequence, the last character specified is associated with the figurative constant HIGH-VALUE."

(5) General Rule (5) states: "The character that has the lowest ordinal position in the program collating sequence specified is associated with the figurative constant LOW-VALUE. If more than one character has the lowest position in the program collating sequence, the first character specified is associated with the figurative constant LOW-VALUE."

Discussion: An alphabet-name which is defined by an alphabet-name clause in which literals appear may be referenced in the PROGRAM COLLATING SEQUENCE clause of the OBJECT-COMPUTER paragraph and in the COLLATING SEQUENCE phrase of the SORT and MERGE statements. Consider the case where the alphabet-name defined in an alphabet-name clause containing literals is referenced in the PROGRAM COLLATING SEQUENCE clause. It cannot be supposed that the figurative constants LOW-VALUE and HIGH-VALUE specify characters from the native computer code set in terms of the program collating sequence being defined in the alphabet-name clause. Such a supposition would lead to inconsistencies. For example, LOW-VALUE if specified as the first literal in an alphabet-name clause would not uniquely identify any character; and LOW-VALUE specified other than as the first literal in an alphabet-name clause would be prohibited by reference c. For HIGH-VALUE, the inconsistency would be that any unspecified character assumed to be highest in the program collating sequence, if specified by means of HIGH-VALUE in the alphabet-name clause, would then be explicitly specified and could not be the character referred to by HIGH-VALUE, according to references d(2) and d(4). These inconsistencies can only be avoided if either HIGH-VALUE and LOW-VALUE are syntactically incorrect specifications for literals in the alphabet-name clause or else HIGH-VALUE and LOW-VALUE specify characters in terms of some other program collating sequence than that which is being defined. Because reference a allows a figurative constant to be used "wherever a literal appears in a format," and since there is no specific prohibition of any figurative constant being used in the alphabet-name clause, the interpretation is given that, while processing the alphabet-name clause and before the program collating sequence is established, the native collating sequence is the program collating sequence for purposes of determining the characters referred to by HIGH-VALUE and LOW-VALUE. The term "native character set" used in reference d(1) obviously embraces both the concepts of a native character code set and of a native collating sequence. The native character set must be ordered if meaning is to be given to the rule applying to numeric literals specified in an alphabet-name clause. This same ordering applies to the "actual character within the native character set, if the literal is nonnumeric." The use of the term "native character set" in reference d(1) is interpreted to mean that the native collating sequence is to be the program collating sequence used

to determine the characters referred to by HIGH-VALUE and LOW-VALUE in the alphabet-name clause, even if the alphabet-name being defined is not specified in the PROGRAM COLLATING SEQUENCE clause.

Discussion of Examples: The following example is provided to illustrate the interpretation. Assume that a computer has a character set consisting of eight characters ordered, from low to high, in the native collating sequence A, B, C, D, E, F, G, H. The following alphabet-name clause is used to define a restructured collating sequence:

SPECIAL-NAMES.
RESTRUCTURED-ALPHABET IS
"C"
"D" ALSO HIGH-VALUE ALSO
LOW-VALUE
"B".

Because of reference a, HIGH-VALUE and LOW-VALUE are permitted in the clause because the General Format of the SPECIAL-NAMES paragraph permits literals where these figurative constants are used. Because of reference d(1), the native collating sequence is used as the program collating sequence for purposes of defining RESTRUCTURED-ALPHABET, regardless of what the program collating sequence is for the remainder of the COBOL source program. Therefore, the collating sequence established for RESTRUCTURED-ALPHABET at execution time is:

C (lowest ordinal position)
D and H and A (second ordinal position)
B (third ordinal position)
E
F
G (highest ordinal position)

If the OBJECT-COMPUTER paragraph specifies the clause "PROGRAM COLLATING SEQUENCE IS RESTRUCTURED-ALPHABET", the character referred to by LOW-VALUE, except in an alphabet-name clause, is the character "C"; and the character referred to by HIGH-VALUE, except in an alphabet-name clause, is the character "G".

Clarification to Federal Standard COBOL. None.

Effective Date of Interpretation. The effective date of this interpretation shall be 180 days after the date the approved interpretation is published in the FEDERAL REGISTER.

Administration

MARINE FISHERIES ADVISORY COMMITTEE

Public Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C., Appendix I, notice is hereby given of a subcommittee meeting of the Marine Fisheries Advisory Committee (MAFAC). The purpose of this subcommittee is to discuss potential amendments to the Fishery Conservation and Management Act of 1976 being developed by the National Marine Fisheries Service (NMFS) and provide recommendations to NMFS. The subcommittee meeting will be held on March 2, 1978, at 3 p.m. with a dinner break followed by an evening session. The meeting will continue on March 3, 1978, from 8:30 a.m. until noon. All sessions will be held in the Penthouse, Page Building 1, 2001 Wisconsin Avenue NW., Washington, D.C. The subcommittee meeting is open to the public and there will be seating for approximately 25 public members available on a first come, first served basis. For further information, members of the public should contact:

Ms. Phyllis Bentz, Marine Fisheries Advisory Committee, National Oceanic and Atmospheric Administration, National Marine Fisheries Service, Washington, D.C. 20235, Telephone: Area Code 202-634-7355.

At the discretion of the chairman, interested members of the public may be permitted to speak at times which allow an orderly conduct of subcommittee business, and a reasonable time relationship between the subcommittee's discussion of a given subject, and comments to that same subject by a member of the public.

Dated: February 9, 1978.

JACK W. GEHRINGER,
Deputy Director,
National Marine Fisheries Service.

PACIFIC FISHERY MANAGEMENT COUNCIL
AND SCIENTIFIC AND STATISTICAL COMMITTEE,
AND SALMON ADVISORY SUBPANEL

Meeting Time Change and Meeting
Cancellation

Notice is hereby given of a change in the meeting time as published in the FEDERAL REGISTER, February 1, 1978 (43 FR 4273), for the Pacific Fishery Management Council.

The meeting is now scheduled for Thursday and Friday, February 16-17, 1978, at the Cosmopolitan Motor Hotel located at 1030 N.E. Union, Portland, Oreg., convening at 1 p.m.,

and adjourning at about 5 p.m. to reconvene for closed session at 7 p.m. and adjourn about 9 p.m. On Friday, February 17, 1978, the Council will convene at 8 a.m. and adjourn about 12 a.m. The date, location and agenda will remain unchanged.

Notice is also hereby given that the meeting of the Scientific and Statistical Committee, scheduled for Wednesday and Thursday, February 15-16, 1978, and the meeting of the Salmon Advisory Subpanel, scheduled for Wednesday, February 15, 1978, both at the Cosmopolitan Motor Hotel, Portland, Ore., have been cancelled.

Dated: February 6, 1978.

WINFRED H. MEIBOHM,
Associate Director, National
Marine Fisheries Service.

Office of the Secretary

REQUEST FOR COMMENTS BY THE NATIONAL
STANDARDS POLICY ADVISORY COMMITTEE
ON A DOCUMENT ENTITLED "A RECOMMENDED
NATIONAL STANDARDS POLICY
FOR THE UNITED STATES"

Notice Inviting Comments

The Department of Commerce functions as the Federal Government focal point in the development, coordination, and strengthening of U.S. national and international standards policy in the public interest.

The National Standards Policy Advisory Committee (NSPAC), which was established under the auspices of the American National Standards Institute (ANSI) early in 1977, has prepared a document entitled "A Recommended National Standards Policy for the United States." In its own words, NSPAC's objective in preparing that document "was to prepare a recommended U.S. National Standards Policy that would, if implemented, go a long way towards creating a working environment within which the Nation's standards capability—both public and private—could be effectively, economically, and equitably used in behalf of the national interest." Before finalizing this document the NSPAC is anxious to obtain and consider the comments of all interested persons.

In the exercise of its role in U.S. standards policy, the Department believes that the public interest will be served by publishing the NSPAC document in the FEDERAL REGISTER so that all interested persons will have the opportunity to comment. Its publication by the Department of Commerce in no way constitutes approval or disapproval of that document by the Department or any of its employees.

Interested persons wishing to comment on the NSPAC document, which

NOTICES

is reproduced in its entirety below, should submit such comments by June 1, 1978 directly to: NSPAC Program Administrator, c/o Richard O. Simpson Associates, Inc., Suite 935, Washington Building, 1435 G Street NW., Washington, D.C. 20005. No comments should be sent to the Department of Commerce.

Dated: February 8, 1978.

JORDAN J. BARUCH,
Assistant Secretary for
Science and Technology.

The full text, including all appendices, of NSPAC's "A Recommended National Standards Policy for the United States" is as follows:

A RECOMMENDED NATIONAL STANDARDS
POLICY FOR THE UNITED STATES

(Prepared By: National Standards
Policy Advisory Committee)

TO THE READER:

This document represents the combined efforts of a group designated as the National Standards Policy Advisory Committee (NSPAC). This independent work efforts was initiated under the auspices of, but free from any policy guidance by, the American National Standards Institute (ANSI) during early 1977.

There are some obvious questions that may be raised in relation to this activity, e.g., Why did ANSI, a private organization, initiate an effort to write a NATIONAL policy? Shouldn't that more properly be a role of the Federal Government? Doesn't ANSI's involvement turn this into an obvious self-serving effort?

Our society is composed of many "stakeholders" or "interested parties" who should be interested in, and will be affected by, a National Standards Policy. Among these stakeholders are federal, state, and local government, organized labor, public interest groups, trade associations, industry, professional societies, standards writing bodies, testing labs, consumers, etc.

Any one of the stakeholders could have provided the initiative to start the policy development process. ANSI, as the coordinator of the U.S. voluntary standards system, is a logical stakeholder to have taken such an initiative with the caveat that all of the interested parties should be assured of the opportunity to participate in the process. The stakeholder representatives, which make up the membership of the NSPAC, are listed in Appendix No. 2 of this document.

In addition, extraordinary steps have been taken to ensure the independence, objectivity, and credibility of this effort. For example, no representative of ANSI serves on the NSPAC; funding for the effort was raised in small amounts from over fifty organizations and is retained in a

special account for this purpose only; expenditures from this account are controlled by the Committee.

The charge given to the NSPAC was to prepare a recommended U.S. National Standards Policy that would, if implemented, go a long way towards creating a working environment within which the Nation's standards capability—both public and private—could be effectively, economically, and equitably used in behalf of the national interest.

The NSPAC recognizes that attainment of a unanimously agreed-upon policy statement cannot be achieved quickly—if ever. The enclosed statement, we believe, represents a reasonable starting point. Indeed, this recommended National Standards Policy should be considered not only as a starting point but, perhaps, more properly, as a milestone in filling a long-recognized major national need. As such a milestone, we want to make sure that it benefits from the inputs of all in this country who have an interest and a stake in this Nation's standards writing activities.

The enclosed document, and each part thereof, represents and initial consensus view of the NSPAC membership. Where individual members of the NSPAC hold strong views which differ from the consensus as reflected in the document, their unedited opinions are contained in Appendix No. 1. We urge the reader to review this appendix along with the complete document before formulating comments.

For us to complete preparation of a document intended to truly represent a broad national consensus, we urgently need your individual and organizational comments on this recommended National Standards Policy.

To be considered, please send your comments by June 1, 1978, to:

NSPAC Program Administrator, c/o Richard O. Simpson Associates, Inc., Suite 935, Washington Building, 1435 G Street NW., Washington, D.C. 20005.

APPENDICES

1. NSPAC Members' Individual Dissenting Views.
2. Membership of the National Standards Policy Advisory Committee.
3. Steps Required to Implement the Policy.
4. Background—Why a National Standards Policy is Needed.
5. Explanatory Remarks.

I. INTRODUCTION

Standards are instruments by which buyers and sellers define mutual needs and/or obligations. They may also be base-line instruments by which government may assert its regulatory authority on behalf of its citizens to enhance their personal health and safety or economic wellbeing.

II. OBJECTIVE(S)

1. To propose policies with respect to both the public and private initiation, development, use, and maintenance of national standards for products, systems and services.
2. To provide a framework for the efficient organization and management of both public and private resources to ensure that the United States' national standards needs are competently and economically met, on a timely basis, under generally recognized principles of due process.

III. SCOPE

1. *Products, Systems and Services.* Unless otherwise excluded, this policy is applicable to all national standards for products, systems, and services found in commerce, including those acquired, fabricated, or regulated by agencies of federal, state, or local governments. This policy does not cover the process of certification.

2. *Organizations and Agencies.* This policy is directed towards all organizations and agencies, public or private, that initiate, develop, or approve national standards, as well as, to all public agencies that use national standards.

*Nothing in this policy is intended to prohibit or prevent the introduction of new or innovative products because of the lack of a national standard nor preclude the right of a certifying organization to utilize standards

3. *International Standards.* Where relevant, this policy is directed toward standards participation on behalf of the United States in international, as well as, national standards activities.

IV. POLICY—PART 1—GENERAL PRINCIPLES

1. *Cooperation, An Essential Element.* The national interest is best served when both the public and private sectors, and/or components of both sectors, initiate, develop, and participate in programs which stimulate and encourage cooperation of both sectors in national standards activities.

2. *National Standards Writing Activities*—a. *Openness.* Participation in national standards writing activities should be open to all interested persons. There should be no undue financial barriers to participation. Participation should not be conditioned upon membership in any organization including the group of organization sponsoring the activity. Interested persons should receive adequate notice of standards development activities and actions.

b. *National Standards Decisions.* Decisions in national standards writing activities should reflect a substantial agreement by all of the parties at interest, or their representatives, who are directly and materially affected by the standard. A substantial agreement means more than a simple majority but not necessarily unanimity. It also includes the requirement to consider and attempt to resolve all substantive-negative comments.

c. *Balance—Rules and Procedures.* The rules and procedures to be followed in national standards writing activities should be such that all societal interests (e.g., government, consumer, labor, producers, users, general interests, etc.) that might be directly and materially affected by the standard in question have the opportunity for fair and equitable participation. There should be no opportunity for domination by any single interest.

d. *Balance—Consumer/User Participation.* Special attention should be given to ensuring that both "consumer" and "user" participants are included when consideration is given to the makeup of national standards committees. For purposes of this policy, the following is applicable:

i. *Consumer (User-Individual).* Where the national standards activity in question deals with a consumer product, e.g., lawn mowers, aerosol sprays, etc., the appropriate consumer participant's view is synonymous with the individual's view. In other words, consumer means an individual user—a person who uses goods and services rather than produces or sells them.

ii. *User—Industrial.* Where the national standards activity in question does not deal with a consumer product, but rather deals with an industrial product, e.g., hardness of steel, insulation used in transformers, etc., the appropriate user participant is the industrial user of the product in question.

iii. *User—Government.* Where the national standards activity in question is likely to

that reflect a higher level of safety than can be achieved by a standard covered by and developed in accordance with this policy.

*The most commonly used method for standards development in achieving this objective is use of a national standards committee, but other methods which achieve a substantial degree of acceptance of the standards should also be recognized.

result in a standard that may become the basis for a government regulation or procurement action, the relevant government agency representative may become one of the user participants.

e. *Consumer Participation.* Representative consumer views should be actively sought and fully considered in national standards activities. Wherever possible, consumer participants with the requisite technical knowledge should be included as active, but not necessarily the sole, consumer participants. Consumer participation may come from either individuals or representatives of organized citizen groups, or both.

f. *Records.* Records of national standards development activities should be prepared, maintained and be accessible to interested parties. Such records should include, but not necessarily be limited to, the status and history of the project, reports of meetings, including discussion, disposition of dissenting views, rationale for key variables and wordings, etc.

3. *Private Sector Commitment.* The private sector should take all necessary and reasonable steps to ensure that, to the maximum extent possible, the Nation's standards needs are identified and met through the voluntary standards system.

4. *Government Encouragement.* It is appropriate and essential that governments take all necessary and reasonable steps to encourage responsible private sector activities to meet national standards needs.

5. *Government Participation.* Government(s) should actively participate in private sector national standards activities that are consistent with this policy to make their needs known and to help ensure that, where necessary, the standards developed will be in a form suitable for government use.

6. *Consumer/Small Business Funding.* It is in the best interests of both the public and the private sectors to ensure that a reasonable source of funds is available to consumers and small businesses to encourage their participation in national standards activities that are consistent with this policy and to offset their costs where necessary. Governments should be the primary, but not the exclusive, source of such funds.

7. *Minimizing Duplication.* In the interest of efficiency and cost-effectiveness, governments should not undertake development of new standards where suitable national standards already exist or are nearing completion unless an evaluation by government indicates that the existing standard is inadequate. Where such an evaluation indicates that changes in either the format or substance would make an existing national standard suitable for government use, the government should cooperate with the original sponsor of the standard to bring about the desired changes.

8. *Performance Standards Preference.* Because of concerns about the effects of standards on innovation and competition, preference should be given to the development and use of national standards which tend towards specifying performance rather than detailed design requirements. Design standards should be limited to those circumstances where the needs of interchangeability, the clarity of objective, and the nature of the attributes requiring measurement cannot be expressed in terms of performance without extensive delays for technological development or at obvious increased costs.

9. *Standards and Technological Innovation.* Any organization or agency, public or

private, that initiates, develops, adopts, or uses national standards should take all necessary steps to ensure that: (1) such standards reflect, if not encourage, the application of the most advanced feasible technology, and (2) they are kept current and adequately upgraded to encourage technological innovation.

10. *Standards Maintenance.* Any organization or agency, public or private, that initiates, develops, adopts, or uses national standards should incorporate appropriate procedures to ensure that each such standard is reviewed at periodic intervals no longer than five years and is either reaffirmed, amended, or revoked as a result of such review. Having once published a standard, organizations or agencies should adopt procedures such that the relevant board, committee, or council considers proposals to amend procedures or standards at the next regularly scheduled meeting of the relevant body.

11. *Forecasting and Measurement.* The public sector should assume the primary, but not the exclusive, responsibility to encourage and support cooperative research in standards theory and methodology, especially that pertaining to forecasting and measuring various effects of standards (e.g., economic impact on commerce and consumers; quantitative changes in health, safety, and environmental factors; risk-benefit evaluation techniques; methods of ensuring equity in committee composition, etc.).

12. *Federal/State/Local Government Cooperation.* Governments, in their standards activities, should establish cooperative mechanisms to ensure that the public health, safety, and general welfare are adequately protected while at the same time minimizing undue burdens on interstate commerce. To this end, governments should take all necessary and reasonable steps to promote as much uniformity as practical in the establishment of mandatory requirements.

V. POLICY—PART 2—HEALTH, SAFETY, AND ENVIRONMENT

Recognizing that the public and private sectors each has an important contribution to make, it is in the national interest to have a constructive cooperative relationship between them in the areas of health, safety, and environment.

1. *Public Sector Role.* Government departments and agencies should take all necessary and reasonable steps to:

- Identify and publish their priority standards needs.
- Encourage, cooperate with, and actively participate in relevant national standards activities that are consistent with this policy.
- List all relevant national standards that have been prepared in accordance with this policy.
- Ensure that the following steps will be taken prior to, and as a prerequisite of, any determination that a mandatory standard may be required.
- Technically evaluate all relevant listed standards.
- Assess the marketplace for voluntary conformity with such standards.
- Evaluate the suitability of such standards for use as the basis for a mandatory standard (where necessary, encourage the originating standards-writing organization to revise the standard, with government cooperation, to suitable form).
- Specifically consider, and make formal findings with respect to the technical, mar-

ketplace and suitability reviews before deciding whether a mandatory standard will be required.

2. *Private Sector Role.* The private sector should take all necessary and reasonable steps to:

- Identify and use all available data in determining its view of priority standards needs, as well as cooperate with governments to aid government in setting priority standards needs.
- Initiate and actively pursue national standards activities in a manner consistent with this policy in areas of its high priority.
- Cooperate with and support national standards activities that are consistent with this policy and that are designed to meet government-identified priority standards needs.

VI. POLICY—PART 3—GOVERNMENT PROCUREMENT

1. *Avoid Duplication.* National standards to meet government procurement needs should be developed by governments only in those instances where private sector standards development efforts are not responsive in a reasonable, efficient, and timely manner to the demonstrated government needs.

2. *Standards Preference.* National standards which are prepared in accordance with this policy should be given preference over other standards for use by government(s) to meet their procurement needs.

VII. POLICY—PART 4—ORGANIZATION/ APPEALS

1. *Centralized Public Sector Focus.* There should be established, or identified, within the Executive Branch of the Federal Government, an entity to serve as the government standards coordinating center. It should have the principal responsibility for the coordination of Government activities covered by this policy. Such a center should have primary responsibility to:

- Establish criteria to determine eligibility of private sector standards activities for Government support.
- Assist, upon request, the regulatory agencies in their evaluations of national standards to determine their suitability for use by the Government.
- Provide the leadership to establish criteria and information by which individuals with the greatest governmental expertise can be readily identified so as to encourage their voluntary participation in the appropriate private sector standards writing groups.
- Serve as a catalyst to stimulate and aid Federal agencies in identifying and publicizing standards priority needs.
- Provide the primary Government stimulus to encourage and support cooperative research in standards theory and methodology, especially that pertaining to forecasting and measuring various effects of standards.
- Provide the guidelines for the disbursement of Government funds available for financial aid to private sector standards activities to offset consumer and small business participation costs when and as required.
- Work closely and cooperatively with the private sector standards coordinating center to ensure that all of the nation's standards needs are clearly identified and met in a timely fashion.
- Establish and operate a suitable appeals mechanism as called for in VII(3) of this policy.

2. *Centralized Private Sector Focus.* There should be established, or identified, a private sector organization to serve as the private sector standards coordinating center. This organization should have the primary responsibility for the coordination of private sector activities covered by this policy. In carrying out these responsibilities, it should:

- Coordinate private sector standards preparation and approval procedures and encourage conformity with this policy by private sector standards organizations writing standards for products, systems and services identified as being national (or international) in scope.
- Provide for meaningful participation in all of its major boards and councils, by the major affected interests, including government and consumers.
- Provide a mechanism, or mechanisms, for confirming whether or not a national standard has been prepared in accordance with this policy.
- Not compete with standards writing organizations. Rather, it should, having identified the need for a particular standards project, encourage qualified organizations to accept the project and move toward development of a national standard in a manner consistent with this policy as expeditiously and as effectively as possible.
- Develop a broad and adequate financial base that is of such a nature that the center is reasonably independent of financial pressures of any single societal group of interest.

f. Work closely and cooperatively with the Government standards coordinating center to ensure that the Nation's standards need are clearly identified and met in a timely fashion.

g. Serve as the recognized and designated representative of the United States in international, nontreaty, standards-setting bodies.

3. *Appeals Mechanisms—*a. *Initial Appeals.* Both the public and the private sector standards writing activities should include realistic and identifiable appeals procedures for those interests or individuals who believe they have been, or will be, disadvantaged by the standard in question, or who question the adherence to established procedures, or disagree with the technical content of the standard.

b. *Final Appeals.* The Government standards coordinating center established by VII (1) of this policy, should establish and operate an appeals mechanism where interested parties can pursue procedural, as well as substantive, complaints arising from private sector standards activities. As a prerequisite to entering the Federal appeals process, the complaining party should first exhaust his initial appeal rights within the private or public sector, providing such appeals processes exist and they meet generally recognized criteria of fairness and due process. If the Federal process finds that the complaint has merit, the complaint along with a complete record of the Federal appeal shall be returned to the relevant standards writing organization for a timely resolution.

VIII. DEFINITIONS

1. *Standard.* A prescribed set of rules, conditions, or requirements established by standards setting bodies, concerning definitions of terms; classification of components; specification of materials, performance, or operations; delineation of procedures; or measurement of quantity and quality in describing

ing materials, products, systems, services, or practices. (For convenience in the text of this policy, we refer to standards for "products, systems and services" as being inclusive of the above.) The word "standard" does not include federal, state or local laws or regulations enacted to adopt or reference a standard.

2. *National.* The word "national" is used in this draft in a broad sense that is inclusive of both the private and public sectors. Further, the word "national" is used to indicate that the total standards preparation resources of the U.S. constitute a national capability, a capability that is not exclusively public or private.

3. *National Standard.* A standard which has, or could reasonably be expected to have, a significant effect upon a substantial number of U.S. citizens. This term does not include what are commonly termed "company" standards, nor does it include those industry standards which have little or no significance outside of that industry. It includes standards whose acceptance is recognized on a national basis.

4. *Performance Standard.* Describes what a product does or what one may do with a product. The word performance may or may not mean "levels of performance."

5. *National Standards Capability.* The total of all resources of both government and private standards writing and development groups and related organizations and agencies.

6. *Determination of Governmental Interest.* A standard is considered to be of governmental interest when it serves to support or implement programs established by law or regulation and/or supports or is necessary for continuing government functions (e.g., programs established for protection of the public against product or environmental hazards, for consumer protection, or for governmental procurement programs).

APPENDIX NO. 1

NSPAC MEMBERS' INDIVIDUAL DISSENTING VIEWS

Dissenting Views of David A. Swankin, Swankin & Turner

I believe that the draft "Recommended National Standards Policy for the United States" contains many basic principles that I endorse, and that I believe most consumer advocates would endorse. Particularly am I in support of the principles of openness, consumer participation, committee balance, and independent appeals. Incorporation of these concepts are vital if there is to be widespread acceptance of this policy statement.

There are, however, a number of sections that must be changed before I could lend my support to the document. They are as follows:

(1) *Section IV.2e (Page 4), "Consumer Participation."* This section, as written, is inadequate. It is not enough to "actively seek" consumer views. Consumer input is an essential ingredient, and therefore the section should place an affirmative obligation on standards-writing bodies to include consumer representation. This is now done by law under the Consumer Product Safety Act for standards produced for promulgation by that agency. It should be in the policy. Without such an affirmative duty, then lip service will continue to be paid to genuine consumer input. "We opened the doors to the consumers, but we can't help it if nobody chose to participate" is the familiar

excuse. As was the case with assuring minority rights in employment, very little took place until the concept of affirmative action was imposed. While today some standards writing bodies are much more committed to consumer participation than are others, a policy statement must not allow the lowest common denominator to prevail.

Furthermore, the section as written is deficient because it allows standards writing bodies the option of seeking consumer representation from either organized consumer groups or individual citizens. Both must be included. To ignore the representatives of organized consumer groups, or to make their participation optional, is the same as making labor union representation optional on the grounds that individual workers are included. In this society, organizations carry more weight in most institutional settings, and standards development is no exception.

I cannot support the document without both of the above changes.

(2) *Section IV.6 (Page 5), "Consumer/Small Business Funding."* The draft is correct in calling for funding, but is deficient in two respects. First of all, there is nothing that indicates that the funding must be (a) at adequate levels, and (b) must be free of all strings (other than financial accountability). Second, the draft places the primary responsibility on government as the source of funds for consumer participation. This is, in my opinion, incorrect. Both government and the standards writing community should have equal, primary responsibility. The concept of joint responsibility is not a new one. Without incorporating it here, then once again some standards writing bodies could claim that they would welcome consumer participation, so long as the government paid for it. The government should be responsible for financial assistance, but the private standards groups need to have an equal responsibility. Then and only then will what is otherwise a fatal loophole be closed.

I cannot support the document without this change.

(3) *Section V.1. (Page 7), "Public Sector Role."* This section speaks of government agencies "listing" all relevant national standards that have been prepared in accordance with this policy (subsection C.), and also places the duty on government agencies to evaluate all relevant listed standards for technical adequacy in the event the government agency is preparing to promulgate a mandatory standard.

I believe this section is acceptable only if the word "listing" is understood to contain no indication of adequacy. During the development of this policy statement, some wanted to require the government to treat voluntary consensus standards as "guidelines" for mandatory standards. This would have been totally unacceptable. When government agencies promulgate safety and health standards, they do so under mandate from Congress. Each enabling act is somewhat different, but all set by law the criteria that must underpin the standards they promulgate.

To the extent that it is efficient, time-saving, and just good sense for government regulatory agencies to take into account existing voluntary standards, the concept of "listing" (and thereafter evaluating "listed" standards) is a viable one. However, it must be clearly understood by all that the concept of "listing" can imply nothing at all concerning substantive adequacy for governmental purposes. Any effort to give listed

standards a priority must be rejected. Each must stand on its own substantive merits, on a case-by-case basis.

Thus, while I do not dissent from the words "list" and "listing" being incorporated, it is only with the understanding of the limitations on what the words do and do not mean.

(4) *Section VII.2 (Page 9), "Centralized Private Sector Focus."* The draft policy statement, in Section VII.1 (page 8), calls for a centralized, coordinating public sector focus, without naming the agency that should play such a role. The concept makes sense, and I endorse it. For example, should the Consumer Protection Agency be enacted, it would be the ideal agency to set criteria for funding consumer representation. The National Bureau of Standards might well be the best agency to coordinate cooperative research.

However, I find no good reason that the policy should declare that the private sector be centrally organized under an organization like the American National Standards Institute. If the private sector chooses to create an ANSI, that is well and good. But that is a far different thing than declaring as a matter of public policy that the private sector be centrally coordinated. Quite to the contrary, one might argue that as a matter of public policy the private sector should not be centrally coordinated, since that is a time proven way to concentrate excessive power in a single organization's hands.

The policy declares principles that are intended to apply to individual standards setting groups. It should stop there. The policy should not deal with the organization of the private sector at all.

I cannot support the document with section VII-2 contained in it.

(5) *Section VII-3 (Pages 10-11), "Appeals Mechanisms."* First, the idea of independent appeals mechanisms is to be heartily endorsed. One of the great deficiencies in the voluntary standards system to date has been their absence.

The section, as written, needs a few changes in order to be acceptable.

First, section (a), "Initial Appeals," now applies to both the public and private sectors. It should be limited to the private sector only, since public standard-setting is done under the enabling clauses of legislation which must control.

Second, section (b) places the final appeal in "the Government Standards Coordinating Center." As I stated above, the coordination of the public standards activities is a good idea, but it does not necessarily mean that all coordination will be in a single organization. The Consumer Protection Agency might coordinate consumer input, the National Bureau of Standards might coordinate research, and perhaps the Federal Trade Commission or the Justice Department might best establish or coordinate independent appeals mechanisms.

Thus, the section should not specify who is to operate the appeals mechanism, but only embody the principle.

Dissenting Views of Ruth B. Jones, Consumer

IV(2) footnote 1. "Safety" is only one of the standards about which a certifying organization may be concerned, therefore the phrase "performance (safety, quality, etc.)" instead of the word "safety" alone would include all concerns.

IV(2)e. Consumer participation, to be unbiased, must be free of allegiance, pressure,

or domination from any groups or individuals. Therefore it seems to me that individual consumers who are not members of consumer groups, per se, are needed in standards writing organizations. On the other hand, those who are members of consumers group may present needed collective opinions. Representatives of both types of consumers should be sought on those standards writing committees which are directly related to consumer concerns and/or products.

Dissenting Views of Monte Florman and George Papritz, Consumers Union

The draft of "A Recommended National Standards Policy for the United States" received on January 12, 1978 contains some areas of omission or inadequate treatment, some areas that we think are not suitably in the consumer interest, and at least one area that appears to represent a step backward in the movement to insure uniform development and effective coordination of national standards.

The first section of this commentary will concern itself with these areas. The second section presents our comments on specific parts of the January draft that we think should be modified and usually includes suggested rewording.

Section 1. The January draft of the National Standards Policy is quite incomplete, as there is nothing about testing and certification except the statement that it warranted separate treatment from standardization, even though there is a close relationship between the two. We suggest that if it remains NSPAC's intention to write a policy for testing and certification, this be made known with some indication as to when this will be done or, if such a policy will not be written, provide a statement such as in the first draft of the National Standards Policy (NSP) to the effect that testing and certification should be performed by an appropriate organization independent of those immediately affected by such a program.

The NSP is essentially mute on participation in the development of international standards. Proposed policy in this regard should be expanded.

Guidelines to the content of standards are almost totally missing, e.g., if a standard establishes some minimum level of performance, should that level be attained by most, but not necessarily all, models of the device affected by the standard, currently on the market—or should it be the very minimum consumers appear to have accepted without complaint?

Implementation is an extremely important part of a policy. It has only been touched on very lightly in Appendix No. 3. Without effective implementation the NSP, as indicated in Appendix No. 4, may become "mere platitudes, wishful thinking or contrived window dressing"—(e.g., to counteract Senate Bill S825). We believe the NSP should include for comment, at the least, an organization chart that would lay out a proposed structure. The structure should contain provision for boards or councils that will establish procedures for the management and coordination of national standards programs, criteria for the development, approval and withdrawal of national standards, e.g., similar to ANSI's Board of Standards Review, the Executive Standards Council and the Consumer Council's Standards Screening and Review Committee.

Paragraph 1(d) of the section on Health, Safety and Environment attempts to discourage government from setting manda-

tory standards with which most manufacturers comply. We do not agree with this proposed policy. Such a course is not fair to consumers, some of whom may purchase hazardous products which do not comply with the adequate voluntary standards, only to be injured by them. If a product exhibits a serious potential hazard, or if it has exhibited a record of serious injuries, it should be regulated by a mandatory standard if such regulation will reduce or eliminate the hazard. The government may also wish, and rightly so, to establish mandatory standards on energy usage and other areas. It would be appropriate for the NSP to include a policy statement regarding the conditions under which standards should be mandatory.

Another area which may work to the disadvantage of consumers is the matter of how committee decisions are arrived at. Paragraph IV2(b) "Committee Decisions"—states that decisions "should reflect a substantial agreement by all parties at interest." It then continues to state that "a substantial agreement means more than a simple majority but not necessarily unanimity." This would appear to be a lesser degree of agreement than was contemplated by the La Que report of 1965 (Report of the Panel on Engineering and Commodity Standards of the Commerce Technical Advisory Board) which defined consensus as much more than a simple majority. At the very least this paragraph should be changed to reflect this thinking. Consumer representatives have frequently found that they were the only voices opposing business and allied interests, only to lose out in committee decisions. It is very important that balance of interests be carefully considered and provided within a committee so that the consumer or some other interest will not be in an unfair position. The NSP lists an example of societal interests in Paragraph IV2(c). It should also list what might be considered a proper balance between those interests.

In section VII2(d) it is stated that the standards coordinating center should "not compete with standards-writing organizations." This could be interpreted as an attempt by standards-making bodies to weaken the role of the private sector coordinating center, so that, in effect, they would have the final word on the standards they write—this would appear to be a step backward to what things were like before ANSI was brought into being to replace its predecessor. In CU's judgment the coordinating center should be made stronger rather than weaker. If standards are to be considered truly national the coordinating center should be fully responsible for their final form, and should have full authority to change their provisions in any way necessary to insure that they do, in fact, reflect substantial agreement, without having to wait for the body that originated the standard to do so. The center should also have the authority to convene special standards-writing committees when there are no groups available that it considers competent to write certain standards. This was another recommendation of the La Que report of 1965. With strong authority, the private sector coordinating center can move to achieve the goals of the national standards policy in an effective, efficient and timely manner.

Section 2. Detailed Comments.—1. *Re I Introduction.* Standards are not instruments by which buyers and sellers define mutual needs and/or obligations. A standard cannot

be said to define a seller's "needs" or a buyer's "obligations." The first sentence of the introduction is really a description of a sales contract. Adhering to a dictionary definition, a standard is "Something established by authority, custom, or general consent as a model or example." We suggest the Introduction be revised as follows:

"Standards are instruments (documents or objects) which define the characteristics with which a product or service must comply. These characteristics may include dimensions, materials, relationships, nomenclature and areas of performance, safety, environmental aspects and test methods by which compliance or non-compliance may be determined. Standards for products may also include requirements for user instructions and safety precautions. Standards may also be instruments by which government may assert its regulatory authority on behalf of consumers to enhance their personal health, safety, general well being and to help establish an orderly marketplace." A standard should be developed by a properly constituted group having the necessary qualifications.

2. *Re III Scope, I.* The last sentence states "This policy does not cover the process of certification." If it remains the intent of the Committee to draft a policy document in the near future, reference should be made in this paragraph to that intent. If the Committee will not draft a certification policy document soon, or not at all, then the NSP should include statements similar to those contained in the first draft of the NSP, i.e., "Membership in groups or organizations sponsoring, promulgating, or administering national certification programs should be open to all interested parties. There should be no undue financial barriers to participation," and, "Certification Independence—the function and responsibility of determining whether any product is to be certified under any program involving national standards should be performed by an appropriate organization independent of those immediately affected by such program."

3. *Re IV Part 12(a) Openness.* This paragraph needs more amplification in regard to getting timely notice of impending standards-writing activity to consumers—direct action should be taken such as placing notices in media to which consumers are likely to be exposed, making direct communication with individual consumers and leaders of consumer groups, etc.

4. *Re IV Part 12(b) Committee Decisions.* In the 5th line, "means more" should be changed to "means much more" since a substantial agreement does entail much more than a simple majority. Greater emphasis should be placed on the need to resolve substantive negatives, e.g., revise the last sentence to: "It also includes the requirement to consider and resolve, if at all possible, all substantive negative comments." The paragraph should also be modified to make it clear that committee decisions shall include the responses (obtained by mail) of members who may not have been in attendance at a particular meeting of the committee.

5. *Re IV Part 12(c) Balance-Rules and Procedures.* The first sentence should be extended by adding "right from the beginning." It is generally much easier to have one's views reflected in a proceeding if one participates from the beginning. The second sentence should be amplified to include "small groups of interests" in addition to "any single interest."

6. *Re IV Part 12(d)(ii) User-Industrial.* Standards for industrial products can deter-

mine what is readily available to manufacturers and, therefore, can affect the design of end products and the consumer's interest. Consumer participation should be insured for an industrial product (e.g., insulation, steel, controls) that may end up either as a component or as a material of which a consumer product is made.

7. *Re IV Part 12(a)(iii) User-Government.* The desire for government participation in standards-development work, where the standard may become the basis for government regulation or procurement action, should be made more positive, e.g., by changing "may" in the 5th line to "shall be invited to." In the event the standard is likely to become the basis for a government regulation, the government representative should not be considered a consumer or user when determining if proper balance between the various interests has been achieved in the make-up of the standards committee.

8. *Re IV Part 12(e) Consumer Participation.* This paragraph should be amplified to make it known that consumer participation is sought for the full duration of the activity and that, when it isn't possible to find consumers with suitable technical knowledge, other technical persons without bias toward the industry or business that is the subject of the standardization activity shall be selected by consumers for consultative use by the non-technical consumers. Revisions are suggested as follows:

(a) Add to the end of the second sentence (6th line of paragraph) "—throughout the standard development activity."

(b) Add to paragraph: "If consumers with suitable technical knowledge are unavailable, technical assistance that is not biased toward the industry or business that is the subject of the standardization activity shall be selected by the non-technical consumers for consultation."

9. *Re IV Part 12(f) Records.* It should be specified that copies of the records shall be made available for a nominal fee. It should not be necessary for interested parties to travel long distances to consult the records at the offices of the standards-making organization.

10. *Re IV Part 1 (3) Private Sector Commitment.* Government should bear final responsibility for the protection of all citizens in certain areas, including health, safety, and the environment. The paragraph should be expanded by adding:

"However, when government is undertaking or sponsoring the development of a mandatory standard, the private sector should participate to the fullest extent in the government's activity and be careful not to conduct a parallel activity."

11. *Re IV Part 1 (5) Government Participation.* Government participation shouldn't be desired only in regard to government procurement. It is suggested that the following be added: "Government participation should also be invited where by wealth and quality of information, technical resources or other advantages, government's participation may be able to enhance the quality of a standard."

12. *Re IV Part 1 (10) Standards Maintenance.* It is important that it should be possible to revise standards on a timely basis whenever the need is indicated, e.g., as the state of the art changes—(rapidly for some standards). Therefore, to avoid undue delay of potentially worthwhile revisions of a standard, in the event a committee's regular

meetings are held on an infrequent basis, this paragraph should be extended as follows: "If the committee holds infrequent regular meetings its procedures should include a mechanism by which a special meeting may be convened on relatively short notice."

13. *Re V Part 2 (1) (d) Public Sector Role in Health, Safety and Environment.* This section lists the steps that government should take before determining that a mandatory standard may be required. These steps contain the underlying view expressed by some manufacturers and standards-making bodies that there is no need for mandatory standards where adequate voluntary standards are available, especially if these voluntary standards are adhered to by a substantial segment of industry. It must be noted that manufacturers need not comply with a voluntary standard and those who do comply need not comply 100% of the time. It is conceivable, too, that a new manufacturer or importer may enter a product area with large scale production of a dangerous item. The steps listed have no real bearing on the question of the need for a mandatory standard. Such a need is (unfortunately) usually determined by injury statistics or the potential of the product for creating serious injury (in the near future, environmental aspects, including conservation of energy and other natural resources, should be areas for mandatory standards). The steps listed in this section have a bearing on determining whether a private sector (voluntary) standard, modified if possible, would be suitable as a base for a mandatory standard. Therefore "d" should be changed to the following:

"In the event that a mandatory standard is required, insure that the following steps will be taken prior to, and as a prerequisite of, any determination that a voluntary standard may be suitable as a base for a mandatory standard."

"(d) (ii)" "Assess the marketplace for voluntary conformity with such standards" should be deleted as it has no bearing on whether or not the content of a voluntary standard is suitable as the base for a mandatory standard.

"(d) (iv)" should be modified by deleting "marketplace" and changing the last line to "voluntary standard will serve as a base for a mandatory standard."

14. *Re V Part 2 (2) (b) Private Sector Role.* This subparagraph specifies that the private sector should initiate and pursue standards activities in areas of their high priority. To the extent that it is possible to do, the private sector should also pursue and initiate standards-development activities in areas of lower priorities.

15. *Re VII Part 4 (1) (b) Centralized Public Sector Focus.* The government standards coordinating center, in addition to assisting regulatory agencies, should also assist procurement agencies to determine the suitability of private sector standards for use by the government. As necessary, this center should assist both agencies in modifying existing standards or developing new ones to meet their needs.

16. *Re VII Part 4 (1) (c).* This section should be expanded to give the government standards coordinating center the responsibility for insuring that a specific government agency or agencies (as necessary) is/are represented in appropriate private sector standards-writing groups.

17. *Re VII Part 4 (1) (d).* This section should be expanded to give the government

center the responsibility, when standard developing activity is decided upon for coordinating the efforts of the various government agencies should more than one be involved.

18. *Re VII Part 4 (1).* Experience may show that the duties listed for the government standards coordinating center are incomplete. Therefore we suggest an additional subparagraph as follows:

"i." "Establish any other procedural criteria that may be deemed necessary as experience with policy is gained."

19. *Re VII Part 4 (2) (d).* This paragraph states that the private sector standards coordinating center should not compete with standards-writing organizations. It should be deleted. The coordinating center should be responsible for insuring that all national standards needs are properly met on a timely basis and therefore it should assume the task of developing and revising standards whenever it appears that this will not get done as expeditiously and as effectively as would be desirable.

20. *Re VII Part 4 (2) (g).* This section should be expanded to give more details/guidelines as to how the private sector coordinating center will function relative to the development of international standards.

21. *Re VII Part 4 (3) (a) Appeals Mechanisms.* This paragraph should be expanded so that the appeals procedure includes the hearing of complaints from interests or individuals who believe they have been or will be disadvantaged because of the non-existence of a standard for a product.

It is recommended that this paragraph include details as to what would constitute an acceptable appeals mechanism, e.g., the "Draft ANSI Requirements for Establishment of American National Standards."

APPENDIX No. 2

NSPAC MEMBERSHIP

Dr. Ernest Ambler, Director, National Bureau of Standards.
Mr. William T. Cavanaugh, Managing Director, American Society for Testing and Materials.
Mr. Angelo Cefalo, Assistant to the President, International Association of Machinists.
Mr. Dennis Cherot, Director, Office of Consumer Action for Newark, N.J.
Mr. Kern E. Church, Deputy Commissioner and Chief of Engineering, Department of Insurance, North Carolina.
Dr. Howard I. Forman, Deputy Assistant Secretary of Commerce for Product Standards, U.S. Department of Commerce.
Dr. Aaron Gellman, President, Gellman Research Associates.
Mr. Joseph Gilbert, General Manager, Society of Automotive Engineers, (Mr. Roy Stoner—alternate).
Mr. Richard Goodemote, National Manager for Merchandising Development and Testing Labs, Sears Roebuck & Co. (Mr. Norman Pugh—alternate).
Dr. Robert Harris, Environmental Defense Fund.
Mr. S. F. Harrison, Executive Director, The National Board of Boiler and Pressure Vessel Inspectors.
Ruth Botz Jones (Mrs. Rudard A.), Urbana, Ill., Consumer.
Ms. Rhoda H. Karparkin, Executive Director, Consumers Union (Mr. George Papritz—alternate).

¹Non-voting member.

Mr. Byron Lee, Jr., Vice President, Commonwealth Edison.
 Mr. Herbert Liebenson, Staff Vice President—Government Affairs, National Small Business Association.
 Professor Kenneth L. McFate, Department of Agricultural Engineering, University of Missouri.
 Mr. W. Robert Moore, Senior Vice President, Chemical Bank of New York (Mr. Jim Booth—alternate).
 Mr. Joseph T. Morris, Executive Vice President, National Association of Photographic Manufacturers.
 Mr. Michael J. O'Conner, Senior Consultant, The Washington Management Group.
 Ms. Alfreda J. Riley, Greater Opportunities Industrial Center, Consumer Education Office.
 Mr. Frank H. Roby, President, Sola Basic Industries (Mr. William Irrgang—alternate).
 Mr. Fred Shippee, Director of Technical Services, American Apparel Manufacturers Association.
 Mr. Erle I. Shobert, II, Vice President—Technology, Stackpole Carbon Co.
 Mr. Arthur Spiegelman, Vice President Engineering, American Insurance Association.
 Mr. Richard Stevens, Assistant Vice President, National Fire Protection Association.
 Mr. David A. Swankin, Swankin & Turner.
 Mr. Baron Whitaker, President, Underwriters Laboratories, Inc.
 Mr. H. P. Weinberg, Senior Vice President, Laboratory Director, Value Engineering Laboratory.
 Mr. Philip Smith—Designated Liaison, Office of Science and Technology Policy, White House.
 Richard O. Simpson, NSPAC Program Administrator.

APPENDIX No. 3

STEPS REQUIRED TO IMPLEMENT THIS NATIONAL STANDARDS POLICY

This is included to call to the attention of the reader that the NSPAC will, as a part of the final document, include a plan for implementation. Although the details of such a plan must necessarily await the completion of the National Standards Policy itself, we invite your comments and suggestions as to steps for us to consider.

APPENDIX No. 4

BACKGROUND—WHY A NATIONAL STANDARDS POLICY IS NEEDED

Standards are instruments by which buyers and sellers define their mutual obligations. They also are instruments by which government asserts its regulatory authority on behalf of the health and safety of citizens. As such, standards are essential for the orderly and efficient conduct of domestic and international commerce and for the protection of the economic and social interests of sellers, buyers, and consumers—both individual and industrial.

Standards can favorably or unfavorably affect consumer costs, domestic and international trade, and the use of scarce materials. They are significant media for technology transfer among relevant groups, both within the U.S., and between the U.S. and other countries. They also serve to introduce technology into the social value system of the society.

While the United States has a sizeable capability—public and private—for developing standards, it lacks a national policy by which these resources can be most effectively, economically, and equitably employed in the national interest.

Everyday experience suggests that "policy" is often mere platitude, wishful thinking, or contrived window dressing. At the same time, it is necessary to start with some basic premise, fundamental concept, or commitment in principle. In the absence of a national policy, involved and interested organizations, government representatives, and others are at a loss to know exactly what the outlook, vis a vis standards, of a nation is. The strife, confusion, and confrontation surrounding standards matters in the last few years of U.S. history may well reflect this lack of an agreed-upon national standards policy.

A nation's "thinking" translated into words is "policy", and policy implies commitment.

A policy statement is an expression of the nation's point of view and degree of commitment.

A national standards policy also implies a definite course or method of action to be pursued.

A national standards policy should generate, foster, and maintain a basis or series of guidelines under which various organizations and people which make up the nation's standards capability could develop consistent policies and procedures. Formulation of policy is an occasion for national self-analysis—it should be repeated periodically.

This document is intended to provide a vehicle for bringing the strengths of the public and private sectors to bear cooperatively upon our Nation's standards needs.

APPENDIX No. 5

EXPLANATORY REMARKS

We have included in this appendix explanatory remarks that we hope will aid the reader in understanding what is intended by the statements in the text. For convenience, the remarks below are indexed using the same numbering system in the recommended National Standards Policy text.

Also, the NSPAC recognized the importance of the testing and certification process to the U.S. economy, but consciously decided to exclude these subjects from this policy. Although the close relationship between standardization and certification was recognized, it was felt both were important enough to warrant separate treatment.

III. Scope

1. *Products, etc.* This policy relates to products, systems, and services as distinct from physical phenomena such as temperature or pressure. It covers items acquired or fabricated by the government except government-unique items such as military or space hardware.

2. *Organizations and Agencies.* Our intention was to include in the scope all national standards activities and all organizations to the extent that they are engaged in writing national standards. Please note the definitions in section VIII of National Standards. We did not intend to include within the scope of this document standards activities with limited or localized impact, nor, as previously explained, those concerned with physical phenomena which are normally within the province of the National Bureau of Standards.

IV. (2)(a-f) Openness, Balance, Consumers, Etc.

These six paragraphs, collectively, state that all who are interested in participating in national standards writing efforts should have a reasonable opportunity to do so. The NSPAC recognizes that the issue of how to "best" identify, and bring into the standards process, the consumer/citizen views is still open to experimentation and discussion. It is our intent not to rigidly structure the NSP in this respect but to encourage and ensure meaningful citizen input where required in such a form and manner as to enhance, not hinder, the development of needed national standards. The reader's comments are particularly solicited on this subject.

IV. (2)(f) Records

Most, but not all, standards organizations follow this paragraph with varying degrees of completeness. What is being suggested is a kind of standards legislative history. Such information will be essential to the orderly handling of appeals and its existence may well serve to minimize the number of appeals. This is not likely to add additional unnecessary paperwork in the view of the NSPAC.

IV. (5) Government Participation

This statement is based on the premise that objects cannot be bought, manufactured, or used without a common baseline of at least form, fit, and function. Since the Government is the largest procurer of goods and services, it has a vital interest in standards. This interest is further increased by its regulatory responsibilities.

IV. (6) Consumer/Small Business Funding

This paragraph recognizes the fact that to obtain the input of these interests, it may well be necessary to provide special funding considerations. It also recognizes that society, through government, should be the primary source of funds.

IV. (8) Performance Standards Preference

We believe this paragraph states a generally accepted view and only note that it is much easier to talk about performance standards than it is to write them. If this statement sounds as if it is hedged, that is true; because, we think we should avoid any statement that indicates that "pure" performance standards are practical. But standards can be written to emphasize performance and function rather than design details and composition. What we have in mind is a statement to the effect that standards should not be so prepared that they can constitute a tool that can be used to discriminate adversely against materials, products, systems, and services that are equally satisfactory and among which the user should be able to freely choose in order to obtain satisfactory results. And standards should not be so constructed as to serve as a barrier to the introduction of solutions of novel design or composition that will perform equally as well as those of the sorts of compositions and designs that were known to exist at the time the standard was adopted.

IV. (9) Standards and Technological Innovation

Although the statement may seem self-evident, it is fact that many people believe a major problem in the U.S. is that all such bodies are not following these concepts—

particularly where the standards in question are Government-mandated standards. To guard against this problem, the FDA requires that medical devices be manufactured and tested in accordance with practices abreast of current technology.

IV. (10) Standards Maintenance

This paragraph is intended to be a standards "sunset" clause.

IV. (11) Forecast and Measure

We will probably not develop the needed methodologies without a government push. Also, the benefits of this research would be of broad societal benefit, domestically and internationally.

V. POLICY—PART 2—HEALTH, SAFETY, AND ENVIRONMENT

1. *Public Sector Role.* Many people have observed that when the government assumes legislative authority in a particular field, private initiative tends to dry up. This section, if followed by regulators, should go a long way towards stimulating responsible private efforts. Please also note that this article applies to local governments as well as the Federal Government.

VII. POLICY—PART 4—ORGANIZATIONS/APPEALS

1. *Centralized Public Sector Focus.* A major complaint over the past few years has been the lack of a central focal point in the Federal Government for standards matters. Hence, the above. You, the reader, should consider whether we should recommend where this focal point should be located. A prime consideration should be to establish not only a central, but a stable and continuing, standards coordination capability.

2. *Centralized Private Sector Focus.* Under paragraph VII (1) of this policy, we call for a government standards coordinating center because it was needed and did not exist. This paragraph calls for a counterpart organization in the private sector. The NSPAC is well aware that the American National Standards Institute (ANSI) exists and is today performing most, if not all, of the responsibilities identified on this part of the policy. The NSPAC consciously decided not to identify ANSI as the needed private-sector standards coordinating center. However, this fact should not convey to the reader any value judgment with respect to ANSI. Rather, we solicit your views and recommendations.

VII. (2)(c)

There are three ways to verify "national consensus" presently recognized by ANSI. The reader might keep in mind whether you believe this policy should somehow distinguish between the three methods.

VII. (2)(d)

This paragraph suggests that the coordinator should not compete with those being coordinated. You should decide for yourself whether the present American National Standards committees constitute a writing of standards by ANSI—if you wish to recommend ANSI as the private sector standards coordinating organization. The NSPAC would appreciate your thoughts and suggestions.

VII. (2)(e)

It probably goes without saying that the private-sector national coordinator should be financially independent to allow for independent decisions. It also goes without

saying that it is easier to suggest the above than it is to make it a reality. The NSPAC solicits your views as to how to accomplish this.

VII. (3) Appeals

The word "identifiable" is a key word in this paragraph. Past history indicates that much of the confusion and confrontation may exist not because appeals procedures are not available, but rather, because very few are aware that they exist. Some believe that for appeals procedures to be "realistic", they should provide for an impartial body of competent individuals not employed by the standards writing organization.

DEPARTMENT OF DEFENSE

Department of the Army

ARMY SCIENCE BOARD

Notice of Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee meeting:

NAME OF COMMITTEE: Army Science Board.

DATE OF MEETING: 2-3 March 1978.

PLACE: Room 2E715A, The Pentagon, Washington, D.C.

TIME: Thursday, 2 March 1978, 1000-1600 hours, Friday, 3 March 1978, 0930-1330 hours.

AGENDA:

2 March (Thursday)

1000-1030 Welcome
 1030-110 Keynote address
 1100-1130 Army Goals
 1130-1220 Luncheon
 1330-1400 Free time
 1400-1430 Personnel situation in the Army
 1430-1515 Army operations center
 1515-1600 Mission and Capabilities of Concepts Analysis Agency

3 March (Friday)

0930-1000 Operational requirements
 1000-1030 Army research and development mission
 1030-1100 Major research thrusts
 1100-1130 Mission and Capabilities of Operational Test and Evaluation Agency
 1130-1330 Luncheon

This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. Any additional information concerning the meeting may be obtained from Dr. Joseph H. Yang, Executive Direc-

tor, Army Science, OASA(RDA), Room 3E390, The Pentagon, Washington, D.C. 20310.

JOSEPH H. YANG,
Executive Director.

DEPARTMENT OF DEFENSE

Office of the Secretary

DEFENSE INTELLIGENCE AGENCY SCIENTIFIC ADVISORY COMMITTEE

Closed Meeting

Pursuant to the provisions of subsection (d) of section 10 of Pub. L. 92-463, as amended by section 5 of Pub. L. 94-409, notice is hereby given that a closed meeting of a panel of the DIA Scientific Advisory Committee will be held as follows:

Monday and Tuesday, March 13-14, 1978.
 Los Alamos Scientific Labs, Los Alamos, N. Mex.

The entire meeting, commencing at 0900 hours each day, is devoted to the discussion of classified information as defined in section 552b(c)(1), Title 5 of the U.S. Code, and therefore will be closed to the public. Subject matter will be used in a study on nuclear weapon technology.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Service, Department of Defense.

FEBRUARY 6, 1978.

[3128-01]

DEPARTMENT OF ENERGY

GEOPRESSURED GEOTHERMAL INDUSTRIAL WORKSHOP

Public Meeting

The U.S. Department of Energy through a contract with CK GeoEnergy Corp. of Las Vegas, Nev. will conduct workshops to present its overall plan for geopressured geothermal resource development, to describe its drilling, completion and testing plans for geopressured wells in the Gulf Coast and to discuss environmental, legal and institutional problems associated with the resource development. Time is allotted for questions following the presentations to allow discussions among participants including members of the Department of Energy, their contractors, oil and gas industry personnel, utility representatives and other interested participants regarding geopressured geothermal resource development. The third workshop meeting of the Environmental Working Group and the Legal and Institutional Working Group will be held February 22 and 23 at the Executive Red Carpet Motor Hotel, 4020 Southeast Freeway at Wesleyan Street, Houston, Tex. Reservations can be made by calling 713-623-4720. The working subgroup meetings described below are open on a space available basis. The February workshop will be organized into two groups which will meet at the following dates with the agenda as follows:

ENVIRONMENTAL/LABORATORY RESEARCH WORKING SUBGROUP

FEBRUARY 22

- 9 a.m.—Introduction and Status of Previous Meeting Action Items.
- 9:15—Brazoria Wellsite Environmental Data.
- 10—Louisiana Environmental Analysis Update.
- 10:45—Hydrothermal Environmental Data Base Applicable to Geopressured Resource.
- 11:15—Discussion of Methods of Acquiring Critical Environmental Data.
- 1:30 p.m.—Travel to Brazoria Wellsite.
- 2:20—Site Tour and Discussion.
- 3:30—Return to Houston Airport.

LEGAL/INSTITUTIONAL WORKING SUBGROUP

FEBRUARY 22

- 10 a.m.—Introduction and Status of Action Items.

- 10:30—Status of General Crude Brazoria Well.
- 11—Wells of Opportunity Permit Problems.
- 1:30 p.m.—Geopressured Resource Leasing Perspective—Delcambre Well.
- 2—Leasing and Royalty Problems.

With respect to public participation in agenda items scheduled above, the following requirements shall apply:

(a) Persons wishing to submit written statements on agenda items may do so by mailing 12 copies thereof, postmarked no later than February 17, 1978, to the Director, Division of Geothermal Energy, U.S. Department of Energy, 20 Massachusetts Avenue NW., Washington, D.C. 20545. Comments shall be directly relevant to the above agenda items.

(b) Information as to whether the meeting has been rescheduled or relocated can be obtained by a prepaid telephone call on February 17, 1978 to Dr. Henry F. Coffey, CK GeoEnergy on 702-739-9630 between 8:30 and 5 p.m. (PDT).

(c) Questions at the working subgroup meeting may be raised by the public only when recognized to do so by the chairman of those meetings.

(d) Seating will be made available on a first-come, first-served basis.

(e) The use of still, movie, and television cameras, the physical installation and presence of which will not interfere with the course of the workshop, will be permitted before and after each day's activities and during any recess. The use of such equipment will not, however, be allowed during the general sessions or panel meetings.

(f) Copies of the final report prepared by CK GeoEnergy will be available at the Department of Energy Public Document Room, 20 Massachusetts Avenue NW., Washington, D.C. 20545, upon payment of all charges required by law.

Dated at Washington, D.C., this 9th day of February 1978.

WILLIAM S. HEFFELFINGER,
Director of Administration.

[FR Doc. 78-4056 Filed 2-13-78; 8:45 am]

[3128-01]

PRIVACY ACT OF 1974

Systems of Records; Proposed Additional Routine Uses for System ERDA 30

AGENCY: Department of Energy.

ACTION: Notice of proposal to amend an existing System of Records.

SUMMARY: Pursuant to section (3)(e)(11) of the Privacy Act of 1974, 5 U.S.C. 552a(e)(11); the Office of Management and Budget (OMB) Guidelines issued thereunder; and OMB Circular No. A-108, September 30, 1975, the Department of Energy (DOE) hereby publishes a notice of proposed addition of routine uses to an existing

System of Records. Notice is hereby given of the proposal by the Department of Energy to amend the routine uses of existing System of Records identified as ERDA 30—Personnel Radiation Exposure Information. A Report on New Systems is not being submitted under 5 U.S.C. 552a(o) with respect to this proposed amendment since it does not alter the purpose for which the System is maintained.

Written comments will be received with respect to this proposal; however, it is the intent of the Department of Energy to operate the System as amended at the expiration of the advance notice period if no comments to the contrary are received.

DATE: Comments by March 16, 1978.

FOR FURTHER INFORMATION CONTACT:

Nancy L. Speck, Office of the General Counsel, 20 Massachusetts Avenue NW., Washington, D.C. 20545, 301-353-4463.

Dr. W. W. Burr, Jr., Deputy Director, Division of Biomedical and Environmental Research, 20 Massachusetts Avenue NW., Washington, D.C. 20545, 301-353-3153.

SUPPLEMENTARY INFORMATION:

Background. The System to be revised was established by the former Energy Research and Development Administration as ERDA 30. Public notice of the existence and character of the System was last previously published on September 30, 1977 (42 FR 53466-68). The authority to maintain ERDA 30 was transferred to the Department of Energy, effective October 1, 1977, by notice published in the FEDERAL REGISTER on October 11, 1977 (42 FR 54856). The System will continue to be known as ERDA 30 until a consolidated DOE Systems Notice is developed and notice of any consequent changes is published.

Discussion. The Department of Energy proposes to amend ERDA System 30 to add routine uses that would allow the release of information contained in the System to the Department of Defense, the Center for Disease Control (HEW) and the National Academy of Sciences, for the purpose of conducting epidemiological studies and other follow-up activities relating to the health effects of radiation on individuals exposed to ionizing radiation.

The Department believes that the proposed uses are consistent with the purposes for which the information is collected and maintained. The Department, and its predecessor agencies, have, since the inception of the atomic energy program, collected radiation exposure information for monitoring purposes, and, in connection with the monitoring, have conducted analytical programs designed to assess radiation

impact on human health and to determine maximum safe levels of exposure. The basic purpose of the program has always been the protection of the health and safety of the individuals involved.

The proposed disclosures to the additional organizations is consistent with this purpose. The need for additional disclosures has arisen recently as a result of growing interest in the effects of radiation exposure on personnel involved in nuclear test detonations. The disclosure to the Department of Defense would allow the Department to identify participating military and military contractor personnel and their respective exposure levels, and to use the information for follow-up purposes (including litigation). Disclosure to the Center for Disease Control and the National Academy of Sciences would allow those organizations to conduct follow-up studies on identified military and military contractor personnel as well as other individuals exposed to radiation in connection with nuclear test detonations.

Comments. As provided in section 3(e)(11) of the Privacy Act of 1974 (5 U.S.C. 552a(e)(11)), interested persons are invited to submit written data, views or arguments related to this proposal to Dr. W. W. Burr, Jr., Deputy Director, Division of Biomedical and Environmental Research, 20 Massachusetts Avenue NW., Washington, D.C. 20545.

Comments should be identified on the outside of the envelope and on the documents submitted with the designation "System 30 Amendment." Ten copies should be submitted. Comments should be provided by March 16, 1978. Comments received will be available for public inspection in the DOE Public Document Room at 20 Massachusetts Avenue NW., Washington, D.C. during regular business hours. It is the intent of the Department of Energy to operate this System as proposed to be amended at the expiration of the advance notice period if no comments to the contrary are received.

NOTE.—The Department of Energy has determined that this document does not contain a major proposal requiring preparation of an inflationary impact statement under Executive Order 11821, as amended, and OMB Circular A-107.

(Privacy Act of 1974, Pub. L. 93-579; Department of Energy Organization Act, Pub. L. 95-91; Executive Order 12009, 42 FR 46267.)

In consideration of the foregoing the Department of Energy proposes to amend that portion of the System Notice for ERDA 30 (published at 42 FR 53466-68) pertaining to routine uses, to add the following routine uses:

System name:

Personnel Radiation Exposure Information

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Department of Defense—For the limited purpose of identifying DOD and DOD-Contractor Personnel exposed to ionizing radiation during nuclear testing; and for conducting epidemiological studies of radiation effects on individuals so identified; and for use in litigation between the DOD and any of the individuals so identified.

National Academy of Sciences and the Center for Disease Control (and appropriate HEW management personnel)—For use in conducting epidemiological studies of the effects of radiation on individuals exposed to ionizing radiation.

Issued in Washington, D.C., on February 9, 1978.

WILLIAM S. HEFFELFINGER,
Director, Office of
Administration.

[6740-02]

DEPARTMENT OF ENERGY

FEDERAL ENERGY REGULATORY COMMISSION

[Docket No. ER78-194]

CLEVELAND ELECTRIC ILLUMINATING CO.

Notice of Filing

FEBRUARY 6, 1978.

Take notice that on January 27, 1978, The Cleveland Electric Illuminating Co. (CEI) tendered for filing a Transmission Service Tariff with a proposed effective date of February 27, 1978. CEI states that the proposed transmission service tariff is being filed pursuant to certain conditions included in licenses and permits issued by the Nuclear Regulatory Commission for the Davis-Besse and Perry nuclear power plants.

CEI further states that when the tariff is made effective, CEI will transmit electric power from a supplying utility with which it is interconnected to or for the account of any rural electric cooperative or municipality located within the Combined CAPCO (Central Area Power Coordination Group) Company Territories.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE.,

Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 13, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-3984 Filed 2-13-78; 8:45 am]

[6740-02]

[Docket No. CP78-173]

COLORADO INTERSTATE GAS CO.

Application

FEBRUARY 6, 1978.

Take notice that on January 24, 1978, Colorado Interstate Gas Co. (Applicant), P.O. Box 1087, Colorado Springs, Colo. 80944, filed in Docket No. CP78-173 an application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing additional sales of natural gas to certain of its jurisdictional customers for resale, revision in maximum daily volume obligation to five of its full requirement customers by delivery point as contained in certain service agreements, and for permission and approval to abandon in part its deliveries of natural gas for direct sale to Great Western Sugar Company, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant requests authorization to revise its firm peak day and annual volume commitments for fiscal year 1979 and to make other revisions to the service agreement with certain of its jurisdictional customers as follows:

- (1) An increase in transmission system jurisdictional maximum daily contract demand (peak day gas entitlements) totaling 25,000 Mcf per day,
- (2) An increase in transmission system jurisdictional annual contract quantity (annual entitlements) of 4,772,000 Mcf, and
- (3) Revisions to the maximum daily volume obligations by delivery point as contained in the service agreements with the Town of Keyes, Okla., Northern Natural Gas Co. (Peoples Natural Gas Division), Raton Natural Gas Co., the City of Trinidad, and the City of Walsenburg, both in Colorado.

It is stated that pursuant to Applicant's gas tariff, the proposed 25,000 Mcf peak day entitlement increase would be allocated on a pro rata basis to Applicant's full requirement transmission system customers, and that ninety percent of the increase in peak day gas would be used to serve the re-

quirements of residential and small commercial customers in FERC Priority 1. Almost all of the remaining volume would be allocated to FERC Priority 2 with only 154 Mcf being used for FERC Priority 5. It is said.

Applicant proposes to revise its total annual entitlements to jurisdictional transmission system customers from the current level of 358,414,500 Mcf, as authorized in Docket No. CP77-404, to 363,186,500 Mcf, an increase of 4,772,000 Mcf. It is said. Applicant states that the proposed revisions in annual volumes, to be effective in Fiscal Year 1979, are the result of increased nomination requests from Applicant's jurisdictional customers.

Applicant indicates that five of its full requirement customers, the Town of Keyes, Northern Natural Gas Co. (Peoples Natural Gas Division), Raton Natural Gas Co., the City of Trinidad, and the City of Walsenburg, have requested relatively small increases in the maximum daily volume obligations for certain delivery points into their respective systems. It is stated that the Town of Keyes requires an increase of 8 Mcf to accommodate the peak day entitlement increase proposed herein, and that Raton Natural Gas Co., the City of Trinidad, and the City of Walsenburg must increase their maximum daily volume obligation by 207 Mcf, 158 Mcf, and 40 Mcf, respectively, for the same reason. These are all single delivery point customers, it is said. Applicant states that Northern Natural Gas Co. (Peoples Natural Gas Division), requires revisions, both upward and downward, to the maximum daily volume obligation for five of its eighteen existing delivery points from Applicant's transmission system. It is stated that this is necessary because of a gradual shift in load concentration on Peoples' system caused primarily by growth in residential and small commercial building.

Petitioner indicates that in order to serve its existing requirements in Fiscal Year 1979 and thereafter, as well as those proposed herein, it would be necessary to obtain additional gas deliveries to the Denver area from the Wyoming main line through the facilities proposed in Docket No. CP77-655, and that it would also be necessary to increase air injection at Watkins Junction for thermal control of this gas as proposed in Docket No. CP78-133. The application states that Applicant and Great Western executed an amendment to the direct sales agreement between the parties on July 5, 1974. The application further states that the proposed abandonment of 11,000 Mcf of firm peak day natural gas service, which was effective pursuant to the contract on October 1, 1976, is in part a result of Applicant's meeting with Great Western during the early 1970's when it was notified that low-priority natural gas users would have to

modify their facilities to utilize other forms of energy. It is indicated that Great Western is currently able to burn coal for its boiler fuel needs, and therefore, a firm natural gas entitlement of 12,000 Mcf per day is no longer required and should be reduced to 1,000 Mcf per day, the amount of gas needed to fuel Great Western's lime kiln.

Applicant asserts that the 25,000 Mcf peak day entitlement increase proposed herein results in a net increase of only 14,000 Mcf per day over the currently authorized peak day entitlements, since the proposed increases are partially offset by the 11,000 Mcf of entitlement volume to be abandoned from Great Western, as proposed herein.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 28, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.70). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.70). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, fur-

ther notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Project No. 163]

COLORADO

Order Vacating Land Withdrawal Under
Section 24 of the Federal Power Act

FEBRUARY 6, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977. On December 23, 1977, the Secretary issued an order amending DOE delegation Order No. 0204-1 further delegating to the FERC the authority to take action in this proceeding.

The Forest Service, U.S. Department of Agriculture, has requested that the land withdrawal for Project No. 163 be vacated insofar as it pertains to lands described in the attached Land List, thereby requiring Commission consideration under Section 24 of the Federal Power Act.

The lands lie along or near the Fryngpan River, a tributary of the Roaring Fork River which is tributary to the Colorado River, and are withdrawn pursuant to the filing on April 8, 1921, of an application for preliminary permit for Project No. 163. Notice of the withdrawal was given to the General Land Office (now Bureau of Land Management) by letter dated April 30, 1921.

The applicant for Project No. 163 contemplated construction of an extensive diversion-conduit system with several powerhouses; however, the preliminary permit for the project was revoked on November 20, 1922. The development proposed in Project No. 163 is no longer feasible because features of the Bureau of Reclamation's Fryngpan-Arkansas Project have been constructed in this reach of the Fryngpan River. The Fryngpan-Arkansas Project is adequately protected by a reclamation withdrawal, and the

withdrawal for Project No. 163 no longer serves a useful purpose.

The U.S. Geological Survey has recommended that the withdrawal for Project No. 163 be vacated.

The Commission orders: That the withdrawal for Project No. 163 is hereby vacated insofar as it pertains to the subject lands.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-587]

GEORGIA POWER CO.

Order Conditionally Accepting Settlement
Agreement

FEBRUARY 6, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "savings provisions" of Section 705(b) of the DOE Act provide that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The func-

tions which are the subject of these proceedings were specifically transferred to the FERC by Section 402(a)(1) of the DOE Act.

The joint regulation adopted on October 1, 1977 by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR —, provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above mentioned authorities.

On August 17, 1977, Georgia Power Co. (GPC) submitted a proposed Settlement Agreement with its customers Oglethorpe Electric Membership Corp. (Oglethorpe), the Municipal Electric Authority of Georgia (MEAG), and the Board of Water, Light and Sinking Fund Commissioners of the City of Dalton, Georgia (Dalton) which purports to settle all contested issues in the proceeding in this docket.

GPC tendered for filing on March 31, 1976, proposed changes in its requirements rate schedule (PR-2) which would yield additional revenues of \$14,215,000 for the year ended December 31, 1976. On April 30, 1976, the Commission issued an order in this docket which accepted GPC proposed rates for filing, suspended the rate schedule for three months and permitted it to become effective August 1, 1976, subject to refund. Oglethorpe, MEAG and Dalton began taking service under the PR-2 rate subject to refund on August 1, 1976, January 27, 1977, and June 1, 1977, respectively. Top sheets were filed by Commission Staff on November 1, 1976. On April 12, 1977, a tentative settlement was reached. On August 17, 1977, GPC submitted the instant agreement which was executed by GPC, Oglethorpe and MEAG. Counsel for GPC represented that Dalton concurred in the proposed settlement.

The proposed settlement provides that GPC will file a revised schedule of monthly charges for capacity in four categories: base capacity, intermediate capacity, peaking capacity, and capacity for reserve service. The settlement revenues will reduce the originally proposed increase from \$14,213,000 to \$7,900,000. The proposed agreement provides that GPC will refund to Oglethorpe the requisite portion of the rate collected under the PR-2 rate schedule with simple interest at 7.773 percent per annum for the period August 1, 1976, through May 31, 1977, and 9 percent per annum thereafter. The agreement states that GPC will refund to MEAG and Dalton the requisite portion of the revenues collected under the partial require-

¹ All references to the Commission prior to October 1, 1977, are to the Federal Power Commission; thereafter they are to the Federal Energy Regulatory Commission.

ment rate schedule with simple interest at 9 percent per annum for the period during which each customer took service under the PR-2 rates. The agreement further provides that GPC will not file a further increase in partial requirements rates to be effective prior to March 1, 1978. The settlement rates reflect a rate of return of 9.64 percent with a 13.25 percent return on common equity.

The proposed Settlement Agreement was certified to the Commission on August 18, 1977, and notice of the agreement was issued on August 30, 1977.

On October 28, 1977, Commission Staff filed comments concurring in the settlement with the stipulation that interest on all refunds in this proceeding be computed at a simple interest rate of 9% per annum.

On November 7, 1977, GPC and Oglethorpe filed a joint response to Staff's comments. They stated that the 7.773 percent simple interest rate applies to a "billing procedure" change which would only apply to Oglethorpe. They maintain that the parties intentionally provided for a 7.773 percent interest rate to apply to a portion of the refund not related to the rate level reduction and assumed that this intentional deviation from the standard interest level would be recognized and approved by the Commission.

Section 3.1 of the agreement reflects certain refunds to be made to Oglethorpe. It provides:

3.1 GPC shall refund to OEMC (Oglethorpe) a portion of the revenues collected under PR-2 for the period August 1, 1976 through May 31, 1977 as follows:

Month:	Refund
August 1976.....	\$265,710
September 1976.....	318,851
October 1976.....	318,851
November 1976.....	318,851
December 1976.....	318,851
January 1977.....	329,557
February 1977.....	329,892
March 1977.....	329,892
April 1977.....	329,892
May 1977.....	329,892

Simple interest at 7.773% per annum shall be paid in respect of the refund described in this Section 3.1 from the date of receipt of each payment from OEMC under PR-2 to the date of refund. Payment of the principal amounts and interest set forth in this Section 3.1 shall constitute full satisfaction of the Company's refund obligation arising from the interpretation described in Section 2.2 of this Agreement.

The PR-2 rate as originally filed states that the monthly capacity charge will be based on the customers' estimated peak coincident demand or the actual one hour coincident peak load, whichever is higher during the months of June, July, August and September. The proposed settlement provides for a retroactive monthly adjustment of the estimated capacity charge

V

3
3
1

F
F
1
4

7
8
UMI

based on the customers' actual maximum one hour integrated coincident peak load during the months of June, July, August and September. The amounts listed in Section 3.1 of the agreement for the period August 1, 1976 through May 31, 1977, reflect refunds to Oglethorpe for the difference between the originally filed capacity payments and the revised capacity payments.

GPC and Oglethorpe argue that the 7.773% refund is only applicable to a billing procedure revision and not the rates and that the "Commission's expressed policy of encouraging settlements would be thwarted if negotiated, 'dollars-and-cents' settlements of billing disputes are summarily disapproved." They state that Section 35.19a of the Commission's Regulations contemplates interest on refunds at levels other than 9% in certain instances, and that they have shown this to be such an instance.

Historically, in cases where there was some indication of actual bargaining for a particular refund interest rate during the course of settlement negotiations, the Federal Power Commission applied the settlement interest rate if it was found to be reasonable. However, on December 6, 1976, in Docket No. RM74-18, the Commission issued its Order Denying Rehearing And Further Clarifying Order No. 513-A which stated from that date forward, in applying the interest rate on refunds, it would not distinguish between contested proceedings and settled proceedings. For all settlements filed with the Commission on or after December 6, 1976, the Commission would apply the interest rates set forth in the Commission's Regulations. Section 35.19a of the Regulations provides that after October 10, 1974, interest on excessive rates shall be computed at 9% per annum. In announcing its policy with respect to interest on refunds, the Commission stated:

... [I]t is desirable to limit as much as possible the issues to be negotiated in a settlement situation. The existing Regulations provide the basis for certainty with respect to interest rates. No advantage is seen in providing litigants yet another issue for dispute.

We find that GPC's and Oglethorpe's arguments do not warrant changing this policy with respect to interest rates on refunds. Their argument that Section 3.1 of the agreement merely reflects a billing procedure revision is of no moment. The "billing procedure" change is a rate change which will be incorporated in the tariff sheets and will be applicable to the determination of the capacity charges for Oglethorpe, MEAG and Dalton.

Other than the 7.773 percent rate of interest on refunds presently contemplated by Section 3.1 of the agree-

ment, the Commission finds that the proposed settlement represents a reasonable resolution of all issues in this docket. However, Section 4.4 of the agreement provides in part:

This Agreement is executed on the same explicit understanding and on the further condition that in the event the FPC does not by order accept this Agreement in its entirety, any party having a direct interest in such failure of approval may, at its option, cancel the Agreement in its entirety and withdraw or cause to be withdrawn all pleadings and other filings made with the FPC in connection therewith.

Accordingly, the Commission will condition its approval of the Settlement Agreement herein on the parties' acceptance of an interest rate of 9 percent per annum on all refunds, including those contemplated by Section 3.1 of the Agreement.

The Commission finds: (1) The Settlement Agreement submitted by Georgia Power Co. on August 17, 1977, should be conditionally approved.

(2) The interest rate on all refunds provided for by the Settlement Agreement should be computed at 9 percent per annum.

The Commission orders: (A) The Settlement Agreement submitted by Georgia Power Company on August 17, 1977 is hereby incorporated herein, modified to require interest at 9 percent per annum for all refunds made thereunder, and, as modified, is hereby approved.

(B) In the event that the parties hereto reject the modification of the Settlement Agreement as set forth above, those parties are hereby directed to notify the Commission of such rejection within fifteen (15) days from the date of issuance of this order and, upon such notification, a prehearing conference shall be convened by the Presiding Administrative Law Judge during the week of February 13, 1978 to establish procedures for the hearing of the issues involved herein.

(C) In the event that all parties accept the Settlement Agreement as herein modified, then, within forty-five (45) days of issuance of this order, Georgia Power Co., shall file rate schedules in compliance with the Settlement Agreement.

(D) Within thirty (30) days after compliance submittals are accepted for filing, Georgia Power Co., shall refund amounts collected in excess of the settlement rates with interest computed at 9 percent per annum.

(E) Within thirty (30) days after refunds have been made, Georgia Power Co., shall file with the Commission a compliance report showing monthly billing determinants and revenues under prior, present and settlement rates; the monthly revenue refund; and the monthly interest computation together with a summary of such information for the total refund period.

A copy of such report shall also be furnished to each wholesale customer and to each State Commission within whose jurisdiction the wholesale customers distribute and sell electric energy at retail.

(F) This order is without prejudice to any findings or orders which have been made or which will hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, its Staff, or any party or person affected by this order, in any proceeding now pending or hereafter instituted by or against Georgia Power Co., or any other person or party.

(G) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH P. PLUMB,
Secretary.

[6740-02]

[Docket No. CP77-545]

NORTHERN NATURAL GAS CO.

Petition To Amend

FEBRUARY 6, 1978.

Take notice that on January 30, 1978, Northern Natural Gas Co. (petitioner), 2223 Dodge Street, Omaha, Nebr. 68102, filed in Docket No. CP77-545 a petition to amend the Commission's order of November 29, 1977 (57 FPC —) issued pursuant to section 7(c) of the Natural Gas Act so as to provide for the construction and operation of a 1,250 horsepower compressor unit in lieu of the 1,000 horsepower compressor unit presently authorized for construction and operation near Egan, La., all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

It is indicated that pursuant to the Commission's order of November 29, 1977, petitioner was authorized to construct and operate the Egan gas interconnect and compressor station between transmission facilities of Columbia Gulf Transmission Co. and Trunkline Gas Co. to be located in Acadia Parish, La. Petitioner states that the authorized facilities consist of approximately 2,800 feet of 16-inch pipeline, a measuring station, and a 1,000 horsepower electric motor driven compressor and appurtenances. Petitioner further states that due to the significant role which Egan compressor station would have in the transportation and delivery of its offshore Gulf of Mexico gas to its market, the integrity of this compressor station is most essential.

The petition states that a comparison of the 1,000 horsepower unit with the 1,250 horsepower unit reveals that the 1,250 horsepower electric drive has certain inherent characteristics (addi-

tional insulation and copper) which would result in added reliability of unattended operations at the Egan compressor station, and that heat generated by the compressor and equipment plus high ambient temperatures at the site creates conditions which would increase the degradation of the motor insulation. The insulation and copper in the larger motor would provide added protection against overheating of the motor and the problems associated therewith, and this added protection increases the life expectancy of the driver and reduces the chance of motor winding insulation failure, it is said. It is stated that, depending on the extent of such a failure, service could be interrupted for 1 to 4 months, and that petitioner, therefore, submits that the installation and operation of the 1,250 horsepower motor at Egan compressor station would provide the measure of unattended operating reliability essential for compressor station integrity.

Petitioner states that it has now placed a firm order for the 1,250 horsepower motor and was able to purchase such unit within the estimated cost detailed in the original application; therefore, the estimated cost of the interconnecting facilities would not change as a result of increase in horsepower as proposed herein.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before February 28, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ES78-19]

NORTHWESTERN PUBLIC SERVICE CO.

Application

FEBRUARY 6, 1978.

Take notice that on January 30, 1978, the Northwestern Public Service Co. filed an application with the Commission pursuant to section 204 of the Act and Part 34 of the regulations, for

authorization to engage in negotiations for the sale of up to \$12 million first mortgage bonds and up to 400,000 shares of common stock, par value \$7 per share, pursuant to section 34.1a(a)(4) and 34.2(f)(2) of the regulations under the Act.

Applicant is incorporated under the laws of the State of Delaware, with its principal business offices at Huron, S. Dak., and is authorized to do business in the States of Iowa, North Dakota, South Dakota, and Nebraska.

Applicant indicates that a portion of the proceeds from the proposed first mortgage bond financing will be used to refund \$3,000,000 of the Company's presently outstanding first mortgage bonds which mature in 1978. The remainder of such proceeds, together with the proceeds from the proposed common stock financing, will be used to repay outstanding short-term bank loans, which as of this date total \$14,000,000, with the balance to become treasury funds to be used for the Company's 1978 construction program.

Applicant believes that a negotiated public sale would be advantageous because of the relatively small amounts of first mortgage bonds and common stock involved because of the successful prior negotiated offerings of bonds and of common stock, and because the underwriter will be required to presell the issue to ensure a satisfactory market.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests shall be filed on or before February 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

WYOMING

Order Vacating Land Withdrawals Under
Section 24 of the Federal Power Act

FEBRUARY 6, 1978

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act),

Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR. 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977. On December 23, 1977, the Secretary issued an order amending DOE delegation Order No. 0204-1 further delegating to the FERC the authority to take action in this proceeding.

The Forest Service, U.S. Department of Agriculture, has requested that the land withdrawals for Project Nos. 1021, 1226, 1606, and 1772 be vacated in their entirety, thereby requiring Commission consideration under section 24 of the Federal Power Act. The lands affected by the withdrawals lie within the drainage area of the Bighorn River, in the Bighorn and Shoshone National Forests, Wyo., and are described in the attachment hereto.

Project No. 1021 was a 7 horsepower diversion-conduit development on Middle Creek, a tributary of the North Fork Shoshone River, near the east entrance to Yellowstone National Park, in Park County, Wyo. The Federal Power Commission accepted the surrender of the license for Project No. 1021 by order dated May 13, 1947, after the project was dismantled.

The applicant for Project No. 1226 contemplated construction of a 1,400 horsepower diversion-conduit development on Shell Creek, about 10 miles upstream from the town of Shell, in Big Horn County, Wyo. The application for Project No. 1226 was denied on July 29, 1935. Several diversion-conduit schemes have been proposed in the subject reach of Shell Creek; however, the potential diversion dam and conduit locations are indefinite and flexible.

The applicant for Project No. 1606 contemplated construction of a small hydroelectric project, on a small tributary of the Shoshone River, to light a cabin and surrounding buildings. The application for Project No. 1606 was dismissed by order dated November 5, 1940, because the applicant failed to complete the application.

Project No. 1772 was a 5 horsepower diversion-conduit development on Leigh Creek, a tributary of Tensleep Creek, in Washakie County, Wyo. The Commission accepted the surrender of the license for Project No. 1772 by order issued November 10, 1950, after the project was dismantled.

Under the circumstances, the land withdrawals for Project Nos. 1021, 1226, 1606, and 1772 no longer serve a useful purpose.

The Geological Survey has recommended that the land withdrawals for

6312

NOTICES

Project Nos. 1021, 1226, 1606, and 1772 be vacated in their entirety.

The Commission orders: That the land withdrawals for Project Nos. 1021, 1226, 1606, and 1772 are hereby vacated in their entirety.

By the Commission.

KENNETH F. PLUMB,
Secretary.

SIXTH PRINCIPAL MERIDIAN, WYOMING

1. Project No. 1021 (Shoshone National Forest)—Portions, totaling about 3 acres, of the following described subdivisions were variously withdrawn pursuant to the filings on September 25, 1929, and August 19, 1939, of applications for license for Project No. 1021 for which the Commission gave notice of land withdrawal to the General Land Office (now Bureau of Land Management) by letters dated October 5, 1929 (2), and July 12, 1940:

T. 52 N., R. 109 W.,
Sec. 2, SW $\frac{1}{4}$ SW $\frac{1}{4}$;
Sec. 3, SE $\frac{1}{4}$ SE $\frac{1}{4}$;
Sec. 10, NE $\frac{1}{4}$ NE $\frac{1}{4}$;
Sec. 11, NW $\frac{1}{4}$ NW $\frac{1}{4}$.

2. Project No. 1226 (Bighorn National Forest)—The following described lands, totaling about 200 acres, were withdrawn pursuant to the filing on October 13, 1932, of an application for preliminary permit for Project No. 1226 for which the Commission gave notice of land withdrawal to the General Land Office by letter dated November 22, 1932:

T. 53 N., R. 89 W.,
Sec. 7, NW $\frac{1}{4}$ SE $\frac{1}{4}$, NW $\frac{1}{4}$ SW $\frac{1}{4}$.
T. 53 N., R. 90 W.,
Sec. 12, NW $\frac{1}{4}$ SE $\frac{1}{4}$.

3. Project No. 1606 (Shoshone National Forest)—The application for Project No. 1606 was incomplete. The only land description given was that the project was to be located on Spring Creek, a small tributary of the Shoshone River, 47 miles west of Cody, in Park County, Wyo.

4. Project No. 1772 (Bighorn National Forest)—Portions, totaling about 1 acre, of the following described subdivision were withdrawn pursuant to the filing on October 3, 1940, of an application for license for Project No. 1772 for which the Commission gave notice of land withdrawal to the General Land Office by letter dated December 9, 1940:

T. 48 N., R. 87 W.,
Sec. 34, NW $\frac{1}{4}$ SW $\frac{1}{4}$.

[6740-02]

[Docket No. ER78-171]

SAN DIEGO GAS & ELECTRIC CO.

Extension of Time

FEBRUARY 8, 1978.

On January 30, 1978, the State of California Department of Water Resources (DWR) filed a motion to extend the time for filing petitions to intervene or protests to the proposed tariff change tendered for filing by San Diego Gas & Electric Co. (SDG&E) on January 3, 1978, and no-

ticed January 11, 1978, in the referenced docket. The motion states that SDG&E concurs in the request for an extension of time.

The January 30, 1978, motion filed by DWR requests that any extension of time granted apply also to responses to the motion to defer action filed in this docket by SDG&E on January 18, 1978.

Upon consideration, notice is hereby given that an extension of time is granted to and including April 3, 1978, for filing protests or petitions to intervene pursuant to the notice of proposed tariff change and for filing responses to the SDG&E motion filed on January 18, 1978.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ER78-195]

OKLAHOMA GAS & ELECTRIC CO.
Filing of Wholesale Electric Service
Agreements

FEBRUARY 6, 1978.

Take notice that Oklahoma Gas & Electric Co., (OG&E) on January 27, 1978, tendered for filing an electric service agreement for wholesale service for the city of Ponca City, Okla. OG&E states that the proposed electric service agreement cancels and supersedes the existing contract presently on file with the Commission. OG&E proposes an effective date of March 1, 1978.

OG&E further states that the proposed rate is identical to those filed by OG&E on December 27, 1976, in Docket No. ER77-127 and designated as Federal Power Commission Tariff, Original Volume No. 1—Municipalities.

OG&E indicates that a copy of the proposed electric service agreement has been mailed to Ponca City, the Corporation Commission of the State of Oklahoma, and the Arkansas Public Service Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 13, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to the proceeding must file a petition to intervene. Copies of this application

are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. ID-1822]

FRANK E. COYNE

Filing

FEBRUARY 6, 1978.

Take notice that on January 19, 1978, Frank E. Coyne filed an application pursuant to section 305(b) of the Federal Power Act to hold the following positions:

Assistant Controller, the Cincinnati Gas & Electric Co., public utility.
Assistant Controller, the Union Light, Heat & Power Co., public utility.
Assistant Controller, Miami Power Corp., public utility.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions and protests should be filed on or before February 24, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RI77-124]

MAURICE L. BROWN CO.

Amended Petition for Special Relief

FEBRUARY 7, 1978.

Take notice that on January 31, 1978, the Maurice L. Brown Co. (petitioner), P.O. Box 11320, Kansas City, Mo. 64112, filed in Docket No. RI77-124 an amended petition for special relief. On September 1, 1977, petitioner filed a petition for special relief in this docket pursuant to section 2.76 of the Commission's general policy and interpretations (18 CFR § 2.76) seeking authorization to collect a rate of 184.69 cents per Mcf for the sale of natural gas to United Gas Pipe Line Co. from the Sneed gas unit No. 1 and Sneed gas unit No. 2 wells located in

NOTICES

6313

the Bethany field, Harrison County, Tex. By its amended petition petitioner now requests authorization to collect a rate of 120.74 cents per Mcf for the sale.

Any person desiring to be heard or to make any protest with reference to said petition should on or before March 2, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RI77-125]

MAURICE L. BROWN CO.

Amended Petition for Special Relief

FEBRUARY 7, 1978.

Take notice that on January 31, 1978, the Maurice L. Brown Co. (petitioner), P.O. Box 11320, Kansas City, Mo. 64112, filed in Docket No. RI77-125 an amended petition for special relief. On September 1, 1977, petitioner filed a petition for special relief in this docket pursuant to section 2.76 of the Commission's general policy and interpretations (18 CFR § 2.76) seeking authorization for the working interest owner to collect a rate of \$1.5879 per Mcf for the sale of natural gas to Northern Natural Gas Co. from the Strackeljohn gas unit No. 1 well located in Finney County, Kansas. By its amended petition petitioner now requests authorization to collect a rate of 97.45 cents per Mcf for the sale.

Any person desiring to be heard or to make any protest with reference to said petition should on or before March 2, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hear-

ing therein, must file a petition to intervene in accordance with the Commission's rules.

[6740-02]

[Docket No. RI77-56]

OIL & GAS FUTURES, INC., OF TEXAS, ET AL.

Amended Application for Special Relief

FEBRUARY 7, 1978.

Take notice that on January 31, 1978, Oil & Gas Futures, Inc., of Texas, et al. (applicant), c/o Patrick J. Keeley, Fulbright & Jaworski, 1150 Connecticut Avenue NW., Washington, D.C. 20036, filed in Docket No. RI77-56 an amended application for special relief under section 2.76 of the Commission's general policy and interpretations (18 CFR § 2.76). On April 8, 1977, applicant filed an application for special relief in this docket pursuant to section 2.76 seeking authorization to collect a rate of \$2.25 per Mcf for sales of natural gas to Trunkline Gas Co. from the Grand Isle block 82 field, offshore Louisiana, in the Federal domain. By its amended application applicant now requests authorization to collect a rate of \$1.8851 per Mcf for the sales.

Any person desiring to be heard or to make any protest with reference to said petition should on or before March 2, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

[6740-02]

[Docket No. ER78-198]

PUBLIC SERVICE CO. OF OKLAHOMA

Filing

FEBRUARY 7, 1978.

Take notice that the Public Service Co. of Oklahoma (PSO) on January 30, 1978, tendered for filing its request for a change in the rates of the Markham Ferry coordinating agreement

identified as rate schedule FPC No. 162, for calendar year 1978. PSO states that the agreement coordinates the operations through the interchange and sale of electric power and energy between Public Service and the Grand River Dam Authority of Oklahoma (Authority).

PSO further states that the agreement provides for annual review of the energy rates charged by the parties to reflect changes in production costs. PSO indicates that the filing revises the energy charge rates to reflect those costs as of December 31, 1977.

PSO requests that the Commission waive its notice requirements in order that the proposed rate schedule can become effective on January 1, 1978.

According to PSO, the Oklahoma Corporation Commission and the Authority have been served a copy of this filing.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 21, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-3999 Filed 2-13-78; 8:45 am]

[6740-02]

[Docket No. RP78-36]

SOUTHERN NATURAL GAS CO.

Proposed Changes in FPC Gas Tariff

FEBRUARY 3, 1978.

Take notice that Southern Natural Gas Co. (Southern) on January 30, 1978, tendered for filing proposed changes in its FPC Gas Tariff, Sixth Revised Volume No. 1. The proposed changes are based on the 12-month period ending October 31, 1977, and, as adjusted, would increase jurisdictional revenues by \$117,695,037.

Southern states that the principal reasons for the proposed rate increase are to reflect: (1) The cost of vaporized liquefied natural gas (LNG) service which was approved by the Federal Power Commission in Docket No. CP71-264, et al.; (2) increased costs of acquiring new gas supplies; (3) increases in operation, maintenance, and

other expenses; (4) decline in volumes available for sale; and (5) an increase in the overall rate of return to 11.39 percent.

Copies of the filing have been served upon Southern's jurisdictional customers and interested state public service commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 15, 1978. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-3993 Filed 2-13-78; 8:45 am]

[6740-02]

[Docket No. CP77-240]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Petition To Amend

FEBRUARY 6, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary of Energy and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "savings provisions" of section 705(b) of the DOE Act provided that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of this proceeding were specifically transferred to the FERC by section 402(a)(1) of the DOE Act.

The joint regulation adopted on October 1, 1977, by the Secretary and the

FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR—, provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above-mentioned authorities.

Take notice that on January 24, 1978, Transcontinental Gas Pipe Line Corp. (petitioner), P.O. Box 1396, Houston, Tex. 77001, filed in Docket No. CP77-240 a petition to amend the Commission's order of October 26, 1977, issued in the instant docket pursuant to section 7(c) of the Natural Gas Act and section 2.79 of the Commission's general policy and interpretations (18 CFR 2.79) so as to provide for the transportation of up to 284 Mcf of natural gas per day for an additional end-use consumer of Long Island Lighting Co. (Lilco) a petitioner resale customer served under rate schedule CD-3, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

Pursuant to the Commission's order of October 26, 1977, applicant was granted authorization in the instant docket to transport natural gas for Cerro Wire & Cable Co., Division of Cerro-Marmon Corp.; Entenmann's Inc.; Fabric Leather Corp., a wholly owned subsidiary of Borden, Inc.; Kaiser Aluminum & Chemical Corp.; Knickerbocker Partition Corp.; Global Steel Production Corp.; and Lawrence Aviation Industries, Inc. (buyers), all of which are existing consumers of Lilco.

Petitioner states that it is presently transporting for buyers, up to 2,461 Mcf of natural gas per day purchased by buyers from George C. Ayers, et al., in the Tigre Lagoon field area, Vermilion Parish, La., and R. L. Burns Corp. (Burns) in the S. W. Lake Boeuf field, Lafourche Parish, La. Petitioner further states that such transportation takes place pursuant to an agreement dated February 7, 1977, as amended, among petitioner, buyers, acting severally and not jointly by and through the Stone Energy Corp. (Stone) as duly authorized agent; and Lilco, and pursuant to permanent authorization granted herein on October 26, and temporary authorization granted herein December 8, 1977.

The petition states that petitioner, Lilco, and Stone, as agent for buyers, have entered into an agreement dated November 23, 1977, which amends the

The instant application was filed as an amendment to an application filed herein on February 17, 1977, as amended June 14, 1977, and October 19, 1977; however, pursuant to the Commission's order of October 26, 1977, applicant was granted permanent certificate authorization for its filing of February 17, 1977, as amended June 14, 1977. Consequently, the instant application is being noticed as a petition to amend.

February 7, 1977, agreement as previously amended so as to provide for the transportation of natural gas for an additional end-use consumer of Lilco, Gim Metal Products Division of Lighton Corp. (GIM).

It is indicated that Gim has contracted to purchase 284 Mcf of natural gas per day from Burns from properties in the Southwest Lake Boeuf field, Lafourche Parish, La., at an initial price of \$1.75 per million Btu's. It is stated that Gim would use the transported gas solely for high priority uses for which no alternate fuel capability is technologically feasible.

Petitioner states that the maximum daily volume of 284 Mcf of natural gas which it proposes to transport for Gim must be added to the maximum daily volume of 2,461 Mcf which it is presently authorized to transport herein. Petitioner indicates that the present transportation rate for all volumes is 31.5 cents per dekatherm.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before February 28, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 78-3994 Filed 2-13-78; 8:45 am]

[6740-02]

[Docket No. ER77-614]

UNION ELECTRIC CO.

Order Granting Late Intervention

FEBRUARY 6, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977), and Executive Order No. 12009, 42 FR 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "savings provisions" of section 705(b) of the DOE Act provide that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of these proceedings were specifically transferred to the FERC by section 402(a)(1) of the DOE Act.

The joint regulation adopted on October 1, 1977, by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR —, provided that this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above-mentioned authorities.

On September 26, 1977, Union Electric Co. tendered for filing proposed increases in rates for service to 15 wholesale customers under its new W-3 electric tariff, and to Missouri Power & Light Co. and to Missouri Utilities Co. Public notice of the filing was issued on September 28, 1977, with comments, protests or petitions to intervene due on or before October 12, 1977.

On January 9, 1978, the Secretary of the Army (Army) filed a late petition for leave to intervene in these proceedings. In support of the petition Army states that the Department of the Army operates, within the area served by the Union Electric Co., the Iowa Army Ammunition Plant, Burlington, Iowa, which purchases electric power under tariff W-2 (which will be superseded by W-3). The Secretary further states that the Department of the Army timely received notice of the filing but that it believed that its interests were sufficiently similar to those of other W-2 customers so that no separate intervention was warranted. However, according to pleadings recently filed with the Commission, the position taken by the W-2 defense group may not necessarily be in accord with the Army's position. Accordingly, the Department of the Army asserts that the issues in this proceeding will directly and substantially affect its interests which cannot be protected adequately by any other party, and that intervention by the Department of the Army would not broaden the issues, delay the proceedings, or prejudice the rights of any parties.

The Commission finds: Intervention in these proceedings by the Secretary of the Army may be in the public interest.

The Commission orders: (A) The Secretary of the Army is hereby per-

mitted to intervene in these proceedings subject to the rules and regulations of the Commission; *Provided, however*, That participation by the Army shall be limited to matters affecting asserted interests as specifically set forth in the petition to intervene; and *Provided, further*, That the admission of the Army as intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(B) The intervention granted herein shall not be the basis for delaying or deferring any procedural schedules heretofore established for the orderly and expeditious disposition of this proceeding.

(C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

ENVIRONMENTAL PROTECTION
AGENCY

ENVIRONMENTAL IMPACT STATEMENTS

Receipt

Pursuant to the President's Reorganization Plan No. 1, the Environmental Protection Agency is the official recipient for environmental impact statements (EIS) and is required to publish the availability of each EIS received weekly. The following is a list of environmental impact statements received by the Environmental Protection Agency from January 30, 1978, through February 3, 1978. The date of receipt for each statement is noted in the statement summary. Under the guidelines of the Council on Environmental Quality the minimum period for public review and comment on draft environmental statements is forty-five (45) days from this FEDERAL REGISTER notice of availability (March 27, 1978). The thirty (30) day period for each final statement begins on the day the statement is made available to the Environmental Protection Agency and to commenting parties.

Copies of individual statements are available for review from the originating agency. Back copies are also available at 10 cents per page from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

Dated: February 7, 1978.

JOSEPH M. McCABE,
Acting Director,
Office of Federal Activities.

DEPARTMENT OF AGRICULTURE

CONTACT: Mr. Barry Flamm, Coordinator, Environmental Quality Activities, U.S. Department of Agriculture, Room 307A, Washington, D.C. 20250, 202-447-6827.

SOIL CONSERVATION SERVICE

Final

Deposit Watershed, New York, Broome, Chenango, and Delaware Counties, N.Y., February 3: Proposed is a project for watershed protection and flood prevention in Broome, Chenango, and Delaware Counties, N.Y. The planned works of improvement include conservation land treatment, supplemented by two floodwater retarding structures, channel work, and dikes in residential and agricultural areas. Installation of structures will result in the commitment of 4 acres of pasture, 18 acres of open land formerly cropped, 3 acres of forest land, 2 acres of urban land, and 900 feet of intermittent stream. Short-term increases in sediment and turbidity will also result. Comments made by: DOD, HEW, DOI, USDA, EPA, State and local agencies, groups and individuals. (ELR Order No. 80105.)

Tehuacana Creek Watershed, McLennan, Hill, and Limestone Counties, Tex., January 31: Proposed is a completion of a watershed project in McLennan, Hill, and Limestone Counties, Tex. The project contains provisions for needed land treatment measures on the watershed and the installation of 27 floodwater retarding structures, and channel work. Remaining land treatment measures are to be applied on about 11,000 acres of agricultural land and the remaining 23 grade stabilization structures, 3 floodwater retarding structures and 10.1 miles of channel work are to be installed for completion of the project. Destruction of wildlife habitat will occur on the 72 acres used for installation of dams and emergency spillways of structures. Comments made by: USA, DOI, HEW, DOT, EPA, USDA, State and local agencies. (ELR Order No. 80095.)

DEPARTMENT OF DEFENSE, ARMY CORPS

Draft

Beach Erosion Control Study, Key Biscayne, Key Biscayne County, Fla., January 31: This action involves the hydraulic excavation and placement of 371,000 cubic yards of sand on 2.4 miles of the southerly ocean shore of Key Biscayne to provide a 25-foot level berm at elevation 7 feet mean low water with gentle seaward slopes. Periodic nourishment to compensate for erosion losses would be provided as required. Material for partial beach restoration will be obtained from two areas located offshore beyond the grass beds in areas of shifting sand bottom. The benefit-cost ratio is 7.3 to 1. (ELR Order No. 8009.)

U.S. 321 Highway, Watauga County, N.C., February 3: Proposed is the improvement of the existing two lane U.S. 321 Highway by widening to a basic four-lane highway. The

NOTICES

ENVIRONMENTAL PROTECTION AGENCY

Improvement is 5.3 miles in length between Boone and Blowing Rock in Watauga County, N.C. Widening of the highway will require channel changes of Middle Fork Creek, a tributary of the south fork of the New River. The channel involves 3,550 feet of the stream. Widening of U.S. 321 will require reconstruction of 500 feet of the Blue Ridge Parkway and a new bridge 200 feet in length which carries parkway traffic over U.S.321. (ELR Order No. 80107.)

Draft
Flood Protection Project, Great Falls County, Mont., February 3: This draft supplement No. 4 presents the reevaluation of the project economics for the flood protection project on the Sun River at Great Falls, Mont., originally presented in section X of design memorandum No. MGS-1, July 1966, revised October 1966. Since the area is in a stable economic setting, relative to potential future changes in flood potential, and is economically feasible based on damage reduction to existing development alone, benefits are based on a 100-year project life discounted at 6.625 percent. Land use and damage data collected after the flood in 1975 were used in this analysis. (ELR Order No. 80106.)

Final

Kanopolis Lake, Kans., O&M, Ellsworth, McPherson, and Saline Counties, Kans., January 30: Proposed is the continued operation and maintenance of Kanopolis Lake, located in Ellsworth, McPherson, and Saline Counties, Kans. The plan includes water control operations, and operation and maintenance of project land and water resources. A major adverse effect is related to flood control operations. Shoreline erosion, disruption of recreation use and damage to project roads and recreation areas result from these fluctuations. (Kansas City District.) Comments made by: DOT, HEW, EPA, HUD, DOI, USDA, AHP, State agencies. (ELR Order No. 71536.)

Fire Island-Montauk Point Beach Erosion Project, Nassau and Suffolk Counties, N.Y., January 30: This EIS addresses all work, past and future, in conjunction with Fire Island Inlet to Montauk Point project authorized by the River and Harbor Act of 1960. The project provides for widening of beaches, raising dune elevations, installing sand fencing and planting grass on the dunes, and constructing interior drainage structures at Mecox Bay, Sagaponack Lake, and Georgia Pond. Temporary adverse impacts associated with construction will result and will last from 3 to 12 months at any specific site. (New York District.) Comments made by: EPA, GSA, USDA, DOC, HUD, DOI, HEW, DOD, State and local agencies, groups and individuals. (ELR Order No. 80085.)

Aquatic Plant Control, Florida, January 31: This statement supplements a final EIS filed with CEQ in September 1973 relating to the aquatic plant control program in Florida. It concerns the inclusion of hydrilla and water lettuce in the Corps' ongoing aquatic plant control program as authorized by section 302 of Pub. L. 89-298. The proposed control program calls for the herbicidal maintenance of fishing trails and open water areas in water bodies seriously infested with hydrilla, and localized treatments of water lettuce only when it poses a serious threat to water resource activities. (Jacksonville District.) Comments made by: GSA, DOI, DOC, EPA, State and local agencies. (ELR Order No. 80096.)

Draft

Wastewater Treatment Plan, Los Angeles, Los Angeles County, Calif., January 30: The city of Los Angeles is in the process of completing a plan to meet city sewage treatment needs for the next 25 years. This plan is part of the city's continued long-range planning effort designed to improve the quality of city environment. A range of alternative technical processes, treatment plant locations, and facilities modifications and additions are identified and evaluated. The city has also developed a number of facilities modifications or additions designed to satisfy flow and treatment capacity requirements over the next 25-year planning period. (ELR Order No. 80086.)

GENERAL SERVICES ADMINISTRATION

Contact: Mr. Andrew E. Kauders, Executive Director, Environmental Affairs Division, General Services Administration, 18th and F Streets NW., Washington D.C. 20405, 202-566-0405.

Draft

Southeast Federal Center, February 3: Proposed is the development of the 60.5 acre southeast Federal Center site (Navy Yard Annex) as a 15,000 employee administrative office complex. This site is located in the southeast area of Washington, D.C., and is bounded by the east, the Anacostia River to the south, First Street to the west and M Street to the north. Implementation of the proposed action is expected to take 20 years, beginning in 1980 and extending through the year 2000. (EDC 78001.) (ELR Order No. 80100.)

DEPARTMENT OF HUD

Contact: Mr. Richard H. Broun, Director, Office of Environmental Quality, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410, 202-755-6308.

Draft

Tallow Wood Subdivision, Harris County, Tex., February 3: The proposed action is for the Department of Housing and Urban Development to accept for HUD-FHA Home Mortgage Insurance purposes under section 203(B) of title II of the National Housing Act of 1943, some 224 acres of land located in the northwestern portion of Harris County, Tex. It is proposed that this tract of land be developed into a subdivision composed primarily of single family dwellings (approximately 1,000 units). (ELR Order No. 80102.)

Highland Creek Village Subdivision, Harris County, Tex., February 3: The proposed action is for the Department of Housing and Urban Development to accept HUD-FHA Mortgage Insurance purposes, authorized under section 203(B) of title II of the National Housing Act of 1934, the 541 acre Highland Creek Village Subdivision is located in Harris County, Tex. When completed in approximately 9 years, the subdivision will contain approximately 2,400 single family homes. If accepted by HUD a beneficial impact would be the provisions of needed housing within the growing community of Metro Housing. Also it will be influenced by NEPA requirements and HUD

minimum property standards (HUD-R08EIS-78-9D). (ELR Order No. 80103.)

Final

Stonefield Subdivision, Charleston County, S.C., January 30: Proposed is the approval of HUD-FHA Mortgage Insurance for the Stonefield Subdivision in the Charleston area, South Carolina. The development will consist of 1,079 dwelling units on a 330-acre tract of land. Development plans include a golf course with club facilities, tennis courts, swimming pools, and a boat basin/marina. Adverse effects will be conversion of open and wooded land to urban use, and some increase in storm water runoff into Clark Sound and Seaside Creek. Comments made by: EPA, COE, DOD, FPC, GSA, HEW, ERDA, DOT, SCS, DOC, State and local agencies, and concerned groups and individuals. (ELR Order No. 80090.)

Westpoint Development, Tarrant County, Tex., February 3: Proposed is the acceptance of the 1,311-acre Westpoint Development for mortgage insurance purposes. The Development, located on Interstate 20 and West Loop 820 approximately 9 miles west of the Fort Worth central business district, is designed to accommodate a 1985 population of 13,300 persons with a housing supply of 4,600 units. Of these housing units, 3,650 are single-family homes and 950 units are apartments, cluster, condominiums, townhomes duplexes, and other multifamily units. The proposed development also provides for schools, parks, commercial and shopping centers, and other community facilities. Comments made by: EPA, DOT, USDA, DOI, DOD, VA, State and local agencies. (ELR Order No. 80101.)

SECTION 104 (H)

The following are community development block grant statements prepared and circulated directly by applicants pursuant to section 104(h) of The 1974 Housing and Community Development Act. Copies may be obtained from the Office of the Appropriate Local Chief Executive. Copies are not available from HUD.

Final

Vallejo, Calif.—Vallejo River Park, Soland County, Calif., January 30: Proposed is the development of a neighborhood-community park located in northwest Vallejo, adjacent to Mare Island Strait in Soland County, Calif. The site is 3,800 feet in length and about 630 feet in average width, with approximately one-half mile of water frontage. The park will total approximately 75 acres and will be known as River Park. Phase 1 will include tennis courts, soft-ball complex, and overlook picnic area. Phase 2 will include the east picnic area, children's playground, and miscellaneous facilities. Comments made by: DOI, COE, State and local agencies, groups and individuals. (ELR Order No. 80091.)

BUREAU OF LAND MANAGEMENT

Draft

Proposed 1978 OCS Oil and Gas Lease, OCS No. 65, several counties in Florida, Ala-

bama, and Mississippi, January 31: proposed is the OCS sale No. 65 which involves the offering of 116 tracts for leasing for the extraction of oil and gas. The tracts are located on the Outer Continental Shelf in areas located west, south, and east of that portion of the States of Florida, Alabama, Mississippi, and Louisiana that border on the Gulf of Mexico. The largest portion is located off the coast of Florida, with the exception of two tracts, each tract contains 5,760 acres. The total area offered in all tracts amounts to 667,229.28 acres. (ELR Order No. 80094.)

BUREAU OF RECLAMATION

Supplement

Garrison Diversion Plan, several counties in North Dakota, February 2: proposed is the Garrison Diversion Unit, of the Pick-Sloan Missouri Basin in North Dakota. The Department of the Interior has prepared this draft supplemental environmental impact statement which presents six alternative plans ranging from foregoing additional construction to development of the unit as authorized by Congress in 1965 (DES 78-2). (ELR Order No. 80098.)

STATE DEPARTMENT

Contact: Mr. Cameron Sanders, Office of Environmental Affairs, Department of State, Washington, D.C. 20520, 202-632-9169.

Draft

Antarctic Living Marine Resources, February 1: The United States will participate in the negotiation of a regime to conserve Antarctic marine living resources. All living resources in waters south of the Antarctic convergence, except whales and except seals south of 60° south latitude, are affected. The purpose of the regime would be to ensure that any harvesting of Antarctic marine living resources take place in accordance with sound conservation principles. There are no present or proposed commercial fishing operations by the United States in Antarctic waters. (ELR Order No. 80097.)

DEPARTMENT OF TRANSPORTATION

FEDERAL AVIATION ADMINISTRATION

Final

Greenbrier Valley Airport, Greenbrier County, W. Va., January 30: Proposed is the improvement of the Greenbrier Valley Airport in Lewisburg, W. Va. The project includes construction of a runway and parallel taxiway extension, acquisition of 80 acres for a navigation easement for clear zone purposes, and relocation of the existing approach lighting system. Plans also call for the construction of additional aircraft parking apron, automobile parking facilities, and pavements to "T" hangars and general aviation parking. The runway extension will allow a heavier operating payload for the B-737 aircraft, resulting in increased noise levels. Comments made by: FAA, CEQ, EPA, USDA, HUD, DOI, State and local agencies, and groups and individuals. (ELR Order No. 80089.)

FEDERAL HIGHWAY ADMINISTRATION

Draft

Improvement Act of 1978, January 30: Proposed is the Highway and Public Trans-

portation Improvement Act of 1978, to provide for the continuation of Federal transportation assistance programs at significant levels, and the allocation of government transportation expenditures. The legislation would give the States and localities which carry out these programs a new ability to program their activities in a balanced and effective way. Consideration of energy conservation air quality, environmental quality, effects on minorities, housing, land use, and future development. (ELR Order No. 80088.)

Final

I-93, Littleton, N.H.—Waterford, Vt., January 30: This statement is a supplement to a final EIS approved by the Department of Transportation, July 8, 1974. The proposed action is the construction of a 4-lane, 6.5 mile section of Interstate 93 between New Hampshire Route 18 at Littleton, N.H., and the Vermont bank of the Connecticut River in the town of Waterford, Vt. Adverse effects include the acquisition of 380 acres of land and the displacement of 2 families (Region 1, 175 pages). Comments made by: DOT, DOI, EPA, USDA, HEW, HUD, DOC, COE, FEA, State, regional, and local agencies, and groups and individuals. (ELR Order 880087.)

Supplement

SR 5, South 272d Street, King County, Wash., February 3: The proposed project is a diamond interchange, park and ridge lot, and flyer stop which is to be constructed on Interstate 5 ST, South 272d Street approximately 10 miles south of the Seattle corporate limits in King County, Wash. This environmental impact statement for alternative design of the interchange was approved in 1973. The park and ridge lot, designated as site A contains approximately 500 stalls and a ramp level flyer stop. This report has been prepared to outline the impacts associated with the interchange and the inclusion of the park and ridge lot and flyer stop. (ELR Order No. 80104.)

U.S. COAST GUARD

Draft

Tanker Safety and Pollution Prevention, February 3: This impact statement covers U.S. participation in the International Conference on Tanker Safety and Pollution Prevention, February 1978, in London, England, and possible U.S. implementation of the standards adopted by this conference. The objective is to obtain international action to improve tanker safety and pollution prevention standards. The changes are being sought to reduce oil pollution from tanker accidents and routine operational discharges, and to reduce the risk of tanker accidents and resulting loss of life and property damage. (ELR Order No. 80099.)

TENNESSEE VALLEY AUTHORITY

Contact: Dr. Peter Krenkel, Director of Environmental Planning, Tennessee Valley Authority, 720 Edney Building, Chattanooga, Tenn. 37401, 615-755-3161, PTC 854-3161.

Final

Yellow Creek Nuclear Plant, Tishomingo County, Miss., January 31: The proposed action is the construction and operation of a 2-unit nuclear plant in Tishomingo County, Miss. Baseloaded coal-fired and nuclear-fueled units would help meet the 1985-1986 peak load. There would be a slight increase

in temperature of water returned to Pickwick Lake. Fish larvae drawn into the closed cooling system could result in reductions of some adult and juvenile fish stocks in Yellow Creek embankment. Comments made by: ERDA, CEQ, EPA, FPC, USDA, FEA, DOC, DOD, HEW, HUD, and DOI. (ELR Order No. 80092.)

NPDES PERMIT PROGRAM

Open Meeting

Notice is hereby given that an informal discussion session has been scheduled for 9:30 a.m., March 6, 1978, at Waterside Mall, Room 3906, 401 M Street SW., Washington, D.C.

The purpose of the meeting is to receive comments from the public concerning provisions of the Clean Water Act of 1977 relating to the NPDES permit program.

Because of the size of the room, attendance must be held to the first 100 that request reservations. If needed, other meetings will be scheduled at a later date.

Those wishing to attend the meeting should contact Mr. Edward A. Kramer, Permits Division (EN-336), 401 M Street SW., Washington, D.C. 20460. The telephone number is area code 202-755-0750.

MARVIN B. DURNING,
Assistant Administrator
for Enforcement.

FEBRUARY 8, 1978.

FLORIDA DEPARTMENT OF AGRICULTURE

Issuance of Specific Exemption To Use Heptachlor To Control West Indian Sugarcane Rootstalk Borer Weevil on Ornamental Plants and Nonbearing Citrus

The Environmental Protection Agency (EPA) has granted a specific exemption to the Florida Department of Agriculture (hereafter referred to as the "Applicant") to use a five (5) percent granular heptachlor formulation as a soil treatment to control the West Indian Sugarcane Rootstalk Borer Weevil on ornamental plants and nonbearing citrus nursery stock in 13 counties in Florida. This exemption was granted in accordance with, and is subject to, the provisions of 40 CFR Part 166, which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of certain information required by regulation to be included in the notice. For

NOTICES

NOTICES

more detailed information, interested parties are referred to the application on file with the Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M Street SW., Room E-315, Washington, D.C. 20460.

According to the Applicant, the West Indian Sugarcane Rootstalk Borer Weevil (*Diaprepes abbreviatus*) poses a serious threat to the citrus, ornamental and sugarcane industries in the State of Florida. The first serious infestation of this pest occurred in 1968 on about 2,500 acres in Orange County. At present, it is estimated by the Applicant that about 4,726 acres of citrus are affected. A quarantine has been enacted by the State of Florida under which about 38,314 acres are regulated. This acreage surrounds the largest foliage nursery industry in the United States; income from the containerized ornamental industry in this area is about \$156 million, according to the Applicant. Although the heavily concentrated growing areas of foliage and containerized ornamentals are not presently infested, the weevil infestations in citrus are in dangerous proximity. It is felt that the weevil will infest the foliage growing area soon, because the adult can easily fly the distance involved. This pest, however, can also be spread in potting soil and on foliage through intrastate and interstate commerce. The State of California has enacted a quarantine prohibiting the shipment of nursery stock to California from Puerto Rico and the weevil-infested areas in Florida unless they are certified as uninfested. According to the Applicant, if a soil treatment is not used for potting medium, Hawaii, Louisiana, Texas, and other important market areas for nursery products may also enact quarantines. Loss of this market would be economically detrimental.

This pest is known to be very damaging to citrus and a number of other host plants. The adults feed and lay their eggs upon the foliage of the host plant. About seven days after the eggs hatch, the larvae drop from the leaves and burrow into the soil; they remain in this stage for 24-30 months during which they feed on both the stem and root system causing loss of fruit production and tree mortality. The weevil is considered a threat to the entire \$500 million citrus industry; it is also considered to be a threat to the important sugarcane industry in Florida, valued at \$334 million, the Applicant stated. This pest is known to feed on 40 native plant species in Florida and is a threat to fragile ecosystems such as the Florida Everglades.

Accordinging to the United States Department of Agriculture, research programs on biological and chemical control of this pest are in progress. Field tests have shown that spray oil can control weevil eggs; orthane can

control adult weevils; Mocap liquid, CGA 12223, and Furadan show control of newly-hatched larvae. Dimilin, an insect growth regulator, has also shown promise under grove conditions. However, none of these compounds are registered for use against the weevil. The larval stage is the most destructive period of this pest's life cycle, and it is in this form that it is transported in potted plants. Consequently, in foliage nurseries, an insecticide in the potting soil mix is the preferred method of controlling newly-hatched larvae entering the soil. One hundred percent control of these larvae must be achieved. According to the Applicant, heptachlor is the only material that has achieved this degree of control, even though it is unregistered for this use.

On December 24, 1975, the Administrator, EPA, issued a Decision and Order suspending the registration of heptachlor and chlordane for some but not all uses; on January 19, 1976, a clarification of the suspension order was issued. The use of heptachlor and chlordane on Florida citrus crops to control root weevils was exempted from the suspension order. Subsequently, a specific exemption was granted to the Applicant in 1976 for the use of 40,000 pounds of a five percent granular heptachlor formulation as a soil (growing medium) amendment at a rate of 0.2 ounce active ingredient per cubic yard for the control of this weevil in ornamental plants and nonbearing citrus in Seminole, Orange, and Broward counties.

Infestations of this pest have been confirmed in Florida. The Applicant stated that the pest is under control at present in the area regulated under the quarantine, and in which the heptachlor use was authorized in last year's specific exemption; however, infestations have developed in nurseries located outside of the regulated area, especially in Broward County.

This request for a specific exemption is similar to the 1976 submission, except that this one asked not only that the use of heptachlor be allowed to control the pest in the regulated (quarantined) areas, but also that the use should be extended to control the pest in unregulated areas where infestations may occur. The Applicant requested that heptachlor be used in potting soil as an amendment in all nurseries in regulated or unregulated areas which receive shipments from Puerto Rico; moreover, this treatment would be required once infestations have been confirmed.

After reviewing the application and other available information, EPA has determined that: (a) An outbreak of the West Indian sugarcane rootstalk borer weevil has occurred; (b) there is no pesticide presently registered and available for use to control this pest in

Florida; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the pest is not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until October 1, 1978, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. Treatment shall be limited to nurseries located in the regulated area in Orange and Seminole Counties, and to nurseries located in the unregulated areas in Broward, Orange, Seminole, Dade, Palm Beach, Manatee, Sarasota, Valusia, Lake, Polk, Brevard, Charlotte, and Collier counties, once infestations of the pest have been confirmed;

2. Heptachlor shall be used at a rate of 0.2 ounces active ingredient per cubic yard;

3. The maximum quantity of heptachlor authorized to be used is limited to 2,000 pounds active ingredient (40,000 pounds of a five percent granular heptachlor formulation);

4. The use of heptachlor shall be restricted to use as a soil treatment for bedded, nonbearing citrus nursery stock which is at least two years from commercial fruit production and as an amendment to planting medium for potted ornamentals;

5. Application of heptachlor shall be restricted to bedded nursery stocks and shall not be applied to fieldgrown nursery stock;

6. Applicators shall wear protective clothing and use proper equipment to minimize their exposure to heptachlor; these shall consist of a respirator, goggles, helmet, face protector, gloves, and waterproof boots;

7. The Florida Division of Plant Industries and the U.S. Department of Agriculture will supervise the application of heptachlor;

8. The Applicant shall continue to vigorously pursue research to develop alternative products to control this pest;

9. A final report shall be submitted to EPA by October 31, 1978, summarizing the results of this program;

10. The EPA shall be informed immediately of any adverse effects to man or the environment resulting from this program; and

11. The Applicant shall be responsible for insuring that all the provisions of this specific exemption are observed.

(Sec. 18, Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; (7 U.S.C. 136 et seq.))

Dated: February 3, 1978.

EDWIN L. JOHNSON,
Deputy Assistant Administrator
for Pesticide Programs.

[FRL 855-2; OPP-180174]

OREGON DEPARTMENT OF AGRICULTURE

Issuance of a Specific Exemption To Use Paraquat To Control Certain Weeds in Peppermint Fields

The Environmental Protection Agency (EPA) has granted a specific exemption to the Oregon Department of Agriculture (hereafter referred to as the "Applicant") to use a paraquat formulation to control certain annual, biennial, and perennial weeds in peppermint fields. This exemption was granted in accordance with, and is subject to, the provisions of 40 CFR Part 166, which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of certain information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the application on file with the Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M Street SW., Room E-315, Washington, D.C. 20460.

According to the Applicant, the peppermint is western Oregon and in various other parts of the State is now grown under a non-tillage system as a cultural method to prevent the spread of *Verticillium* wilt. This has caused an extreme pressure from various kinds of weeds. The major weeds occurring during the dormant season of the peppermint are Italian ryegrass (*Lolium multiflorum*), common groundsel (*Senecio vulgaris*), and several other annual, biennial and perennial weed species. These weeds, the Applicant stated, germinate in the fall, grow vigorously during the winter season, and literally overwhelm the emerging peppermint in the spring. Treatment to combat these weeds should be made while the peppermint is dormant.

Only three herbicides are presently registered for use on peppermint: Terbacil, Trifluralin, and Diuron. According to the Applicant, none of these are adequate to control the pest weeds. Data submitted by the Applicant indicated that paraquat (1,1-Dimethyl-4,4'-bipyridinium ion) seems to be the only effective herbicide which can be used in a pest management system which relies exclusively on cultural methods for mint disease control.

The Applicant proposed to use a paraquat formulation on a maximum of

15,000 acres located mainly in the Willamette Valley of western Oregon; some of this acreage is also located in southern, central, and eastern Oregon. A total of 11,250 pounds of the active ingredient will be required. Applications will be made by ground equipment using 20 to 50 gallons of water. Either State-licensed commercial applicators or growers who have qualified as private applicators will make such treatments.

The Applicant estimated that growers with weed-infested fields will lose an average of at least 15 pounds of mint oil per acre. Maximal losses of 45 pounds per acre have also occurred. The current price of mint can range from over \$200-\$600 per acre. Hand labor can be used for the removal of certain perennial and biennial weeds when in sparse stands, but the ryegrass and groundsel cannot be economically removed by hand. This labor cost could also reach several hundred dollars per acre. In addition to the short-term economic impact of these weeds, another concern is the accumulation of millions of weed seeds in the soil to cause future problems.

There does not appear to be any potential irreversible hazard to the environment as a result of this short-term use of paraquat. The use of paraquat on peppermint, a minor crop, will not significantly increase the amount of residues in the total diet of man or domestic animals.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak of various weeds in peppermint fields has or is about to occur; (b) there is no pesticide presently registered and available for use to control these weeds in Oregon; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the weeds are not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until March 31, 1978, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. Paraquat formulations containing 2 pounds active ingredient/gallon may be used at a dosage rate of from 1 to 3 pints product (0.37-0.75 pounds A.I.) per 20 to 50 gallons of water/acre. If the high dosage rate is used, only a single application may be made. Two applications may be made at the low (0.37 lb./acre) dosage rate;

2. Applications may be made by either State-licensed commercial applicators or growers who have qualified as private applicators. Applications

NOTICES

must be restricted to ground equipment only;

3. Applications rates and procedures for specific farms will be recommended by qualified Oregon State University Extension agents;

4. A residue level of paraquat not exceeding 0.05 ppm in mint oil has been deemed adequate to protect the public health. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action;

5. The fresh peppermint forage must be used only for the distillation of mint oil. The spent hay must not be fed to livestock;

6. All label precautions and restrictions must be adhered to;

7. The EPA shall be immediately informed of any adverse effects resulting from the use of paraquat in connection with this exemption; and

8. A full report summarizing the results of this program must be submitted to the EPA by the end of March 1979.

(Sec. 18, Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751, (U.S.C. 136 et seq.))

Dated: February 3, 1978.

EDWIN L. JOHNSON,
Deputy Assistant Administrator
for Pesticide Programs.

SCIENCE ADVISORY BOARD EXECUTIVE COMMITTEE

Open Meeting

As required by Pub. L. 92-463, notice is hereby given that a meeting of the Executive Committee of the Science Advisory Board will be held beginning at 9 a.m., March 2 and 3, 1978, in Room 1101 West Tower, U.S. Environmental Protection Agency, Waterside Mall, 401 M Street SW., Washington, D.C.

This meeting is a regularly scheduled meeting of the Committee. The Committee will be discussing the anticipatory research plan, the five year plan and review of regulations, the report to Congress on long range research, and will be briefed on selected Agency issues and activities.

The meeting is open to the public, any member of the public wishing to attend or obtain additional information should contact Dr. Richard M. Dowd, Executive Secretary, Executive Committee, Science Advisory Board,

6320

202-755-0263 by close of Business February 28, 1978.

RICHARD M. DOWD,
Staff Director,
Science Advisory Board.

FEBRUARY 8, 1978.

[FRL 854-4; OPP-42028C]

STATE OF DELAWARE

State Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides; Approval Status

Section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136 et seq.), and the implementing regulations of 40 CFR Part 171 require each State desiring to certify applicators to submit a plan for such purpose, subject to approval by the Environmental Protection Agency (EPA).

On November 9, 1976, the Delaware State Plan was approved contingent upon promulgation of necessary regulations implementing the legislation. Notice of contingent approval was published in the FEDERAL REGISTER on November 30, 1976 (41 FR 52512). On October 21, 1977, the Regional Administrator, EPA, Region III extended contingent approval of the Delaware State Plan until December 31, 1977 to allow for promulgation of necessary regulations. Notice of extension of contingent approval was published in the FEDERAL REGISTER on November 11, 1977 (42 FR 58780).

On January 1, 1978, regulations necessary to implement the Delaware legislation were promulgated. Having reviewed these regulations and finding that all requisite legal authorities required by FIFRA and 40 CFR Part 171 are now enacted and promulgated, the Regional Administrator, EPA, Region III, hereby gives notice that the Delaware State Plan is fully approved.

Dated: January 31, 1978.

JACK J. SCHRAMM,
Regional Administrator,
Region III.

WASHINGTON STATE DEPARTMENT OF AGRICULTURE

Issuance of Specific Exemption To Use Benomyl To Control Fungus on Cabbage, Cauliflower, Broccoli, and Brussels Sprout Seeds

The Environmental Protection Agency (EPA) has granted a specific exemption to the Washington State

Department of Agriculture (hereafter referred to as the "Applicant") to use benomyl on commercial cabbage, cauliflower, broccoli, and brussels sprout seeds in western Washington to control infestations of the fungus *Phoma lingam*, which causes the plant disease called "blackleg". This exemption was granted in accordance with, and is subject to, the provisions of 40 CFR Part 166, which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of certain information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the application on file with the Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M Street SW., Room E-315, Washington, D.C. 20480.

According to the Applicant, *Phoma lingam*, the causal agent of blackleg disease in these crucifers (plants of the family *Cruciferae*), is frequently present on seed, but epidemic outbreaks depend on the weather conditions in seed growing, transplant and food production areas. The organism, which may remain viable on plant debris for up to four (4) years, can be introduced into new fields by seed transmission. The Applicant stated that a disastrous outbreak of cabbage blackleg occurred in the eastern cabbage growing States in 1973 as a result of seed transmission of *Phoma lingam*. In that year, cabbage growers suffered a ten (10) percent loss of the nation's cabbage crop to blackleg and blackrot; the cabbage seed growing industry of Washington State was threatened by lawsuits and the potential loss of insurance coverage.

About 1,000 acres of cabbage are grown for seed in the Skagit Valley region in western Washington. The Applicant estimated that 80 percent of the nation's and 30 percent of the world's cabbage seed supply is produced in this area. Moreover, about 100 acres of cauliflower, broccoli, and brussels sprouts are grown for seed in the area. This specific exemption requested treatment of up to 1,000,000 pounds of seed; treatment will be dependent on confirming the presence of the organism. Disease control requires both the treatment of seed used for seed production and of commercial seed lots. Benomyl (Benlate 50% Wettable Powder; EPA Reg. No. 352-354) will be applied at the rate of eight ounces Benlate formulation in sufficient water for seed coverage per hundred pounds of seed. The Applicant stated that other pesticides and cultural practices have been unsuccessful in controlling the disease. A single benlate application will be made on seed produced in 1977 for the 1978 commercial acreage; personnel of seed

companies or seed contractors will make the applications.

It should be noted that a rebuttable presumption against registration of pesticide products containing benomyl was published on December 6, 1977 (42 FR 61788); however, no decision has yet been made by EPA as to appropriate regulatory action in this matter.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak of the fungus *Phoma lingam* has occurred; (b) there is no pesticide presently registered and available for use to control the fungus in Washington State; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the fungus is not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until April 30, 1978, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. A benomyl product, Benlate 50% Wettable Powder (EPA Reg. 352-354), will be used;

2. Benomyl will be applied at a maximum rate of eight (8) ounces of the product (four (4) ounces active ingredient) in sufficient water to treat one hundred (100) pounds of seeds;

3. Each seed lot may receive no more than a single application of benomyl;

4. Application of benomyl will be restricted to seeds which are determined to be infected or to seeds from areas where *Phoma lingam* is known to be present;

5. A maximum of one million pounds of seeds may be treated;

6. Treated seeds will not be used for food, feed, or any other use except planting, and all shipments of seed must be so labeled;

7. EPA has determined that residues of benomyl resulting from this use are not likely to exceed 0.20 ppm in cabbage and cauliflower and 0.40 ppm in broccoli and brussels sprouts; cabbage, cauliflower, broccoli, and brussels sprouts with residues not exceeding these levels may be shipped in interstate commerce. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action;

8. Only seeds intended for commercial planting may be treated with benomyl. Benomyl-treated seed will be clearly labeled as such;

9. The Applicant is responsible for insuring that the restrictions of this specific exemption are met, and must submit a report summarizing the results of this program by August 30, 1978;

NOTICES

NOTICES

6321

10. The Applicant will insure that residue data will be obtained to support tolerances for residues of benomyl in or on broccoli and brussels sprouts;

11. All applicable directions, restrictions, and precautions on the EPA-registered label must be followed;

12. The EPA shall be immediately informed of any adverse effects resulting from use of benomyl in connection with this exemption; and

13. All applications will be made by seed treating personnel of the seed companies or seed contractors. Personnel of these companies must be certified and must wear dust masks when treating crucifer seeds with benomyl. (Sec. 18, Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; (7 U.S.C. 136 et seq.))

Dated: February 3, 1978.

EDWIN L. JOHNSON,
Deputy Assistant Administrator
for Pesticide Programs.

FEDERAL MARITIME COMMISSION

LATIN AMERICA/PACIFIC STEAMSHIP CONFERENCE ET AL.

Notice of Agreements Filed

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of each of the agreements and the justifications offered therefor at the Washington Office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreements at the field offices located at New York, N.Y.; New Orleans, La.; San Francisco, Calif.; and San Juan, P.R. Interested parties may submit comments on each agreement, including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before March 6, 1978. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed agreement. Comments shall discuss with particularity allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Agreement No. 8660-8.

Filing party: F. Conger Fawcett, Esq., Graham & James, One Maritime Plaza, San Francisco, Calif. 94111.

Summary: Agreement No. 8660-8, among the member lines of the Latin America/Pacific Coast Steamship Conference, amends the basic conference agreement by extending the scope thereof to include movements by intermodal, overland routes connecting with all-water movements from or to United States Atlantic and Gulf ports. The amendment also defines what is to be considered as maintaining a regular service, and how the failure to maintain such service will affect the voting rights of the member lines.

Agreement No. 10203-2.

Filing party: R. A. Velez, Secretary, Japanese-American Discussion Agreement, 417 Montgomery Street, San Francisco, Calif. 94104.

Summary: Agreement No. 10203-2 is an application filed on behalf of American Export Lines, Inc., American President Lines, Ltd., Japan Line, Ltd., Kawasaki Kisen Kaisha, Ltd., Lykes Bros. Steamship Co., Inc., Mitsui O.S.K. Lines, Ltd., Nippon Yusen Kaisha, Pacific Far East Lines, Inc., Sea-Land Service, Inc., Showa Line, Ltd., States Steamship Co., United States Lines, Inc., Yamashita-Shinnihon Steamship Co., Ltd., and Waterman Steamship Corp. to extend the duration of the Japanese-American Discussion Agreement for a period of 6 months beyond the present expiration date of March 30, 1978.

Agreement No. 10321.

Filing parties: Seymour H. Kligler, Esq., Brauner, Baron, Rosenzweig, Kligler & Sparber, 120 Broadway, New York, N.Y. 10005; and Thomas K. Roche, Esq., 21 West Main Street, Oyster Bay, N.Y. 11771.

Summary: Agreement No. 10321, by and among Empresa Lineas Maritimas Argentinas S.A., Montemar S.A. Comercial y Maritimas and Olvind Lorentzen, Ltd. (Nopal Atlantic Lines), is a quota division agreement whereby the parties have established individual shares for themselves of the 20 percent quota made available to non-national flag lines pursuant to the terms of Agreement No. 10320, a pooling agreement among the national flag lines in the northbound trade from ports of Brazil within the Rio Grande/Vitoria range, both inclusive, to ports of the United States on the Gulf of Mexico.

Agreement No. 10323.

Filing party: William Levenstein, Esq., Dross, Katz, Levenstein & Karpel, Langley Professional Building, Suite 404, 7676 New Hampshire Avenue, Langley Park, Md. 20783.

Summary: Agreement 10323 is a space charter agreement between the Korea Shipping Corp. and the Dalichi Chuo Kisen Kaisha whereby each has agreed to charter space aboard vessels owned or operated by the other as circumstances require in order to accommodate certain cargoes to be transported from Korea and/or Japan to ports of the United States except those of the St. Lawrence River and Great Lakes.

Agreement No. T-3047-1.

Filing party: Leslie E. Still, Jr., Deputy, Offices of the City Attorney of Long Beach, City Hall, 333 West Ocean Boulevard, Long Beach, Calif. 90802.

Summary: Agreement No. T-3047-1, between City of Long Beach (City) and Forest Terminals Corp. (Forest), amends the parties' basic agreement which provides for the nonexclusive preferential assignment to Forest (formerly Building Materials Terminal, Inc.) of certain berthing facilities and the exclusive assignment to Forest of particular land areas including improvements thereon and transit shed offices. The sole purpose of this amendment is to adjust the compensation year, which presently commences on the first day of April of each year, to make it correspond to Forest's fiscal year, which is on a calendar year basis.

Agreement No. T-3575.

Filing party: H. H. Wittren, Manager, Waterfront Real Estate, Port of Seattle, P.O. Box 1209, Seattle, Wash. 98111.

Summary: Agreement No. T-3575, between the Port of Seattle (Port) and Simmons Tug & Barge (Simmons), provides for the Port's 1-year renewable lease to Simmons of certain premises at the Port of Seattle, Wash., to be used for the purpose of mooring, repair, and maintenance of Simmons' tugs and barges, and other activities incidental thereto. As compensation, Simmons shall pay the Port \$1,300.00 per month.

Agreement No. T-3576.

Filing party: Joe H. Hamner, Jr., Esq., Board of Commissioners of the Port of New Orleans, P.O. Box 60046, New Orleans, La. 70160.

Summary: Agreement No. T-3576, between the Board of Commissioners of the Port of New Orleans (Port) and Puerto Rico Maritime Shipping Authority (PRMSA), provides for the Port's 25-year renewable term lease to PRMSA of France Road Berth No. 4, Container Wharf and Terminal at the Port of New Orleans, La. The Port agrees to construct terminal facilities at these premises, the cost of which shall not exceed \$5,500,000. PRMSA shall use the premises for the operation of a container terminal for berthing and handling of vessels owned, chartered, or operated by

BOARD OF SCIENTIFIC COUNSELORS DIVISION
OF CANCER TREATMENT

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Board of Scientific Counselors, DCT, National Cancer Institute, March 13-14, 1978, at the Baltimore Cancer Research Center, Baltimore, Md. This meeting will be open to the public on March 13, 1978, from 8:30 a.m. to 9:30 a.m. at which time there will be a tour of the facilities. The meeting will again be open to the public at 1:30 p.m. til 5 p.m. on March 13, 1978, and on March 14, 1978 from 8:30 a.m. til 5 p.m. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in section 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on March 13, 1978, from 10 a.m. to 12 noon, for the review, discussion, and evaluation of individual programs and projects conducted by the National Institutes of Health, including consideration of personnel qualifications and performance, the competence of individual investigators, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dr. Vincent T. DeVita, Director, Division of Cancer Treatment, National Cancer Institute, Building 31, Room 3A-52, National Institutes of Health, Bethesda, Md. 20014, 301-496-4291 will furnish summaries of meetings, rosters of committee members, and substantive program information.

Dated: February 3, 1978.

SUZANNE L. FREMEAUX,
Committee Management Officer,
National Institutes of Health.

GENERAL MEDICINE A STUDY SECTION

Meeting

Notice is hereby given of a change in the meeting date of the General Medicine A Study Section, Division of Research Grants, which was published in the FEDERAL REGISTER on January 13, 1978 (43 FR 2004).

The General Medicine A Study Section will meet as scheduled March 6-8, 1978, in Conference Room 10, Building

31, National Institutes of Health, Bethesda, Md. However, they will hold an additional session on March 5, 1978, at 6 p.m. until recess, also in Conference Room 10, Building 31. This session will be closed to the public under sections 552b(c)(4) and 552b(c)(6) of Title 5, U.S. Code, and section 10(d) of Pub. L. 92-463, for the review of individual research grant applications.

The open portion of this meeting will be held on March 6, 1978, at 8:30 a.m. for approximately one hour.

Dated: February 3, 1978.

SUZANNE L. FREMEAUX,
Committee Management
Officer,

GENERAL RESEARCH SUPPORT PROGRAM
ADVISORY COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of a special meeting of the General Research Support Program Advisory Committee (GRSPAC), Division of Research Resources, March 30, 1978, from 9 a.m. to 5 p.m. at the Marriott Hotel, Atlanta, Ga. 30303. The entire meeting will be open to the public.

Junior colleges were authorized for participation in the MBS program on June 30, 1975. Proposed guidelines for the review of minority biomedical support applications from junior colleges will be developed by the GRSPAC and reviewed at the May 25-26, 1978, meeting of the National Advisory Research Resources Council. These guidelines will be used to review junior college applications.

Mr. James Augustine, Information Officer, Division of Research Resources, National Institutes of Health, Building 31, Room 5B13, Bethesda, Md. 20014, telephone area code 301-496-5545, will provide summaries of meetings and rosters of committee members. Dr. Sidney A. McNairy, Jr., Executive Secretary, General Research Support Program Advisory Committee, Building 31, Room 5B33, Bethesda, Md. 20014, telephone area code 301-496-6743, will furnish substantive program information.

GENERAL RESEARCH SUPPORT PROGRAM
ADVISORY COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the General Research Support Program Advisory Committee, Division of Research Resources, March 2 and 3, 1978, from 9 a.m. to 5 p.m. at the Holiday Inn, Bethesda, Md.

The meeting will be open to the public from 9 a.m. to 1:30 p.m. on March 2, 1978, to discuss administrative matters relating to the minority biomedical support program. Attendance by the public will be limited to space available.

In accordance with provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, United States Code, and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on March 2, 1978, from 1:30 p.m. to 5 p.m. and on March 3, 1978, from 9 a.m. to adjournment for the review, discussion, and evaluation of individual grant applications submitted to the minority biomedical support program. These applications and discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Mr. James Augustine, Information Officer, Division of Research Resources, National Institutes of Health, Building 31, Room 5B13, Bethesda, Md. 20014, telephone area code 301-496-5545, will provide summaries of meetings and rosters of committee members. HEART, LUNG, AND BLOOD RESEARCH
REVIEW COMMITTEE B

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Heart, Lung, and Blood Research Review Committee B, National Heart, Lung, and Blood Institute, March 31 and April 1, 1978, Conference Room 7, Building 31, National Institutes of Health, Bethesda, Md.

This meeting will be open to the public on March 31, 1978 from 8:30 a.m. to approximately 9:30 a.m. to discuss administrative details and to hear reports concerning the current status of the National Heart, Lung, and Blood Institute. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in section 552b(c)(6), Title 5, United States Code, and section 10(d) of Pub. L. 92-463, the meeting will be closed to the public on March 31, 1978, from 9:30 a.m. until adjournment on April 1, 1978, for the review, discussion, and evaluation of individual grant applications. These applications and the discussions could reveal personal information concerning individuals associated with the applications.

Mr. York E. Onnen, Chief, Public Inquiries and Reports Branch, NHLBI, NIH, Room 5A03, Building 31, Bethesda, Md. 20014, phone 301-496-4236, will provide summaries of the meeting and rosters of the committee members. Dr. Henry G. Roscoe, Executive Secretary, NHLBI, NIH, Room 554, Westwood Building, Bethesda, Md. 20014, phone 301-496-7915, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Program Nos. 13.837, 13.838, 13.839, National Institutes of Health.)

NIH PUBLIC ADVISORY COMMITTEES

Committee Renewals

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Public Law 92-463, 86 Stat. 770-776), the National Institutes of Health announces the renewal by the Secretary, HEW, with the concurrence of the Office of Management and Budget Committee Management Secretariat, of the following committees:

Advisory Committee to the Director, National Institutes of Health
Allergy and Immunology Study Section
Applied Physiology and Orthopedics Study Section
Artificial Kidney-Chronic Uremia Advisory Committee
Bacteriology and Mycology Study Section
Biochemistry Study Section
Biomedical Library Review Committee
Biophysics and Biophysical Chemistry A Study Section
Biophysics and Biophysical Chemistry B Study Section
Board of Scientific Counselors, National Institute on Aging
Board of Scientific Counselors, National Institute of Arthritis, Metabolism, and Digestive Diseases

Board of Scientific Counselors, National Institute of Child Health and Human Development
Board of Scientific Counselors, National Institute of Environmental Health Sciences
Cell Biology Study Section
Developmental Behavioral Sciences Study Section
Endocrinology Study Section
General Medicine A Study Section
Maternal and Child Health Research Committee
Mental Retardation Research Committee
National Advisory Child Health and Human Development Council
National Advisory Environmental Health Sciences Council
National Arthritis, Metabolism, and Digestive Diseases Advisory Council
Oral Biology and Medicine Study Section
Population Research Committee

Authority for the above committees will expire on May 31, 1979, unless the Secretary formally determines that continuance is in the public interest.

Allergy and Clinical Immunology Research Committee
Arteriosclerosis and Hypertension Advisory Committee
Blood Diseases and Resources Advisory Committee
Board of Scientific Counselors, National Eye Institute
Board of Scientific Counselors, National Heart, Lung, and Blood Institute
Board of Scientific Counselors, National Institute of Allergy and Infectious Diseases
Cardiology Advisory Committee
Cardiovascular and Pulmonary Study Section
Clinical Applications and Prevention Advisory Committee
Clinical Trials Review Committee
Communicative Sciences Study Section
Experimental Psychology Study Section
Heart, Lung, and Blood Research Review Committee A
Heart, Lung, and Blood Research Review Committee B
Immunobiology Study Section
Lipid Metabolism Advisory Committee
Microbiology and Infectious Diseases Advisory Committee
National Advisory Allergy and Infectious Diseases Council
National Advisory Eye Council
National Heart, Lung, and Blood Advisory Council
Neurology A Study Section
Physiological Chemistry Study Section
Pulmonary Diseases Advisory Committee
Radiation Study Section
Research Manpower Review Committee
Sickle Cell Disease Advisory Committee
Surgery, Anesthesiology and Trauma Study Section
Toxicology Study Section
Transplantation Biology and Immunology Committee
Vision Research Program Committee

Authority for the above committees will expire on June 30, 1979, unless the Secretary formally determines that continuance is in the public interest.

Dated: February 2, 1978.

DONALD S. FREDRICKSON,
Director,
National Institutes of Health.

PHARMACOLOGY-TOXICOLOGY RESEARCH
PROGRAM COMMITTEE

Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Pharmacology-Toxicology Research Program Committee, National Institute of General Medical Sciences, March 16-18, 1978, National Institutes of Health, Building 31C, Conference Room 6, Bethesda, Md.

This meeting will be open to the public on March 16 from 9 a.m. to 10 a.m. for opening remarks and general administrative business. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Title 5, U.S. Code 552b(c)(4) and 552b(c)(6), the meeting will be closed to the public on March 16 from 10 a.m. to 5 p.m. and on March 17 and 18 from 9 a.m. to 5 p.m. or adjournment for the review, discussion, and evaluation of individual grant applications. These applications could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications.

Mr. Paul Deming, Research Reports Officer, NIGMS, Westwood Building, Room 9A05, Bethesda, Md. 20014, telephone 301-496-7301, will provide a summary of the meeting and a roster of committee members. Substantive program information may be obtained from Dr. Raymond E. Babor, Executive Secretary, Westwood Building, Room 919, Bethesda, Md., telephone 301-496-7707.

(Catalog of Federal Domestic Assistance Program 13-859, Pharmacology-Toxicology Program, National Institute of General Medical Sciences, National Institutes of Health.)

Dated: February 3, 1978.

SUZANNE L. FREMEAUX,
Committee Management Officer,
National Institutes of Health.

NATIONAL DIABETES ADVISORY BOARD

Amended Notice of Meeting

Notice is hereby given of a change in the meetings of the Ad Hoc Insulin Study Committee, National Diabetes Advisory Board on February 7 and 23, 1978, which were published in the FEDERAL REGISTER on January 27, 1978 (43 FR 3768.)

The meeting on February 7, 1978 was postponed, due to snow conditions which disrupted travel in the area. This circumstance necessitated a change of the meeting scheduled for

February 23, 1978. These two meetings have been re-scheduled for February 15 and March 2, 1978.

The meeting on February 15, 1978 will be held at the Crystal City Marriott, 1999 Jefferson Davis Highway, Arlington, Va., from 9 a.m. to 5 p.m. The time and meeting location of the March 2, 1978 meeting can be obtained by contacting Mr. Raymond M. Kuehne, Executive Director of the Board, P.O. Box 30174, Bethesda, Md. 20014, 301-496-6045.

Mr. Raymond M. Kuehne (address above) will provide summaries of the meeting and a roster of the committee members.

(Catalog of Federal Domestic Assistance Program No. 13.847, National Institutes of Health.)

Dated: February 9, 1978.

SUZANNE L. FREMEAU,
Committee Management
Officer, NIH.

[4110-08]

CANCER CONTROL PREVENTION, DETECTION, DIAGNOSIS, AND PRETREATMENT EVALUATION REVIEW COMMITTEE

Meeting

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Cancer Control Prevention, Detection, Diagnosis, and Pretreatment Evaluation Review Committee, National Cancer Institute, March 2-3, 1978, Blair Building, Conference Room 10, 8300 Colesville Road, Silver Spring, Md. 20910. Except as noted below, this meeting will be open to the public on March 2, 1978, from 8:30 a.m. to adjournment, to review breast cancer detection projects from the University City Science Center, Philadelphia, Pa.; Vanderbilt University Medical Center, Nashville, Tenn.; Medical College of Wisconsin, Milwaukee; and Emory University, Atlanta, Ga. Except as noted below, the meeting will also be open on March 3, 1978, from 8:30 a.m. to 12 noon, to review breast cancer demonstration projects from Georgia Baptist Hospital, Atlanta, Ga.; Guttman Breast Diagnostic Institute, New York City; University of Louisville, Louisville, Ky; University of Oklahoma, Norman, Oklahoma; Virginia Mason Research Center, Seattle, Wash.; and a cervical cancer screening program, Maryland Department of Health, Baltimore, Md. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in section 552b(c)(6), Title 5, U.S. Code and section 10(d) of Public Law 92-463, the meeting will be closed to the public approximately ten times during the two days for approximately fifteen minutes each time to discuss

personal information concerning individuals associated with each contract. In addition, and in accordance with the provisions set forth in section 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Public Law 92-463, the meeting will be closed to the public on March 3, from 12 noon to 1 p.m. for the review, discussion, and evaluation of an individual contract proposal. This proposal and the discussions of the proposal could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the proposal.

Mrs. Marjorie F. Early, Committee Management Officer, National Cancer Institute, Building 31, Room 4B43, National Institutes of Health, Bethesda, Md. 20014, 301-496-5708, will provide a summary of the meeting and a roster of committee members, upon request.

Dr. Veronica L. Conley, Executive Secretary, National Cancer Institute, Blair Building, Room 7A07, National Institutes of Health, Bethesda, Md. 20014, 301-427-7941, will furnish substantive program information.

(Catalog of Federal Domestic Assistance Number 13.399, National Institutes of Health.)

Dated: February 9, 1978.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

Office of Education

EDUCATION COMMENTS ON COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

Pursuant to Section 406(g)(2)(B), General Education Provisions Act, notice is hereby given as follows:

The Institute of Museum Services, the National Center for Education Statistics, and the U.S. Office of Education have proposed collections of information and data acquisition activities which will request information from educational agencies or institutions.

The purpose of publishing this notice in the FEDERAL REGISTER is to comply with paragraph (g)(2)(B) of the "Control of Paperwork" amendment which provides that each educational agency or institution subject to a request under the collection of information and data acquisition activity and their representative organizations shall have an opportunity, during a 30-day period before the transmittal of the request to the Director of the Office of Management and Budget, to comment to the Administrator of the National Center for Education Statis-

tics on the collection of information and data acquisition activity.

These data acquisition activities are subject to review by the HEW Education Data Acquisition Council and the Office of Management and Budget.

Descriptions of the proposed collections of information and data acquisition activities follow below.

Written comments on the proposed activities are invited. Comments should refer to the specific sponsoring agency and form number and must be received on or before March 16, 1978, and should be addressed to Administrator, National Center for Education Statistics, attention: Manager, Information Acquisition, Planning, and Utilization, Room 3001, 400 Maryland Avenue SW., Washington, D.C. 20202.

Further information may be obtained from Elizabeth M. Proctor of the National Center for Education Statistics, 202-245-1022.

Dated: February 8, 1978.

MARIE D. ELDRIDGE,
Administrator, National
Center for Education Statistics.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. *Title of proposed activity.*—Application for Museum Services Grant.

2. *Agency/Bureau/Office.*—Institute of Museum Services, Assistant Secretary for Education.

3. *Agency form number.*—IMS-100.

4. *Legislative authority for this activity.*—"Sec. 206. (a) The Director . . . is authorized to make grants to museums to increase and improve museum services . . ." Pub. L. 94-462 (20 U.S.C. 965).

5. *Voluntary/obligatory nature of response.*—Voluntary.

6. *How information collected will be used.*—The information collected will be used to make awards to eligible applicants.

7. *Data acquisition plan.*—(a) Method of collection—Mail; (b) Time of collection—Spring; and (c) Frequency—Annually.

8. *Respondents.*—(a) Type—Museums (public and private non-profit); (b) Number—750; and (c) Estimated average man-hours per respondent—25.

9. *Information to be collected.*—The standard nonconstruction application promulgated by OMB Circular No. A-102 will be used. The Program Narrative will highlight the material required to cover the specific services for which grants may be made.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. *Title of proposed activity.*—Survey of nonpublic elementary and secondary day schools.

2. *Agency/Bureau/Office.*—National Center for Education Statistics.

3. *Agency form number.*—NCES Form 2325.

4. *Legislative authority for this activity.*—"The Center shall—(1) collect, collate, and, from time to time, report full and complete statistics on the conditions of education in the United States; . . ." Sec. 406(b), General Education Provisions Act, Pub. L. 90-247 as amended by Pub. L. 93-380, (20 U.S.C. 1221-1).

5. *Voluntary/obligatory nature of response.*—Voluntary.

6. *How information collected will be used.*—The National Center for Education Statistics plans to publish a series of topical reports which describe the characteristics of nonpublic schools. It also plans to compile the data into a data tape which will be made available to interested users at cost. Both the topical reports and the data tapes are expected to be widely disseminated to individuals and organizations interested in non-public education in the United States.

7. *Data acquisition plan.*—(a) Method of collection—Mail; (b) Time of collection—October-November, 1978; and (c) Frequency—Annually.

8. *Respondents.*—(a) Type—Nonpublic elementary and secondary school officials; (b) Number—Approximately 18,000; and (c) Estimated man-hours per respondents—0.5.

9. *Information to be collected.*—Name and location of each school; type of school; special program offerings; Federal program participation; enrollment by grade; full-time equivalent number of employees by assignment category; religious affiliation of the school, if any; and number of high school graduates, if a secondary school.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. *Title of proposed activity.*—An evaluation of the right to read special emphasis projects.

2. *Agency/Bureau/Office.*—U.S. Office of Education, Office of Planning, Budgeting, and Evaluation.

3. *Agency form number.*—OE 520.

4. *Legislative authority for this activity.*—Planning and evaluation activities are authorized under the General Education Provisions Act which States in part: ". . . the Secretary shall transmit to (appropriate Congressional committees) an annual evaluation report which evaluates the effectiveness of applicable programs . . . such report shall . . . contain information on progress being made . . . describe the cost and benefits of the applicable program . . . identify which sectors of the public receive the benefits of such program . . ." (20 U.S.C. 1226C). Pub. L. 93-380. Also, Part D of Pub. L. 93-380 as amended by Pub. L. 94-194 provides a one percent administrative set-aside for evaluation purposes as part of the National Reading Improvement Program funding. (20 U.S.C. 1126).

5. *Voluntary/obligatory nature of response.*—Voluntary.

6. *How information to be collected will be used.*—This study is an assessment of program effectiveness. The data will be used by the Office of Planning, Budgeting and Evaluation to provide Congress and other decisionmakers with an evaluation of the effectiveness of reading specialists and reading teachers in providing intensive reading instruction to elementary school children, and an evaluation of the effectiveness of intensive summer reading programs in elementary schools.

7. *Data acquisition plan.*—(a) *Method of collection.*—All questionnaires will be administered in face-to-face interviews, except for the parent instrument. This questionnaire will be sent home and collected by classroom teachers who will return them to the contractor.

(b) *Time of collection.*—Questionnaires will be administered in Spring and Fall of 1978 (and Spring and Fall of 1979 should an additional year of assessment be required).

(c) *Frequency.*—Semi-annually.

8. *Respondents.*—(a) Type—Reading specialists/teachers—elementary; (b) Number—28; and (c) Estimated average person-hours per respondent—5.

(a) Type—Classroom teachers—elementary (experimental and control school); (b) Number—190; and (c) Estimated average person-hours per respondent—5.1.

(a) Type—Librarians; (b) Number—14; and (c) Estimated average person-hours per respondent—25.

(a) Type—Students in public elementary schools; (b) Number—3,500; and (c) Estimated average person-hours per respondent—2.

(a) Type—Parents of students in public elementary schools; (b) Number—5,300; and (c) Estimated average person-hours per respondent—2.

9. *Information to be collected.*—Reading specialist—Qualifications; uses of test and assessment information; coordination activities among special emphasis staff and regular classroom teaching staff; role of reading specialist; instructional groupings, strategies and materials; provision of support services to the reading project; use of aides; in-service training; coordination of summer reading program with regular school reading program; project goals and objectives; role of project director; and effects of the special emphasis project.

Classroom teachers (experimental and control)—Grade levels and content areas; instructional groupings, strategies and materials; use of aides or parent volunteers; qualifications; uses of test and assessment information; project goals and objectives; coordination activities among special emphasis staff and regular classroom teaching staff; role of the reading specialist; in-service training; effects of the reading program; student demographic characteristics; and reading treatment received (by students).

Librarians—Qualifications; coordination of library with total school reading program; role of librarians; and effects of the special emphasis project.

Students—Attitudes toward reading and reading instruction; reading habits; and attitudes toward summer school program.

Parents—Child's attitude toward reading; information related to the reading program provided by the school; increase in parent volunteer activity in child's school; and attitudes toward summer school program.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. *Title of proposed activity.*—Pretest and plan for the assessment of ESAA supported intergroup relations activities.

2. *Agency/Bureau/Office.*—U.S. Office of Education, Office of Planning, Budgeting and Evaluation.

3. *Agency form number.*—OE 561-1, -3, -4, -6a, -6b.

4. *Legislative authority for this activity.*—Section 417(a)(1) of Pub. L. 93-380 requires that ". . . the Secretary shall transmit to the . . . (Congress) . . . an annual evaluation report which evaluates the effectiveness of applicable programs in achieving their legislated purposes together with recommendations relating to such programs for the improvement of such programs which will result in greater effectiveness in achieving such purposes." (20 U.S.C. 1226c)

5. *Voluntary/obligatory nature of response.*—Voluntary.

6. *How information to be collected will be used.*—The information collected in the

study will be used to provide program managers and Congress with information about the effectiveness of different types of intergroup relations activities supported by the ESAA program. The results of the pretest will be used to revise and improve the instruments to be used in the study.

7. *Data acquisition plan.*—(a) Method of collection—Mail; (b) Time of collection—Spring 1978; and (c) Frequency—Single time.

8. *Respondents.*—(a) Type—ESAA school coordinator; (b) Number—20; and (c) Estimated average man-hours per respondent—1 hour.

(a) Type—Teachers, elementary/secondary; (b) number—40; and (c) Estimated man-hours per respondent—5 hour.

(a) Type—Principals; (b) Number—20; and (c) Estimated average man-hours per respondent—17 hour.

(a) Type—5th grade students receiving ESAA services; (b) Number—500; and (c) Estimated average man-hours per respondent—1 hour.

(a) Type—10th grade students receiving ESAA services; (b) Number—500; (c) Estimated average man-hours per respondent—1 hour.

9. *Information to be collected.*—Respondent type—ESAA School coordinators; recipients of intergroup relations services; objectives and types of human relations activities supported by ESAA program; method and context of service delivery; intensity of services received; stability of program; coordination of services within district; perceived achievement of program goals; and type and amount of resources of human relations program.

Respondent type—Teachers, elementary/secondary; type of human relations services provided in the classroom; types of resources available for human relations program; method and context of service delivery; coordination of human relations program; and perception of intergroup relations in the school.

Respondent type—Principals; and perception of intergroup relations in the school.

Respondent type—Students; perception of intergroup relations in the school; exposure to intergroup relations services; and knowledge of minority group contributions.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ARIZONA; CHIEF, BRANCH OF RECORDS AND DATA MANAGEMENT

Redelegation of Authority by State Director

Pursuant to the authority contained in section 1.1 of BLM Order No. 701 dated July 23, 1964, as amended, authority is hereby redelegated to the Chief, Branch of Records and Data Management to take action under section 2.6(k) as to mining claim instruments filed for record with BLM under 43 CFR Part 3833, as follows:

- (1) Accept and record instruments meeting recording requirements;
- (2) Notify owners to take curative actions to complete defective filings;

(3) Reject instruments and void claims not filed within the prescribed time periods; and

(4) Reject fillings and void claims located on lands not available for mineral location on dates of location.

This delegation is effective on January 30, 1978. The redelegation published December 30, 1977, FR document 77-37181 is revoked.

Approved: February 3, 1978.

ROBERT O. BUFFINGTON,
State Director.

ARNOLD E. PETTY,
Acting Associate Director.

NEW MEXICO

Applications

FEBRUARY 3, 1978.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Gas Company of New Mexico has applied for two 4-inch natural gas pipeline rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 28 N., R. 11 W.,
Sec. 10, SE $\frac{1}{4}$ SE $\frac{1}{4}$;
Sec. 11, SW $\frac{1}{4}$ SW $\frac{1}{4}$.

T. 29 N., R. 11 W.,
Sec. 6, S $\frac{1}{4}$ SE $\frac{1}{4}$;
Sec. 7, E $\frac{1}{4}$ NE $\frac{1}{4}$ and NE $\frac{1}{4}$ SE $\frac{1}{4}$.

These pipelines will convey natural gas across 1.28 miles of public lands in San Juan County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, N. Mex. 87107.

FRED E. PADILLA,
Chief, Branch of Lands and
Minerals Operations.

[4310-84]

(NM 32646)

NEW MEXICO

Application

FEBRUARY 3, 1978.

Notice is hereby given that, pursuant to section 28 of the Mineral Leas-

ing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Phillips Petroleum Company has applied for a right-of-way for four 4 $\frac{1}{2}$ -inch pipelines across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 14S., R. 28 E.,
Sec. 8, S $\frac{1}{4}$ NE $\frac{1}{4}$, SE $\frac{1}{4}$ NW $\frac{1}{4}$, NE $\frac{1}{4}$ SW $\frac{1}{4}$,
N $\frac{1}{4}$ SE $\frac{1}{4}$ and SW $\frac{1}{4}$ SE $\frac{1}{4}$;
Sec. 10, W $\frac{1}{2}$ SW $\frac{1}{4}$;
Sec. 15, N $\frac{1}{4}$ NW $\frac{1}{4}$, SE $\frac{1}{4}$ NW $\frac{1}{4}$ and
NE $\frac{1}{4}$ SW $\frac{1}{4}$.

These pipelines will convey natural gas across 1.993 miles of public land in Chaves County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, N. Mex. 88201.

NEVADA

Filing of Plats of Survey and Order Providing for Opening of Lands

1. The Plat of Survey of Lands described below will be officially filed at the Nevada State Office, Reno, Nevada, effective 10:00 a.m. on March 17, 1978:

MOUNT DIABLO MERIDIAN, NEVADA
T. 10 N., R. 44 E.

A dependent resurvey of a portion of the west boundary and subdivisional lines and survey completing Sections 19 and 20. Retracement and remonumentation of certain corners of Mineral Surveys 2823, 2929, 3134, 3248, 3463, 3618, 4368, and 4429.

2. The land within the above area varies from gently rolling in the north portion to mountainous in the south portion. Elevation ranges from 5,900 to 6,900 feet above sea level. Soil varies from sandy gravel in lower elevations to shale rock in the mountains and vegetation consists of shadscale and sagebrush. The town of Round Mountain, Nevada is located in Section 20. Access is provided by Nevada State Highway No. 92.

3. Subject to valid existing rights, the provisions of existing withdrawals and classifications, and the requirements of applicable law, the lands are hereby opened to such applications

and petitions as may be permitted. All such valid applications received at or prior at 10 a.m., March 17, 1978, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in order of filing.

Inquiries concerning these lands shall be addressed to the Nevada State Office, Bureau of Land Management, 300 Booth Street, Reno, Nev. 89509.

Date signed: February 6, 1978.

LOYD C. MILLER,
Chief, Branch of Records and
Data Management.

Geological Survey

OUTER CONTINENTAL SHELF

North Atlantic Order No. 2

In the FEDERAL REGISTER issue of January 13, 1978, Vol. 43, No. 12, pages 2702-2711, notice was given of the finalized North Atlantic Area Order Nos. 2, 5, 7, and 12. These orders were effective on January 1, 1978.

Subparagraph 6.3, "Training," of Order No. 2, referenced the First Edition, December 1977, of the U.S. Geological Survey Outer Continental Shelf Standard No. T1 (GSS-OCS-T1) entitled "Training and Qualifications of Personnel in Well-Control Equipment and Techniques for Drilling on Offshore Locations." Since compliance with the referenced standard will not be required until specific training programs have been approved by the Chief, Conservation Division, the reference to the standard should have included a date for compliance. Therefore, subparagraph 6.3 is hereby modified as set forth below. At the present time, the U.S. Geological Survey is in the process of evaluating specific training programs. Those will be identified in future notices to lessees and operators.

The date for compliance with this standard is consistent with the notice for the standard which appeared in the FEDERAL REGISTER on Friday, December 30, 1977, Vol. 42, No. 251.

W. A. RADLINSKI,
Acting Director.

MODIFICATION OF SUBPARAGRAPH 6.3, "TRAINING," OF NORTH ATLANTIC OCS ORDER NO. 2, EFFECTIVE JANUARY 1, 1978

6.3 *Training.* Company and drilling contractor supervisory personnel including drillers shall be trained in and qualified for present-day well control. Records of such training and qualification shall be maintained at the drill site. Training shall include but is not limited to:

(a) Abnormal pressure detection methods.

(b) Well-control methods and procedures.

Such training shall be given in addition to the required weekly blowout-prevention drills. Written verification of compliance with these provisions shall be filed with the Supervisor.

After December 1, 1979, personnel employed in the drilling personnel classifications of rotary helper, derrickman, driller, tool pusher, and operator's representative must be qualified in accordance with the U.S. Geological Survey Outer Continental Shelf Standard No. T1 (GSS-OCS-T1). First Edition, December 1977, entitled "Training and Qualifications of Personnel in Well-Control Equipment and Techniques for Drilling on Offshore Locations," and subsequent revisions thereto. Compliance with this standard shall be considered a prerequisite to approval of any drilling operation.

(FR Doc. 78-4030 Filed 2-13-78; 8:45 am)

[4310-31]

OUTER CONTINENTAL SHELF

Finalized South Atlantic Order Nos. 1, 2, 3, 4, 5, 7, and 12

Notice is hereby given that pursuant to Title 30 CFR Part 250.11, the Acting Chief, Conservation Division, U.S. Geological Survey (USGS) has approved the issuance of the finalized South Atlantic Outer Continental Shelf (OCS) Order Nos. 1, 2, 3, 4, 5, 7, and 12 as set forth below. These orders will be effective on February 1, 1978. For the purpose of these orders, the South Atlantic area shall include those lands subject to Federal oil and gas leasing on the OCS between 37° N. latitude and Key West.

These South Atlantic OCS orders incorporate appropriate comments and suggestions which were received in response to the FEDERAL REGISTER publications of July 22, 1976, Vol. 41, No. 142, and December 23, 1976, Vol. 41, No. 248, soliciting comments on the existing Mid-Atlantic OCS orders as draft orders for the North and South Atlantic areas respectively. These orders also incorporate the comments received in response to the FEDERAL REGISTER publication of June 29, 1977, Vol. 42, No. 125, soliciting comments on the proposed National OCS Order Nos. 1, 3, and 4.

Comments were received from the following organizations:

Chevron Oil Co.
Exxon Company, U.S.A.
Gulf Energy & Minerals Co.—U.S.
Marathon Oil Co.
Mobil Oil Corp.
Offshore Operators Committee
Phillips Petroleum Co.
Paul Purser, Professional Engineer
Sante Fe Drilling Co.

Shell Oil Co.
State of Florida
State of Georgia
State of South Carolina
Texaco, Inc.
The Offshore Co.
U.S. Coast Guard
U.S. Department of Commerce

We have published below a summary of the comments received, our rationale for accepting or rejecting the suggestions of the commenters, and the final version of the orders.

For further information, contact Mr. George Brown, Eastern Region Conservation Manager, Conservation Division, U.S. Geological Survey, 1725 K Street NW., Suite No. 204, Washington, D.C. 20006, 202-254-7870. The primary authors of this document are Mr. Dwayne E. Hull and Mr. Larry Ake of the Atlantic Area Office.

Copies of the finalized South Atlantic OCS orders are available from:

Conservation Manager, Eastern Region,
U.S. Geological Survey, 1725 K Street
NW., Suite No. 204, Washington, D.C.
20006.

NOTE.—1. It has been determined that this document does not contain a major proposal requiring the preparation of an economic impact statement under Executive Order 11821 and OMB Circular A-107.

2. It has also been determined that issuance of these South Atlantic orders is not a major Federal action significantly affecting the quality of the human environment under the National Environmental Policy Act of 1969, 42 U.S.C. sec. 4321 et seq. One of the primary functions of the orders is the mitigation of potential environmental impacts. The manner in which this is accomplished is discussed in the final environmental impact statement for OCS Lease Sale No. 43, South Atlantic area. The South Atlantic orders are based on similar orders for other OCS areas. All modifications are designed to incorporate technological advances and improvements, incorporate regulatory changes, or account for geological differences. No revisions have been made which would lessen the orders' mitigatory impact.

W. A. RADLINSKI,
Acting Director.

SUMMARY OF COMMENTS

U.S. GEOLOGICAL SURVEY RATIONALES—SOUTH ATLANTIC ORDER NOS. 1, 2, 3, 4, 5, 6, 7, AND 12

South Atlantic OCS Order No. 1

Paragraphs 1 and 2. Identification of Platforms and Structures (Fixed and Nonfixed). Several commenters expressed concern that paragraph Nos. 1 and 2 did not require navigational lights and sounding devices for fixed structures and mobile drilling units.

The Order does not address navigational devices on fixed structures and mobile drilling units since these requirements are prescribed by regulations of the U.S. Coast Guard.

Paragraph 4. Identification of Subsea Objects.

A commenter suggested that markers for subsea objects include "all weather" aids to navigation. Another commenter suggested

that marker buoys would not remain in place; therefore, the Order should require the owner to notify the U.S. Coast Guard and the fishing and shrimp associations of the location of the object. Yet another commenter objected to the fact that the design of navigational markings for subsea hazards must meet the standards of both the USGS and the U.S. Coast Guard.

The U.S. Coast Guard suggested that the Order should state that the requirements for the marking of submerged objects should be determined by the Coast Guard District Commander.

Since the determination of hazards to navigation or to commercial fishing operations is a function of the Coast Guard District Commander, we have adopted the suggestion of the Coast Guard and have revised paragraph 4 as follows:

"4. *Identification of Subsea Objects.* All subsea objects resulting from lease operations, which are determined by the Coast Guard District Commander to be hazards to navigation or to the deployment of commercial fishing devices, shall be identified by suitable aid to navigation devices if the District Commander so directs. Prior to the establishment of a subsea object, or in the event of the accidental submergence of an object, the owner shall inform the District Commander of the object's description, location, and unobstructed depth of water above the object's highest point. Based on this information, the District Commander will determine what marking and permits, if any, will be required (14 U.S.C. 83, 85; 43 U.S.C. 1333; 33 CFR 67). The owner shall maintain these navigational markings on-site and properly functioning at all times while the obstruction remains."

U.S. DEPARTMENT OF THE INTERIOR,
GEOLOGICAL SURVEY—CONSERVATION DIVISION

EASTERN REGION, ATLANTIC AREA, SOUTH ATLANTIC

OCS Order No. 1, Effective Feb. 1, 1978

Identification of wells, platforms, structures, and subsea objects

This Order is established pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.37. All departures from the requirements specified in this Order must be approved pursuant to 30 CFR 250.12(b).

1. *Identification of fixed platforms or structures.*—Platforms and structures shall be identified at two diagonal corners by a sign with letters and figures not less than 30 centimeters (12 inches) in height with the following information:

- The name of the lease operator.
- The area name shown on OCS Official Protraction Diagrams or, where no name has been assigned, the Protraction Diagram number.
- The block number in which the platform or structure is located.
- The platform or structure designation.

The information shall be abbreviated as in the following example:
The Blank Oil Co. operates "C" platform on Block 999 of the Salisbury Area. The identifying sign on the platform would indicate: BOC-SAL-999-C.

2. *Identification of nonfixed platforms or structures.*—Floating semi-submersible platforms, bottom-setting mobile rigs, and drilling ships shall be identified by one sign with letters and figures not less than 30 centimeters (12 inches) in height affixed to the

derrick so as to be visible to approaching traffic and containing the following information:

- The name of the lease operator.
- The area designation based on OCS Official Leasing Maps.
- The block number.
- The OCS lease number.
- The well number.

3. *Identification of wells.*—The OCS lease and well number shall be painted on, or a sign affixed to, each singly completed well. In multiple completed wells, each completion shall be individually identified at the wellhead. All identifying signs shall be maintained in a legible condition.

4. *Identification of subsea objects.*—All subsea objects resulting from lease operations, which are determined by the Coast Guard District Commander to be hazards to navigation or to the deployment of commercial fishing devices, shall be identified by suitable aid to navigation devices if the District Commander so directs. Prior to the establishment of a subsea object, or in the event of the accidental submergence of an object, the owner shall inform the District Commander of the object's description, location, and unobstructed depth of water above the object's highest point. Based on this information, the District Commander will determine what marking and permits, if any, will be required (14 U.S.C. 83, 85; 43 U.S.C. 1333; 33 CFR 87). The owner shall maintain these navigational markings onsite and properly functioning at all times while the obstruction remains.

DWAYNE E. HULL,
Area Oil and Gas Supervisor.

Approved:

Acting Chief, Conservation Division.

SOUTH ATLANTIC OCS ORDER NO. 2

Paragraph 1. Drilling platforms and mobile drilling units.

It was suggested that, for clarity, the term "mobile drilling units" shall be used rather than "vessels." This was done since the term is more descriptive and also conforms to the wording used in a Memorandum of Understanding between the Department of the Interior and the Department of Transportation.

A suggestion was made that the USGS delete the requirement for submission of operational criteria and the critical operations and curtailment plan. This was rejected since operational criteria are essential for determining the capability of the unit to operate at the proposed location. The critical operations and curtailment plan is necessary to ensure proper operator planning for safe operations and protection of the environment.

Several commenters suggested that the USGS require an American Bureau of Shipping Classification or U.S. Coast Guard Certificate of Inspection for mobile drilling units. This comment was adopted as both of these items are based on similar criteria of design and construction.

One commenter suggested deleting the requirement to submit the expected environmental conditions. This requirement was rephrased to require only the anticipated maximum wave height, wind, and water current values expected to be encountered.

One commenter requested that the oceanographic and meteorological information

collected under this paragraph be made available to the public. South Atlantic OCS Order No. 12 now states that this information will be available for public inspection.

Several commenters suggested that once a mobile drilling unit had been approved for use in an area, it need not be reapproved for subsequent work in the same area. A sentence was added to subparagraph 1.2 which will normally prevent the operator from having to resubmit rig drawings, specifications, and performance data.

Paragraph 2. Well casing and cementing. A suggestion was made that the sentence requiring casing to conform to the specification contained in API Spec. 5A be altered since Spec. 5A lists only four API grades of casing. The Order was revised to conform to the suggestion. Casing must still meet API quality standards.

Several comments were received from concerned South Atlantic coastal States which indicated concern for the offshore freshwater aquifers which might be encountered during drilling in the South Atlantic. Title 30, Code of Federal Regulations, Part 250.41(a)(1), currently requires that all wells must be cemented and cased in a manner that will prevent the contamination of freshwater strata. Furthermore, the OCS Orders have sufficient flexibility for the USGS District Supervisor to direct actions that will protect any aquifer during drilling and upon abandonment. Additionally, a new sentence has been added to Order No. 2, paragraph 2, that will emphasize the importance of protecting the freshwater aquifers.

One commenter complained that allowing cement around the structural casing to be washed out to a depth of 12 meters could be harmful to shallow aquifers. The Order has been revised to require the Supervisor's approval of this practice.

A commenter suggested that the references to "freshwater sands" in this paragraph be changed to "freshwater zones." This change was made because of the abundance of limestone aquifers in the South Atlantic.

Paragraph 3. Directional surveys.

A commenter suggested that an average of 3 degrees be the limiting deviation for a vertical well and that directional surveys be taken every 1000' rather than 500'. The Order was not revised. These two requirements provide a closer control on the location of the bottom of the well. We believe that in a frontier drilling area this closer control is justified.

Paragraph 4. Blowout-preventer (BOP) equipment requirements.

A variety of commenters disagreed with the USGS requirements for the types and placement of chokes in a choke manifold. The Order was revised to refer to the API Recommended Practice #53 on choke manifold equipment.

Several commenters pointed out that the Order required all seismic data gathered to be made available to the Supervisor along with the Application for Permit to Drill. This was changed to say that only seismic data relating to shallow hazards need be submitted.

One commenter suggested that the requirement that annular preventers be equipped with an alternate control be deleted. Although the wording in the Order has been changed, all blowout preventers are required to have a remote-control station as well as a primary hydraulic-actuation system with an accumulator backup capable of closing all blowout preventers.

All subsea blowout-preventer stacks are required to have dual pod control systems and provisions for BOP closure in the event of loss of connection to the surface. It is felt that a fully redundant system is necessary to provide maximum well-control safety.

One commenter requested that the requirement for weekly pressure testing of blind/shear rams be deleted. The rationale given was that this test poses a potential threat to the unprotected formation if the test plug should leak.

The requirement for weekly testing of the blind/shear rams on subsea BOP stacks was removed. The blind/shear rams must still be pressure tested: (1) on installation, (2) before drilling out of each casing string, and (3) after repairing a pressure seal.

Paragraph 5. Mud Program. Many comments were received which pointed out that the mud-storage requirements in the proposed Order were excessive. The Order was revised to make mud storage and inventory requirements more realistic and flexible while still maintaining adequate safety.

Paragraph 6. Supervision, Surveillance, and Training.

One commenter stated that a reference to future training standards for all members of the drilling crew should be placed in a separate subparagraph rather than in subparagraph C(2). "Well-control methods and procedures." This sentence was deleted during the reorganization of this paragraph, and a reference was made to the U.S. Geological Survey Outer Continental Shelf Standard No. T1 entitled, "Training and Qualifications of Personnel in Well-Control Equipment and Techniques for Drilling on Offshore Locations." First Edition, December 1977. Subparagraph 6.3, "Training," requires certain drilling personnel to be qualified in accordance with the Standard by December 1, 1979. At the present time, the U.S. Geological Survey is in the process of evaluating applications for approval of specific training programs. Those programs which have been approved will be identified in future Notices to Lessees and Operators.

Paragraph 8. Critical Operations and Curtailment Plans.

Several commenters expressed the opinion that this paragraph should not be included in the final Order. They stated the such plans would be voluminous and would restrict the flexibility of onsite personnel.

The Order was not changed. The requirements for submission of critical operations and curtailment plans were made a part of the Orders to ensure adequate planning on the operator's part and to provide the Supervisor with the necessary information to assist and coordinate emergency actions.

U.S. DEPARTMENT OF THE INTERIOR, GEOLOGICAL SURVEY—CONSERVATION DIVISION

EASTERN REGION, ATLANTIC AREA, SOUTH ATLANTIC

OCS Order No. 2, Effective Jan. 1, 1978

Drilling procedures

This Order is established pursuant to the authority prescribed in 30 CFR 250.11. All exploratory and development wells drilled for oil and gas shall be drilled in accordance with 30 CFR 250.34, 250.41, 250.91, and the provisions of this Order which shall continue in effect until field drilling rules are issued. When sufficient geologic and engineering information is obtained through exploratory drilling, operators may make ap-

plication or the Supervisor may require an application for the establishment of field drilling rules. After field drilling rules have been established by the Supervisor, development wells shall be drilled in accordance with such rules.

All wells drilled under the provisions of this Order shall have been included in an exploratory or development plan for the lease as required under 30 CFR 250.34. All applications for approval under the provisions of this Order shall be submitted to the appropriate District Supervisor. Each Application for Permit to Drill (Form 9-331 C) shall include all information required under 30 CFR 250.91 and shall include a notation of any proposed departures from the requirements of this Order. All departures from the requirements specified in this Order shall be subject to approval pursuant to 30 CFR 250.12(b).

1. Drilling platforms and mobile drilling units.

1.1 *General requirements for fixed and mobile drilling units.* The requirements applicable to fixed and mobile drilling units are contained in subparagraphs 1.1.1 through 1.1.6.

1.1.1 *Fitness of drilling unit.* All drilling platforms and mobile drilling units shall be capable of withstanding the oceanographic and meteorological conditions for the proposed area of operations. The operator shall furnish evidence of the fitness of the drilling platform or mobile drilling unit to perform the planned drilling operation.

1.1.2 *Pre-drilling inspection.* Prior to commencing operations in an OCS area, all drilling platforms and mobile drilling units shall be given a complete inspection by the Area Supervisor to insure compliance with OCS Orders and Regulations.

1.1.3 *Well-site surveys.* Operators or lessees shall conduct a shallow geological hazards survey, and other surveys as required by the Supervisor, and furnish the District Supervisor with the results of the survey(s) of the proposed well site, prior to the approval of drilling operations.

1.1.4 *Drawings, specifications, performance data.* Drawings, specifications, and performance data of all drilling equipment, drilling safety systems, and pollution-prevention equipment associated with the drilling operation, and a schematic of the mobile drilling unit, shall be submitted to the District Supervisor.

1.1.5 *Oceanographic, meteorological, performance data.* Operators shall collect and report oceanographic, meteorological, and performance data during the period of operations as required by the Supervisor.

1.2 *Mobile drilling units.* Applications for drilling from mobile drilling units shall include the following:

a. Maximum environmental design criteria, operational criteria, and a critical operations plan as described in paragraph 8 of this Order.

b. Anticipated maximum wave height, wind, and current values expected to be encountered based on an average recurrence interval of 100 years.

c. Current American Bureau of Shipping Classification or U.S. Coast Guard Certification of Inspection with operational limitations.

Unless required by the Supervisor, after a mobile drilling unit has been approved for use in an area, the information detailed in 1.1.4 above need not be resubmitted unless there are changes in equipment or performance data.

1.3 *Fixed drilling platforms.* Applications for placement of fixed drilling platforms or structures shall be submitted in accordance with OSC Order No. 8.

2. *Well casing and cementing.* All wells shall be cased and cemented in accordance with the requirements of 30 CFR 250.41(a)(1). The Application for Permit to Drill shall include the casing design safety factors for collapse, tension, and burst. Wells drilled in areas which are underlain by freshwater aquifers shall have casing programs which are designed and conducted to protect the freshwater zones. In cases where cement has filled the annular space back to the ocean floor, upon approval by the District Supervisor, the cement may be washed out or displaced to a depth not exceeding 12 meters (39 feet) below the ocean floor to facilitate casing removal upon well abandonment. For the purpose of this Order, the several casing strings in order of normal installation are drive or structural, conductor, surface, intermediate, and production casing.

For the surface, intermediate, and production casing strings, if there are indications of improper cementing such as lost returns, cement channeling, or mechanical failure of equipment, the operator shall recement or make the necessary repairs and run a temperature or cement bond log to verify that the casing has been adequately cemented.

The design criteria for all wells shall consider all pertinent factors for well control, including formation fracture gradients and pressures and casing setting depths. The Operator shall utilize appropriate drilling technology and state-of-the-art methods, such as drilling-rate evaluation, shale density analysis, or other appropriate methods in order to enhance the evaluation of conditions of abnormal pressure, and to minimize the potential for the well to develop a flow or kick.

All casing, except drive pipe or structural casing, shall be new pipe which meets American Petroleum Institute (API) quality standards or reconditioned used pipe that has been tested to insure that it will meet API quality standards for new pipe.

2.1 *Drive or structural casing.* This casing shall be set by drilling, driving, or jetting to a minimum depth of 30 meters (98 feet) below the ocean floor or to such greater depth, approved by the District Supervisor, required to support unconsolidated deposits and to provide hole stability for initial drilling operations. If this portion of the hole is drilled, the drilling fluid shall be of a type that is in compliance with the liquid disposal requirements of OCS Order No. 7, and a quantity of cement sufficient to fill the annular space back to the ocean floor shall be used.

2.2 *Conductor and surface casing cementing requirements.* These casing strings shall be cemented as follows:

2.2.1 *Conductor casing.* This casing shall be cemented with a quantity of cement sufficient to fill the calculated space back to the ocean floor. Cement fill to the ocean floor shall be verified by the observation of cement returns. In the event that observations of cement returns is not feasible or possible, an excess volume of cement shall be used to assure fill to the ocean floor. The excess volume shall be approved by the District Supervisor.

2.2.2 *Surface casing.* This casing shall be cemented with a quantity of cement sufficient to protect all freshwater zones and provide well control until the next string of

casing is set and sufficient to fill the calculated annular space to at least 60 meters (197 feet) inside the conductor casing or as approved by the District Supervisor. After drilling a maximum of 30 meters (98 feet) below the surface casing shoe, a pressure test shall be obtained to aid in determining a formation fracture gradient either by testing to formation leak-off or by testing to a predetermined equivalent mud weight. The results of this test and any subsequent tests of the formation shall be recorded on the driller's log and used to determine the depth and maximum mud weight of the intermediate hole.

2.2.3 *Conductor and surface casing setting depths.* Casing design and setting depths shall be based upon all engineering and geologic factors including the presence or absence of hydrocarbons or other potential hazards and water depths. These strings of casing shall be set at the depth specified below subject to approved variation to permit the casing to be set in a competent bed or through formations determined desirable to be isolated from the well by pipe for safer drilling operations; provided, however, that the conductor casing shall be set immediately prior to drilling into formations known to contain oil or gas, or, if unknown, upon encountering such formations.

These casing strings shall be run and cemented prior to drilling below the specified setting depths. For those wells which may encounter abnormal pressure or conditions and for the initial wells in an area, the District Supervisor may prescribe the exact setting depths. Conductor casing setting depths shall be between 91 meters (298 feet) and 305 meters (1,000 feet) TVD below ocean floor, and surface casing setting depths shall be between 305 meters (1,000 feet) and 1,400 meters (4,592 feet) TVD below ocean floor.

Engineering, geophysical, and geologic data used to substantiate the proposed setting depths of the conductor and surface casings (such as estimated fracture gradients, pore pressures, shallow hazards, etc.) shall be furnished with the Application for Permit to Drill.

2.3 *Intermediate casing.* One or more strings of intermediate casing shall be set when required by anticipated abnormal pressure, mud weight, sediment, and other well conditions. The proposed setting depth for intermediate casing shall be based on the pressure tests of the exposed formation below the surface casing shoe or on subsequent pressure tests. After drilling a maximum of 30 meters (98 feet) below the intermediate casing shoe, a pressure test shall be obtained to aid in determining a formation fracture gradient either by testing to formation leak-off or by testing a predetermined equivalent mud weight.

A quantity of cement sufficient to cover and isolate all hydrocarbon zones and to isolate abnormal pressure intervals from normal pressure intervals shall be used. Sufficient cement shall be used to provide annular fill-up to a minimum of 150 meters (492 feet) above the zones to be isolated or 150 meters (492 feet) above the casing shoe in cases where zonal coverage is not required. If a liner is used as an intermediate string, it shall be lapped a minimum of 30 meters (98 feet) into the previous casing string, and the cement shall be tested by a fluid entry or pressure test to determine whether a seal between the liner top and the next larger string has been achieved. The test shall be recorded on the driller's

log. When such liner is used as production casing, it shall be extended to the surface and cemented to avoid surface casing being used as production casing.

2.4 *Production casing.* This string of casing shall be set before completing the well for production. It shall be cemented in a manner necessary to cover or isolate all zones which contain hydrocarbons. But in any case, a calculated volume sufficient to fill the annular space at least 150 meters (492 feet) above the uppermost producible hydrocarbon zone must be used. When a liner is used as production casing, it shall be lapped a minimum of 30 meters (98 feet) into the previous casing string, and the testing of the seal between the liner top and the next larger string shall be conducted as in the case of intermediate liners. The test shall be recorded on the driller's log.

2.5 *Pressure-testing of casing.* Prior to drilling the plug after cementing, all casing strings, except the drive or structural casing, shall be pressure-tested as shown in the table below. The test pressure shall not exceed the internal yield pressure of the casing. The surface casing shall be tested with water in the top 30 meters (98 feet) of the casing. If the pressure declines more than 10 percent in 30 minutes, or if there is another indication of a leak, the casing shall be recemented, repaired, or an additional casing string run, and the casing tested again. The above procedures shall be repeated until a satisfactory test is obtained.

Casing	Minimum surface pressure
Conductor surface..	1,400 kilopascals (kPa) (203 psi) 6,900 kPa (1000 psi).
Intermediate, liner, and production.	10,400 kPa (1508 psi) or 5 kPa/m (0.32 psi/ft.), whichever is greater.

After cementing any of the above strings, drilling shall not be commenced until a time lapse of 8 hours under pressure for the conductor casing string or 12 hours under pressure for all other strings. Cement is considered under pressure if one or more float valves are employed and are shown to be holding the cement in place or when other means of holding pressure is used. All casing pressure tests shall be recorded on the driller's log.

In all cases, sufficient time must elapse to allow the bottom 153 meters (500 feet) of annular cement fill, or total length of annular cement fill, if less, to attain a compressive strength of at least 3,448 kPa (500 psi) before drilling commences. The typical performance data for the particular cement mix used in the well shall be used to determine the time lapse required.

3. *Directional surveys.* Wells are considered vertical if inclination does not exceed three degrees from the vertical. Inclination surveys shall be obtained on all vertical wells at intervals not exceeding 150 meters (492 feet) during the normal course of drilling.

Wells are considered directional if inclination exceeds three degrees from the vertical. Directional surveys giving both inclination and azimuth shall be obtained on all directional wells at intervals not exceeding 150 meters (492 feet) during the normal course of drilling and at intervals not exceeding 30 meters (98 feet) in all angle change portions of the hole. On both vertical and directional wells, directional surveys giving both inclination and azimuth shall be obtained at intervals not exceeding 150 meters (492 feet) prior to, or upon, setting surface or intermediate casing, liners, and at total depth.

Composite directional surveys shall be filed with the District Supervisor. The interval shown will be from the bottom of conductor casing, or, in the absence of conductor casing, from the bottom of drive or structural casing to total depth. In calculating all surveys a correction from true north to Universal Transverse Mercator Grid north or Lambert Grid north shall be made after making the magnetic to true north correction.

4. Blowout-preventer (BOP) equipment requirements.

4.1 *General requirements.* Blowout preventers and related well-control equipment shall be installed, used, and tested in a manner necessary to insure well control.

4.1.1 *BOP equipment.* Blowout-preventer equipment shall consist of an annular and the specified number of ram-type preventers. The pipe rams shall be of proper size to fit the drill pipe in use. The working pressure of any blowout preventer shall exceed the maximum anticipated surface pressure to which it may be subjected. Information submitted with the Application for Permit to Drill shall include the maximum anticipated surface pressure and the criteria used to determine this pressure. All blowout-preventer systems shall be equipped with:

a. A hydraulic-actuating system that provides sufficient accumulator capacity to close all BOP equipment units with a 50 percent operating fluid reserve at 8,300 kPa (1,204 psi). An accumulator backup system, driven by a source of power independent from the primary system, shall be provided with sufficient capacity to close all blowout preventers and hold them closed. Locking devices shall be provided on the ram-type preventers. The method of BOP actuation, such as hydraulic, acoustic or other methods, shall be described and included in the Application for Permit to Drill.

b. At least one operable remote blowout-preventer-control station in addition to the one on the drilling floor.

c. A drilling spool with side outlets, if side outlets are not provided in the BOP body, to provide for a kill line and choke line.

d. A kill line with a master valve located adjacent to the BOP. This valve shall not be used for normal opening or closing on flowing fluids. The kill line shall have at least one control valve in addition to the master valve.

e. A choke manifold equipped in accordance with American Petroleum Institute Recommended Practice entitled "Blowout-Prevention Equipment Systems," API RP 53, First Edition, February 1976, Sections 3A and 3B, or subsequent revisions thereto approved by the Supervisor.

f. A fill-up line.

g. Valves, pipes, and fittings upstream of and including the choke manifold that can be exposed to pressure from the wellbore, with a pressure rating at least equal to that of the blowout-preventer equipment.

4.1.2 *Auxiliary equipment.* The following auxiliary equipment shall also be provided:

a. A top kelly cock shall be installed below the swivel, and an essentially full-opening kelly cock of such design that it can be run through blowout preventers shall be installed at the bottom of the kelly.

b. An inside blowout preventer and an essentially full-opening drill string safety valve in the open position shall be maintained on the rig floor at all times while drilling operations are being conducted. Such valves shall be maintained on the rig floor to fit all connections that are in the drill string.

c. A safety valve shall be available on the rig floor assembled with the proper connection to fit the casing string that is being run in the hole at the time.

4.1.3 *Subfreezing operations.* The blowout preventers and related control equipment must be equipped and conditioned to assure proper operation under subfreezing conditions when operations will be conducted over winter months in areas likely to experience these conditions.

4.2 *Subsea BOP requirements.* The minimum requirements for drilling below the casing strings for subsea blowout-preventer stacks are tabulated below:

SUBSEA BOP STACKS

Drive Pipe: 1—Annular or Pressure Rotating Pack-off Head.

Conductor: 1—Annular and 2—Diverter. Surface: 1—Annular; 2—Pipe Rams; and 1—Blind Shear Ram.

Intermediate: 1—Annular; 2—Pipe Rams; and 1—Blind Shear Ram.

NOTE.—The working pressure of all blowout preventers shall exceed the maximum anticipated surface pressure to which they may be subjected.

Subsea blowout-preventer stacks shall be equipped with blind-shear rams. A subsea accumulator system is required to provide fast closure of the preventers and for cycling all critical functions in case of loss of connection to the surface. A fail-safe design shall be incorporated into the blowout-preventer system and shall include dual pod control systems and fail-safe valving on critical lines and outlets. Prior to the removal of the marine riser for installing casing, the riser shall be displaced with sea water. The operator shall insure that sufficient hydrostatic head exists within the well bore to compensate for the reduction in head and maintain a safe well condition. If repair or replacement of the blowout-preventer stack is necessary after installation, this work will be accomplished after casing has been cemented prior to drilling out the shoe or by setting a cement or bridge plug to insure safe well conditions.

4.3 *Surface BOP requirements.* The minimum requirements for drilling below the casing strings for conventional surface blowout-preventer stacks are tabulated below:

MINIMUM BOP REQUIREMENTS

SURFACE BOP STACKS

Drive Pipe: 1—Annular or Pressure Rotating Pack-off Head; Diverter.

Conductor Casing: 1—Annular and Diverter.

Surface Casing: 1—Annular; 2—Pipe Rams; 1—Blind Ram.

1. To be installed on top of the marine riser.

2. The diverter system shall provide as a minimum two 15-centimeter (6-inch) internal diameter lines and full-opening valves.

3. When a tapered drill string is in use, the BOP stack shall be additionally equipped with a minimum of one set of pipe rams to fit the smaller size(s) drill pipe.

4. The diverter system shall provide, as a minimum, two 15-centimeter (6-inch) internal diameter lines and full-opening valves.

Intermediate Casing: 1—Annular; 2—Pipe Rams; 1—Blind Ram.

NOTE.—The working pressure of all blowout preventers shall exceed the maximum anticipated surface pressure to which they may be subjected.

4.4 *Drive pipe or structural casing BOP requirements.*

4.4.1 *Surface BOP.* Before drilling below this string, at least one remotely-controlled, annular-type blowout preventer or pressure-rotating, packoff-type head and related equipment shall be installed for circulating the drilling fluid to the drilling structure or vessel.

4.4.2 *Subsea BOP.* When the blowout-preventer system is on the ocean floor, the choke and kill lines or equivalent vent lines, equipped with necessary connections and fittings, can be used for diversion, if approved by the Supervisor, or an annular preventer or pressure-rotating, packoff-type head, equipped with suitable diversion lines, shall be installed on top of the marine riser. The diverter system shall be equipped with automatic, remotely-controlled valves which open prior to shutting in the well. Lines venting in different directions to permit downwind diversion shall be provided. A schematic diagram and operational procedure for the diverter system shall be submitted with the Application for Permit to Drill (Form 9-331 C) to the District Supervisor for approval.

4.4.3 *Floating drilling operations.* In drilling operations where a floating or semi-submersible type of drilling vessel is used and formation competency at the structural casing setting depth is not adequate to permit circulation of drilling fluids to the vessel while drilling conductor hole, a program which provides for safety in these operations shall be described and submitted to the District Supervisor for approval. This program shall include all known pertinent and relevant information, including seismic and geologic data, water depth, drilling-fluid hydrostatic pressure, schematic diagram from rotary table to proposed conductor-casing seat, and contingency plan for moving off location. In all areas where shallow hazards or hydrocarbons are unknown, seismic data shall be obtained, and a small-diameter initial pilot hole from the bottom of drive or structural casing to proposed conductor-casing seat shall be drilled to aid in determining the presence or absence of these hazards. All seismic data relating to shallow hazards shall be made available to the Supervisor, and an analysis of the geologic hazards shall be furnished with the Application for Permit to Drill.

4.5 *Conductor casing.* Before drilling below this string, at least one remotely-controlled, annular-type blowout preventer, a diverter system as described in subparagraph 4.4 above, and equipment for circulating the drilling fluid to the drilling structure or vessel shall be installed.

4.6 *Surface and/or intermediate casing.* Before drilling below this string, the blowout-preventer equipment shall include a minimum of:

a. Four remotely-controlled, hydraulically-operated blowout preventers with a working pressure which exceeds the maximum anticipated surface pressure, including at least at least two equipped with pipe rams, one with blind rams, and one annular type.

b. When a tapered drill string is in use, the BOP stack shall be additionally equipped with a minimum of one set of pipe rams to fit the smaller size(s) drill pipe.

c. A drilling spool with side outlets, if side outlets are not provided in the blowout-preventer body.

d. A choke line and manifold.

e. A kill line separate from the choke line.

f. A fill-up line.

4.7 *Testing.*

4.7.1 *BOP controls.* A minimum of one operable remote blowout-preventer control station shall be provided, in addition to the primary blowout-preventer control station on the drilling floor. Accumulators or accumulators and pumps shall maintain a pressure capacity reserve at all times to provide for repeated operation of hydraulic blowout preventers.

4.7.2 *Pressure tests.* Pipe ram-type blowout preventers and related control equipment shall be tested at the rated working pressure of the BOP stack assembly, or at 70 percent of the minimum internal yield pressure of the casing, whichever is the lesser. Annular-type preventers shall be tested at 70 percent of the applicable above pressure test requirements. All preventers shall first be tested at low pressures of 1,400 to 2,000 kPa (203 to 290 psi).

All preventers shall be tested:

a. When installed.

b. Before drilling out after each string of casing has been set.

c. Not less than once each week alternating between control stations.

d. Following repairs that require disconnecting a pressure seal in the assembly.

The blind/shear rams of subsea BOP stacks shall be tested exactly as the pipe ram-type blowout preventers with the exception of not requiring the weekly pressure test in c. above. The blind rams of surface BOP stacks shall be tested in accordance with the requirements for pipe ram-type preventers.

4.7.3 *Actuation.* While drill pipe is in use, the following actuation procedures shall be performed, as a minimum, to determine the proper functioning of the blowout preventers and control stations:

a. Pipe Rams—Actuated daily.

b. Blind/Shear Rams—Actuated while drill pipe is out of the hole, once each trip, but not more than once each day.

c. Tapered Drill String Pipe Rams—The smaller size pipe rams shall be actuated on the appropriate drill pipe size once each trip.

d. Annular-Type Preventer—Actuated on the drill pipe, in conjunction with the pressure test, once each week.

e. Control Stations—Actuated while drill pipe is out of the hole, once each trip, but not more than once each day.

4.8 *Inspection and maintenance.* All blowout-preventer systems and marine risers and associated equipment shall be inspected and maintained in accordance with the manufacturer's recommended procedures. The blowout preventers and marine risers shall be visually inspected during each trip and in no event less than once each day. Inspection of subsea installations may be accomplished by the use of television equipment.

4.9 *Drills.* All drilling personnel shall be indoctrinated in blowout-preventer procedures and be familiar with the blowout-preventer equipment before starting work on the well. A blowout-preventer drill shall be conducted at least weekly for each drilling crew to insure that all equipment is operational and that crews are trained properly to carry out emergency duties. These drills shall be performed during various drilling operations such as drilling, running and pulling the drill string, and when out of the hole. All blowout-preventer tests and crew drills shall be recorded on the driller's log. The operator shall furnish current schedules of drills to the District Supervisor so that a U.S. Geological Survey representative may witness any drill. Such a drill may be required by a U.S. Geological Survey representative at any time during the drilling operation. The drill shall include as a minimum:

a. Sounding of a warning signal sometimes actuated by pit-level indicator or other automatic device.

b. Withdrawing the kelly.

c. Stopping the pump.

d. Observing flow of mud from the well.

e. Actuation of the blowout preventers.

(In order to prevent damage to the rams complete closure of the rams on drill pipe is not required on floating drilling vessels.)

5. *Mud program.* The characteristics, use, and testing of drilling mud and the conduct of related drilling procedures shall be such as are necessary to prevent the blowout of any well. Quantities of mud materials sufficient to insure well control shall be maintained readily accessible for use at all times.

5.1 *Mud control.* Before starting out of the hold with drill pipe, the mud shall be properly conditioned. Proper conditioning requires either circulation with the drill pipe just off bottom to the extent that the annular volume is displaced or proper documentation in the driller's log prior to pulling the drill pipe that:

a. There was no indication of influx of formation fluids prior to starting to pull the drill pipe from the hole.

b. The weight of the returning mud is not less than the weight of the mud entering the hole.

c. Other mud properties recorded on the daily drilling log are within the specified ranges at the stage of drilling the hole to perform their required functions.

In those cases when the hole is circulated, the driller's log shall be so noted.

When coming out of the hole with the drill pipe, the annulus shall be filled with mud before the mud level drops 30 meters (98 feet). A mechanical device for measuring the amount of mud required to fill the hole shall be utilized, and any time there is an indication of swabbing or influx of formation fluids the necessary safety devices and action shall be employed to control the well. The mud shall not be circulated and conditioned, except on or near bottom, unless well conditions prevent running the drill pipe back to the bottom. The mud in the hole shall be circulated or reverse-circulated prior to pulling drill-stem test tools from the hole.

The hole shall be filled by accurately measured volumes of mud. The number of stands of drill pipe and drill collars that may be pulled between the times of filling the hole shall be calculated and posted. The number of barrels and pump strokes required to fill the hole for this designated number of stands of drill pipe and drill collars shall be posted. For each casing string, the maximum pressure which may be ap-

(Subsea blowout-preventer stacks used with floating drilling vessels shall be equipped with one set of blind-shear rams.)

b. In addition to the above, when a tapered string is used for drilling intermediate casing hole, the BOP stack shall be additionally equipped with a minimum of one set of pipe rams to fit the smaller size(s) drill pipe.

c. A drilling spool with side outlets, if side outlets are not provided in the blowout-preventer body.

d. A choke line and manifold.

e. A kill line separate from the choke line.

f. A fill-up line.

4.7 *Testing.*

4.7.1 *BOP controls.* A minimum of one operable remote blowout-preventer control station shall be provided, in addition to the primary blowout-preventer control station on the drilling floor. Accumulators or accumulators and pumps shall maintain a pressure capacity reserve at all times to provide for repeated operation of hydraulic blowout preventers.

4.7.2 *Pressure tests.* Pipe ram-type blowout preventers and related control equipment shall be tested at the rated working pressure of the BOP stack assembly, or at 70 percent of the minimum internal yield pressure of the casing, whichever is the lesser. Annular-type preventers shall be tested at 70 percent of the applicable above pressure test requirements. All preventers shall first be tested at low pressures of 1,400 to 2,000 kPa (203 to 290 psi).

All preventers shall be tested:

a. When installed.

b. Before drilling out after each string of casing has been set.

c. Not less than once each week alternating between control stations.

d. Following repairs that require disconnecting a pressure seal in the assembly.

The blind/shear rams of subsea BOP stacks shall be tested exactly as the pipe ram-type blowout preventers with the exception of not requiring the weekly pressure test in c. above. The blind rams of surface BOP stacks shall be tested in accordance with the requirements for pipe ram-type preventers.

4.7.3 *Actuation.* While drill pipe is in use, the following actuation procedures shall be performed, as a minimum, to determine the proper functioning of the blowout preventers and control stations:

a. Pipe Rams—Actuated daily.

b. Blind/Shear Rams—Actuated while drill pipe is out of the hole, once each trip, but not more than once each day.

c. Tapered Drill String Pipe Rams—The smaller size pipe rams shall be actuated on the appropriate drill pipe size once each trip.

d. Annular-Type Preventer—Actuated on the drill pipe, in conjunction with the pressure test, once each week.

e. Control Stations—Actuated while drill pipe is out of the hole, once each trip, but not more than once each day.

4.8 *Inspection and maintenance.* All blowout-preventer systems and marine risers and associated equipment shall be inspected and maintained in accordance with the manufacturer's recommended procedures. The blowout preventers and marine risers shall be visually inspected during each trip and in no event less than once each day. Inspection of subsea installations may be accomplished by the use of television equipment.

4.9 *Drills.* All drilling personnel shall be indoctrinated in blowout-preventer procedures and be familiar with the blowout-preventer equipment before starting work on the well. A blowout-preventer drill shall be conducted at least weekly for each drilling crew to insure that all equipment is operational and that crews are trained properly to carry out emergency duties. These drills shall be performed during various drilling operations such as drilling, running and pulling the drill string, and when out of the hole. All blowout-preventer tests and crew drills shall be recorded on the driller's log. The operator shall furnish current schedules of drills to the District Supervisor so that a U.S. Geological Survey representative may witness any drill. Such a drill may be required by a U.S. Geological Survey representative at any time during the drilling operation. The drill shall include as a minimum:

a. Sounding of a warning signal sometimes actuated by pit-level indicator or other automatic device.

b. Withdrawing the kelly.

c. Stopping the pump.

d. Observing flow of mud from the well.

e. Actuation of the blowout preventers.

(In order to prevent damage to the rams complete closure of the rams on drill pipe is not required on floating drilling vessels.)

5. *Mud program.* The characteristics, use, and testing of drilling mud and the conduct of related drilling procedures shall be such as are necessary to prevent the blowout of any well. Quantities of mud materials sufficient to insure well control shall be maintained readily accessible for use at all times.

5.1 *Mud control.* Before starting out of the hold with drill pipe, the mud shall be properly conditioned. Proper conditioning requires either circulation with the drill pipe just off bottom to the extent that the annular volume is displaced or proper documentation in the driller's log prior to pulling the drill pipe that:

a. There was no indication of influx of formation fluids prior to starting to pull the drill pipe from the hole.

b. The weight of the returning mud is not less than the weight of the mud entering the hole.

c. Other mud properties recorded on the daily drilling log are within the specified ranges at the stage of drilling the hole to perform their required functions.

In those cases when the hole is circulated, the driller's log shall be so noted.

When coming out of the hole with the drill pipe, the annulus shall be filled with mud before the mud level drops 30 meters (98 feet). A mechanical device for measuring the amount of mud required to fill the hole shall be utilized, and any time there is an indication of swabbing or influx of formation fluids the necessary safety devices and action shall be employed to control the well. The mud shall not be circulated and conditioned, except on or near bottom, unless well conditions prevent running the drill pipe back to the bottom. The mud in the hole shall be circulated or reverse-circulated prior to pulling drill-stem test tools from the hole.

The hole shall be filled by accurately measured volumes of mud. The number of stands of drill pipe and drill collars that may be pulled between the times of filling the hole shall be calculated and posted. The number of barrels and pump strokes required to fill the hole for this designated number of stands of drill pipe and drill collars shall be posted. For each casing string, the maximum pressure which may be ap-

plied to the blowout preventer before controlling excess pressure by bleeding through the choke shall be posted near the driller. Drill pipe pressure shall be monitored during the bleeding procedure for well control.

A mud gas separator and degasser shall be installed in the mud system prior to the commencement of drilling operations and shall be maintained for use throughout the drilling and completion of the well.

5.2 *Mud test equipment.* Mud test equipment shall be maintained on the drilling rig at all times, and mud tests shall be performed once each tour or more frequently as conditions warrant. Such tests shall be conducted in accordance with procedures outlined in API RP 13B, "Recommended Practice for Standard Procedure for Testing Drilling Fluids," Sixth Edition, April 1976, or subsequent revisions as approved by the Supervisor, and the results recorded and maintained at the drill site. The following mud-system monitoring equipment shall be installed (with derrick floor indicators) and used at the point in the drilling operation when mud returns are established and throughout subsequent drilling operations:

a. Recording mud pit level indicator to determine mud pit volume gains and losses. This indicator shall include a visual and audio warning device.

b. Mud volume measuring device for accurately determining mud volumes required to fill the hole on trips.

c. Mud return indicator to determine that returns essentially equal to the pump discharge rate.

d. Gas-detecting equipment to monitor the drilling mud returns.

5.3 *Mud quantities.* The operator shall include, with his Application for Permit to Drill, a tabulation of well depth versus minimum quantities of mud material including weighting material to be maintained at the drill site for emergency use. The minimum quantities of mud material required shall be based on the criteria listed in a and b below taking into account the mud storage capacity of the drilling vessel. When the mud quantity required exceeds the storage capacity of the vessel, the operator must demonstrate that the mud inventories on hand are sufficient to maintain well control until additional quantities can be delivered to the well site.

a. The quantity of the mud materials shall be based on twice the volume of the calculated capacity of the active downhole and surface mud system.

b. The quantity of the weighting material shall be based on the amount required to overcome the highest anticipated formation pressure.

Daily inventories of mud materials, including barite, shall be recorded to provide a basis for comparison with the tabulation of well depth versus minimum quantities of mud material. Drilling operations shall be suspended in the absence of mud material specified in the table.

6. *Supervision, surveillance, and training.*
6.1 *Supervision.* A representative of the operator shall provide onsite supervision of drilling operations on a 24-hour basis.

6.2 *Surveillance.* From the time drilling operations are initiated and until the well is completed or abandoned, a member of the drilling crew or the toolpusher shall maintain rig floor surveillance continuously unless the well is secured with blowout preventors or cement plugs.

6.3 *Training.* Company and drilling contractor supervisory personnel including

drillers shall be trained in and qualified for present-day well control. Records of such training and qualification shall be maintained at the drill site. Training shall include but is not limited to:

a. Abnormal pressure detection methods.

b. Well-control methods and procedures. Such training shall be given in addition to the required weekly blowout-prevention drills. Written verification of compliance with these provisions shall be filed with the Supervisor.

After December 1, 1979, personnel employed in the drilling personnel classifications of rotary helper, derrickman, driller, tool pusher, and operator's representative must be qualified in accordance with the U.S. Geological Survey Outer Continental Shelf Standard No. T 1 (GSS-OCS-T 1), First Edition, December 1977, entitled "Training and Qualifications of Personnel in Well-Control Equipment and Techniques for Drilling on Offshore Locations," and subsequent revisions thereto. Compliance with this Standard shall be considered a prerequisite to approval of any drilling operation.

7. *Hydrogen sulfide.* When drilling operations are undertaken to penetrate reservoirs known or expected to contain hydrogen sulfide (H₂S), or, if unknown, upon encountering H₂S, the preventive measures and operating practices set forth in the U.S. Geological Survey Outer Continental Shelf Standard No. 1, "Safety Requirements for Drilling Operations in a Hydrogen Sulfide Environment (GSS-OCS-1)," February 1976, or subsequent revisions thereto, shall be followed.

8. *Critical operations and curtailment plans.* Certain operations performed in drilling are more critical than others with respect to well control, fire, explosion, oil spills, and other discharges or emissions. These operations may occur during drilling, running casing, logging, drill-stem testing, well completion, or wireline operations.

Each operator shall file with the Supervisor, for approval, a Critical Operations and Curtailment Plan for the lease which shall contain:

a. A list or description of the critical drilling operations that are likely to be conducted on the lease. Such list or description shall specify the operations to be ceased, limited, or not to be commenced under given circumstances or conditions. The list shall include operations such as:

(1) Drilling in close proximity to another producing well.

(2) Drill-stem testing.

(3) Running and cementing casing.

(4) Cutting and recovering casing.

(5) Logging or wireline operations.

(6) Well-completion operations.

(7) Moving the drilling vessel off location in an emergency, repositioning the vessel on location, and reestablishing entry into the well.

b. A list or description of circumstances or conditions under which such critical operations shall be curtailed. This list or description shall be developed from all the factors and conditions relating to the conduct of operations on the lease and shall consider, but not necessarily be limited to, the following:

(1) Whether the drilling operations are to be conducted from mobile drilling units or fixed platforms.

(2) The availability and capability of containment and cleanup equipment.

(3) Abnormal or unusual characteristics expected to be encountered during drilling operations.

(4) Spill-control system response time.

(5) Known or anticipated meteorological or oceanographical conditions.

(6) Availability of personnel and equipment for the particular operation to be conducted.

(7) Other factors peculiar to the particular lease under consideration.

c. When any such circumstance or condition listed or described in the plan occurs or other operational limits are encountered, the operator shall notify the Supervisor and shall curtail the critical operations as set forth under 8a above.

d. Any deviations in the plan shall require prior approval by the Supervisor except in case of an emergency in which event the Supervisor shall be notified as soon as possible.

e. The operator shall review the plan at least annually. Notification of the review and any amendments or modifications to the plan shall be filed with the Supervisor.

DWAYNE E. HULL,
Area Oil and Gas Supervisor.

Approved:

Acting Chief, Conservation Division.

SOUTH ATLANTIC OCS ORDER NO. 3

Subparagraph 1.1. Isolation of zones in open hole.

It was suggested that the phrase "or to prevent migration of fluids in the well bore" is redundant. The intent of the Order, however, is to prevent the undesirable migration of well fluids. The subparagraph was revised by changing the title to "Isolation of Zones in Open Hole" by adding the word "saltwater" to the first sentence between "gas" and "freshwater" and by revising the second sentence to read:

"Additional cement plugs to prevent the migration of fluids in the well bore may be required by the District Supervisor."

This revision clarifies the intent and grants the District Supervisor the flexibility to require additional plugs.

A commenter suggested that the requirement for a cement plug to be placed for every 750 meters of uncased hole is unnecessary. The Order was revised. Subparagraph 1.1 now requires plugs to isolate zones containing oil, gas, saltwater, freshwater, and such additional plugs as prescribed by the Supervisor. The Supervisor's review of applications to plug and abandon will ensure that wells are properly plugged.

Subparagraph 1.4. Plugging of casing stubs.

It was suggested that the phrase "cannot be used" is ambiguous and that the phrase should read "if the foregoing preferred methods are not used." The subparagraph was revised to eliminate the phrase "if the foregoing methods cannot be used." A new lead-in sentence was then added as follows:

"If casing is cut and recovered leaving a stub, one of the following methods shall be used to plug the stub."

It was suggested that any material used in a hole, such as casing, be made of corrosion-resistant material in order to protect freshwater zones. Although this comment would have been more properly directed at Order No. 2, the Orders have not been changed. Adherence to proper casing-cementing procedures as well as the abandonment requirements of the Orders will help ensure that unwanted migration of fluids will not occur.

Two new subparagraphs were added, 1.4.1 and 1.4.2, to differentiate between the requirements of stubs terminating inside

casing and stubs terminating below the casing strings.

Subparagraph 1.7. Testing of plugs.

It was suggested that all plugs should be verified in the same manner as the first plug below the top plug. The Order presently requires the testing of the first plug below the surface plug. Past well history has not indicated a need to test the other plugs below the surface plug. The subparagraph was reorganized by adding a new lead-in sentence stating that the plug shall be verified by one of the following methods: a or b. The revised language also made it clear that, if cement were placed above a bridge plug or a retainer, the cement need not be tested.

Subparagraph 1.9. Clearance of location.

There was a divergence of opinion on the wording which provides flexibility for the District Supervisor to approve the severance of casing at depths less than 5 meters (16 feet) below the ocean floor. The Order states that the approval of the Supervisor is required to sever casing at depths less than 5 meters (16 feet) "after a review of data on the ocean bottom conditions." There have been instances where it was impossible to remove casing which had been severed at 16 feet. In the Alaska Area, a casing was severed at 16 feet and could not be pulled with a force of 400,000 pounds. The pipe was then cut at 6 feet below the ocean floor and was pulled with a force of 300,000 pounds. The problem is prevalent where hard bottoms exist. In a hard bottom where erosion of the ocean floor is unlikely, the depth of the severance is not critical. In a soft bottom which is subject to erosion or sand waves, review of bottom conditions by the Supervisor will ensure that the casing is severed at an adequate depth. Supervisory review will also take into account that protection of freshwater aquifers during abandonment.

Paragraph 2. Temporary abandonment.

A comment was made that the Order should clarify the difference between temporary and permanent abandonment. No time conditions will be set, but temporarily abandoned wells will be seafloor obstructions which must be marked. Determination as to the type of abandonment will be handled on a case-by-case basis by the Supervisor.

The paragraph was revised in response to comments received by Task Force members in the field. One operator commented that the requirement for setting a cement plug in the open hole of a temporarily abandoned drilling well has caused an unintentional side track while trying to drill out of the 100-foot cement plug below the casing. This can easily occur when the formation is softer than the cement plug. Such side tracking and the resultant dog leg is highly undesirable. The following two sentences were added to the paragraph:

"When a drilling well is temporarily abandoned, a bridge plug or a cement plug shall be set at the base of the deepest string. If a cement plug is set, it shall not be necessary for the cement plug to overlap into the open hole."

It was suggested by USGS personnel that this paragraph should address the requirements for the marking of casing stubs which extend above the ocean floor. The last sentence of the paragraph was revised as follows:

"When casing extends above the ocean floor, the operator shall comply with the following requirements:

a. A mechanical retrievable or permanent bridge plug, or a cement plug 30 meters (98 feet) in length, shall be set in the casing between 5 and 60 meters (16 and 197 feet) below the ocean floor.

b. The requirements of Order No. 1, paragraph 4, "Identification of Subsea Objects."

UNITED STATES DEPARTMENT OF THE INTERIOR,
GEOLOGICAL SURVEY, CONSERVATION DIVISION

EASTERN REGION, ATLANTIC AREA—SOUTH
ATLANTIC OCS ORDER NO. 3

Effective February 1, 1978

Plugging and abandonment of wells

This Order is established pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.15. The operator shall comply with the following minimum plugging and abandonment procedures which have general application to all wells drilled for oil and gas. Plugging and abandonment operations shall not be commenced prior to obtaining approval from the appropriate District Supervisor. Oral or telegraphic approvals shall be in accordance with 30 CFR 250.13. All departures from the requirements specified in this Order shall be subject to approval pursuant to 30 CFR 250.12(b).

1. *Permanent abandonment.*

1.1 *Isolation of zones in open hole.* In uncased portions of wells, cement plugs shall be spaced to extend 30 meters (98 feet) below the bottom to 30 meters (98 feet) above the top of any oil, gas, saltwater, and freshwater zones so as to isolate them in the strata in which they are found and to prevent them from escaping into other strata. Additional cement plugs to prevent the migration of fluids in the well bore may be required by the District Supervisor.

1.2 *Isolation of open hole.* Where there is open hole below the casing, a cement plug shall be placed in the deepest casing string by a or b below. In the event lost circulation conditions exist or are anticipated, the plug may be placed in accordance with c below:

a. A cement plug placed by displacement method so as to extend a minimum of 30 meters (98 feet) above and 30 meters (98 feet) below the casing shoe.

b. A cement retainer with effective back pressure control set not less than 15 meters (49 feet) nor more than 30 meters (98 feet) above the casing shoe, with a cement plug calculated to extend at least 30 meters (98 feet) below the casing shoe and 15 meters (49 feet) above the retainer.

c. A permanent type bridge plug set within 45 meters (148 feet) above the casing shoe with 15 meters (49 feet) of cement on top of the bridge plug. This bridge plug shall be tested in accordance with 1.7 prior to placing subsequent plugs.

1.3 *Plugging or isolating perforated intervals.* A cement plug shall be placed opposite all open perforations (perforations not squeezed with cement) extending a minimum of 30 meters (98 feet) above and 30 meters (98 feet) below the perforated interval or down to a casing plug, whichever is less. In lieu of the cement plug, the following two methods are acceptable, provided the perforations are isolated from the hole below:

a. A cement retainer with effective back pressure control set not less than 15 meters (49 feet) nor more than 30 meters (98 feet) above the top of the perforated interval with a cement plug calculated to extend at

least 30 meters (98 feet) below the bottom of the perforated interval and 15 meters (49 feet) above the retainer.

b. A permanent type bridge plug set within 45 meters (148 feet) above the top of the perforated interval with 15 meters (49 feet) of cement on top of the bridge plug.

1.4 *Plugging of casing stubs.* If casing is cut and recovered leaving a stub, one of the following methods shall be used to plug the casing stub.

1.4.1 *Stub termination inside casing string.* A stub terminating inside a casing string shall be plugged by methods a, b, or c as follows:

a. A cement plug will be set so as to extend 30 meters (98 feet) above and 30 meters (98 feet) below the stub.

b. A retainer set 15 meters (49 feet) above the stub with 45 meters (148 feet) of cement set below and 15 meters (49 feet) above.

c. A permanent bridge plug set 15 meters (49 feet) above the stub and capped with 15 meters (49 feet) of cement.

1.4.2 *Stub termination below casing string.* If the stub is below the next larger string, plugging shall be accomplished in accordance with either 1.1 or 1.2.

1.5 *Plugging of annular space.* Any annular space communicating with any open hole and extending to the ocean floor shall be plugged with cement.

1.6 *Surface plug requirement.* A cement plug of at least 45 meters (148 feet), with the top of the plug 45 meters (148 feet) or less below the ocean floor, shall be placed in the smallest string of casing which extends to the surface.

1.7 *Testing of plugs.* The setting and location of the first plug below the surface plug shall be verified by one of the following methods:

a. Placing a minimum pipe weight of 6,800 kilograms (15,000 pounds) on the cement plug, cement retainer, or bridge plug. The cement placed above the bridge plug or retainer need not be tested.

b. Testing with a minimum pump pressure of 6,900 kPa (1,000 psi) with no more than a 10-percent pressure drop during a 15-minute period.

1.8 *Mud.* Each of the respective intervals of the hole between the various plugs shall be filled with mud fluid of sufficient density to exert hydrostatic pressure exceeding the greatest formation pressure encountered while drilling such an interval.

1.9 *Clearance of location.* All casing and piling shall be severed and removed to a depth of at least 5 meters (16 feet) below the ocean floor, or at a depth as approved by the District Supervisor after a review of data on the ocean bottom conditions. The operator shall verify that the location has been cleared of all obstructions.

2. *Temporary abandonment.* Any drilling well which is to be temporarily abandoned shall be mudded and cemented as required for permanent abandonment except for the requirements 1.6 and 1.9. When a drilling well is temporarily abandoned, a bridge plug or a cement plug shall be set at the base of the deepest casing string. If a cement plug is set, it shall not be necessary for the cement plug to overlap into the open hole. When casing extends above the ocean floor, the operator shall comply with the following requirements:

a. A mechanical, retrievable or permanent bridge plug, or a cement plug 30 meters (98 feet) in length, shall be set in the casing between 5 and 60 meters (16 and 197 feet) below the ocean floor.

b. The requirements of South Atlantic OCS Order No. 1, paragraph 4, "Identification of Subsea Objects."

WAYNE E. HULL,
Area Oil and Gas Supervisor.

Approved:

Acting Chief, Conservation Division.

SOUTH ATLANTIC OCS ORDER NO. 4

PREAMBLE

It was suggested that the fourth sentence of the preamble should be revised by changing the word "may" to "shall" and by adding the phrase "and reasonable and prudent efforts are being made to comply with the requirements." The Order was not revised since the intent of the preamble was not to make it mandatory that the Supervisor grant a suspension of production. The Supervisor has specific guidelines to be used in his determination of the approval or the denial of a suspension of production. The Supervisor has the option of approving or disapproving suspensions of production based on these guidelines.

A commenter suggested that a suspension of production be granted only if all the requirements set forth in OCS Order No. 14 have been met. The preamble of the Order was changed to reflect the fact that the conditions of South Atlantic OCS Order No. 14 must be met before a suspension of production is granted. South Atlantic OCS Order No. 14 will be published before South Atlantic OCS exploration progresses significantly.

ORDER

Several commenters indicated that the intent of the Order was not clear. A lack of clarity was cited in the paragraphs which allow the demonstration of production capability through production tests, logs, or other proven formation-evaluation techniques. We agree with these comments and have revised the Order by adding two new sentences to the preamble as follows:

"All pertinent engineering, geologic, and economic data shall be submitted to the District Supervisor for his consideration in determining whether a well is capable of being produced in paying quantities. The District Supervisor shall prescribe which of the following shall be used to determine the capability of a well to produce in paying quantities."

The content of draft paragraph 4, "Witnessing and Results," was incorporated into the lead-in sentence of paragraph 1, "Production Tests." The production tests for oil wells and gas wells were listed in subparagraphs a and b of paragraph 1. Paragraph 3 was refiled as a new paragraph 2, "Production Capability Determination," and was rewritten as follows:

"When the District Supervisor determines that the opening hole evaluation data, such as wireline-formation tests, drill-stem tests, core data, and logs, have been demonstrated as reliable in a geological area, such data may be considered as acceptable evidence that a well is capable of producing in paying quantities."

It was suggested that the Order require oil produced during a production test to be disposed of by incineration. The Order was not revised. Requiring the incineration of the test oil might lead to the waste of significant quantities of valuable mineral resources.

NOTICES

UNITED STATES DEPARTMENT OF THE INTERIOR,
GEOLOGICAL SURVEY, CONSERVATION DIVISION

EASTERN REGION, ATLANTIC AREA—SOUTH
ATLANTIC OCS ORDER NO. 4

Effective February 1, 1978

Suspensions and determination of well producibility

This Order is established pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.12(d)(1). An OCS lease provides for extension beyond its primary term for as long as oil or gas may be produced from the lease in paying quantities. The term "paying quantities" as used herein means production in quantities sufficient to yield a return in excess of operating costs. An OCS lease may be maintained beyond the primary term, in the absence of actual production, when a suspension of production has been approved in accordance with South Atlantic OCS Order No. 14. All departures from the requirements specified in this Order shall be subject to approval pursuant to 30 CFR 250.12(b).

All pertinent engineering, geologic, and economic data shall be submitted to the District Supervisor for his consideration in determining whether a well is capable of being produced in paying quantities.

The District Supervisor shall prescribe which of the following shall be used to determine the capability of a well to produce in paying quantities.

1. *Production tests.* All tests must be witnessed by an authorized representative of the Geological Survey. Test data accompanied by operator's affidavit, or third-party test data, may be accepted in lieu of a witnesses test, provided prior approval is obtained from the District Supervisor. The following are minimum requirements for test data:

a. A production test for oil wells of at least 2-hour duration following the stabilization of flow.

b. A deliverability test for gas wells of at least 2-hour duration following the stabilization of flow, or a four-point back-pressure test.

2. *Production capability determination.* When the District Supervisor determines that open-hole evaluation data, such as wireline formation tests, drill stem tests, core data, and logs, have been demonstrated as reliable in a geologic area, such data may be considered as acceptable evidence that a well is capable of producing in paying quantities.

WAYNE E. HULL,
Area Oil and Gas Supervisor.

Approved:

Acting Chief, Conservation Division.

SOUTH ATLANTIC OCS ORDER NO. 5

Subparagraph 2.1 Installation.

Several commenters suggested that surface-controlled subsurface-safety devices be required only on wells with shut-in tubing pressures of less than 4,000 psig. Their rationale was based, in part, on the limited availability of high pressure surface-controlled subsurface valves or by equipment limitations. It is believed that the added safety factor of surface-controlled subsurface-safety devices warrants the requirement for their use. The comments pertain-

ing to pressure criteria and the limited availability of surface-controlled subsurface-safety devices do not justify the use of subsurface-controlled valves. The reliability and ease of maintenance of surface-controlled subsurface-safety devices are the overriding considerations.

A commenter suggested that downhole-check valves be allowed in injection wells and that water injection wells be controlled by surface-safety devices. It is felt that anti-pollution and safety requirements would not be honored if surface-controlled subsurface-safety valves were not installed in injection wells. Injection wells, regardless of their history of activity, often contain residual volumes of oil and/or entrained gas. These residual volumes collect in the well bore when injection is terminated, and the injection well is then capable of flowing oil or gas. High-salinity water is also a pollutant.

Subparagraph 2.8 Additional protective equipment.

Several commenters pointed out that this subparagraph used the terms "measured top of cement" although there had been no requirement to make such a measurement. The word "calculated" was substituted in the Order.

U.S. DEPARTMENT OF THE INTERIOR, GEOLOGICAL SURVEY—CONSERVATION DIVISION

EASTERN REGION, ATLANTIC AREA, SOUTH
ATLANTIC

OCS Order No. 5, Effective Feb. 1, 1978

Subsurface-safety devices

This Order is established pursuant to the authority prescribed in 30 CFR 250.11, 30 CFR 250.12(a), 30 CFR 250.45, 30 CFR 250.46, and in accordance with 30 CFR 250.41(b). The operator shall be responsible for compliance with the requirements of this Order in the installation and operation of all platforms and structures and all facilities installed thereon including those facilities not operated or owned by the operator. All applications for approval under the provisions of this Order shall be submitted to the appropriate District Supervisor. All departures from the requirements specified in this Order shall be subject to approval pursuant to 30 CFR 250.12(b).

1. *Technological improvement.*—As technological research, progress, and product improvement result in increased effectiveness of existing safety devices or the development of new devices or systems, such devices or systems may be required or used upon application, justification, and approval. Applications for routine use shall include evidence that the device or system has been field-tested at least once each month, for a minimum of 6 consecutive months, and that each test indicated proper operation.

2. *Subsurface-safety devices.*

2.1 *Installation.* All tubing installations open to and capable of producing from hydrocarbon-bearing zones shall be equipped with a subsurface-safety device unless, after application and justification, the well is determined to be incapable of flowing. The device is to be installed at a depth of 30 meters (98 feet) or more below the ocean floor. These installations shall be made within 2 days after stabilized production is established. The well shall not be left unattended while open to production until a subsurface-safety device is installed.

2.2 *Design, testing, and inspection.* Subsurface-safety devices shall be designed, ad-

justed, installed, and maintained to insure reliable operation. During testing and inspection procedures, the well shall not be left unattended while open to production unless a properly operating subsurface-safety device has been installed in the well.

2.3 *Surface-controlled subsurface-safety devices.* All tubing installations open to and capable of producing from hydrocarbon-bearing zones shall be equipped with a surface-controlled subsurface-safety device, except as specified in subparagraph 2.4 below. The surface controls may be located onsite or remotely.

2.3.1 *Quality assurance and performance.* Subsurface-safety devices installed after July 1, 1979, shall conform to the following Standards, or subsequent revisions thereto, as approved by the Supervisor:

a. American Petroleum Institute, "Specification for Subsurface Safety Valves," API Spec 14A, Second Edition, November 1977, as amended by Supplement 1, January 1978.

b. American National Standards Institute/American Society of Mechanical Engineers Standard, "Quality Assurance and Certification of Safety and Pollution Prevention Equipment Used in Offshore Oil and Gas Operations," ANSI/ASME OCS-1-1977.

c. American National Standards Institute/American Society of Mechanical Engineers Standard, "Accreditation of Testing Laboratories for Safety and Pollution Prevention Equipment Used in Offshore Oil and Gas Operations," ANSI/ASME OCS-2-1977.

2.3.2 *Installation and testing.* The operator shall comply with the minimum recommended practices set forth in API Recommended Practice, RP 14 B, First Edition, October 1973, "Design, Installation, and Operation of Subsurface-Safety Valve Systems," or revisions thereto as approved by the Supervisor which contain procedures for design calculations, safe installation, and operating and testing. Each surface-controlled or other remotely-controlled subsurface-safety device installed in a well shall be tested in place for proper operation when installed, or reinstalled, at least monthly for the next 6 months and quarterly thereafter. If the device does not operate properly, it shall be promptly removed, repaired, and reinstalled or replaced and tested to insure proper operation.

2.4 *Shut-in wells.* A tubing plug shall be installed in lieu of, or in addition to, other subsurface-safety devices if a well has been shut in for a period of 6 months. Such plugs shall be set at a depth of 30 meters (98 feet) or more below the ocean floor. All retrievable plugs installed after the date of this Order shall be of the pump-through type. All wells perforated and completed, but not placed on production, shall be equipped with a subsurface-safety device or tubing plug within 2 days after completion. A surface-controlled subsurface-safety device of the pump-through type may be used as a pump-through tubing plug for the purpose of this subparagraph, provided the surface control has been rendered inoperative.

2.5 *Injection Wells.* Surface-controlled subsurface-safety devices shall be installed in all injection wells unless, after application and justification, it is determined that the well is incapable of flowing.

2.6 *Tubing plugs.* A shut-in well equipped with a tubing plug shall be inspected for leakage by opening the well to possible flow at intervals not exceeding 6 months. No sustained liquid flow or gas leakage is allowed. In the event leakage is detected, the plug shall be removed, repaired, and reinstalled,

or an additional tubing plug may be installed in lieu of removal and repair.

2.7 *Temporary removal for routine operations.* Each wireline- or pumpdown-retrievable subsurface-safety device may be removed, without further authorization or notice, for a routine operation which does not require the approval of a Sundry Notice and Report on Wells (Form 9-331) for a period not to exceed 15 days. The well shall be clearly identified as being without a subsurface-safety device and shall not be left unattended while open to production unless approved by the District Supervisor. The provisions of this subparagraph are not applicable to the testing and inspection procedures specified in subparagraph 2.2 above.

2.8 *Additional protective equipment.* All tubing installations in which a wireline- or pumpdown-retrievable subsurface-safety device is to be installed shall be equipped with a landing nipple, flow couplings, or other protective equipment, above and below, to provide for setting of the subsurface-safety device. All wells in which a subsurface-safety device or tubing plug is installed shall have the tubing-casing annulus packed off above the uppermost open casing perforations and at least 30 meters (98 feet) below the measured or calculated top of cement on the production string or the intermediate string. The control system for all surface-controlled subsurface-safety devices shall be an integral part of the platform shut-in system.

2.9 *Departures.* All applications for departures shall include a detailed statement of the well conditions, efforts made to overcome any difficulties, and proposed alternate safety measures.

2.10 *Emergency action.* All tubing installations open to and capable of producing from hydrocarbon-bearing zones and not equipped with a subsurface-safety device as permitted by subparagraph 2.7 of this Order shall be clearly identified as not being so equipped, and a subsurface-safety device or tubing plug shall be available at the field location. In the event of an emergency, such as an impending storm, such device or plug shall be promptly installed with due consideration being given to personnel safety.

2.11 *Records.* The operator shall maintain the following records for a minimum period of 1 year for each subsurface-safety device and tubing plug installed, and these records shall be available to any authorized representative of the Geological Survey.

2.11.1 *Field Records.* Individual well records shall be maintained at or near the field and shall include, as a minimum, the following information:

a. A record which will give design and other information; i.e., make, model, type, spacers, bean and spring size, pressure, etc.

b. Verification of assembly by a qualified person in charge of installing the device, and the installation date.

c. Verification of setting depth and all operational tests as required in this Order.

d. Removal date, reason for removal, and reinstallation date.

e. A record of all modifications of design in the field.

f. All mechanical failures or malfunctions, including sand cutting of such devices, with notation as to cause or probable cause.

g. Verification that failure report was submitted.

2.11.2 *Other records.* The following records, as a minimum, shall be maintained at the operator's office:

a. Verified design information of subsurface-safety devices for the individual well.

NOTICES

b. Verification of assembly and installation according to design information.

c. All failure reports.

d. All laboratory analysis reports of failed or damaged parts.

e. Quarterly failure-analysis report.

2.12 *Reports.* Well-completion reports (Form 9-330) and any subsequent reports of workover (Form 9-331) shall include the type and the depth of the subsurface-safety devices and tubing plugs installed.

To establish a failure-reporting and corrective-action program as a basis for reliability and quality control, each operator shall submit a quarterly failure-analysis report to the Supervisor identifying mechanical failures by lease and well, make and model, cause or probable cause of failure, and action taken to correct the failure. The report shall be submitted within 30 days following the periods ending December 31, March 31, June 30, and September 30 of each year.

WAYNE E. HULL,
Area Oil and Gas Supervisor.

Approved:

Acting Chief, Conservation Division.

SOUTH ATLANTIC OCS ORDER NO. 7

Paragraph 2. Personnel, inspections, and reports.

Many commenters were concerned over the timing and size of oil spills that were to be reported. The Order was revised to reflect the concern expressed by commenters about prompt and detailed notification of spills. Spills must be reported, both orally and in writing, and the reports will be available for public inspection. State agencies can arrange with the District Supervisor for prompt notification of oil spills.

One commenter suggested that the Supervisor prescribe that a minimum number of inspections be made of unattended facilities and that the number of such facilities be held to a minimum. A subparagraph was included in the Order which states that unattended facilities shall be inspected daily or at intervals prescribed by the District Supervisor. The Area Supervisor must approve all structures before they are set in place, but economics, alone, will keep this number to a minimum.

A commenter expressed a desire to review Oil Spill Contingency Plans as they are submitted for the South Atlantic. Revised South Atlantic OCS Order No. 12 makes it clear that these plans are nonproprietary and are available for public inspection.

One commenter was concerned that onshore storage of spill-containment equipment would not provide adequate protection from spills and blowouts. The revised Order states that pollution-control equipment will be maintained at an offshore location or at a site required by the Supervisor. This will give the Supervisor the flexibility needed to ensure timely response to oil spills.

Paragraph 4. Drills and training.

A commenter suggested that pollution-control drills be scheduled by the Supervisor and held at least semiannually. The Order, as currently written, requires that the drill schedules be acceptable to the Supervisor and that the frequency of drills be increased if the Supervisor judges performance to be inadequate. In its present form, the Order provides the Supervisor with appropriate authority and flexibility, and it was not revised.

U.S. DEPARTMENT OF THE INTERIOR, GEOLOGICAL SURVEY—CONSERVATION DIVISION
EASTERN REGION, ATLANTIC AREA, SOUTH ATLANTIC

OCS Order No. 7, Effective February 1, 1978
Pollution Control and Waste Disposal

This Order is established pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.43. The operator shall comply with the following requirements. All departures from the requirements specified in this Order shall be subject to approval pursuant to 30 CFR 250.12(b).

1. **Pollution prevention.** In the conduct of all oil and gas operations, the operator shall prevent pollution of the ocean. Furthermore, the disposal of waste materials into the ocean shall not create conditions which will adversely affect the public health, life or property, aquatic life or wildlife, recreation, navigation, commercial fishing or other uses of the ocean.

1.1 **Liquid disposal.**

1.1.1. **Oil-cut drilling mud.** Drilling mud containing free oil shall not be disposed of into the ocean.

1.1.2. **Drilling-mud components.** The operator shall submit as a part of the Application for Permit to Drill (Form 9-331 C) a detailed list of drilling-mud components including the common chemical or chemical trade name of each component, a list of the drilling mud additives anticipated for use in meeting special drilling requirements, and the proposed method of drilling-mud disposal. Disposal of drilling mud shall be by methods which will minimize the adverse effects to marine life. Approval of drilling-mud disposal into the ocean must be obtained from the District Supervisor; each request will be site specific and decided on a case-by-case basis.

1.1.3. **Hydrocarbon-handling equipment.** All production facilities such as separators, tanks, treaters, and other hydrocarbon-handling equipment shall be designed and operated in a manner necessary to prevent pollution. Maintenance or repairs are necessary to prevent pollution of the ocean shall be undertaken immediately.

1.1.4. **Curbs, gutters, and drains.** Curbs, gutters, and drains shall be installed in all deck areas in a manner necessary to collect all contaminants in a closed sump or in a sump pile, unless drip pans or equivalent are placed under equipment and piped to a closed sump or sump pile which will automatically maintain the oil at a level sufficient to prevent discharge into the ocean. All walking and working surfaces shall be kept free of all liquid accumulations. Sump piles shall not be used as a processing device to treat or skim liquids but shall be used to collect treated produced water, treated sand, liquids from drip pans and deck drains, and as a final trap for hydrocarbon liquids in the event of equipment upsets.

1.1.5. **Fixed-structure discharges.** Discharges from fixed structures including sanitary waste, produced water, and deck drainage are subject to the Environmental Protection Agency's permitting procedures pursuant to the Federal Water Pollution Control Act as amended.

1.1.6. **Mobile drilling-unit discharges.** Discharges from mobile drilling units including produced water and deck drainage shall contain no free oil and shall not cause a sheen to form on the surface of the ocean. Marine sanitation devices for mobile drilling units shall meet Coast Guard Type I specifications.

NOTICES

1.2 Solid material disposal.

1.2.1. **Well solids.** Drill cuttings, sand, and other well solids containing oil shall not be disposed of into the ocean unless all of the free oil has been removed.

1.2.2. **Containers.** Containers and other similar solid-waste materials shall not be disposed of into the ocean.

1.2.3. **Equipment.** Disposal of equipment into the ocean is prohibited except under emergency conditions. The location and description of any equipment so discharged shall be reported to the District Supervisor.

2. Personnel, inspections, and reports.

2.1. **Personnel.** The operator's personnel shall be thoroughly instructed in the techniques of equipment maintenance and operation for the prevention of pollution. Non-operator personnel providing services offshore shall be informed in writing, prior to executing contracts, of the operator's obligations to prevent pollution and of the provisions of this Order.

2.2 Pollution inspections.

2.2.1. **Manned facilities.** Manned drilling and production facilities shall be inspected daily to determine if pollution is occurring. Such maintenance or repairs as are necessary to prevent pollution of ocean waters shall be immediately undertaken and performed.

2.2.2. **Unattended facilities.** Unattended facilities, including those equipped with remote control and monitoring systems, shall be inspected daily or at intervals prescribed by the District Supervisor and necessary maintenance or repairs immediately made thereto.

2.3. **Pollution reports.** All spills of oil and liquid pollutants shall be reported orally to the District Supervisor and confirmed in writing. The reports shall include the cause, location, ocean state, meteorological conditions, size and appearance of slick, volume of spill, and action taken.

2.3.1. **Spills.** Spills shall be reported orally as follows:

- Less than 1.0 cubic meters (6.3 barrels) within 12 hours.
- 1.0 to 5.0 cubic meters (6.3 to 31.5 barrels) within 4 hours.
- More than 5.0 cubic meters (31.5 barrels) without delay.

2.3.2. **Observed malfunctions.** Operators shall notify each other upon observation of equipment malfunction or pollution resulting from another's operation.

3. Pollution-control equipment and oil spill contingency plan.

3.1. **Equipment.** Standby pollution-control equipment and materials shall be maintained by, or shall be available to, each operator at an offshore location or at such location as required by the Supervisor. This shall include containment booms, skimming apparatus, cleanup materials, and chemical agents which shall be available prior to the commencement of operations. The use of chemicals shall be permitted only after approval by the Supervisor in accordance with Annex X, National Oil and Hazardous Substances Pollution Contingency Plan. The equipment and materials shall be inspected monthly and maintained in good condition for use. The results of the inspections shall be recorded and maintained at the site.

3.2. **Oil spill contingency plan.** The operator shall submit an oil spill contingency plan for approval by the Supervisor prior to approval of an application for a permit to conduct operations. This plan shall contain the following:

- Provisions to assure that full resource capability is known and can be committed

during an oil-discharge situation including the identification and inventory of applicable equipment, materials, and supplies which are available locally and regionally, both committed and uncommitted, and the time required for deployment.

b. Provisions for varying degrees of response effort depending on the severity of the oil discharge.

c. Provisions for protecting areas of special biological sensitivity.

d. Establishment of procedures for the purpose of early detection and timely notification of an oil discharge including a current list of names, telephone numbers, and addresses of the responsible persons and alternates on call to receive notification of an oil discharge, as well as the names, telephone numbers, and addresses of regulatory organizations and agencies to be notified when an oil discharge is discovered.

e. Provisions for well-defined and specific actions to be taken after discovery and notification of an oil discharge including:

(1) Specification of an oil-discharge response operating team consisting of trained, prepared, and available operating personnel.

(2) Predesignation of an oil discharge response coordinator who is charged with the responsibility and delegated commensurate authority for directing and coordinating response operations.

(3) A preplanned location for an oil discharge response operations center and a reliable communications system for directing the coordinated overall response operations.

(4) Provisions for disposal of recovered spill material.

4. **Drills and training.** Drills and training classes for familiarization with pollution-control equipment and operational procedures shall be held by the operator at locations approved by the Supervisor. The drills shall be realistic and shall include deployment of the equipment. A drill schedule acceptable to the Supervisor shall be set by the operator and a copy shall be sent to the District Supervisor in sufficient time for U.S. Geological Survey personnel to witness any of the drills or training classes. All equipment need not be deployed at each drill. Records of the drills shall be kept and made available to U.S. Geological Survey personnel. Where drill performance and results are deemed inadequate by the District Supervisor, the operator shall increase the frequency of the drills until satisfactory results are achieved.

5. **Spill control and removal.** Immediate corrective action shall be taken in all cases where pollution has occurred. Corrective action taken under the operator's Oil Spill Contingency Plan shall be subject to modification when directed by the Area Supervisor. The primary jurisdiction to require corrective action to abate the source of pollution and to enforce the subsequent cleanup by the lessee or operator shall remain with the Supervisor pursuant to the provisions of this Order and the Memorandum of Understanding between the Department of Transportation (U.S. Coast Guard) and the Department of the Interior (U.S. Geological Survey) dated August 18, 1971.

6. **Contingency plan review.** Contingency plans shall be reviewed annually. All modifications and the results of the review shall be submitted to the Supervisor for approval.

DWAYNE E. HULL,
Area Oil and Gas Supervisor.

Approved:
Acting Chief, Conservation Division.

NOTICES

SOUTH ATLANTIC OCS ORDER NO. 12

Paragraph 2. Availability of records.

Several commenters requested that the 5-year time period for keeping proprietary items of information on Form 9-330, Well Completion or Recompletion Report and Log, be suspended during periods when the courts or the Secretary suspends operations. This suggestion was adopted since recent events have shown a need for this provision on the Atlantic OCS.

A commenter suggested that all information on OCS operations which could not provide a "competitive advantage" be released to the public. The Order has been revised and now contains a noncomprehensive list of items which are available to the public for inspection. The Order will not attempt to list every item that is available. However, the Department of the Interior will make records available to the public, to the greatest extent possible, in keeping with the spirit of the Freedom of Information Act.

A suggestion was made that Governors' designees be permitted to view proprietary data on a protected, confidential, basis and that language to this effect be put in the Order. This change will not be made to the Order. A modification such as this would require changes in OCS regulations and in the statutory requirements of the Freedom of Information Act.

U.S. DEPARTMENT OF THE INTERIOR, GEOLOGICAL SURVEY—CONSERVATION DIVISION

EASTERN REGION, ATLANTIC AREA, SOUTH ATLANTIC

OCS Order No. 12, Effective Feb. 1, 1978 Public Inspection of Records

This Order is established pursuant to the authority prescribed in 30 CFR 250.11 and in accordance with 30 CFR 250.97 and 43 CFR Part 2. Requests for information made under the Freedom of Information Act, 5 U.S.C. § 552, will be governed by the provisions of 43 CFR Part 2 (40 FR 7304, February 19, 1975). All departures from the requirements specified in this Order shall be subject to approval pursuant to 30 CFR 250.12(b).

1. **Filing of reports.** All reports on Forms 9-152, 9-330, 9-331, 9-331 C, 9-1869, 9-1870, and the forms used to report the results of multi-point back-pressure tests shall be filed by the Operator in accordance with the following:

a. All reports submitted on these forms shall include a copy with the words "Public Information" shown on the lower right-hand corner. This copy of the form shall be made available for public inspection.

b. All items on the form not marked "Public Information" shall be completed in full, and such forms and all attachments thereto shall not be available for public inspection.

c. The copy marked "Public Information" shall be completed in full except that the items described in subparagraphs 2.1 through 2.4 below and the attachments relating to such items may be excluded.

2. **Availability of records.** It has been determined that certain records pertaining to

leases and wells in the Outer Continental Shelf and submitted under 30 CFR 250 shall be made available for public inspection, as specified below, in the Area office. Certain other portions of these records have been determined to be exempt from disclosure. The reason for these exemptions is discussed in paragraph 3 of this Order.

2.1 **Form 9-152—Monthly report of operations.** All information contained on this form shall be available except the information required in the Remarks column.

2.2 **Form 9-330—Well-completion or re-completion report and log.**

2.2.1 **Prior to commencement.** Prior to commencement of production, all information contained on this form shall be available except:

- Item 1a, Type of Well.
- Item 4, Location of Well, at top production interval and at total depth.
- Item 22, if Multiple Completion, How many?
- Item 24, Producing Interval.
- Item 26, Type Electric and Other Logs Run

- Item 28, Casing Record.
- Item 29, Liner Record.
- Item 30, Tubing Record.
- Item 31, Perforation Record.
- Item 32, Acid, Shot, Fracture, Cement Squeeze, etc.
- Item 33, Production.
- Item 37, Summary of Porous Zones.
- Item 38, Geologic Markers.

2.2.2 **After commencement of production.** After commencement of production, all information shall be available except Item 37, Summary of Porous Zones, and Item 38, Geologic Markers.

2.2.3 **Five years elapsed time.** If production has not commenced after an elapsed time of 5 years from the date of filing Form 9-330 as required in 30 CFR 250.38(b), excluding the total of such time that operations and production are suspended by direction of the Secretary of the Interior or his duly authorized representative, and further excluding the total of such time that operations and production are stopped or prohibited by Court order, all information contained on this form shall be available except Item 37, Summary of Porous Zones, and Item 38, Geologic Markers. Within 90 days prior to the end of the 5-year period, exclusive of exceptions noted above, the lessee or operator shall file a Form 9-330 containing all information requested on the form, except Item 37, Summary of Porous Zones, and Item 38, Geologic Markers, to be made available for public inspection. Objections to the release of such information may be submitted with the completed Form 9-330.

2.3 **Form 9-331—sundry notices and report on wells.**

2.3.1 **"Request for Approval to."** When used as a "Request for Approval to:" conduct operations, all information contained on this form shall be available except Item 4, Location of Well, at top production interval and at total depth, and Item 17, Describe Proposed or Completed Operations.

2.3.2 **"Subsequent Report of."** When used as a "Subsequent Report of:" operations, and after commencement of production, all information contained on this form shall be available, except information under Item 17 as to subsurface locations and measured and true vertical depths for all markers and zones not placed on production.

2.4 **Form 9-331 C—application for permit to drill, deepen, or plug back.** All information contained on this form and the attached location plat shall be available except Item 4, Location of Well at Proposed Production Zone, and Item 23, Proposed Casing and Cementing Program.

2.5 **Form 9-1869—quarterly oil-well-test report.** All information contained on this form shall be available.

2.6 **Form 9-1870—semi-annual gas-well-test report.** All information contained on this form shall be available.

2.7 **Multi-point back-pressure-test report.** All information contained on this form used to report the results of required multi-point back-pressure-test of gas wells shall be available.

2.8 **Sales of lease production.** Information contained on monthly U.S. Geological Survey computer printout showing sales volumes, value, and royalty of production of oil, condensate, gas and liquid products by lease shall be made available.

2.9 **Availability of inspection records.** All accident-investigation reports, pollution-incident reports, facilities-inspection data, and records of enforcement actions are also available for public inspection.

2.10 **Availability of data and information submitted by lessees as a requirement of OCS orders and notices.** It has been determined that much information submitted by lessees as a result of OCS Orders and OCS Notices to Lessees and Operators is non-proprietary in nature and will be made available for public inspection.

This will include:

a. Notices of support activity.

b. Oceanographic, meteorological, and performance data collected from drilling units and production facilities during the period of operations.

c. Results of site surveys required prior to drilling or placement of structures except for those portions which the lessee shall designate, with the Supervisor's approval, as trade secrets and commercial or financial information which are privileged or confidential.

d. Drawings, maximum environmental-design criteria, and performance data of mobile-drilling units and structures.

e. Oil spill contingency plans.

f. Critical operations and curtailment plans.

3. **Information exempt from public inspection.** The requirements of this paragraph are applicable to leases issued after June 11, 1976. It has been determined that certain information as discussed in paragraph 1 and subparagraphs 2.1 through 2.4 of this Order is exempt from disclosure under exemption No. 9 of the Freedom of Information Act (5 U.S.C. § 552 (b)(9) and 43 CFR 2.13 subparagraph (c) "Statutory Exemptions" (9)). This information has been determined to qualify as "Geological and geophysical information and data including maps concerning wells." In accordance with 30 CFR 250.97, "Public Inspection of Records," subparagraph (a), geophysical data shall not be available for public inspection without the consent of the lessee so long as the lease remains in effect or for a period of 10 years after the date of submission, whichever is less, unless the Supervisor, with the approval of the Director, determines that earlier release of such information is necessary for the proper development of the field or area. Subparagraph (b) requires that geological data shall not be made available for public inspection without the consent of the lessee as long as the lease

remains in effect or for a period of 2 years after the date of submission, whichever is less, unless the Supervisor, with the approval of the Director, determines that earlier release of such information is necessary for the proper development of the field or area.

DWAYNE E. HULL,
Area Oil and Gas Supervisor.

Approved:

Acting Chief, Conservation Division.

National Park Service

HEADQUARTERS AREA, CANYON DE CHELLY NATIONAL MONUMENT, ARIZONA

Proposed Development Concept Plan; Availability of Review of Alternatives/Negative Declaration

An assessment of alternatives which examined options and impacts thereof associated with either limiting, improving or expanding facilities at the Monument headquarters area near Chinle, Apache county, Ariz., was distributed August 10, 1977, and was made available by publication in the FEDERAL REGISTER of August 29, 1977.

A review of the alternatives has now been prepared, based on input received and upon management judgments and is available at the following locations: Southwest Regional Office, National Park Service, 1100 Old Santa Fe Trail, P.O. Box 728, Santa Fe, N. Mex. 87501; Navajo Lands Group Office, 111 North Behrend Avenue, P.O. Box 539, Farmington, N. Mex. 87401; and from the Superintendent, Canyon de Chelly National Monument, P.O. Box 588, Chinle, Ariz. 86503.

The review selects alternative C as described in the assessment. Facilities will be improved and expanded, including a limited increase in lodging and food service accommodations.

It is the conclusion of the National Park Service that the plan outlined is not a major Federal action that will

significantly affect the human environment. More detailed plans and specifications will be prepared and the plan implemented as funds become available. No environmental statement will be prepared.

Dated: January 19, 1978.

DOUGLAS G. WARNOCK,
Acting Regional Director, Southwest Region, National Park Service.

[FR Doc. 78-4023 Filed 2-13-78; 8:45 am]

[4310-70]

SALINAS NATIONAL MONUMENT, NEW MEXICO

Availability of a Proposal/Assessment

A public workshop will be held beginning at 1 p.m. on Wednesday, March 22, at the Forest Ranger Station, Mountainair, N. Mex., to discuss a proposal and alternatives thereto for a Salinas National Monument in Torrance and Socorro Counties, N. Mex. National Park Service personnel will be present an hour prior to the beginning of the meeting to answer questions or explain details of the proposal.

The National Park Service has prepared a proposal/assessment which will be available at the workshop and may also be obtained at the following locations: Southwest Regional Office, National Park Service, 1100 Old Santa Fe Trail, P.O. Box 728, Santa Fe, N. Mex. 87501; Gran Quivira National Monument, Route 1, Mountainair, N. Mex. 87036; and the Chaco Center, Anthropology Building, Room 240, University of New Mexico, P.O. Box 26176, Albuquerque, N. Mex. 87125.

The proposal or preferred alternative suggests legislation be sought to establish a Salinas National Monument consisting of the existing Gran Quivira National Monument and two State monuments, Abo and Quarai, as enlarged by acquisition. The proposed three-unit monument would be administered and managed from a centralized facility in or near the town of Mountainair.

Comments on the proposal/assessment may either be submitted at the workshop or within 30 days thereafter to the Superintendent of Gran Quivira National Monument at the address given above.

At the conclusion of the review period, the National Park Service will evaluate comments and suggestions received and will decide on a future course of action for the proposal.

Dated: January 19, 1978.

DOUGLAS G. WARNOCK,
Acting Regional Director, Southwest Region, National Park Service.

[Investigation No. 337-TA-43]

CERTAIN CENTRIFUGAL TRASH PUMPS

Investigation

Notice is hereby given that a complaint was filed with the United States International Trade Commission on January 9, 1977, under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), on behalf of Hale Fire Pump Co., 708 Springmill Avenue, Conshohocken, Pa. 19428. The complaint alleges that unfair methods of competition and unfair acts exist in the importation of certain centrifugal trash pumps into the United States or in their sale by reason of the alleged coverage of such articles by U.S. Letters Patent No. 3,499,388. The complaint alleges that such unfair methods of competition and unfair acts have the effect or tendency to destroy or substantially injure an industry, efficiently and economically operated, in the United States. The complainant requests that such infringing pumps be permanently excluded from entry into the United States and that a temporary exclusion order issued to exclude the imported articles during the period of the investigation.

Having considered the complaint, the United States International Trade

Commission, on February 9, 1978, Ordered—

(1) That, pursuant to subsection (b) of Section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), an investigation be instituted to determine, under subsection (c) whether, on the basis of the allegations set forth in the complaint and the evidence adduced, there is, or is reason to believe there is, a violation of subsection (a) of this section in the unauthorized importation of certain centrifugal trash pumps into the United States, or in the sale thereof, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States. The alleged violations of subsection (a) of this section consists of allegations that the imported pumps infringe U.S. Letters Patent No. 3,499,388;

(2) That, for the purpose of the investigation so instituted, the following persons, alleged to be involved in the unauthorized importation of such article into the United States or in their sale, are hereby named as respondents upon which the complaint and this notice are to be served:

C. Itoh America, Inc., 270 Park Avenue, New York, N.Y. 10017.

Ataka America, Inc., 633 Third Avenue, New York, N.Y. 10017.

Tokai Manufacturing Co., Matsusaka City, Mie Prefecture, Japan.

C. Itoh & Co., Inc., 4 Nihonbashi-Honcho, 2-Chrome, Chuo-Ku, C.P.O. Box 136, Tokyo, Japan.

(3) That, for the purpose of the investigation so instituted, Judge Myron R. Renick, United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436, is hereby appointed as presiding officer; and

(4) That, for the purpose of the investigation so instituted, Louis S. Mastriani, United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436, is hereby appointed Commission investigative attorney.

Responses must be submitted by the named respondents in accordance with section 210.21 of the Commission's Rules of Practice and Procedure, as amended (41 FR 17710, April 27, 1976). Pursuant to sections 201.16(d) and 210.21(a) of the Rules, such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless good and sufficient cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint, and of this notice, and will authorize the presiding officer and the Commission, with-

out further notice to the respondent to find the facts to be as alleged in the complaint and this notice and to enter both a recommended determination and a final determination, respectively, containing such findings.

The complaint, with the exception of confidential information referred to therein, is available for inspection by interested persons at the Office of the Secretary, United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436, and in the New York City Office of the Commission, 6 World Trade Center.

By Order of the Commission.

KENNETH R. MASON,
Secretary.

[7020-02]

[Investigation No. 337-TA-44]

CERTAIN ROLLER UNITS

Investigation

Notice is hereby given that a complaint was filed with the United States International Trade Commission on January 12, 1978, under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), on behalf of Presto Lock Co., Division of Walter Kidde & Co., Inc., 35 Market Street, Elmwood Park, N.J. 07407. The complaint alleges that unfair methods of competition and unfair acts exist in the importation into the United States of certain roller units and luggage bearing such roller units, or in their sale, by reason of the alleged coverage of such articles by claims 1 through 9 of U.S. Patent No. 4,024,600, which patent is owned by Presto Lock Co. The complaint alleges that such unfair methods of competition and unfair acts have the effect or tendency to destroy or substantially injure an industry, efficiently and economically operated, in the United States. Complainant has requested that the imports in question be temporarily and permanently excluded from entry into the United States.

Having considered the complaint, the United States International Trade Commission, on February 9, 1978, ordered—

(1) That, pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), an investigation be instituted to determine, under subsection (c), whether, on the basis of the allegations set forth in the complaint and the evidence adduced, there is, or is reason to believe that there is, a violation of subsection (a) of this section in the unauthorized importation of certain roller units and luggage bearing such roller units into the United States, or in the sale thereof, the effect or ten-

NOTICES

and a final determination, respectively, containing such findings.

The complaint, with the exception of confidential information referred to therein, is available for inspection by interested persons at the Office of the Secretary, United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436, and in the New York City office of the Commission, 6 World Trade Center.

By order of the Commission.

NATIONAL SCIENCE FOUNDATION

ADVISORY COMMITTEE FOR SOCIAL SCIENCES,
SUBCOMMITTEE ON GEOGRAPHY
AND REGIONAL SCIENCES

Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Subcommittee on Geography and Regional Sciences of the Advisory Committee for Social Sciences.

Date and time: March 3, 1978, 8:30 a.m. to 5 p.m.

Place: Room 321, National Science Foundation, 1800 G Street NW., Washington, D.C. 20550.

Type of meeting: Closed.

Contact person: Ms. Patricia McWethy, Associate Program Director, Geography and Regional Sciences Program, Room 312, National Science Foundation, Washington, D.C. 20550, telephone 202-634-6683.

Purpose of subcommittee: To provide advice and recommendations concerning support for research in Geography and Regional Sciences.

Agenda: To review and evaluate research proposals and projects as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552(b)(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 18, 1977.

NOTICES

Science Foundation, Washington, D.C. 20550, telephone 202-634-1583.

Purpose of subcommittee: To provide advice and recommendations concerning support for research in Memory and Cognitive Processes.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552(b)(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,
Acting Committee
Management Officer.

NUCLEAR REGULATORY
COMMISSION

[Docket No. 50-155]

CONSUMERS POWER CO., BIG ROCK POINT
NUCLEAR POWER STATION

Reconstitution of Board

John M. Frysiak, Esq., was Chairman of the Atomic Safety and Licensing Board for the above proceeding. Because he is transferring to another government agency, Mr. Frysiak is unable to continue his service on this Board.

Accordingly, Sheldon J. Wolfe, Esq., whose address is Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, is appointed Chairman of this Board. Reconstitution of the Board in this manner is in accordance with section 2.721 of the Commission's Rules of Practice, as amended.

Dated at Bethesda, Md., this 6th day of February 1978.

JAMES R. YORE,
Chairman, Atomic Safety and
Licensing Board Panel.

[Docket No. 50-302]

FLORIDA POWER CORP. ET AL

Issuance of Amendment to Facility Operating
License

The U.S. Nuclear Regulatory Commission (the Commission) has issued

Amendment No. 13 to Facility Operating License No. DPR-72, issued to the Florida Power Corp., City of Alachua, City of Bushnell, City of Gainesville, City of Kissimmee, City of Leesburg, City of New Smyrna Beach and Utilities Commission, City of New Smyrna Beach, City of Ocala, Orlando Utilities Commission and City of Orlando, Sebring Utilities Commission, Seminole Electric Cooperative, Inc., and the City of Tallahassee (the licensees) which revised Technical Specifications for operation of the Crystal River Unit No. 3 Nuclear Generating Plant located in Citrus County, Fla. The amendment becomes effective 30 days after its date of issuance.

The amendment incorporates fire protection Technical Specifications on the existing fire protection equipment and adds administrative controls related to fire protection at the facility. This action is being taken pending completion of the Commission's overall fire protection review of the facility.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated July 11, 1977, and Florida Power & Light Co's letter dated December 19, 1977, (2) the Commission's letter to the licensee dated November 29, 1977, (3) Amendment No. 13 to License No. DPR-72, and (4) the Commission's related Safety Evaluation issued November 29, 1977. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Crystal River Public Library, Crystal River, Fla. A copy of items (2) through (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 3d day of February 1978.

For the Nuclear Regulatory Commission.

[Docket No. 50-320]

JERSEY CENTRAL POWER & LIGHT CO., ET AL.

Issuance of Amendment to Provisional
Construction Permit No. CPPR-66

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission), has issued Amendment No. 1 to Provisional Construction Permit No. CPPR-66 issued to Jersey Central Power & Light Co. and Metropolitan Edison Co. for the construction of the Three Mile Island Nuclear Station, Unit 2. This unit is as pressurized water reactor and is located in Dauphin County, Pa. The amendment is effective as of the date of issuance.

The amendment reflects a change in ownership of the Three Mile Island Nuclear Station, Unit 2. As a result of the change Pennsylvania Electric Co. will acquire an interest in the ownership of the facility. The amendment reflects the proposed changes in ownership interests for the three participating companies (Jersey Central Power & Light Co., Metropolitan Edison Co., and Pennsylvania Electric Co.). Metropolitan Edison Co. will retain sole responsibility for overall planning, design, construction, operation, maintenance and disposal of the facility.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the

Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the construction permit amendment.

Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4), an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared.

For further details with respect to his action, see (1) the application for amendment dated April 1, 1977, and amendment thereto dated August 23, 1977; and (2) Amendment No. 1 to Provisional Construction Permit No. CPPR-66. These items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the State Library of Pennsylvania, Commonwealth and Walnut Streets, Harrisburg, Pa. 17126.

A copy of item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Project Management.

Dated at Bethesda, Md., this 3d day of February 1978.

MAINE YANKEE ATOMIC POWER CO.

Issuance of Amendment to Facility Operating
License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 35 to Facility Operating License No. DPR-36, issued to Maine Yankee Atomic Power Co. (the licensee), which revised Technical Specifications for operation of the Maine Yankee Atomic Power Station (the facility) located in Lincoln County, Maine. The amendment becomes effective 30 days after its date of issuance.

The amendment incorporates fire protection Technical Specifications on the existing fire protection equipment and adds administrative controls related to fire protection at the facility. This action is being taken pending completion of the Commission's overall fire protection review of the facility.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated July 14, 1977, as supplemented December 14, 1977, (2) the Commission's letter to the licensee dated November 25, 1977, (3) Amendment No. 35 to License No. DPR-36, and (4) the Commission's related Safety Evaluation issued November 25, 1977. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at

the Wiscasset Public Library Association, High Street, Wiscasset, Maine. A copy of items (2) through (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

[Docket No. 50-395]

SOUTH CAROLINA ELECTRIC AND GAS CO., ET
AL VIRGIL C. SUMMER NUCLEAR STATION,
UNIT 1

Hearing on Issuance of Facility Operating
License

On April 18, 1977 the staff of the Nuclear Regulatory Commission published in the FEDERAL REGISTER a notice that the Commission had received an application for facility operating license from South Carolina Electric and Gas Co. (applicant) for itself and as agent for the South Carolina Public Service Authority to possess, use and operate the Virgil C. Summer Nuclear Station, a pressurized water nuclear reactor located on the applicant's site in Fairfield County, S.C., at a steady-state power level of 2785 megawatts thermal. (42 FR 20203)

The notice stated the Commission will consider the issuance of a facility operating license which would authorize the applicant to possess, use and operate the Summer Nuclear Station in accordance with the provisions of the license and the technical specifications appended thereto. The notice provided that on or before May 18, 1977 any person whose interest may be affected by the proceeding could file a request for a hearing and a petition for leave to intervene in accordance with the Commission's "Rules of Practice" in 10 CFR Part 2. An Atomic Safety and Licensing Board was designated to rule on any such request for hearing and/or petition for leave to intervene.

Mr. Brett Allen Bursey of Little Mountain, S.C., filed a request for a hearing and petition for leave to intervene in the proceeding. On February 3, 1978, the Atomic Safety and Licensing Board designated to rule upon hearing requests and petitions issued a Memorandum and Order granting Mr. Bursey's request for hearing and admitting him as a party intervenor to the proceeding. As a result a hearing to consider the issuance of the operating license for the facility will be held in Columbia, S.C., at a time and a place to be established.

The Chairman of the Atomic Safety and Licensing Board Panel designated

an Atomic Safety and Licensing Board (Board) to preside over the hearing. The Board will consist of Mr. Gustave A. Linenberger, Dr. Frank F. Hooper, and Ivan W. Smith who will serve as Chairman of the Board.

Pursuant to 10 CFR § 2.751(a) the Board will conduct a special prehearing conference on March 30, 1978 in Columbia, S.C. at a time and place to be specified in a later notice. The parties to this proceeding, including the intervenor, or their respective counsel are directed to appear. At the prehearing conference the Board will consider identifying the specific issues to be considered at the evidentiary hearing and establish a schedule for further actions in the proceeding.

The public is invited to attend the prehearing conference but members of the public may not participate in this conference. An opportunity for any person who wishes to make an oral or written statement in this proceeding but who has not filed a petition for leave to intervene will be provided. Any person may request permission to make a limited appearance pursuant to provisions of 10 CFR § 2.715 of the Commission's "Rules of Practice." Limited appearances will be permitted at the time of the hearing and will be subject to the conditions set forth in a subsequent Notice of Hearing. Persons desiring to make a limited appearance are requested to inform the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

For further details see the application for the facility operating license dated February 25, 1977, the Applicant's environmental report dated February 25, 1977, and papers filed concerning the request for hearing and petition for leave to intervene including the Memorandum and Order dated February 3, 1978, all of which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Richland County Public Library, 1400 Sumter Street, Columbia, S.C. 29201.

Issued at Bethesda, Md., this 8th day of February, 1978.

It Is So Ordered.

For the Atomic Safety and Licensing Board, designated to rule on petitions for leave to intervene.

IVAN W. SMITH,
Chairman.

VERMONT YANKEE NUCLEAR POWER CORP.
Issuance of Amendment to Facility Operating
License

The Nuclear Regulatory Commission (the Commission) has issued Amendment No. 44 to Facility Operating License No. DPR-28 issued to Vermont Yankee Nuclear Power Corp. (the licensee) which revised Technical Specifications for operation of the Vermont Yankee Nuclear Power Station (the facility), located near Vernon, Vermont. The amendment is effective as of the date of issuance.

The amendment provides for an increase in the High Drywell Pressure setpoint.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter 1, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact ap-

praisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application dated August 5, 1977, (2) Amendment No. 44 to License No. DPR-28, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Brooks Memorial Library, 224 Main Street, Brattleboro, Vt. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 7th day of February 1978.

OFFICE OF THE FEDERAL REGISTER

CERTIFIED INTERPRETER FOR THE DEAF PROVIDED AT APRIL REGULATIONS DRAFTING WORKSHOP

The Office of the Federal Register will hold a basic Regulations Drafting Workshop on April 17, 18, 19, and 20, 1978. We have changed the name from Legal Drafting Workshop to Regulations Drafting Workshop to reflect the focus of the course. The goal of the Workshop is to improve the clarity of regulations and preambles that are published in the FEDERAL REGISTER.

The Regulations Drafting Workshop covers the following material:

1. Drafting conventions, preferred usage, the rule of consistency.
 2. Drafting proposed rules, final rules, and preambles.
 3. Review techniques that improve your work.
 4. What you can do to make regulations easier to read and easier to use.
- WHO: Any Federal employee who drafts documents or who reviews documents for substance that are published in the FEDERAL REGISTER. In addition, the April Workshop will provide a certified interpreter for deaf Federal employees working with regulations.

WHERE: Office of the Federal Register, Washington, D.C.

COST: \$150 for each person. Send a form 170 or the training authorization used by your office to: Special Projects Unit, Office of the Federal Register, NARS, Washington, D.C. 20408.

HOW: Each participant must call the Office of the Federal Register, 202-523-4534 to make a reservation in addition to completing the training form.

FOR MORE INFORMATION: Write: Special Projects Unit, Office of the Federal Register, NARS, Washington, D.C. 20408 or phone: Special Projects Unit at 202-523-4534.

Dated: February 10, 1978.

FRED J. EMERY,
Director of the
Federal Register.

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule changes is as follows:

The purpose of the proposed rule changes is to increase the costs of the above enumerated services in order to meet the rising costs to provide them.

The proposed rule changes assure the prompt and accurate clearance and settlement of security transactions and foster cooperation and coordination among persons engaged in the clearance and settlement of security transactions, and remove impediments to the perfection of a national system for clearance and settlement of security transactions by making the Midwest Clearing Corp. and the Midwest Securities Trust Co. more competitive.

The Midwest Clearing Corp. and the Midwest Securities Trust Co. believe that the proposed rule changes will not impose any burdens on competition.

The foregoing rule changes have become effective, pursuant to section 19(b)(3) of the Securities Exchange Act of 1934. At any time within 60 days of the filing of such proposed rule changes, the Commission may summarily abrogate such rule changes if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filings with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of such filings will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organizations. All submissions should refer to the file numbers referenced in the caption above and should be submitted on or before March 7, 1978.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

FEBRUARY 3, 1978.

DEPARTMENT OF STATE

Agency for International Development

ADVISORY COMMITTEE ON VOLUNTARY
FOREIGN AID

Notice of Meeting

Pursuant to Executive Order 11769 and the provisions of section 10(a)(2), Pub. L. 92-463, Federal Advisory Committee Act, notice is hereby given of the meeting of the Advisory Committee on Voluntary Foreign Aid which will be held on March 2, 1978, from 9:30 a.m. to 5 p.m., in Room 1107, New State Building, 21st and Virginia Avenue NW., Washington, D.C.

The purpose of the meeting is to address the future role of the Committee and for the Advisory Committee to formulate recommendations to the Administrator regarding ethical standards applicable to registered PVOs, the procedures and conditions related to the registration of indigenous PVOs and to consider such other matters related to the foreign assistance advisory concerns of the Committee as may be appropriate.

The meeting will be open to the public. Any interested person may attend, appear before, or file statements with the Committee in accordance with procedures established by the Committee and to the extent time available for the meeting permits. Written statements may be filed before or after the meeting.

Mr. Allan Furman will be the AID representative at the meeting. Information concerning the meeting may be obtained from Mr. Robert S. McClusky, telephone area code 202-632-8634. Persons desiring to attend the meeting should enter the New State Building through the diplomatic entrance, 22nd and C Streets.

Dated: February 8, 1978.

ALLAN R. FURMAN,
Acting Assistant Administrator
for Private and Development
Cooperation.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

CERTIFICATION OF SIZES AND WEIGHTS

Determination of Nonconformity

Based upon an analysis of available factors, the certifications of vehicle size and weight enforcement submitted by the States listed hereunder for the period October 1, 1976, to September 30, 1977, appear to indicate that these States are not in compliance with the requirement of 23 U.S.C. 141 that the States enforce their size and weight laws on the Federal-aid systems.

Effective January 4, 1975, the Congress, by section 107 of the Federal-Aid Highway Amendments of 1974, Pub. L. 93-643, amended Chapter 1 of Title 23 of the United States Code by inserting section 141, which provides that "Each State shall certify to the Secretary before January 1 of each year that it is enforcing all State laws respecting maximum vehicle size and weights permitted on the Federal-aid primary, the Federal-aid urban system and the Federal-aid secondary system, including the Interstate System" in accordance with section 127 of Title 23, U.S.C. The regulations issued under authority of section 141 are found in Title 23, Code of Federal Regulations, Part 658. Section 658.9 provides that in order to obtain approval of Federal-aid projects under 23 U.S.C. 106, each State certification should contain certain information which would indicate the effectiveness of enforcement efforts.

Pursuant to the provisions of section 141, I am considering withholding approval of further highway projects under 23 U.S.C. 106 for these States. In accordance with the applicable regulation, 23 CFR 658.17, a final determination as to the withholding of project approval will be made not sooner than March 31, 1978, unless the States request an opportunity to show cause why the determination should not be made effective. The States may do so by requesting an informal hearing within that period of time. They may direct such a request to me.

Rhode Island, Pennsylvania, Hawaii, South Dakota, Delaware, Nevada, Oklahoma, Alabama, Massachusetts, Arizona, Maine, Connecticut, New Jersey, and New York.

BROCK ADAMS,
Secretary of Transportation.

HON. GEORGE C. WALLACE,
Governor of Alabama,
Montgomery, Ala. 36104

FEBRUARY 3, 1978.

DEAR GEORGE: Based upon the analysis of available factors, the certification of vehicle size and weight enforcement submitted by Alabama for the

period October 1, 1976, to September 30, 1977, appears to indicate that Alabama is not in compliance with the requirement of 23 U.S.C. 141 that the State enforce its laws on the Federal-aid systems.

Effective January 4, 1975, the Congress, by section 107 of the Federal-Aid Highway Amendments of 1974, P.L. 93-643, amended Chapter 1 of title 23 of the United States Code by inserting section 141, which provides that "Each State shall certify to the Secretary before January 1 of each year that it is enforcing all State laws respecting maximum vehicle size and weights permitted on the Federal-aid primary, the Federal-aid urban system and the Federal-aid secondary system, including the Interstate System" in accordance with section 127 of title 23 U.S.C. The regulations issued under authority of section 141 are found in title 23, Code of Federal Regulations, part 658. Part 658.9 provides that in order to obtain approval of Federal-aid projects under 23 U.S.C. 106, each State certification should contain certain information which would indicate the effectiveness of enforcement efforts.

Pursuant to the provisions of section 141, I am considering withholding approval of further highway projects under 23 U.S.C. 106 in your State. In accordance with the applicable regulation, 23 CFR 658.17, a final determination as to the withholding of project approval will be made not less than 45 days from receipt of this letter unless the State requests an opportunity to show cause why the determination should not be made effective. The State may do so by requesting an informal hearing within that period of time. You may direct your request for a hearing to me, and I assure you that it will be given prompt attention.

Sincerely,

BROCK ADAMS.

SILICON METAL FROM CANADA

Antidumping Proceeding Notice

AGENCY: U.S. Treasury Department.

ACTION: Initiation of Antidumping Investigation.

SUMMARY: This notice is to advise the public that a petition in proper form has been received and an antidumping investigation is being initiated for the purpose of determining whether imports of silicon metal from Canada are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended. Sales at less than fair value generally means that the prices of the merchandise sold for exportation to the United States are less than the prices of such or similar merchandise sold in the home market.

EFFECTIVE DATE: February 14, 1978.

FOR FURTHER INFORMATION CONTACT:

Mary S. Clapp, Operations Officer,
U.S. Customs Service, Office of Operations, Duty Assessment Division,
Technical Branch, 1301 Constitution Avenue, NW., Washington, D.C. 20229, telephone: 202-566-5492.

SUPPLEMENTARY INFORMATION: On January 4, 1978, information was received in proper form pursuant to §§ 153.26 and 153.27, Customs Regulations (19 CFR 153.26, 153.27), from counsel acting on behalf of the Ohio Ferro-Alloys Corp., Union Carbide Corp., Interlake, Inc., and Kaweck-Berylo Industries, Inc., indicating a possibility that silicon metal from Canada is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.).

The subject merchandise is silicon metal, unwrought, containing by weight not over 99.7 percent pure silicon; and alloys of silicon metal, unwrought, containing by weight 96 percent or more but less than 99.0 percent silicon.

The information received tends to indicate that the prices of the merchandise sold for home consumption and to third countries are at prices which represent less than the cost of its production. Therefore, these prices have been disregarded and fair value

[Rule 19, Ex Parte No. 241, 15th Rev. Exemption No. 129]

BESSEMER AND LAKE ERIE RAILROAD CO. ET AL.

Exemption Under Provision of Mandatory Car Service Rules

It appearing, that the railroads named herein own numerous 40-ft. plain boxcars; that under present conditions, there is virtually no demand for these cars on the lines of the car owners; that return of these cars to the car owners would result in their being stored idle on these lines; that such cars can be used by other carriers for transporting traffic offered for shipments to points remote from the car owners; and that compliance with Car Service Rules 1 and 2 prevents such use of plain boxcars owned by the railroads listed herein, resulting in unnecessary loss of utilization of such cars.

It is ordered, That, pursuant to the authority vested in me by Car Service Rule 19, plain boxcars described in the Official Railway Equipment Register, I.C.C.-R.E.R. No. 405 issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "XM", with inside length 44-ft. 6-in. or less, regardless of door width and bearing reporting marks assigned to the railroads named below, shall be exempt from the provisions of Car Service Rules 1(a), 2(a), and 2(b).

Bessemer and Lake Erie Railroad Co.; Reporting Marks: BLE.
Chicago, West Pullman & Southern Railroad Co.; Reporting Marks: CWP.
Detroit and Mackinac Railway Co.; Reporting Marks: D&M-DM.
Illinois Terminal Railroad Co.; Reporting Marks: ITC.
Louisville, New Albany & Corydon Railroad Co.; Reporting Marks: LNAC.
Missouri-Kansas-Texas Railroad Co.; Reporting Marks: MKT.

New Hope and Ivyland Railroad Co.; Reporting Marks: NHIR.
Richmond, Fredericksburg and Potomac Railroad Co.; Reporting Marks: REP.

Effective 12:01 a.m., February 1, 1978, and continuing in effect until further order of this Commission.

Issued at Washington, D.C., January 30, 1978.

INTERSTATE COMMERCE
COMMISSION,
JOEL E. BURNS,

Agent.

(FR Doc. 78-4063 Filed 2-13-78; 8:45 am)

* Missouri Pacific Railroad Co.; eliminated.

has been determined, for the purposes of initiating this proceeding, from the constructed value of the merchandise. The prices of the merchandise sold for exportation to the United States are below that constructed value by substantial margins.

There is evidence on record concerning injury to, or the likelihood of injury to, an industry in the United States as a result of the sales at less than fair value. This evidence indicates that imports of the subject merchandise from Canada have increased dramatically during the first three quarters of 1977, from roughly 1 percent to 10 percent of United States consumption. Prices of the imported merchandise from Canada are significantly lower than those of the domestic industry and appear to account for about 40 percent of aggregate imports during the last year, making Canadian merchandise the largest single foreign supplier and the closest in geographic proximity to the United States. There is also a perceived reliability of supply from Canadian sources that may have contributed to the market penetration of the merchandise from Canada. Prices of imports from Canada appear to be either comparable to, or possibly lower than, prices of imports from other sources. Elimination of the alleged margins of sales at less than fair value of the Canadian imports would apparently eliminate the margin of underselling of the domestic industry. In the light of these factors, it has been determined that there is no substantial doubt that the sales of the merchandise cause or threaten to cause injury to the domestic industry.

Having conducted a summary investigation as required by § 153.29 of the Customs Regulations (19 CFR 153.29) and having determined as a result thereof that there are grounds for so doing, the U.S. Customs Service is instituting an inquiry to verify the information submitted and to obtain the facts necessary to enable the Secretary of the Treasury to reach a determination as to the fact or likelihood of sales at less than fair value.

This notice is published pursuant to § 153.30 of the Customs Regulations (19 CFR 153.30).

ROBERT H. MUNDHEIM,
General Counsel of the
Treasury.

[Notice No. 588]

ASSIGNMENT OF HEARINGS

FEBRUARY 9, 1978.

Cases assigned for hearing, postponement, cancellation or oral argu-

ment appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 113784 (Sub-No. 55), Laidlaw Transport Limited, now assigned March 6, 1978 at Buffalo, N.Y., will be held in Room 914, Federal Building, 111 West Huron Street.

MC 143522, Consolidated Carriers, Inc., now assigned March 1, 1978 at Buffalo, N.Y., will be held in Room 914, Federal Building, 111 West Huron Street.

MC 117883 (Sub-No. 219), Subler Transfer, Inc., now being assigned April 3, 1978 (2 weeks) at Chicago, Ill., in a hearing room to be later designated.

MC 19311 (Sub-No. 34), Central Transport, Inc., now being assigned April 3, 1978 (2 weeks) at Chicago, Ill., in a hearing room to be later designated.

MC 138562 (Sub-No. 1), Cates Trucking, Inc., is now assigned for hearing March 9, 1978 (2 days) at Chicago, Ill., at a hearing room to be later designated.

(Docket No. AB-7 (Sub-No. 34))

CHICAGO, MILWAUKEE, ST. PAUL AND
PACIFIC RAILROAD CO.

Abandonment Near Park Junction and
National in Pierce County, Wash., Findings

Notice is hereby given pursuant to Section 1a of the Interstate Commerce Act (49 U.S.C. 1a) that by a Certificate and Order dated January 26, 1978, a finding, which is administratively final, was made by the Commission. Review Board Number 5, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Oregon Short Line R. Co., Abandonment, Goshen*, 354 ICC 76 (1977), and subject to the further condition that Milwaukee submit an order from the United States District Court for the Northern District of Illinois, Eastern Division, authorizing Milwaukee to file and prosecute the instant application, or, if a trustee has been appointed by the court, joinder of that trustee in the application, the present and future public convenience and necessity permit the abandonment by the Chicago, Milwaukee, St. Paul and Pacific Railroad Co., of that portion of its line of railway known as the Park Junction to National Branch, extending from railroad milepost 0.0 near Park Junction in an easterly direction to railroad milepost 3.8 near National, a distance of 3.8 miles in Pierce County, Wash. A certificate of public convenience and necessity permitting abandonment was issued to the Chicago, Milwaukee, St. Paul and Pacific Railroad Co. Since no investigation was instituted, the requirement of § 1121.38(a) of the regulations that publication of notice of abandonment decisions in the FEDERAL REGISTER be made only after such a decision becomes administratively final was waived.

Upon receipt by the carrier of an actual offer of financial assistance, the carrier shall make available to the offeror the records, accounts, appraisals, working papers, and other documents used in preparing Exhibit I (§ 1121.45 of the regulations). Such documents shall be made available during regular business hours at a time and place mutually agreeable to the parties.

The offer must be filed and served no later than 15 days after publication of this Notice. The offer, as filed, shall contain information required pursuant to § 1121.38(b)(2) and (3) of the regulations. If no such offer is received, the certificate of public convenience and necessity authorizing abandonment shall become effective March 31, 1978.

H. G. HOMME, Jr.,
Acting Secretary.

[7035-01]

(Rule 19, Ex Parte No. 241, Exemption No. 144)

RAILROADS IN THE NORTH CENTRAL PORTION
OF THE UNITED STATES

Exemption Under Provision of Mandatory Car
Service Rules

Because of severe winter storms resulting in massive snow drifts blocking main tracks and yards, railroads in the North Central portion of the United States are unable to relocate empty cars to other stations for loading or to return them promptly to car owners in accordance with Car Service Rules 1 and 2. Consequently, these carriers are unable to furnish cars of suitable ownership to shippers while at the same time similar cars of other ownerships stand idle because of the inability of the railroads to return them to owners.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19:

(a) Railroads operating in the states named in paragraph (b) are authorized to accept from shippers general service freight cars described in paragraph (c) owned by other railroads regardless of the provisions of Car Service Rules 1 and 2.

(b) North Dakota, South Dakota, Minnesota, Iowa, Wisconsin, Michigan, Illinois, Indiana, Kentucky, Ohio, New York, and Pennsylvania.

(c) This exemption is applicable to general service freight cars bearing reporting marks assigned to railroads listed in the official Railway Equipment Register, ICC-RER No. 405 issued by W. J. Trezise, or successive issues thereof as having the following mechanical designations:

Plain boxcars: "XM", "XMI",
Gondola cars: "GA", "GB", "GD", "GH",
"GS", "GT",
Hopper cars: "HFA", "HK", "HM", "HMA",
"HT", "HTA",
Flat cars: "FM", less than 200,000 lb. capacity.

It is further ordered, That: (d) This exemption shall not apply to cars of Mexican or Canadian ownership or to cars subject to Interstate Commerce Commission or Association of American Railroads' Orders requiring return of cars to owners.

Effective: January 31, 1978.

Expires: February 10, 1978.

(M-100, Amdt. 1, Feb. 9, 1978)

NOTICE OF DELETION FROM THE FEBRUARY 9, 1978 AGENDA AND ADDITION TO THE FEBRUARY 15, 1978, AGENDA AND ADDITION TO THE FEBRUARY 15, 1978 AGENDA

CIVIL AERONAUTICS BOARD.

TIME AND DATE: 10 a.m. to February 15, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue, NW., Washington, D.C. 20428.

SUBJECT: 2a. Docket 28655, Seattle/Portland-Japan Service Investigation, (request for instructions) (Memo No. 7758, 7758-A, OGC).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary,
202-673-5068.

SUPPLEMENTARY INFORMATION:

At the February 9, 1978, meeting the Board decided to defer discussion on the above item on that agenda to the February 15 agenda so that the Members would have more time in which to consider this item and also so that Member West could be briefed on the item and his views obtained. Accordingly the following Members have voted that agency business requires that the board delete this item from the February 9, 1978, agenda and add to the February 15, 1978 agenda and that no earlier announcement of this change was possible:

Chairman, Alfred E. Kahn
Vice Chairman, G. Joseph Minetti
Member, Richard J. O'Mella
Member, Elizabeth E. Bailey

FEDERAL COMMUNICATIONS
COMMISSION.

TIME AND DATE: 9:30 a.m., Wednesday, February 8, 1978 (open), followed by the closed meeting.

PLACE: Room 856, 1919 M Street NW., Washington, D.C.

STATUS: Open and closed Commission meetings.

CHANGES IN THE MEETINGS: A change has been made to the order the Commission will consider the agenda.

(1) Closed hearing item 2 (Overmyer transfer of control, Docket No. 18950) will be considered at 9:30 a.m.

(2) The regular open meeting will commence at the conclusion of the closed item. The following items have been deleted from the open agenda:

Agenda, Item No., and Subject

General-1-Amendment of Parts 2, 13, 81, and 83 of the Commission's rules relating to the use of radiotelegraphy in the maritime services (Docket No. 20813).

General-2-1978 Aeronautical World Administrative Radio Conference preparation (Docket No. 20290).

Common Carrier-6-Modification of procedures in Docket No. 20814, investigation into A.T. & T.'s Multi-Schedule Private Line (MPL) tariff.

(3) The regular closed meeting, excluding hearing item 2, will begin at the conclusion of the regular open meeting.

The prompt and orderly conduct of Commission business requires these

DEPARTMENT OF
HOUSING
AND URBAN
DEVELOPMENT

HOUSING ASSISTANCE
PAYMENTS PROGRAMS
FOR EXISTING HOUSING

Amendment of Schedule B—
Section 8 Existing Housing and
Section 23 Existing Housing

[4210-01]

DEPARTMENT OF HOUSING AND
URBAN DEVELOPMENTOffice of Assistant Secretary for Housing—
Federal Housing Commissioner

[24 CFR Parts 803 and 888]

(Docket No. R-78-502)

SECTION 23 AND SECTION 8 HOUSING ASSIS-
TANCE PAYMENTS PROGRAM—FAIR
MARKET RENTS AND CONTRACT RENT
AUTOMATIC ANNUAL ADJUSTMENT FAC-
TORSAmendment of Schedule B—Section 8 Existing
Housing and Section 23 Existing HousingAGENCY: Department of Housing
and Urban Development (HUD).

ACTION: Proposed rule.

SUMMARY: The Department is pro-
posing to amend the schedules that set
forth Fair Market Rents under the
"Section 23" and "Section 8" Housing
Assistance Payments Programs for Ex-
isting Housing.

COMMENTS DUE: March 1, 1978.

ADDRESSES: All materials which
persons wish to submit should be sent
to the Rules Docket Clerk, Office of
the General Counsel, Room 5218, De-
partment of Housing and Urban De-
velopment, 451 7th Street SW., Wash-
ington, D.C. 20410. Copies of com-
ments by PHAs should be concurrent-
ly submitted to the appropriate HUD
field office. A copy of each comment
will be available for public inspection
at this address during regular business
hours.

PROPOSED RULES

FOR FURTHER INFORMATION
CONTACT:Bernard Horn, Acting Director,
Office of Economic and Market
Analysis, PD&R, HUD, Washington,
D.C. 20410, 202-755-5870. This is not
a toll free number.

SUPPLEMENTARY INFORMATION:

The last nationwide revision of Fair
Market Rents, required on an annual
basis by law, was published in the Fed-
eral Register on July 1, 1977 and
made retroactive to March 29, 1977 (42
FR 33921). On the basis of current
data submitted by the public and by
HUD field offices, revised rents are
now being proposed to reflect changes
in local housing market or submarket
conditions. The intent of these
changes is to provide current rents for
each of the classes of housing de-
scribed in the schedules.By nature, Fair Market Rent sched-
ules are subject to periodic revisions
where data and information indicate
change is needed. Accordingly, Sched-
ule B Fair Market Rents will continue
to be amended in the future during
the year for those local housing
market or submarket areas where
changes are deemed appropriate on
the basis of available data and infor-
mation.Because it is necessary to the op-
eration of the Section 8 and Section 23
programs that Fair Market Rents
remain as current as possible, and be-
cause interested parties are encour-
aged at all times to submit infor-
mation and data on those rents which
will be considered in initiating revi-
sions as needed, it has been deter-
mined that it is impracticable and un-necessary to provide a 30-day period
for comments on these proposed rev-
isions and that a 15-day period is rea-
sonable and in the public interest.Interested persons are invited to par-
ticipate by submitting comments or
suggestions on the proposed rents to
the address set forth above and direct-
ly to the appropriate HUD field of-
fices. Communications should identify
the subject matter by the above title,
docket number, and date of publica-
tion. All relevant material received on
or before the date specified above will
be considered by HUD before adoption
of revised Fair Market Rents.The Department has determined
that these regulations do not consti-
tute a major Federal action signifi-
cantly affecting the quality of human
environment. Accordingly, a finding
of inapplicability of environment
impact has been prepared and is avail-
able for public inspection during regu-
lar business hours at the office of the
Rules Docket Clerk, at the address
specified above. It is hereby certified
that the economic and inflationary im-
pacts of this regulation have been
carefully evaluated in accordance with
Executive Order No. 11821.It is therefore proposed that Title
24, Part 888, Schedule B and Part 803,
Schedule B be revised as set forth
below.This notice of proposed rulemaking
is issued under the authority of sec.
7(d), Department of HUD Act (42
U.S.C. 3535(d)).Issued in Washington, D.C., on Janu-
ary 31, 1978.LAWRENCE B. SIMONS,
Assistant Secretary for Housing—
Federal Housing Commissioner.

ELECTROPLATING POINT
SOURCE CATEGORY

Proposed Pretreatment Standards
for Existing Sources

[6560-01]

ENVIRONMENTAL PROTECTION
AGENCY

[40 CFR Part 413]

[FRL 853-51]

ELECTROPLATING POINT SOURCE CATEGORY

Pretreatment Standards for Existing Sources

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: This regulation limits the concentrations of certain pollutants which may be introduced into publicly owned treatment works by operations in the Electroplating Point Source Category. The purpose is to limit those pollutants which interfere with, pass through, or are otherwise incompatible with the operation of such treatment works. The Federal Water Pollution Control Act requires these standards to be issued. The effect will be to require pretreatment of process waste water by operations in the Electroplating Point Source Category which introduce waste water into publicly owned treatment works.

DATE: Comments due by April 17, 1978.

ADDRESS: Send comments to: Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. Attention: Distribution Officer, WH-552.

FOR FURTHER INFORMATION CONTACT:

Harold B. Coughlin, Effluent Guidelines Division, (WH-552) Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, 202-426-2560.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On March 28, 1974, EPA promulgated a regulation adding Part 413 to Chapter 40 of the Code of Federal Regulations (39 FR 11510). That regulation (the "Phase I regulation") with subsequent amendments (the "Phase II regulation") (40 FR 18130, April 24, 1975) established effluent limitations guidelines for existing sources in five subcategories and standards of performance and pretreatment standards for new sources in one subcategory. Proposed revisions and additions setting forth effluent limitations guidelines based on "best available technology economically achievable" (BAT), pretreatment standards for new and existing sources, and standards of performance for new sources were also published for five subcategories (30 FR

11515, March 28, 1974, and 40 FR 18140, April 24, 1975). The history of rulemaking for the category by the Agency prior to December 1976 is described in greater detail in 41 FR 53018 (December 3, 1976).

On December 3, 1976, the Agency suspended the promulgated effluent limitations guidelines based on "best practicable control technology currently available" (BPT). The effluent limitations guidelines based on "best available technology economically achievable" (BAT), new source performance standards, and pretreatment standards for Subpart A of the Electroplating Point Source Category (41 FR 53081) were revoked. The Agency also withdrew its notices of proposed rulemaking for the category (41 FR 53070). The Agency took this action for the purpose of reevaluating the appropriateness of the limitations and standards earlier established in light of new data and further analysis.

On July 12, 1977, the Agency issued interim final pretreatment standards which incorporated additional study and analysis (42 FR 35834 (July 12, 1977)). However, these standards applied to only cyanide, hexavalent chromium and pH and required plants discharging less than 152,000 liters (40,000 gallons) per day to comply only with amenable cyanide standards, and represented only a first step toward adequate control of wastes from this category. The proposed standards set forth below would change the July 12, 1977 standards by requiring all plants to limit hexavalent chromium, lead, cyanide, and cadmium. In addition, plants discharging more than 38,000 liters (10,000 gallons) per day would be required to limit discharges of additional metals. These standards also take into account the additional study and analysis which has been conducted over the past several months.

Pretreatment standards are proposed for pollutants discharged into publicly owned treatment works (POTW) from existing sources which fall within the following subcategories of the Electroplating Point Source Category: Electroplating of Common Metals Subcategory (Subpart A); Electroplating of Precious Metals Subcategory (Subpart B); Anodizing Subcategory (Subpart D); Coatings Subcategory (Subpart E); Chemical Etching and Milling Subcategory (Subpart F); Electroless Plating (Subpart G) and Printed Circuit Boards (Subpart H). The content of the standards is discussed in detail below under Summary of Standards.

LEGAL AUTHORITY

These regulations are proposed for promulgation pursuant to section 307(b) of the Federal Water Pollution Control Act, as amended (33 U.S.C.

1251, 1317(b); 86 Stat. 816 et seq.; Pub. L. 92-500) (the Act), which requires the establishment of pretreatment standards for pollutants introduced into publicly owned treatment works.

SUMMARY OF STANDARDS

These regulations establish "categorical" pretreatment standards, containing specific numerical limitations based on an evaluation of available technologies in a particular industrial subcategory. The specific numerical limitations are arrived at separately for each subcategory, and are imposed on pollutants which may interfere with, pass through, or otherwise be incompatible with publicly owned treatment works. For plants with a daily flow of 38,000 l (10,000 gal) or more, the proposed standards specifically limit concentrations of all or some of the following metals: lead, cadmium, copper, nickel, total and hexavalent chromium, zinc, and silver. Additionally, these regulations also limit the sum of the individual concentrations of copper, nickel, chrome and zinc (total metals). For plants with a daily process waste water flow of less than 10,000 gallons, limitations on only amenable cyanide, hexavalent chromium, lead and cadmium are proposed in order to limit the closure rate in the industry with minimal environmental consequences.

For the purpose of clarity, the subcategories affected by the present regulations are exempted from 40 CFR Part 128. The provisions of the present regulation overlap considerably with the language of 40 CFR Part 128. 40 CFR Part 128 was proposed on July 19, 1973, (38 FR 19236) and published in final form in November 1973, (38 FR 30982). It limits the discharge of pollutants which pass through or interfere with the operation of publicly owned treatment works, but it does not set numerical limitations or explicitly list particular pollutants to be regulated. The provisions of 40 CFR Part 128 have sometimes been a source of confusion in the past. New general pretreatment regulations have been proposed (42 FR 6476, February 2, 1977) which will revoke and replace 40 CFR Part 128 upon promulgation. Therefore, the general pretreatment requirements set forth in 40 CFR Part 128 are superseded with respect to the subcategories regulated by this regulation. All pretreatment requirements currently applicable to the subcategories listed are included in the regulations set forth below. When the new general pretreatment regulations are promulgated, the standards set forth below will be reviewed for consistency with the new general policies.

OVERVIEW

These proposed pretreatment standards cover all firms performing operations in the Electroplating Point

Source Category that discharge effluent to publicly owned treatment works. These operations include electroplating, anodizing, chromating, phosphating, electroless plating, chemical etching and milling and the manufacture of printed circuit boards. The proposed standards cover both firms performing these processes as their primary line of business and so-called captive operations that perform these processes as part of the manufacture of another product. The plants covered by these regulations are found throughout the United States but are concentrated in heavily industrialized areas.

The standards require limitations on the discharge of pollutants that are toxic to human beings as well as to aquatic organisms. There pollutants include cadmium, lead, chromium, copper, nickel, zinc, silver and cyanide. The Agency has put a high priority on the elimination of these pollutants from the Nation's waters, primarily because of their toxic nature.

These proposed standards cover a large number of point source discharges that account for a significant amount of toxic substances entering the environment. Rough estimates by the Agency indicate that enforcement of these standards could prevent approximately 40 million pounds per year of toxic pollutants from entering the ambient waters or concentrating in the sludge from municipal treatment systems.

However, this environmental improvement is not attained without a significant economic impact. Economic analyses by the Agency indicate that many firms whose primary business is metal finishing or printed board manufacturing are vulnerable to adverse economic impact.

The Agency has considered methods of reducing the projected economic impact of these proposed pretreatment standards without compromising the environmental improvement that these regulations would accomplish. For example, plants whose metal finishing process flow is less than 10,000 gallons per day (who tend to be more economically vulnerable) must meet a less stringent level of control than do plants with greater flows. However, cadmium and lead, because of their high toxicity, are controlled for all flows. Reducing the requirements on these smaller flows greatly reduces the projected economic impact of the standards while relaxing controls on less than one percent of the flow to publicly owned treatment works.

Nonetheless, the projected economic impacts of these standards are a matter of major concern to the Agency. It is hoped that the adverse effects of this regulation can be reduced by one-half through the use of

Small Business Administration economic injury loans.

The Agency has been working with the Small Business Administration to develop ways to insure that their loan and other financial assistance programs will be available to eligible firms affected by these standards.

The effort to reduce projected impacts on independent metal finishers and printed circuit board makers will continue between proposal and promulgation of these standards. Comments on how this might be accomplished are solicited from the public.

On December 27, 1977, the President signed the Clean Water Act of 1977 (Pub. L. 95-217) which makes significant changes in the Federal water pollution control laws. Included in the amendments are provisions relating to pretreatment (section 54) and these provisions should be examined by persons subject to electroplating or other pretreatment regulations. Some relief from these or other pretreatment regulations may be provided by section 54(a) of the Clean Water Act, amending section 307(b) of the Federal Water Pollution Control Act:

If, in the case of any toxic pollutant under subsection (a) of this section introduced by a source into a publicly owned treatment works, the treatment by such works removes all or any part of such toxic pollutant and the discharge from such works does not violate that effluent limitation or standard which would be applicable to such toxic pollutant if it were discharged by such source other than through a publicly owned treatment works, and does not prevent sludge use or disposal by such works in accordance with section 405 of this Act, then the pretreatment requirements for the sources actually discharging such toxic pollutant into such publicly owned treatment works may be revised by the owner or operator of such works to reflect the removal of such toxic pollutant by such works.

The list of toxic pollutants specified under subsection (a) section 307 is a list of pollutants reprinted in the House of Representatives Committee Print No. 95-30, which includes virtually all the pollutants controlled by today's proposed pretreatment regulations. Named on that list are cadmium, chromium, lead, cyanide, nickel, copper and silver, as examples. In the brief time since the passage of the Clean Water Act of 1977 EPA has not had an opportunity to establish policies or procedures for implementing section 54(a) of the amendments; the Agency plans to publish such information as soon as possible, and probably as part of the final general pretreatment regulations, which were proposed on February 2, 1977 (42 FR 6474, proposing to establish 40 CFR Part 403). However, commenters are encouraged to address the Clean Water Act amendments and the desired means of implementing those changes in the context of these elec-

troplating regulations, in the comments on these proposed standards.

TECHNICAL BASIS FOR STANDARDS

The technical analysis upon which these regulations are based included an identification of the principal waste water pollutants generated by this category, a consideration of the extent to which these pollutants interfere with or pass through POTW, and a study of the various pretreatment technologies which are available for controlling the discharge of such pollutants. Information gathered in a technical study of direct and indirect discharges for this category was used as the primary basis for assessing available pretreatment technologies. Additionally, data gathered earlier in support of the direct discharge limitations under sections 301 and 304 as well as data submitted by industry were used. Appendix A summarizes these data and the analysis used in developing these limitations. The details of these studies are set forth in the "Proposed Development Document for the electroplating Point Source Category." The Agency also relied upon a report entitled "A Survey of Three Exemplary Electroplating Waste Treatment Systems."

ECONOMIC IMPACT ANALYSIS

In establishing the present regulations, the Agency has studied and taken into account the potential economic impact on industry of implementing the standards. The analyses which have been undertaken are described in Appendix A. The details of the economic studies are set forth in a report entitled "Economic Analysis of Proposed Pretreatment Standards for Existing Sources of the Electroplating Point Source Category," December, 1977.

These proposed pretreatment standards for plants discharging to publicly owned treatment works apply to: (1) Independent job shops performing the metal finishing processes covered by these standards as their primary line of business; (2) independent manufacturers of printed circuit boards; and (3) captive establishments performing the processes regulated but as part of the manufacture of some other product.

The total investment required to bring the three sectors of the industry into compliance is estimated to be 460.7 million dollars (134.3 million dollars for the job shops, 20.8 million dollars for the printed circuit board makers and 305.6 million dollars for the captive operations). The total annualized compliance cost for the three sectors is estimated to be 128.9 million dollars (37.7 million dollars for the job shops, 5.7 million dollars for the printed circuit board makers and 85.5 million dollars for the captive operations). The above costs, which make

PROPOSED RULES

allowance for treatment in place, are the increment between the existing level of compliance in the industry and that required by these pretreatment standards. Thus, these costs include the cost to comply with the July 12, 1977, Interim Final Pretreatment Standards for the Electroplating Point Source Category plus any additional costs necessary to comply with these proposed regulations.

Independent metal-finishing job shops and printed circuit board makers may suffer significant adverse economic impact as a result of these standards. It is estimated that as many as 584 metal-finishing job shops representing 12,500 jobs may close as a result of these proposed standards. This represents 19 percent of the firms and jobs in this sector of the industry. It is estimated that as many as 55 printed circuit board makers representing 3135 jobs may close as a result of these standards. This represents 14 percent of the firms and 13 percent of the jobs in this sector of the industry.

Thus, a total of approximately 639 independent firms representing approximately 15,636 jobs may close as a result of these standards. This represents 19 percent of the independent firms and approximately 18 percent of the jobs. These estimated impacts are drastically reduced when the effect of federal financial assistance programs to small business is considered. For example, analyses performed for the Environmental Protection Agency show that existing Small Business Administration (SBA) loan programs could reduce impacts on the job shops to 8 percent of the firms and jobs. Thus, SBA loan programs could possibly reduce estimated closures by 370 and estimated job losses by 8000. The Environmental Protection Agency is working closely with the Small Business Administration to insure that these loans and other federal financial assistance are made available to eligible firms.

Captive establishments are anticipated to have much lower adverse economic impacts than is the case for the independent establishments. No plants are expected to close as a result of the standards but it is estimated that 67 establishments may close down their metal-finishing operations and purchase metal-finishing services from job shops. This represents 322 metal finishing jobs among the 2.3 million jobs in establishments on municipal waste treatment systems with captive metal-finishing operations.

ENVIRONMENTAL CONSIDERATIONS

The Electroplating Point Source Category consists of an estimated 9,400 firms discharging effluent from metal finishing processes either directly to the Nation's waters or indirectly through publicly owned treatment

works (FOTW). Of these, an estimated 6,600 discharge approximately one billion gallons a day of metal finishing process water to publicly owned treatment works and are covered by these proposed pretreatment standards.

The pollutants discharged by these plants include the following substances that are toxic to human beings and aquatic organisms: Cadmium, lead, chromium (both hexavalent and trivalent), copper, nickel, zinc, silver, and cyanide. These pollutants are only partially treated by municipal treatment systems and pass through to the Nation's waters to varying degrees. The fraction of these pollutants that does not pass through the municipal system will concentrate in the municipal sludge where it may hamper the use of the sludge as fertilizer and soil conditioner. These pollutants can also interfere with the efficient operation of the publicly owned treatment works.

Rough calculations by the Agency indicate that the metal finishing operations covered by these standards are responsible for approximately 40 million pounds of these pollutants entering the environment each year. These standards will prevent essentially all of these pollutants from entering the environment.

The Nation's water quality will be improved by these standards. Cities that have promulgated and enforced similar regulations on metal finishers in the past report substantial reductions in toxic pollutants.

Environmental considerations are discussed in more detail in Appendix A, Technical Summary and Basis for Regulations under section (2)(ii), "Origins and Characteristics of Wastewater Pollutants."

AVAILABILITY OF DOCUMENTS

The EPA technical and economic reports mentioned above are available for inspection at the EPA Public Information Reference Unit, Room 2922 (EPA Library), Waterside Mall, 401 M Street SW., Washington, D.C. 20460, at all EPA Regional Offices and at State Water Pollution Control Offices.

Copies of the supplemental EPA reports described are being sent to persons or institutions affected by the regulation or who have placed themselves on a mailing list for this purpose (see EPA's Advance Notice of Public Review Procedures, 38 FR 21202, August 6, 1973). A limited number of additional copies are available. Persons wishing to obtain a copy may write the Environmental Protection Agency, Effluent Guidelines Division, Washington, D.C. 20460, Attention: Distribution Officer, WH-552.

When this regulation is promulgated in final rather than proposed form, revised copies of the technical documentation will be available from the Su-

perintendent of Documents, Government Printing Office, Washington, D.C. 20402. Copies of the economic analysis document will be available through the National Technical Information Service, Springfield, Va. 22151.

PUBLIC PARTICIPATION

Numerous agencies and groups have participated at various stages in the development of pretreatment regulations for existing sources in this industry. Comments were solicited when proposed pretreatment standards were issued on March 28, 1974 (Phase I) and on April 24, 1975 (Phase II). Many agencies and groups were also consulted in the course of developing the proposed regulations. Similar opportunities for public participation were also provided in the related development of Phase I and Phase II regulations based upon best practicable control technology currently available. Furthermore, a public hearing on pretreatment standards for the electroplating industry was held on June 10, 1974. On December 3, 1976, the Agency announced that the regulations which had been previously proposed or promulgated would be reevaluated. Since that time the Agency has reconsidered the formulation of pretreatment standards and other regulations in light of all comments which have been received. The Agency has also continued to consult with, and receive comments from, interested agencies and groups. Furthermore, at the request of the National Association of Metal Finishers, the Agency has released split samples for duplicate analysis as well as additional data on the electroplating plants that were selected for sampling and study as a basis for reevaluating the regulations. A summary of public participation in this rulemaking, public comments, and the Agency's response to major issues which have been raised is contained in Appendix B of this preamble.

COMPLIANCE SCHEDULE

Section 301 of the Act anticipates that pretreatment standards for existing sources would be established and compliance would be required before July 1, 1977, while section 307(b) specifies "a time for compliance not to exceed three years from the date of promulgation" of the standard. Because the pretreatment standards are only now being promulgated, the Agency believes that the compliance deadline as set forth in section 307(b) should apply. The time for compliance with these categorical pretreatment standards will thus be three years from the date of promulgation. States or local governments may wish to adopt now or after promulgation the substantive pretreatment standards proposed today and make these standards part of the state laws or local ordinances.

PROPOSED RULES

The job shop sector of the Electroplating Point Source Category is quite vulnerable to adverse economic impact from these proposed pretreatment standards. The Agency is seeking ways to mitigate the economic consequences of this regulation without compromising environmental and public health considerations. For example, the Agency is working with the Small Business Administration in an attempt to mitigate these projected economic impacts. The Agency has also proposed in this regulation that compliance be achieved in most cases within three years after promulgation, even though the economic impact analysis is based on compliance within one year. Preliminary analyses indicate that this might reduce the projected economic impact by spreading the cost burden over three years. This will allow more time for raising or accumulating capital through cash flow or retained earnings.

OPPORTUNITY FOR PUBLIC COMMENT

Interested persons are encouraged to submit written comments. Comments should be submitted in triplicate to the Environmental Protection Agency, 401 M St. SW., Washington, D.C. 20460, Attention: Distribution Officer, WH-552. Comments on all aspects of the regulation are solicited. In the event comments are in the nature of criticisms as to the adequacy of data which are available, comments should identify and if possible, provide any additional data which may be available and should indicate why such data suggest amendment or modification of the regulation. In the event comments address the approach taken by the Agency in establishing pretreatment standards, EPA solicits suggestions as to what alternative approach should be taken and why and how this alternative better satisfies the detailed requirements of section 307(b) of the Act. The Agency particularly solicits comments on other technologies for treating metal finishing effluents. All comments received on or before April 17, 1978, will be considered.

The Agency particularly solicits comments on the following specific issues:

(1) The proposed pretreatment standards place limitations on the allowable concentrations of individual metals. In addition, the proposed pretreatment standards include limitations on "total metals" which is defined to be the sum of the concentrations of copper, nickel, chromium and zinc. This differs from earlier standards which limited only individual metals concentrations. Commenters are urged to comment on the use of combined specific metal and total metal limitations as a pretreatment standard. In addition, EPA data indi-

cate that limitations on total suspended solids and pH can be an adequate surrogate for specific and total metals concentrations in some instances. Comments on the use of Total Suspended Solids and pH as a surrogate for the metals are solicited along with any data relating them to each other.

(2) The economic impact of these proposed pretreatment standards can be greatly reduced if financial assistance through the Small Business Administration is available to those potential closures that meet SBA loan criteria. Because of the potential importance of SBA programs to compliance by the industry, EPA has been working closely with SBA to improve the effectiveness of federal financial assistance programs, especially with regard to the Electroplating Point Source Category. As part of this effort, EPA is soliciting comments on the effectiveness of these financial assistance programs. More specifically, EPA would like comments on the following:

1. How can EPA and SBA better coordinate their programs?

2. What problems have been encountered by firms attempting to finance pollution control equipment through SBA?

3. Do firms generally know about Small Business Administration financial assistance programs?

4. Does the paperwork associated with SBA pollution abatement loans significantly deter eligible firms from applying?

5. Does the time to process a loan application significantly deter firms from doing so?

(3) These proposed pretreatment standards differ depending on whether a plant discharges more than 10,000 gallons per day of electroplating process waste water. Plants with flows of less than 10,000 gallons per day must meet limitations on amenable cyanide, hexavalent chromium, lead and cadmium. Plants with flows of greater than 10,000 gallons per day must meet these limitations plus additional limits on total cyanide, pH and other metals. The Agency is concerned that plants with flows of greater than 10,000 gallons per day will attempt to avoid the more stringent standard applicable to them by reducing their water flow to below 10,000 gallons per day. This would bypass the intent of the standard. Therefore, the Environmental Protection Agency solicits comments on the ability of electroplating facilities to reduce their process waste water use. Any comments should include data, if possible.

(4) These proposed pretreatment standards are concentration standards except for pH. The proposed regulations prohibit dilution as a means of complying with these regulations. The Agency solicits comments on the prac-

ticality of enforcing this prohibition, particularly in the context of local pretreatment enforcement programs. In addition there is a danger that concentration-based standards will penalize those firms that conserve water. A water conserving firm while discharging lower absolute amounts of a given pollutant could violate concentration-based limitations that are achieved by a similar firm that uses more water. Therefore, the Environmental Protection Agency solicits comments in the extent to which these concentration-based standards penalize firms who have better than average water usage.

(5) Do the data and analyses used by EPA support the Agency's preliminary conclusions with respect to the potentially adverse economic consequences foreseen and the availability of existing pollution control technology to meet the limitations proposed? Comments are also solicited on the extent to which the regulated pollutants pass through, interfere with, or are otherwise incompatible with the operation of publicly owned treatment works.

(6) These standards will often be met using technologies that create a sludge which must be disposed of in an environmentally sound manner. The Agency solicits comments on the proper disposal of this sludge. The Agency also solicits additional data on the costs of sludge disposal and invites comment on the 12 cent gallon cost which was used as an average cost for this regulation.

A copy of all public comments will be available for inspection and copying at the EPA Public Information Reference Unit, Room 2922, (EPA Library), Waterside Mall, 401 M Street, SW., Washington, D.C. 20460. A copy of the technical studies and economic studies referred to above, and certain supplementary materials will be maintained at this location for public review and copying. The EPA information regulation, 40 CFR Part 2, provides that a reasonable fee may be charged for copying.

An opportunity for public hearing will be provided shortly after the close of the comment period. The place and time will be announced in a later notice.

SMALL BUSINESS ADMINISTRATION
FINANCIAL ASSISTANCE

The analysis of the economic impact of these proposed pretreatment standards indicated that Small Business Administration financial assistance could significantly reduce the adverse impact of these standards. EPA estimates that the projected firm closure rates for metal finishing job shops of 19 percent could possibly be reduced to 8 percent by the use of available SBA loan programs by firms that meet applicable criteria. This would prevent the closing of 370 firms and loss of

eight thousand jobs. The Agency has been working with the Small Business Administration to insure that these benefits of fewer firm closures will be realized. The intent of this work has been to make sure that all firms that must comply with these pretreatment standards and are eligible for SBAA assistance are able to do so without undue delay.

There are two SBA programs that may be important sources of funding for the Electroplating Point Source Category. They are the Small Business Administration's Economic Injury Loan Program and SBA guaranteed Pollution Control Revenue Bonds.

Section 8 of the FWPCA authorizes the Small Business Administration through its economic disaster loan program, to make loans to assist any small business concern in effecting additions to or alterations in equipment, facilities, or methods of operation so as to meet water pollution control requirements under the Federal Water Pollution Control Act, if the concern is likely to suffer a substantial economic injury without such assistance. This program is open to all firms of 250 or fewer employees and for larger firms in some categories. Thus, this program is open to essentially all independent job shops in the Electroplating Point Source Category. Loans can be made either directly by SBA or through a bank using an SBA guarantee of up to ninety percent of the loans. The interest on direct loans depends on the cost of money to the federal government and is currently set at 6% percent. Borrowers can have up to thirty years to pay. SBA loans made through banks are at somewhat higher interest rates and are currently at 9% percent with up to 30 years to pay.

Analyses by the Environmental Protection Agency indicate that many firms in the Electroplating Point Source Category would be eligible for direct and indirect SBA loans. For further details on this Federal loan program write or telephone any of the following individuals at EPA Headquarters and in the ten EPA Regional offices:

- Coordinator—Sheldon Sacks, Environmental Protection Agency, Financial Assistance Coordinator, Office of Analysis and Evaluation (WH-588), 401 M Street SW., Washington, D.C. 20460, telephone 202-426-2504.
- Region I—Ted Landry, Environmental Protection Agency, J. F. Kennedy Federal Office Building, Room 2203, Boston, Mass. 02203, telephone 617-223-5061.

Region VIII—James Chuculate, Assistant Regional Director for Finance and Investment, Small Business Administration, 1405 Curtis Street, Denver, Colo. 80202, telephone 303-327-3988.

Region IX—Charles Hertzberg, Assistant Regional Director for Finance and Investment, Small Business Administration, 450 Golden Gate Avenue, San Francisco, Calif. 94102, telephone 415-556-7782.

Region X—Rodney Gauche, Regional Director for Finance and Investment, Small Business Administration, 710 2d Avenue, Seattle, Wash. 98104, telephone 206-399-5679.

In addition, the Small Business Investment Act, as amended by Pub. L. 94-305, authorizes SBA to guarantee the payments on qualified contracts entered into by eligible small businesses to acquire needed pollution facilities when the financing is provided through taxable and tax-exempt revenue or pollution bonds. This program is open to all eligible small businesses including some electroplating and metal finishing firms. Bond financing with SBA's guarantee of the payments makes available long term (20-25 years), low interest (usually 5% to 7%) financing to small businesses on the same basis which is available to larger national or international companies. For further details on this program write to SBA, Pollution Control Financing Division, Office of Community Development, 1441 L Street NW., Washington, D.C. 20416.

CERTIFICATION OF INFLATION IMPACT ANALYSIS

Executive Orders 11821 and 11949, and OMB Circular A-107 require that major proposals for legislation and promulgation of regulations and rules by agencies of the executive branch be accompanied by a statement certifying that the inflationary impact of the proposal has been evaluated. It is hereby certified that the inflationary impact of these standards has been evaluated in the economic impact analysis.

Dated January 24, 1978.

DOUGLAS M. COSTLE,
Administrator.

APPENDIX A—TECHNICAL SUMMARY AND BASIS FOR REGULATIONS

This Appendix summarizes the basis for proposed pretreatment standards for existing sources in the electroplating point source category.

(1) *General methodology.* The pretreatment standards set forth herein were developed in the following manner: The point source category was first studied for the purpose of determining whether separate standards were appropriate for different segments within the category. The raw waste characteristics for each such segment were then identified. This included an analysis of the source, flow and volume of water used in the process employed, the sources of waste and waste waters in the operation and the constituents of all waste water.

PROPOSED RULES

The compatibility of each raw waste characteristic with municipal treatment works was then considered. Waste water constituents posing pass-through or interference problems for POTW were identified.

The control and treatment technologies existing within each segment were identified. This included identification of each distinct control and treatment technology, including both in-plant and end-of-process technologies, which exist or are capable of being designed for each segment. It also included identification of the effluent level resulting from the application of each of the technologies in terms of the amount of constituents and the chemical, physical, and biological characteristics of pollutants. The problems, limitations, and reliability of each treatment and control technology were also identified. In addition, the nonwater quality environmental impact, such as the effects of the application of such technologies upon other pollution problems, including air, solid waste, noise, and radiation were identified. The energy requirements of each control and treatment technology were determined as well as the cost of the application of such technologies.

The information, as outlined above, was then evaluated in order to determine what levels of technology reflected the application of appropriate pretreatment technologies. In identifying such technologies, various factors were considered. These included the total cost of application of technology, the age of equipment and facilities involved, the process employed, the engineering aspects of the application of various types of control techniques, process changes, nonwater quality environmental impact (including energy requirements) and other factors.

The data upon which the above analysis was performed included EPA permit applications, EPA sampling and inspections, consultant reports, and industry submissions.

(2) *Summary of technical analyses.* (i) *Categorization.* Previous regulations for the electroplating point source category were subcategorized on the basis of process considerations. Electroplating was separated from electroplating-related metal finishing processes because electroplating always requires the action of an electrical current to deposit a metallic coating on the basis material. Electroplating-related metal finishing processes may not require a current and may or may not deposit a metallic coat on the basis material. The processes of anodizing, coating, chemical etching and milling are sufficiently different so as to warrant separate subcategories. Anodizing, usually performed on

aluminum, converts the surface of the object to the metal oxide. Coatings refer principally to the conversion coatings of chromating and phosphating. Each of these processes chemically forms a thin protective coat on the treated object. An electrical current may or may not be applied. Chemical etching and milling involve the dissolution of the basis material.

In restudying the industry for the purpose of establishing pretreatment regulations, it was decided that printed circuit board manufacturing and electroless plating also warrant separate subcategorization because of the unique mixture of electrolytic and electroless plating operations found in these processes. Additionally, these processes produce pollutants which may render normal waste treatment techniques ineffective if proper safeguards are ignored. Finally, the foregoing subcategorization is consistent with the existing structure of the industry, each subcategory tending to be oriented toward individual processes or identifiable markets which do not overlap significantly.

(ii) *Origins and Characteristics of Waste Water Pollutants.* Waste water from this industry comes from pretreatment and post treatment operations as well as the actual metal finishing and electroplating steps. The known significant pollutants and pollutant properties from these operations include pH, total suspended solids, cyanide, chromium, copper, nickel, zinc, cadmium, lead, aluminum, and various precious metals and organic compounds. The present study indicates that many of these pollutants may occur together and that their individual concentrations may exceed 100 mg/l.

Waste water results from the following operations in this industry: (1) Rinsing to remove films of processing solution from the surface of work pieces at the site of each operation, (2) rinsing away spills, (3) washing the air that passes through ventilation ducts so as to remove spray from the air before it is exhausted, (4) dumping of spent solutions, (5) washing of equipment, and (6) discharging cooling water used in heat exchangers to cool solutions in metal finishing processes. Approximately 90 percent of the water consumed is in rinsing. That used as cooling water is usually recycled for rinsing. Plating solutions that are dumped may be slowly trickled into the rinse waters prior to treatment.

Many or the pollutants which are generated pose significant interference or pass through problems at POTW. The problems are as follows:

CADMIUM

Cadmium is not destroyed when intro-

duced into a POTW, and will either pass through to the POTW effluent or be incorporated into the POTW sludge. It can interfere with the POTW treatment process and can also limit the usefulness of municipal sludge. It causes toxic effects in a wide variety of organisms, including aquatic species and humans.

Threshold concentrations for inhibition by cadmium in a POTW are 10-100 mg/l for activated sludge processes and 0.02 mg/l for anaerobic digestion processes. Other metals, including zinc and magnesium, are synergistic for cadmium inhibition.

In a recent study of 189 POTW's, 75 percent of the primary plants, 57 percent of the trickling filter plants, 66 percent of the activated sludge plants and 62 percent of the biological plants allowed over 90 percent of the influent cadmium to pass through to the POTW effluent. Only 2 of the 189 POTW's allowed less than 20 percent pass through, and none less than 10 percent pass through. POTW effluent concentrations ranged from 0.001 to 1.97 mg/l (mean 0.028 mg/l, standard deviation .167 mg/l).

The cadmium which passes through the POTW to the effluent will usually be discharged to ambient surface water. Cadmium is toxic to aquatic organisms at levels typically observed in POTW effluents; for example:

- 96 hr LC-50 for chinook salmon is reported as 0.002 mg/l.
- 96 hr LC-50 for steelhead trout is reported as 0.0009 mg/l.
- Reproductive decrease in flagfish and brook trout at 0.0081 and 0.0034 mg/l, respectively.

Besides providing an environment for aquatic organisms, surface water is often used as a source of drinking water or irrigation water. For states with drinking water or irrigation water standards, the most common cadmium standard is 0.01 mg/l. Chronic ingestion of cadmium via drinking water and from use of contaminated irrigation water has been documented as the cause of Itai-itai disease in humans.

Cadmium not passed through the POTW will be retained in the sludge, where it is likely to build up in concentration. Sewage sludge is recognized as being a valuable resource for soil conditioning, with about 25 percent being applied to land (20 percent to cropland, 5 percent to golf courses, etc.). Cadmium contamination of sewage sludge limits its use on land since it increases the level of cadmium in the soil. Moreover, plant uptake results in contaminated crops. Sewage sludge contains 3 to 3000 mg/kg (dry basis) of cadmium (mean=106 mg/kg; median=16 mg/kg). These concentrations, for the most part, are significantly greater than those normally found in soil (0.017-7 mg/kg, with 0.06 mg/kg being a common level). Data show that cadmium can be incorporated into crops, including vegetables and grains, from contaminated soils. Since the crops themselves show no adverse effects from soils with levels up to 100 mg/kg cadmium, these contaminated crops could have a significant impact on human health.

Cadmium may be a factor in the development of such human pathological conditions as kidney disease, testicular tumors, hypertension, arteriosclerosis, growth inhibition, chronic disease of old age, and cancer. Cadmium which enters a POTW will

PROPOSED RULES

either be discharged to ambient water, where it becomes a possible drinking water contaminant, or be incorporated into sewage sludge, where it becomes a possible human food contaminant via crop uptake.

Two federal agencies have already recognized the potential adverse human health effects posed by the use of sludge on cropland. The FDA recommends that sludges containing over 20 mg/kg should not be used on agricultural land. The USDA also recommends placing limits on the total cadmium from sludge that may be applied to land.

Pretreatment of electroplating discharges substantially reduces the concentration of cadmium in sludge. In Buffalo, N.Y., for example, pretreatment of electroplating waste resulted in a decrease of cadmium concentrations in the sludge from 100 to 50 mg/kg.

The Agency estimates that if the proposed regulation is promulgated approximately 200,000 pounds per year of cadmium will be removed from effluent entering POTW.

CHROMIUM

Chromium exists in the environment primarily in two oxidation states, hexavalent chromium and trivalent chromium. Chromium is not destroyed when treated by a POTW (although the oxidation state may change), and will either pass through to the POTW effluent or be incorporated into the POTW sludge. Both oxidation states can cause POTW treatment inhibition and can also limit the usefulness of municipal sludge. Hexavalent and trivalent chromium both cause toxic effects in a wide variety of organisms including aquatic species and humans. Chromium which passes through a POTW becomes a potential drinking and bathing water contaminant. Hexavalent chromium is a known human carcinogen, and is generally the more toxic of the two oxidation states.

Hexavalent chromium threshold concentrations for POTW treatment process inhibition are 1-10 mg/l for activated sludge, 5-50 mg/l for anaerobic digestion, and 0.25 mg/l for nitrification processes. Trivalent chromium threshold concentrations are 50 mg/l for activated sludge and 50-500 mg/l for anaerobic digestion processes. Chromium can also interfere with sludge settling in concentrations as low as 7 mg/l.

The amount of chromium which passes through to the POTW effluent depends on the type of treatment processes used by the POTW. In a recent study of 240 POTW's 56 percent of the primary plants allowed more than 80 percent pass-through to POTW effluent. More advanced treatment results in less pass-through, with median values for trickling filter, activated sludge, and biological treatments all being near about 60 percent pass-through. POTW effluent concentrations ranged from 0.003 to 3.2 mg/l total chromium (mean=0.197, standard deviation=0.48), and from 0.002 to 0.1 mg/l hexavalent chromium (mean=0.017, standard deviation=0.020).

The chromium which passes through the POTW will usually be discharged to ambient surface water. Chromium is toxic to aquatic organisms at levels observed in POTW effluents, for example:

Trivalent chromium showed a significant impairment in reproduction of *Daphnia magna* at levels of 0.3 to 0.5 mg/l. Hexavalent chromium retards growth of chinook salmon at 0.0002 mg/l. Hexavalent chromium is chronically toxic at levels as low as 0.010 mg/l, affecting

the ability of several aquatic species to grow or reproduce.

Hexavalent chromium is also corrosive, and a potent human skin sensitizer.

Besides providing an environment for aquatic organisms, surface water is often used as a source of drinking water. Because hexavalent chromium can be reduced to trivalent chromium in the environment, and trivalent chromium can possibly be oxidized to hexavalent chromium by chlorine or other agents, the National Interim Primary Drinking Water Standards are based on total chromium, the limit being 0.05 mg/l.

Chromium not passed through the POTW will be retained in the sludge, where it is likely to build up in concentration. Sludge concentrations of total chromium of over 20,000 mg/kg (dry basis) have been observed.

Sewage sludge is recognized as being a valuable resource for soil conditioning, with about 25 percent currently being applied to land (20 percent to cropland, 5 percent to golf courses, etc.). Most crops absorb relatively little chromium, even when it is present in high levels in soils, but hexavalent chromium has been shown to reduce some crop yields in concentrations as low as 200 mg/kg.

Pretreatment of electroplating discharges substantially reduces the concentration of chromium in sludge. In Buffalo, New York, for example, pretreatment of electroplating waste resulted in a decrease in chromium concentrations in sludge from 2,510 to 1,040 mg/kg. A similar reduction occurred in Grand Rapids, Michigan where the chromium concentration in the sludge decreased from 11,000 to 2,700 mg/kg.

The Agency estimates that if the proposed regulation is promulgated approximately 10,000,000 pounds per year of chromium will be removed from effluent entering POTW.

COPPER

Copper is not destroyed when treated by a POTW, and will either pass through to the POTW effluent or be retained in the POTW sludge. It can interfere with the POTW treatment processes and can limit the usefulness of municipal sludge. It causes toxic effects in a wide variety of organisms, including aquatic species.

Threshold concentrations for inhibition by copper in a POTW are 1.0 mg/l in activated sludge and anaerobic digestion processes, and 0.005 to 0.5 mg/l for nitrification processes, depending on POTW conditions. In a recent study of 268 POTW's, the median pass through was over 80 percent for primary plants and 40-50 percent for trickling filter, activated sludge and biological treatment plants. POTW effluent concentrations of copper ranged from 0.003 to 1.8 mg/l (mean 0.126, standard deviation 0.242).

The copper which passes through the POTW to the effluent will be discharged to ambient surface water. Copper is toxic to aquatic organisms at levels typically observed in POTW effluents, for example:

96-hour TL-50 for the rainbow trout is 0.02 mg/l.
96-hour LC-50 for the chinook salmon is 0.031 mg/l.
96-hour LC-50 for the fathead minnow is 0.023 mg/l.

Copper which does not pass through the POTW will be retained in the sludge, where it is likely to build up in concentration. The presence of excessive levels of copper in

sludge may limit its use on cropland. Sewage sludge contains up to 16,000 mg/kg of copper, with 730 mg/kg as the mean value. These concentrations are significantly greater than those normally found in soil, which usually range from 18 to 80 mg/kg. Copper toxicity may develop in plants from application of sewage sludge contaminated with copper. Yield reductions have been reported as low as 100 mg/kg with legumes being more sensitive than cereals. In one study, copper decreased beet yields by 74 percent at 80 mg/kg and 90 percent at 160 mg/kg.

Pretreatment of electroplating wastes in Buffalo, N.Y., resulted in a decrease in copper concentration in sludge from 1,570 to 330 mg/kg. In Grand Rapids, Mich., the sludge copper concentration decreased from 3,000 to 2,500 mg/kg.

The Agency estimates that if the proposed regulation is promulgated approximately 6,000,000 pounds per year of copper will be removed from effluent entering POTW.

LEAD

Lead is not destroyed when treated in a POTW, but will either pass through to the POTW effluent or be retained in the POTW sludge. It can interfere with the POTW treatment process and can also limit the usefulness of municipal sludge. It causes toxic effects in a wide variety of organisms, including aquatic species and humans, particularly children.

Threshold concentrations for lead inhibition of POTW treatment processes are 0.1 mg/l for activated sludge processes and 0.5 mg/l for nitrification processes.

In a recent study of 214 POTW's, median pass through values were over 80 percent for primary plants and over 60 percent for trickling filter, activated sludge, and biological process plants. Lead concentrations in POTW effluents ranged from 0.003 to 1.8 mg/l (mean=0.106, standard deviation=0.222).

The lead which passes through the POTW to the effluent will be discharged to ambient surface water. Lead is toxic to aquatic organisms at levels typically observed in POTW effluents, for example:

96-hour LC-50 for the coho salmon is 0.52 mg/l.
50 percent reproductive decrease in *Daphnia magna* at 0.1 mg/l.
Chronic detrimental effects on rainbow trout, brook trout, and sticklebacks at concentrations of 0.1 mg/l.

Besides providing an environment for aquatic organisms, surface water is often used as a source of drinking water. The National Interim Primary Drinking Water Regulations limit lead in drinking water to 0.05 mg/l. The major risk of lead in drinking water is to small children, where the water is one of several sources which result in a well documented, serious problem of excess lead levels in the body. According to the above regulations, as a result of the narrow range between the lead exposure of the average American in everyday life and exposure which is considered excessive, (especially in children) it is imperative that lead in water be maintained within strict limits. The estimated maximum safe level of lead intake is 600 µg/day. Potential sources of exposure are diet, water, dust, air, etc. Levels of lead in many urban children indicate overexposure (chronic brain or kidney damage, or acute brain damage), the levels of lead in water should be limited to as low as is practicable.

PROPOSED RULES

Lead which does not pass through the POTW will be retained in the sludge, where it is likely to build up in concentration. Municipal sludge is recognized as a valuable resource, with about 25 percent currently being applied to land (20 percent to cropland, 5 percent to golf courses, etc.). In a recent two year study of eight cities, the median lead content ranged from 546 mg/kg to 8,466 mg/kg, with a maximum observed content of 11,897 mg/kg. Since the normal range of lead content in soil is from 3 to 70 mg/kg, application of contaminated sewage sludge to the soil will generally increase the soil's lead content.

Data indicate that the application of sludge containing excessive levels of lead to cropland may increase the lead concentration in crops if grown on acid soils. Generally, roots accumulate more lead than do plant tops. For above ground crops, significant impacts on lead concentration can occur when sludge is applied as a surface dressing while crops are growing. In light of the potential human health effects, the FDA has recommended that sludge containing more than 1,000 mg/kg of lead should not be used on agricultural land for crops used directly in the food chain.

Pretreatment of electroplating wastes in Buffalo, N.Y., resulted in a decrease in lead concentrations in sludge from 1,800 to 605 mg/kg.

The Agency estimates that if the proposed regulation is promulgated approximately 200,000 pounds per year of lead will be removed from effluent entering POTW.

NICKEL

Nickel is not destroyed when treated in a POTW, but will either pass through to the POTW effluent or be retained in the POTW sludge. It can interfere with POTW treatment processes and can also limit the usefulness of municipal sludge. Nickel causes toxic effects in a wide variety of organisms, including aquatic species and humans. It is a human carcinogen.

Threshold concentrations for POTW treatment process inhibition are 1 to 2.5 mg/l for activated sludge, 2 mg/l for anaerobic digestion, and 0.53 mg/l for nitrification processes.

In a recent study of 190 POTW's, nickel pass through was greater than 90 percent for 82 percent of the primary plants. Median pass through for trickling filter, activated sludge, and biological process plants was greater than 80 percent. POTW effluent concentrations ranged from 0.002 to 40 mg/l (mean=0.410, standard deviation=3.279).

The nickel which passes through the POTW is usually discharged to ambient surface water. Nickel is toxic to aquatic organisms at levels typically observed in POTW effluents, for example:

50 percent reproductive impairment of *Daphnia magna* at 0.095 mg/l.
3 week LC-50 of 0.130 mg/l for *Daphnia magna*.
Morphological abnormalities in developing eggs of *Limnaea palustris* at 0.230 mg/l.
50 percent growth inhibition of aquatic bacteria at 0.020 mg/l 0.020 mg/l.

Since surface water is often used as a drinking water source, nickel passed through a POTW becomes a possible drinking water contaminant.

Nickel not passed through the POTW will be incorporated into the sludge. Sewage

sludge is recognized as being a valuable resource, with 25 percent currently being applied to land (20 percent to cropland, with 5 percent to golf courses, etc.). In a recent two year study of eight cities, four of the cities had median nickel concentrations of over 350 mg/kg, and two were over 1,000 mg/kg. The maximum nickel concentration observed was 4,016 mg/kg.

Nickel toxicity may develop in plants from application of sewage sludge on acid soils. Nickel has caused reduction of yields for a variety of crops including oats, mustard, turnips, and cabbage.

Beets are the most sensitive to nickel toxicity. In one study, nickel decreased the yields of oats by 16 percent at 50 mg/kg, and 70 percent at 100 mg/kg.

Pretreatment of electroplating wastes in Buffalo resulted in a decrease in nickel concentration in sludge from 315 to 115 mg/kg. A similar decrease occurred in Grand Rapids, Mich., where the sludge nickel concentrations went from 3,000 to 1,700 mg/kg.

The Agency estimates that if the proposed regulation is promulgated approximately 12,000,000 pounds per year of nickel will be removed from effluent entering POTW.

ZINC

Zinc is not destroyed when treated by a POTW, but will either pass through to the POTW effluent or be retained in the POTW sludge. It can interfere with treatment processes in the POTW and can also limit the use of municipal sludge. It causes toxic effects in a wide variety of organisms, including aquatic species.

Threshold concentrations for POTW treatment process inhibition are 0.3 mg/l for activated sludge, 5 mg/l for anaerobic digestion, and 0.08 to 0.5 mg/l for nitrification processes. Other metals can cause synergistic effects.

In a recent study of 258 POTW's, the median pass through values were 70-80 percent for primary plants, 50-60 percent for trickling filter and biological process plants, and 30-40 percent for activated sludge process plants. POTW effluent concentrations of zinc ranged from 0.003 to 3.6 mg/l (mean=0.330, standard deviation=0.464).

The zinc which passes through the POTW to the effluent will be discharged to ambient surface water. Zinc is toxic to aquatic organisms in concentrations typically observed in POTW effluents, for example:

96-hour LC-50 for the cutthroat trout is 0.090 mg/l.
96-hour LC-50 for the chinook salmon is 0.103 mg/l.
Growth retardation in the minnow at 0.13 mg/l and abnormal swimming behavior at 0.04 mg/l.

The zinc which does not pass through the POTW will be retained in the sludge. Municipal sludge is recognized as a valuable resource, with 20 percent currently being applied to cropland as a soil conditioner. The presence of zinc in sludge may limit its use on cropland. Sewage sludge contains 72 to over 30,000 mg/kg of zinc, with 3,366 mg/kg as the mean value. These concentrations are significantly greater than those normally found in soil, which range from 0 to 195 mg/kg, with 94 mg/kg being a common level.

Therefore, application of sewage sludge to soil will generally increase the concentration of zinc in the soil. Zinc can be toxic to plants, depending upon soil pH. Lettuce, tomatoes, turnips, mustard, kale, and beets are especially sensitive to zinc contamination.

Pretreatment of electroplating waste in Buffalo, N.Y., resulted in a decrease in zinc concentrations in sludge from 2,275 to 364 mg/kg. The zinc content in the sludge of Grand Rapids, Mich., also decreased from 7,000 to 5,700 mg/kg as a result of pretreatment.

CYANIDE

Cyanides are widely used in the electroplating industry and are among the most toxic of pollutants commonly observed in industrial waste waters. Cyanides can interfere with the treatment processes in a POTW, or pass through to ambient waters. Cyanide also enhances the toxicity of metals commonly found in POTW effluents.

Threshold cyanide concentrations for POTW treatment process inhibition are 0.1-5 mg/l for activated sludge, 4 mg/l for anaerobic digestion, and 0.34 mg/l for nitrification processes.

Cyanide may be destroyed in a POTW, but data indicate that much of it passes through to the POTW effluent. One primary plant showed 100 percent cyanide pass through, and the mean pass through for 14 biological plants was 71 percent. In a recent study of 41 POTW's the effluent concentrations ranged from 0.002 to 100 mg/l (mean=2.518, standard deviation=15.6).

The cyanide which passes through to the POTW effluent will usually be discharged into ambient surface water. There is a considerable amount of data documenting cyanide toxicity to aquatic organisms at levels at or below those typically observed in POTW effluents.

Cyanides are more toxic to fish than to lower aquatic organisms such as midge larvae, crustaceans, and mussels. Toxicity to fish is a function of chemical form and concentration, and is influenced by the rate of metabolism (temperature), the level of dissolved oxygen, and pH. In laboratory studies free cyanide concentrations ranging from 0.05 to 0.15 mg/l have been proven to be fatal to sensitive fish species including trout, bluegills, and fathead minnows. Levels above 0.2 mg/l are rapidly fatal for many species. Long term sublethal concentrations of cyanide as low as 0.01 mg/l have been shown to affect the ability of fish to function normally, e.g., reproduce, grow, and move freely.

Cyanide may exist as free cyanide (CN anion), hydrogen cyanide (HCN), or as a complex with metals. In the absence of metals, free cyanide and hydrogen cyanide are in an equilibrium which is highly dependent upon pH. At pH values below 7.0 over 99 percent of the cyanide is present as HCN. At pH values of 8.0, 9.0, and 10.0 the HCN percentage decreases to 93.3 percent, 58 percent and 13 percent, respectively. Since HCN is the most toxic form of cyanide, it is clear that decreasing pH (increasing acidity) results in greater toxicity. Temperature increase also results in increased toxicity (2-3 fold over 10°C), as does reduction in dissolved oxygen content.

Cyanide forms complexes with metal ions present in waste water. All these complexes exist in equilibrium with HCN. Therefore, the concentration of free cyanide present is dependent on the pH of the water and the relative strength of the metal-cyanide complex. The cyanide complexes of zinc, cadmium and copper may dissociate to release free cyanide. Also, where these complexes occur together, synergistic effects have been demonstrated. Zinc, copper, and cadmium cyanide are more toxic than an equal concentration of sodium cyanide.

PROPOSED RULES

Another problem associated with cyanide pass through is possible chlorination of cyanide to highly toxic cyanogen chloride, which is subsequently released to the environment. This chlorination reaction may occur as part of the POTW treatment, or subsequently as part of the disinfection treatment for surface drinking water preparation.

Data for Grand Rapids, Mich., show a significant decline in cyanide concentrations downstream from the POTW after pretreatment regulations were enacted. Concentrations fell from 0.06 mg/l before to 0.01 mg/l after pretreatment was required.

SILVER

There is no available literature on the incidental removal of silver by POTW. An incidental removal of about 50 percent is assumed as being representative as this is the highest average incidental removal of any metal for which data are available. (Copper has been indicated to have a median incidental removal rate of 49 percent.)

The toxicity of silver to aquatic organisms has long been recognized. Dosages of 0.000001 to 0.5 mg/l of silver have been reported as sufficient to sterilize water. The threshold toxicity level to other lower aquatic organisms has been reported at 30 to 50 ug/l. The toxic threshold of silver nitrate for sticklebacks is reported as 4.8 ug/l as silver.

Bioaccumulation and concentration of silver from sewage sludge has not been studied to any great degree. There is some indication that silver could be bioaccumulated in mushrooms to the extent that there could be an adverse physiological effect on humans if they consumed large quantities of mushrooms grown in silver enriched soil. The effect, however, would tend to be unpleasant rather than fatal. No data has been accumulated on the remainder of the metals.

There is little summary data available on the quantity of silver discharged to POTW. Presumably because of its high intrinsic value there would be a tendency to limit its discharge from a manufacturing facility. Pretreatment requirements will limit the discharge of silver from those establishments that allow or may allow them to discharge freely.

pH

Extremes of pH or rapid pH changes can exert stress conditions or kill biological life outright. At a pH greater than 10, disruption of a biological treatment system is likely. At a low pH, corrosion of sewer pipes may be caused. Furthermore, at a pH below 7.5, only small amounts of metals are converted to hydroxide form. Since soluble metals tend to pass through POTW untreated, whereas metal hydroxides will tend to be removed in primary clarifiers, pH levels have an important indirect effect on the significance of metal pass-through problems.

(iv) Treatment and control technology. Waste water treatment and control technologies have been studied for this industry to determine the best practicable pretreatment technologies. This study showed that although there are differences between subcategories in the types and quantities of wastes generated, the same general treatment technologies are available to this entire industrial segment.

Electroplating wastes are typically treated by a number of sequential control techniques. General practice includes segrega-

tion and individual treatment of the wastes containing cyanide and chrome followed by the removal of metals by pH adjustment and clarification or filtration in a common treatment system. Therefore, the present pretreatment limitations for this category are based on the following control techniques: cyanide oxidation, chrome reduction, metal precipitation using pH adjustment and solids removal. The use of these technologies formed the basis of the pretreatment standards which are being established. However, this does not preclude the use of other waste water treatment techniques which provide equivalent or better levels of treatment. These treatment technologies are discussed in detail in the development document.

CHROME REDUCTION

Reduction of hexavalent chrome to trivalent chrome is widely practiced and is typically done using sulfur dioxide at a pH of approximately two.

Seventh-three plants sampled by the Agency had operating chrome reduction facilities. The number of data points from each plant varied from one to 133. The data from each plant were averaged into a single number so that all plants were considered equally. Approximately 80 percent of these plants already meet the limitations specified by the regulation.

CYANIDE DESTRUCTION

Cyanide must be treated before treatment for metals removal may take place. If this is not done soluble metal cyanide complexes rather than insoluble metal hydroxides will be formed.

Cyanide destruction is generally done in a two-stage oxidation treatment system using chlorine or hypochlorite. The first stage of the reaction oxidizes cyanide to cyanate, and the second, cyanate to nitrogen and carbon dioxide.

The cyanide limitation set by this regulation is based on two stage treatment and careful separation of iron, nickel, and certain other metal bearing wastes from cyanide waste treatment technologies. This latter segregation practice is standard good housekeeping procedure and is well established within the industry.

Eighty-five plants sampled during this study had cyanide oxidation facilities. The data from each plant were treated in the same manner as the data on chrome reduction. The limitations set by this regulation based on cyanide oxidation are currently achieved by approximately 80 percent of the data base.

pH ADJUSTMENT

Control of pH was practiced by all of the plants sampled in this study. Typically, the pH is adjusted by adding an acid, such as hydrochloric or sulfuric, or base (lime or caustic) to the waste stream in an agitated tank; pH control is achieved by mixing sufficient amounts of acid or base to the waste to maintain the pH in the desired range.

METALS REMOVAL

The pH adjustment of electroplating wastes to 8.0 or above causes the dissolved metals to form insoluble metal hydroxides. These compounds can be removed from the waste water by solids separation techniques such as gravitational settling or filtration. Both methods are in general use within the industry and were used by plants sampled by the Agency. A detailed analysis of the

performance of these techniques is given in the development document.

The limitations proposed by this regulation are based on the Agency's assessment of the performance of the preceding technologies. In making this assessment, the Agency was careful to exclude data or plants which were diluting untreated or inadequately treated process waste water with nonprocess or sanitary waste. Dilution of this sort is counter to the intent of this regulation and must not be used as an aid in achieving these limitations.

(iv) Cost estimates for control of waste water pollutants. Cost information was obtained from industry, engineering firms, equipment suppliers, government sources, and available literature. Whenever possible the Agency used costs based on actual industrial installations or engineering estimates for projected facilities as supplied by contributing companies.

The foregoing cost information was used to estimate the cost of treatment plants for electroplating establishments of various sizes and compositions. Eighty-one model plants were used to characterize the treatment costs associated with this category. These models and a summary of the costing methodology are available for public inspection at the EPA Public Information Reference Unit, Room 2922, (EPA Library), Waterside Mall, 401 M Street SW., Washington, D.C. 20480.

(v) Energy requirements and nonwater quality environment impacts. The energy costs related to the implementation of these regulations are generally limited to electricity required for liquid transfer pumps and agitator motors.

The major nonwater quality consideration which may be associated with these pretreatment standards is the generation of metal-bearing solid wastes which must be disposed of by the industrial user. The estimated cost for disposing of these wastes in an environmentally safe manner has been estimated by the Agency to be 12 cents per gallon. This cost has been included in the cost analysis for this regulation. A discussion of the data gathered by the Agency regarding these costs is contained in the development document.

No significant increase in noise, radiation, air pollution or thermal pollution will result from the implementation of these pretreatment standards.

(3) Economic Summary. This section summarizes the economic and inflationary impacts of the pretreatment standards for the electroplating point source category. Executive Orders 11821 and 11949, and OMB Circular A-107 require that major proposals for legislation and promulgation of regulations and rules by agencies of the executive branch be accompanied by a statement certifying that the inflationary impact of the proposal has been evaluated. The inflationary impact of these standards has been evaluated in an economic impact analysis, the results of which are summarized below. The details of the economic studies are set forth in a report entitled Economic Analysis of Proposed Pretreatment Standards for Existing Sources of the Electroplating Point Source Category, December 1977.

These proposed pretreatment standards for plants discharging to publicly owned treatment works apply to: (1) independent job shops performing the metal-finishing processes covered by these standards as their primary line of business, (2) independent manufacturers of printed circuit

boards; and (3) captive establishments performing the processes regulated but as part of the manufacture of some other product.

Total investment costs for the metal-finishing job shops to comply with these standards are estimated to be 134.3 million dollars. Annualized compliance costs for this sector are estimated to be 37.7 million dollars per year. Investment costs for the printed circuit board makers are estimated to be 20.8 million dollars. Annualized compliance costs for this sector are estimated to be 5.7 million dollars. Thus, independent firms would have to make investments totaling 155.1 million dollars to comply with these standards. Annualized costs of compliance for independent firms are estimated to be 43.4 million dollars per year.

Total investment costs for captive operations are estimated to be 305.6 million dollars. Annualized compliance costs for this sector are estimated to be 85.5 million dollars per year. Thus, the total investment required to comply with these standards is estimated to be 460.7 million dollars. Total annualized compliance costs are estimated to be 128.9 million dollars per year. The above costs make allowance for treatment in place and are the increment between the existing level of compliance in the industry and that required by these proposed pretreatment standards. Thus, these costs include the cost to comply with the July 12, 1977 Interim Final Pretreatment Standards for the Electroplating Point Source Category as well as the increment over these needed to comply with the proposed standards.

Independent metal finishing job shops and printed circuit board makers may suffer significant adverse economic impact as a result of these standards. It is estimated that 584 metal finishing job shops representing 12,500 jobs may close as a result of these standards. This represents 21 percent of the firms and jobs in this sector of the industry. It is estimated 55 printed circuit board makers representing 3,135 jobs may close as a result of these standards. This represents 14 percent of the firms and 13 percent of the jobs in this sector of the industry.

Thus, a total of approximately 639 independent firms representing approximately 15,636 jobs may close as a result of these standards. This represents 19 percent of the independent firms and 18 percent of the jobs.

These estimated impacts are drastically reduced by Federal financial assistance programs to small business. Analyses performed for the Environmental Protection Agency show that existing Small Business Administration loan programs could reduce the projected impacts on the job shops to eight percent of the firms and jobs. Thus, SBA loan programs could possibly reduce the number of firm closures by 370 and the number of job losses by 8,000. The Environmental Protection Agency is working closely with the Small Business Administration to insure that these loans are made available to eligible firms.

Captive establishments are anticipated to have much lower adverse economic impacts than is the case for the independent establishments. No plants are expected to close as a result of the standards but it is estimated that 67 plants may close down their metal finishing operations and purchase metal finishing services from job shops. This represents less than a thousand metal finishing jobs among the 2.3 million jobs in establishments with captive metal finishing

operations that discharge to municipal systems. These possible captive closures represent one percent of the firms having captive metal finishing operations.

Prices are expected to rise to account for increased compliance costs. The price of the regulated metal finishing services from independent job shops is expected to rise by an average of five percent. The price of printed circuit boards is expected to rise by about four percent. The price of those products produced by firms with captive operations is expected to rise by one percent or less.

Profitability and owners' compensation are expected to drop slightly in the short run but are expected to return to their original levels within a few years of compliance as the industry adjusts to the new abatement requirements.

SUMMARY OF PUBLIC PARTICIPATION

The following are the principal agencies and groups consulted in the development of regulations: (1) Effluent Standards and Water Quality Information Advisory Committee (established under section 515 of the Act); (2) all State and U.S. Territory Pollution Control Agencies; (3) Department of Interior; (4) Department of Commerce; (5) Department of Defense; (6) Department of the Treasury; (7) Water Resources Council; (8) Atomic Energy Commission; (9) Office of Management and Budget; (10) National Association of Metal Finishers; (11) Metal Finishers Suppliers Association; (12) American Electroplating Society; (13) Institute of Printed Circuits; (14) Alberts Plating Works, Inc.; (15) American Hot Dip Galvanizers; (16) American Society of Mechanical Engineers; (17) Hudson River Sloop Restoration, Inc.; (18) The Conservation Foundation; (19) Environmental Defense Fund, Inc.; (20) Natural Resources Defense Council; (21) The American Society of Civil Engineers; (22) Water Pollution Control Federation; (23) National Wildlife Federation; (24) American Institute of Chemical Engineers; (25) New England Interstate Water Pollution Control Commission.

A list of those who commented following publication of the Phase I and Phase II regulations was published in the July 12, 1977 interim final pretreatment regulation (FR35834). Those comments were considered by the Agency in proposing the present regulation. Additionally, the following responded with comments following publication of the interim final regulation: U.S. Department of Interior; County Sanitation Districts of Los Angeles County; The Metropolitan Sanitary District of Greater Chicago; East Bay Municipal Utility District; city of Houston, Tex., Office of the Mayor; Slack Associates, Inc.; Roper Eastern; E. I. DuPont de Nemours Inc., Dicson Electronics Inc.; Andco Environmental Process, Inc., Varland Metal Services, Inc.; Allen K. Fischkorn, Jr.; The National Association of Metal Finishers.

The major issues raised by commenters following the publication of the interim final regulations are as follows:

(1) One commenter stated that the interim final cyanide limitations are not reflective of alkaline chlorination alone but rather alkaline chlorination plus an alleged cyanide reduction due to metals removal.

The Agency's analysis of cyanide oxidation systems included only plants which also had metals removal technology. On the basis of a preliminary analysis, a significant cyanide reduction does appear to occur as a result of metals removal. The Agency, in studying this effect proposes today to amend the regulation by increasing the amenable cyanide limitation for plants discharging less than 38,000 l (10,000 gal) per day. The Agency solicits comments on the appropriateness of these limitations and the mechanism by which this removal occurs. However, for those firms discharging more than 38,000 l (10,000 gal) per day, the Agency believes that the cyanide analysis reflects the levels of control which can be attained by use of the model waste treatment control technologies.

(2) Several commenters stated that while control of cyanide and chromium is a necessary first step in the control of toxic wastes from this industry, these and other limitations should only be as severe as necessary to meet the water quality standards required for receiving waters.

The basic scheme of the Federal Water Pollution Control Act is to require all discharges to meet uniform technology-based pretreatment standards as a minimum. Water quality standards are primarily relevant to determine whether further reductions in discharges should be imposed to meet the water quality standards of individual bodies of water. The Agency has followed a practice of utilizing technology based limitations in other pretreatment regulations. The Agency invites comments on whether recent amendments to the Federal Water Pollution Control Act should affect that policy.

(3) One commenter stated that some processes, particularly within the coatings subcategory, utilize process chemicals which inevitably generate low but significant concentrations of cyanide complexes which are poorly treated by alkaline chlorination.

To the extent that such processes exist and were not studied by the Agency and that the formation of these complexes is not the result of failure to segregate cyanide-bearing wastes or other poor housekeeping procedures, these processes may be eligible for variances from these limitations because they are fundamentally different from those processes studied

PROPOSED RULES

Subpart A—Electroplating of Common Metals Subcategory

Subpart A, § 413.10 is proposed to be amended by adding a second paragraph as follows:

§ 413.10 Applicability; description of the electroplating of common metals subcategory.

• • • No discharger into a POTW shall augment his use of process water or otherwise dilute his discharge as a partial or complete substitute for adequate treatment to achieve compliance with this standard.

Subpart A, § 413.11 is proposed to be amended by adding paragraphs (h) and (i) as follows:

§ 413.11 Specialized definitions.

(h) The term "total metal" is defined as the sum of the concentration of Copper (Cu), Nickel (Ni), Total Chromium (Cr) and Zinc (Zn).

(i) The term "strong chelating agents" is defined as all compounds which be virtue of their chemical structure and amount present form soluble metal complexes which are not removed by subsequent metals control techniques such as clarification or filtration.

Subpart A, § 413.14 paragraph (b) is revised to read as follows:

§ 413.14 Pretreatment standards for existing sources.

• • • • •

(b) In addition to the general prohibitions set forth in paragraph (a) of this section, the following pretreatment standards establish the concentration or pH of pollutants which may be introduced into a publicly owned treatment works by a source subject to the provisions of this subpart.

(1) For plants discharging less than 38,000 l (10,000 gal) per day of electroplating process waste water the following limitations shall apply:

Pretreatment standard		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
mg/l		
CN.A.....	2	0.8
Cr.VI.....	.25	.09
Pb.....	.8	.4
Cd.....	1. 145.5	

(2) For plants discharging 38,000 l (10,000 gal) per day or more of electroplating process waste water the following limitations shall apply:

Pretreatment standard		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
mg/l		
CN.A.....	0.20	0.08
CN.T.....	.64	.24
Cr.VI.....	.25	.09
Cu.....	4.6	2.0
Ni.....	3.6	1.8
Cr.Total.....	4.2	1.6
Zn.....	3.4	1.5
Pb.....	.8	.4
Cd.....	1.0	.5
Total metals.....	7.5	3.9

For plants regulated under paragraph (b)(2) of this section, the following optional alternate limitation may be elected by the plant introducing treated process waste water into a POTW. In the absence of strong chelating agents and after neutralization using calcium oxide (or hydroxide) the following limitations shall apply:

Pretreatment standard		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
mg/l		
CN.A.....	0.20	0.08
CN.T.....	.64	.24
Cr.VI.....	.25	.09
Pb.....	.8	.4
Cd.....	1.	.5
TSS.....	15.	10.
pH.....	Within the range 7.5 to 10.	

Subpart B—Electroplating of Precious Metals Subcategory

Subpart B, § 413.20 is proposed to be amended by adding a second paragraph to read as follows:

§ 413.20 Applicability; description of the electroplating of precious metals on ferrous and non-ferrous materials category.

• • • No discharger into a POTW shall augment his use of process water or otherwise dilute his discharge as a partial or complete substitute for adequate treatment to achieve compliance with this standard.

Subpart B, § 413.21 is proposed to be amended by adding paragraphs (h) and (i) as follows:

§ 413.21 Specialized definitions.

• • • • •

(h) The term "total metal" is defined as the sum of the concentration of Copper (Cu), Nickel (Ni), Total Chromium (Cr) and Zinc (Zn).

(i) The term "strong chelating agents" is defined as all compounds

PROPOSED RULES

which by virtue of their chemical structure and amount present form soluble metal complexes which are not removed by conventional metals control techniques such as clarification or filtration.

Subpart B, § 413.24 paragraph (b) is revised to read as follows:

§ 413.24 Pretreatment standards for existing sources.

• • • • •

(b) In addition to the general prohibition set forth in paragraph (a) of this section, the following pretreatment standards establish the concentration or pH of pollutants which may be introduced into a publicly owned treatment works by a source subject to the provisions of this subpart.

(1) For plants discharging less than 38,000 liters (10,000 gal) per day of electroplating process waste water the following limitations shall apply:

Pretreatment standard		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
mg/l		
CN.A.....	2.0	0.8
Cr.VI.....	0.25	0.09
Pb.....	.8	0.4
Cd.....	1.0	0.5

(2) For plants discharging 38,000 liters (10,000 gal) per day or more of electroplating process waste water the following limitations shall apply:

Pretreatment standard		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
mg/l		
CN.A.....	0.20	0.08
CN.T.....	.64	.24
Cr.VI.....	.25	.09
Cu.....	4.6	2.0
Ni.....	3.6	1.8
Cr.Total.....	4.2	1.6
Zn.....	3.4	1.5
Pb.....	.8	.4
Cd.....	1.0	.5
Total metals.....	7.5	3.9
Silver.....	1.0	.34

(3) For plants regulated under paragraph (b)(2) of this section, the following optional alternate limitation may be elected by the plant introducing treated process waste water into a POTW. In the absence of strong chelating agents and after neutralization using calcium oxide (or hydroxide) the following limitations shall apply:

Pretreatment standard		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
mg/l		
CN.A.....	0.20	0.08
CN.T.....	.64	.24
Cr.VI.....	.25	.09
Pb.....	.8	.4
Cd.....	1.0	.5
TSS.....	15	10.
pH.....	Within the range 7.5 to 10	

Support D—Anodizing Subcategory

Subpart D, § 413.40 is proposed to be amended by adding a second paragraph to be read as follows:

§ 413.40 Applicability; description of the anodizing subcategory.

• • • No discharger into a POTW shall augment his use of process water or otherwise dilute his discharge as a partial or complete substitute for adequate treatment to achieve compliance with this standard.

Subpart D, § 413.41 is proposed to be amended by adding paragraphs (h) and (i) as follows:

§ 413.41 Specialized definitions.

• • • • •

(h) The term "total metal" is defined as the sum of the concentration of Copper (Cu), Nickel (Ni), Total Chromium (Cr) and Zinc (Zn).

(i) The term "strong chelating agents" is defined as all compounds which by virtue of their chemical structure and amount present form soluble metal complexes which are not removed by conventional metals control techniques such as clarification or filtration.

Subpart D, § 413.44 paragraph (b) is revised to read as follows:

§ 413.44 Pretreatment standards for existing sources.

• • • • •

(b) In addition to the general prohibitions set forth in paragraph (a) of this section, the following pretreatment standards establish the concentration or pH of pollutants which may be introduced into a publicly owned treatment works by a source subject to the provisions of this subpart.

(1) For plants discharging less than 38,000 liters (10,000 gal.) per day of electroplating process waste water the following limitations shall apply:

Pretreatment standard		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
mg/l		
CN.A.....	2.0	0.8
Cr.VI.....	.25	.09
Pb.....	.8	.4
Cd.....	1.0	.5

(2) For plants discharging 38,000 liters (10,000 gal.) per day or more of electroplating process waste water the following limitations shall apply:

Pretreatment standard		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
mg/l		
CN.A.....	0.20	0.08
CN.T.....	.64	.24
Cr.VI.....	.25	.09
Cu.....	4.6	2.0
Ni.....	3.6	1.8
Cr.Total.....	4.2	1.6
Zn.....	3.4	1.5
Pb.....	.8	.4
Cd.....	1.0	.5
Total metals.....	7.5	3.9

(3) For plants regulated under paragraph (b)(2) of this section, the following optional alternate limitation may be elected by the plant introducing treated process waste water into a POTW. In the absence of strong chelating agents and after neutralization using calcium oxide (or hydroxide) the following limitations shall apply:

Pretreatment standard		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
mg/l		
CN.A.....	0.20	0.08
CN.T.....	.64	.24
Cr.VI.....	.25	.09
Pb.....	.8	.4
Cd.....	1.0	.5
TSS.....	15.	10.
pH.....	Within the range 7.5 to 10.0	

Support E—Coatings Subcategory

Subpart E, § 413.50 is proposed to be amended by adding a second paragraph to read as follows:

§ 413.50 Applicability; description of the coatings subcategory.

• • • No discharger into a POTW shall augment his use of process water or otherwise dilute his discharge as a partial or complete substitute for adequate treatment to achieve compliance with this standard.

PROPOSED RULES

Subpart E, § 413.51 is proposed to be as amended by adding paragraphs (h) and (i) as follows:

§ 413.51 Specialized definitions.

(h) The term "total metal" is defined as the sum of the concentration of Copper (Cu), Nickel (Ni), Total Chromium (Cr) and Zinc (Zn).

(i) The term "strong chelating agents" is defined as all compounds which by virtue of their chemical structure and amount present form soluble metal complexes which are not removed by conventional metals control techniques such as clarification or filtration.

Subpart E, § 413.54 paragraph (b) is revised to read as follows:

§ 413.54 Pretreatment standards for existing sources.

(b) In addition to the general prohibitions set forth in paragraph (a) of this section, the following pretreatment standards establish the concentration or pH of pollutants which may be introduced into a publicly owned treatment works by a source subject to the provisions of this subpart.

(1) For plants discharging less than 38,000 liters (10,000 gal.) per day of electroplating process waste water the following limitations shall apply:

Pretreatment standard		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
mg/l		
CN, A.....	2.0	0.8
Cr, VI.....	.25	.09
Pb.....	.8	.4
Cd.....	1.0	.5

(2) For plants discharging 38,000 liters (10,000 gal.) per day or more of electroplating process waste water the following limitations shall apply:

Pretreatment standard		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
mg/l		
Cu, A.....	0.20	0.08
CN, T.....	.64	.24
Cr, VI.....	.25	.09
Cu.....	4.6	2.0
Ni.....	3.6	1.8
Cr, Total.....	4.2	1.8
Zn.....	3.4	1.5
Pb.....	.8	.4
Cd.....	1.0	.5

Pretreatment standard		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
mg/l		
Total metals.....	7.5	3.9

(3) For plants regulated under paragraph (b)(2) of this section, the following optional alternate limitation may be elected by the plant introducing treated process waste water into a POTW. In the absence of strong chelating agents and after neutralization using calcium oxide (or hydroxide) the following limitations shall apply:

Pretreatment, standard (mg/l)		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days, shall not exceed—
CN, A.....	0.20	0.08
CN, T.....	.64	.24
Cr, VI.....	.25	.09
Pb.....	.80	.40
Cd.....	1.00	.50
TSS.....	15.00	10.00
pH.....	Within the range 7.5 to 10.0	

Subpart F—Chemical Etching and Milling Subcategory

Subpart F, § 413.60 is proposed to be amended by adding a second paragraph to read as follows:

§ 413.60 Applicability; description of the chemical etching and milling subcategory.

... No discharger into a POTW shall augment his use of process water or otherwise dilute his discharge as a partial or complete substitute for adequate treatment to achieve compliance with this standard.

Subpart F, § 413.61 is proposed to be amended by adding paragraphs (h) and (i) as follows:

§ 413.61 Specialized definitions.

(h) The term "total metal" is defined as the sum of the concentration of Copper (Cu), Nickel (Ni), Total Chromium (Cr) and Zinc (Zn).

(i) The term "strong chelating agents" is defined as all compounds which by virtue of their chemical structure and amount present form soluble metal complexes which are not removed by conventional metals control techniques such as clarification or filtration.

Subpart F, § 413.64 paragraph (b) is revised to read as follows:

§ 413.64 Pretreatment standards for existing sources.

(b) In addition to the general prohibitions set forth in paragraph (a) of this section, the following pretreatment standards establish the concentration or pH of pollutants which may be introduced into a publicly owned treatment works by a source subject to the provisions of this subpart.

(1) For plants discharging less than 38,000 liters (10,000 gal.) per day of electroplating process waste water the following limitations shall apply:

Pretreatment standard (mg/l)		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
CN, A.....	2.00	0.80
Cr, VI.....	.25	.09
Pb.....	.80	.40
Cd.....	1.00	.50

(2) For plants discharging less than 38,000 liters (10,000 gal.) per day of electroplating process waste water the following limitations shall apply:

Pretreatment standard (mg/l)		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
CN, A.....	0.20	0.08
CN, T.....	.64	.24
Cr, VI.....	.25	.09
Cu.....	4.60	2.00
Ni.....	3.60	1.80
Cr, total.....	4.20	1.80
Zn.....	3.40	1.50
Pb.....	.8	.40
Cd.....	1.0	.50
Total metals.....	7.5	3.90

(3) For plants regulated under paragraph (b)(2) of this section, the following optional alternate limitation may be elected by the plant introducing treated process waste water into a POTW. In the absence of strong chelating agents and after neutralization using calcium oxide (or hydroxide) the following limitations shall apply:

Pretreatment standard (mg/l)		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
CN, A.....	0.20	0.08
CN, T.....	.64	.24
Cr, VI.....	.25	.09
Cu.....	4.60	2.00
Ni.....	3.60	1.80
Cr, total.....	4.20	1.80
Zn.....	3.40	1.50
Pb.....	.80	.40
Cd.....	1.00	.50
TSS.....	15.00	10.00

Pretreatment standard		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed
pH.....	Within the range 7.5 to 10.0	

Subpart G—Electroless Plating

Subpart G, § 413.70 is proposed to be amended by adding a second paragraph to read as follows:

§ 413.70 Applicability; description of the electroless plating subcategory.

... No discharger into a POTW shall augment his use of process water or otherwise dilute his discharge as a partial or complete substitute for adequate treatment to achieve compliance with this standard.

Subpart G, § 413.71 is proposed to be amended by adding paragraphs (i) and (j) to read as follows:

§ 413.71 Specialized definitions.

(i) The term "total metal" is defined as the sum of the concentration of Copper (Cu), Nickel (Ni), Total Chromium (Cr) and Zinc (Zn).

(j) The term "strong chelating agents" is defined as all compounds which by virtue of their chemical structure and amount present form soluble metal complexes which are not removed by conventional metals control techniques such as clarification or filtration.

Subpart G, § 413.74 paragraph (b) is revised to read as follows:

§ 413.74 Pretreatment standards for existing sources.

(b) In addition to the general prohibitions set forth in paragraph (a) of this section, the following pretreatment standards establish the concentration or pH of pollutants which may be introduced into a publicly owned treatment works by a source subject to the provisions of this subpart.

(1) For plants discharging less than 38,000 l (10,000 gal) per day of electroplating process waste water the following limitations shall apply:

Pretreatment standard (mg/l)		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
CN, A.....	2.00	0.80
Cr, VI.....	.25	.09
Pb.....	.80	.40
Cd.....	1.00	.50

(2) For plants discharging 10,000 gallons per day or more of electroplating

PROPOSED RULES

process waste water the following limitations shall apply:

Pretreatment standard (mg/l)		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
CN, A.....	0.20	0.08
CN, T.....	.64	.24
Cr, VI.....	.25	.09
Cu.....	4.60	2.00
Ni.....	3.60	1.80
Cr, total.....	4.20	1.80
Zn.....	3.40	1.50
Pb.....	.80	.40
Cd.....	1.00	.50
Total metals.....	7.50	3.90

(3) For plants regulated under paragraph (b)(2) of this section, the following optional alternate limitation may be elected by the plant introducing treated process waste water into a POTW. In the absence of strong chelating agents and after neutralization using calcium oxide (or hydroxide) the following limitations shall apply:

Pretreatment standard (mg/l)		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
CN, A.....	0.20	0.08
CN, T.....	.64	.24

TSS.....	15.00	10.00
pH.....	Within the range 7.5 to 10.0	

Subpart H—Printed Circuit Board

Subpart H, § 413.80 is proposed to be amended by adding a second paragraph to read as follows:

§ 413.80 Applicability; description of the printed circuit board subcategory.

... No discharger into a POTW shall augment his use of process water or otherwise dilute his discharge as a partial or complete substitute for adequate treatment to achieve compliance with this standard.

Subpart H, § 413.81 is proposed to be amended by adding paragraphs (i) and (j) as follows:

§ 413.81 Specialized definitions.

(i) The term "total metal" is defined as the sum of the concentration of Copper (Cu), Nickel (Ni), Total Chromium (Cr) and Zinc (Zn).

(j) The term "strong chelating agents" is defined as all compounds which by virtue of their chemical structure and amount present form soluble metal complexes which are not removed by conventional metals control techniques such as clarification or filtration.

Subpart H, § 413.84 paragraph (b) is revised to read as follows:

§ 413.84 Pretreatment standards for existing sources.

(b) In addition to the general prohibitions set forth in paragraph (a) of this section, the following pretreatment standards establish the concentration or pH of pollutants which may be introduced into a publicly owned treatment works by a source subject to the provisions of this subpart.

(1) For plants discharging less than 38,000 l (10,000 gal) per day of electroplating process waste water the following limitations shall apply:

Pretreatment standard (mg/l)		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
CN, A.....	2.00	0.80
Cr, VI.....	.25	.09
Pb.....	.80	.40
Cd.....	1.00	.50

(2) For plants discharging 38,000 l (10,000 gal) per day or more of electroplating process waste water the following limitations shall apply:

Pretreatment standard (mg/l)		
Pollutant or pollutant property	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
CN, A.....	0.20	0.08
CN, T.....	.64	.24
Cr, VI.....	.25	.09
Cu.....	4.60	2.00

"THE FEDERAL REGISTER—WHAT IT IS AND HOW TO USE IT"

Reservations for March are being accepted for the free Friday workshops on how to use the FEDERAL REGISTER. The sessions are held at 1100 L Street NW., Washington, D.C. in room 9409 from 9 to 11:30 a.m.

Each session includes a brief history of the FEDERAL REGISTER, the difference between legislation and regulations, the relationship of the FEDERAL REGISTER to the Code of Federal Regulations, the elements of a typical FEDERAL REGISTER document, and an introduction to the finding aids.

FOR RESERVATIONS call: Martin V. Franks, Workshop Coordinator, 202-523-3517.

SUNSHINE ACT MEETINGS 6715

BOLTS, NUTS AND LARGE SCREWS IMPORTS

Presidential memorandum 6575

CIVIL RIGHTS

HEW publishes revised criteria for acceptable plans to desegregate State systems of public higher education 6658

VETERANS EDUCATION

VA proposes increases in monthly rates and other significant changes in the educational assistance and vocational rehabilitation programs; comments by 3-11-78 (Part II of this issue) . 6722

DISASTER LOAN POLICY

SBA proposes regulations implementing economic dislocation and injury loans policy; comments by 3-17-78 6619

CASH EQUIVALENT OF IN-KIND INCOME

HEW announces availability of study results 6657

INTERNATIONAL ENERGY PROGRAM

DOE/ERA proposes emergency standby mandatory crude oil and refinery yield control programs; hearings on 3-20, 3-21, 3-23, 3-28, and 3-29-78; comments by 3-21-78 6611

INCOME TAX

Treasury/IRS issues domestic international sales corporation (DISC) rules on procedure and administration and rules relating to export trade corporations 6602

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
	CSC			CSC
	LABOR			LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended, 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

FEDERAL REGISTER, VOL. 43, NO. 32—WEDNESDAY, FEBRUARY 15, 1978

Next Week's Deadlines for Comments On Proposed Rules

AGRICULTURE DEPARTMENT

Food and Nutrition Service—

National School Lunch Program, Contractual arrangements with food service management companies or vendors, comments by 2-25-78 1955; 1-13-78

Forest Service—

Grazing livestock on National Forest System Lands; range management; comments by 2-21-78 60108; 11-23-77

Rural Electrification Administration—

Rural telephone program; revisions of REA Specification PE-71 for inside wiring cable and REA Specification PE-72 for switchboard cable; comments by 2-23-78 3284; 1-24-78

COMMERCE DEPARTMENT

Economic Development Administration—

Procedures for modification of business development projects; comments by 2-24-78 3349; 1-25-78

National Oceanic and Atmospheric Administration—

Foreign fishing; incidental taking of billfishes and sharks in Atlantic Ocean, Gulf of Mexico and Caribbean Sea; comments by 2-20-78 3292; 1-24-78

COMMODITY FUTURES TRADING COMMISSION

Contract market designation, demonstration of continued compliance with requirements, comments by 2-21-78 63899, 12-21-77

DEFENSE DEPARTMENT

Air Force Department—

Employment of civil air patrol, comments by 2-24-78 2735, 1-19-78

Engineers Corps—

Shore, Hurricane, and Tidal and Lake Flood protection, Federal participation, comments by 2-20-78 3048, 1-20-78

ENERGY DEPARTMENT

Official seal and distinguishing flag, description and use, comments by 2-22-78 3128, 1-23-78

Economic Regulatory Administration—

Administrative procedures and sanctions, appeal from interpretation; comments by 2-22-78 3668; 1-26-78

Synthetic natural gas, comments by 2-24-78 3740, 1-27-78

ENVIRONMENTAL PROTECTION AGENCY

Compliance date extension; withdrawal; comments by 2-24-78 3401; 1-25-78

State implementation plans, California, comments by 2-21-78 (4 documents) 2896-8, 1-20-78

FEDERAL COMMUNICATIONS COMMISSION

Aviation services, additional aeronautical advisory station at landing areas; comments by 2-24-78 3408; 1-25-78

FM Broadcast stations, table of assignments: Baxter Springs, Kans.; comments by 2-24-78 1512; 1-10-78

Blytheville, Ark. and Mayfield, Ky.; comments by 2-21-78 1515; 1-10-78

Harrison, Ark.; comments by 2-24-78 1513; 1-10-78

"Saturated" cable television systems; comments period extended to 2-23-78 3598; 1-26-78

FEDERAL ELECTION COMMISSION

Freedom of Information Act regulations; comments by 2-18-78 59943; 11-22-77

FEDERAL ENERGY ADMINISTRATION

Appeal from interpretations, administrative procedures and sanctions; comments by 2-22-78 2729; 1-19-78

FEDERAL HOME LOAN BANK BOARD

Electronic fund transfers through remote service units, comments by 2-22-78 5010; 2-7-78

HEALTH, EDUCATION, AND WELFARE DEPARTMENT

Food and Drug Administration—

Antioxidants; indirect food additives; adhe-

sives coatings and components, adjuvants, production aids, and sanitizers, comments by 2-21-78 2873; 1-20-78

Defoaming agents, secondary direct food additives permitted in food for human consumption, comments by 2-21-78 2872; 1-20-78

Emulsifiers, food additives permitted for direct addition to food for human consumption, comments by 2-21-78 2871, 1-20-78

Ethylene-vinyl acetate-vinyl alcohol polymers; indirect food additives; polymers; comments by 2-21-78 2874, 1-20-78

Fee for transmission of facsimile insulin certificates, comments by 2-21-78 64342; 12-23-77

New animal drug applications, approval of supplemental applications; comments by 2-21-78 64367, 12-23-77

Resinous and polymeric coatings; indirect food additives; adhesive coatings and components; comments by 2-21-78 2872; 1-20-78

Health Resources Administration—

Health planning, national guidelines; comments by 2-21-78 3056, 1-20-78

Public Health Service—

Designation of Health Manpower Shortage areas; criteria; comments by 2-24-78 1586; 1-10-78

Nurse training, grants for advanced programs; comments by 2-23-78 3344; 1-24-78

INTERIOR DEPARTMENT

Bureau of Land Management—

Authorizing grazing use; payment of fees; comments by 2-21-78 60109; 11-23-77

Payment of fees; comments by 2-21-78 63437; 12-16-77

Fish and Wildlife Service—

Endangered status for Grevy's Zebra and Hartmann's Mountain Zebra, comments by 2-21-78 64382; 12-23-77

INTERSTATE COMMERCE COMMISSION

Lease and interchange of vehicles; comments by 2-22-78 1109; 1-6-78

LABOR DEPARTMENT

Occupational Safety and Health Administration—

Standard for occupational exposure to acrylonitrile (vinyl cyanide); comments by 2-21-78 (2 documents) 2586; 1-17-78-2608, 1-18-78

NUCLEAR REGULATORY COMMISSION

Contractor organizational conflicts of interest, procedures for avoidance; comments by 2-23-78 3288; 1-24-78

PENSION BENEFIT GUARANTY CORPORATION

Mandatory employee contributions; comments by 2-23-78 1358; 1-9-78

SECURITIES AND EXCHANGE COMMISSION

Issuer tender and exchange offers; new regulations and related schedule; comments by 2-24-78 63066, 12-14-77

SMALL BUSINESS ADMINISTRATION

Loans; administrative limits and waivers; comments by 2-22-78 3130; 1-23-78

TREASURY DEPARTMENT

Currency Comptroller—

National banks, suspensions and prohibitions where felony is charged; comments by 2-24-78 3369, 1-25-78

Other real estate owned; proposed revision to interpretive ruling; comments by 2-21-78 2881; 1-20-78

Customs Service—

Drawback rates; expiration 15 years after issuance or approval unless renewed by rate holder; comments by 2-23-78 3286; 1-24-78

Internal Revenue Service—

Group-term life insurance; comments by 2-21-78 976; 1-5-78

VETERANS ADMINISTRATION

Veterans benefits, character of discharge; comments by 2-21-78 2737; 1-19-78

Title 3—The President

Memorandum of February 10, 1978

Determination Under Section 202(a) of the Trade Act; Bolts, Nuts and Large Screws of Iron or Steel

Memorandum for the Special Representative for Trade Negotiations

THE WHITE HOUSE,
Washington, February 10, 1978.

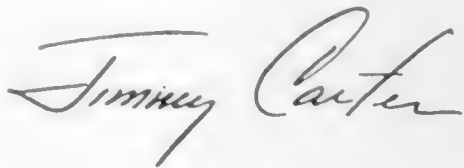

Pursuant to section 202(b)(1) of the Trade Act of 1974 (P. L. 93-618, 88 Stat. 1978), I have determined the action I will take with respect to the report of the United States International Trade Commission (USITC), transmitted to me on December 12, 1977, concerning the results of its investigation of a petition for import relief filed by the United States Fastener Manufacturing Group, the United Steel Workers of America, and the International Association of Machinists and Aerospace Workers on behalf of the domestic industry producing iron or steel lag screws or bolts, bolts (except mine-roof bolts) and bolts and their nuts imported in the same shipment, nuts, and screws having shanks or threads over 0.24 inch in diameter, provided for in items 646.49, 646.54, 646.56, and 646.63 of the Tariff Schedules of the United States.

After considering all relevant aspects of the case, including those set forth in section 202(c) of the Trade Act of 1974, I have determined that provision of import relief is not in the national economic interest for the following reasons:

1. The USITC reported that domestic producers' shipments and exports had increased in 1976 and the first half of 1977. It also indicated that domestic producers' rates of return on sales were above the corresponding ratios for producers of all fabricated metal products and for all manufacturing corporations. Furthermore, domestic producers or their wholly owned subsidiaries imported or purchased 20-25 percent of total 1976 shipments of imported fasteners in the United States. The domestic industry, particularly firms specializing in the production of automotive fasteners, has and should continue to benefit from increased U.S. consumption of fasteners.
2. Provision of import relief would have significantly increased costs of fasteners for U.S. manufacturers who use fasteners to produce cars, machinery, equipment, and construction items. The inflationary impact of providing relief could cause unemployment in other U.S. industries, offsetting gains in fastener employment if import relief had been imposed.
3. The Department of Labor has stated that reemployment prospects for unemployed fastener workers are fair since many of these workers are located in areas with unemployment rates below the national average.
4. Provision of import relief would subject U.S. jobs in other industries to possible foreign retaliation against U.S. exports or compensation by the United States by lessening U.S. import restrictions on other products.
5. Import relief would adversely affect U.S. international economic interests, particularly in light of U.S. efforts to reduce trade barriers in the multilateral trade negotiations.

6. The appreciation of the yen during 1977 will alleviate competitive pressures from Japanese fastener exports to the United States. Imports from Japan have comprised about three-fourths of total U.S. fastener imports in recent years.

In conjunction with my decision not to provide import relief on fasteners, I have directed the Secretary of the Treasury to initiate an expedited national security investigation under Section 232 of the Trade Expansion Act of 1962, of U.S. imports of bolts, nuts, and large screws. I am taking this action in light of a staff study by the Federal Preparedness Agency which indicated that domestic fastener production capability was inadequate to satisfy U.S. requirements in a national emergency. This investigation will permit assessment of U.S. national security interests as they relate specifically to bolts, nuts, and large screws; I will consider whether to take action relating to imports of these products following completion of the national security investigation.

[FR Doc. 78-4314 Filed 2-13-78; 3:41 pm]

EDITORIAL NOTE: The President's letters to the Speaker of the House and the President of the Senate and to the Secretary of the Treasury, dated February 10, 1978, on the American bolt, nut, and large screw industry, are printed in the Weekly Compilation of Presidential Documents (vol. 14, no. 6).

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 12—Banks and Banking

CHAPTER VII—NATIONAL CREDIT UNION ADMINISTRATION

PART 701—ORGANIZATION AND OPERATION OF FEDERAL CREDIT UNIONS

Surety Bond Coverage

AGENCY: National Credit Union Administration.

ACTION: Final rule.

SUMMARY: This document amends the regulations with respect to surety bond coverage for Federal Credit Unions. This amendment removes "securities," "promissory notes," and "mortgages" from coverage under these regulations. Because of information received subsequent to a November 4, 1977, amendment, which incorporated these terms in the regulations in § 701.20(e)(1) (i) and (ii), the NCUA has determined that the inclusion of these terms in the regulations is unnecessarily burdensome and outweighs any corresponding diminution in risk of loss of Federal credit unions with such security coverage.

EFFECTIVE DATE: Effective February 18, 1978.

FOR FURTHER INFORMATION CONTACT:

Steven R. Bisker, Office of General Counsel, National Credit Union Administration, 2025 M Street NW., Washington, D.C. 20456, telephone 202-632-4870.

SUPPLEMENTARY INFORMATION: These amendments are being issued without public participation under the authority of 5 U.S.C. 553(b)(3)(B) and without a delayed effective date under the authority of 5 U.S.C. 553(d) since they merely remove a requirement without appreciably increasing the risk to credit unions of a loss of property. Further, inasmuch as the amendment noted in 42 FR 57625 become effective on December 5, 1977, it is necessary to have these amendments become effective immediately in order to nullify its effect.

Paragraph (e)(1)(i) is amended, by deleting the word "securities." Paragraph (e)(1)(ii) is amended by deleting the words "promissory notes, mort-

gages, securities." Paragraph (e)(3) is amended by deleting the last sentence defining the word "securities."

Accordingly, the Administrator hereby amends paragraphs (e)(1)(i), (e)(1)(ii), and (e)(3) of § 701.20 of the National Credit Union Administration Rules and Regulations to read as set out below.

LAWRENCE CONNELL,
Administrator.

FEBRUARY 8, 1978.

(Sec. 120, 73 Stat. 635 (12 U.S.C. 1766); sec. 209, 84 Stat. 1104 (12 U.S.C. 1789).)

Section 701.20(e) of the regulations involving surety bond coverage is amended to read:

§ 701.20 Surety bond coverage for Federal credit unions.

• • • • •

(e)(1) Where any of the following amounts exceed a Federal credit union's minimum limits as specified in paragraph (f) of this section, the minimum limits of that Federal credit union shall be increased to be equal to the greater of the following amounts:

(i) The aggregate amount of the daily cash fund (change fund plus maximum anticipated daily receipts) and food stamps (if any), on the Federal credit union's premises, or

(ii) The aggregate amount of the Federal credit union's money and food stamps (if any), placed in transit in any one individual shipment.

(2) Such increased limits must be obtained no more than 30 days after the discovery of the need for such increase.

(3) For the purposes of this section, the term "money" shall include currency, coin, banknotes, Federal Reserve notes, revenue stamps, and postage stamps.

(4) Subsection (1) notwithstanding, no increase in coverage shall be required where a Federal credit union temporarily increases its cash fund because of an extraordinary event which cannot reasonably be expected to recur. The Administrator shall determine whether this subsection applies to a given situation. A Federal credit union that wants to rely on this subsection must petition the Administrator, within 30 days of the discovery of facts that would otherwise require an increase in coverage, for a determina-

tion as to whether this subsection is applicable.

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

(Rev. 9, Amdt. 12)

PART 123—DISASTER LOANS

Clarification of Eligibility for Economic Injury and Regulatory Compliance Loans, Changes in Interest Rates, and Additional Loans for Insulation Costs

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: This amendment clarifies what types of small business concerns are eligible to apply for substantial economic injury disaster loans; expands eligibility for displaced business economic injury loans to small concerns in areas affected by certain State or local government projects; authorizes economic injury disaster loans in disaster areas pursuant to the certification by a State Governor; conforms eligibility for regulatory loans to the provisions of Pub. L. 95-89, 91 Stat. 553, et. seq. approved August 4, 1977; incorporates the interest and repayment provisions for physical and related economic injury loans established by Pub. L. 95-89, and allows an increase in certain physical disaster loans to cover insulation costs. It also eliminates the requirement that a certification of use of proceeds be filed, and substitutes a requirement that evidence of use of proceeds be retained for three years.

EFFECTIVE DATE: February 15, 1978.

ADDRESS: Associate Administrator for Finance and Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT:

Richard L. Wray, Financial Analyst, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416, 202-653-6470.

SUPPLEMENTARY INFORMATION: Pub. L. 95-89, 91 Stat. 553, was approved on August 4, 1977. It makes a number of changes in the disaster program. These six amendments reflect the impact of the new law on the program.

Another provision, adding a new subsection 7(b)(9) for economic dislocation assistance, will be the subject of a future announcement of proposed rulemaking.

Previously, small businesses were eligible to apply for economic injury disaster loans, section 7(b)(2), only if the area was covered by a disaster declaration by the President, Administrator of SBA, or Secretary of Agriculture. Section 403 of the law adds a certification by the governor of a state as a basis for eligibility. Minimum criteria for such certification are set forth.

Section 302 of the law amends section 7(b)(5) of the Small Business Act, which contains the regulatory economic injury loan program. Under this program SBA provides assistance to a small business which is required to make structural or operational changes to comply with a Federal law or applicable regulations. Previously it was unclear whether SBA's authority extended to compliance with Federal laws enacted prior to January 2, 1974, the effective date of section 7(b)(5). The amendment clarifies SBA's authority by providing that assistance may be granted regardless of when such law was passed.

Section 402 of the new law extends assistance to small concerns displaced or affected by projects constructed, in whole or in part, by Federal funds to small concerns displaced or affected by the project of a State or local authority with power to invoke the right of eminent domain regarding such project.

Section 405 of the new law establishes a new interest rate schedule for physical disaster loans for disasters occurring after June 30, 1976, and before October 1, 1978. Also, for disasters occurring after March 31, 1977, and before January 1, 1978, the principal amount of a physical disaster loan may be increased by a maximum of \$2,000 for insulation, if the uninsured damage is at least 10 percent of the property's fair market value.

These amendments contain also two clarifications of SBA policy. Presently media enterprises are specifically eligible for physical disaster and regulatory loans and were not expressly made ineligible for economic injury loans. This amendment clarifies the eligibility of small media enterprises to apply for economic injury loans.

Finally, recipients of disaster loans were until now required to file a certification of the use of loan proceeds with supporting evidence. Under the

amendment, such recipients will be required to retain, for SBA inspection, evidence supporting the use of loan proceeds for 3 years, but no longer will have to file a certification.

Since these amendments are either required by statute, or else clarify eligibility, or lessen compliance requirements, they are made immediately effective. Written comments may, however, be submitted to the Associate Administrator for Finance and Investment at the address listed above.

Accordingly, Part 123 of Chapter I, Title 13 of the Code of Federal Regulations is amended as follows:

1. Section 123.1 (General) is amended by adding at the end of paragraph (a) a new subparagraph (3) to read as follows:

§ 123.11 General.

(a) ***

(3) Where no disaster declaration has been issued, the Governor of a State may certify to SBA that, as a result of a disaster as described in paragraph (1) of this subparagraph, at least five small concerns located in that State have suffered economic injury as a direct result of such disaster, are in need of financial assistance, and that such assistance is not otherwise available to them on reasonable terms. Upon acceptance of such certification by SBA, economic injury disaster loans will be available in the same manner as if a physical disaster declaration had been made.

(Sec. 403, Pub. L. 95-89, Stat. 560, (15 U.S.C. 636).)

2. Section 123.2 (a)(4), (b)(1)(iii), (b)(3)(iv) are revised to read as follows:

§ 123.2 Eligibility.

(a) ***

(4) *Substantial economic injury assistance.*—(i) *Disaster area declaration or certification.* An area must be declared to be (A) a major disaster area by the President, (B) a disaster area by the Administrator of SBA, (C) a natural disaster area by the Secretary of Agriculture or his designee, or (D) an area included in a notice of loan eligibility based on a certification by the Governor of a State if such certification has been adopted by SBA. Such notice will be given by local (as distinguished from national) publicity.

(ii) *Location.* An otherwise eligible small business concern must be located in the disaster area as defined by the disaster declaration or certification made pursuant to the preceding paragraph.

(iii) *Types of small business concerns.* Economic injury loans are limited to businesses which qualify as small under the size standards established in Part 121 of this chapter. Business ac-

tivities are eligible or not, as stated in paragraph (b)(1)(iii) of this section.

(b) Displaced business, regulatory, strategic arms, base closing, emergency energy shortage, water pollution control, air pollution control and other economic injury loans.

(1) *General scope of assistance.*—(i) *Limitations on assistance.* ***

(ii) [Reserved]

(iii) *Types of small business concerns.* Religious, eleemosynary, cooperative and nonprofit organizations are not eligible for economic injury assistance, except that a cooperative, including a farm cooperative meeting the requirements of § 122.9 of this chapter is eligible. A consumer or marketing cooperative is not eligible for economic injury assistance. Gambling activities, financing and speculative activities are not eligible for economic injury assistance. The foregoing are eligible only for physical-loss disaster assistance. Small newspapers, radio and TV stations, and similar enterprises engaged in the creation or dissemination of ideas are eligible to apply for economic injury assistance. Pawn shops are eligible to apply if more than 50 percent of income for the previous year resulted from the sale of used merchandise rather than interest on loans. Persons or firms holding realty for lease or rent for the production of income, and all real estate developers, are not small business concerns for purposes of economic injury assistance except that such persons or firms are eligible to apply for assistance under the Strategic Arms or Base Closing Economic Injury Assistance Programs. Multilevel sales distribution plans of the "pyramid" type are not eligible for economic injury assistance.

(iv) ***

(2) ***

(3) *Special Considerations—Regulatory Economic Injury Assistance.* To qualify for a regulatory economic assistance loan, an applicant must be a small concern seeking to comply with standards imposed by Federal law or regulation, or State or local requirements imposed in conformity with Federal law or regulation. The date of enactment of the law under which such regulations or requirements are imposed does not determine the eligibility for assistance under this paragraph. Applicants for such loans must furnish evidence of the requirements of the law or regulation with which they seek to comply and such other documentation as SBA may require. The following special considerations apply to various types of regulatory economic assistance loans.

(i) ***

(ii) ***

(iii) ***

(iv) *Air pollution loans.* Compliance with regulations issued pursuant to the Clean Air Act of 1970 creates eligibility to apply for this type of economic injury loan.

(Sec. 302, Pub. L. 95-89, 91 Stat. 558, (15 U.S.C. 636).)

3. Section 123.3(c)(1) is amended to read as follows:

§ 123.3 Purposes of loans.

(c) *Displaced business assistance.* (1) The purpose of these loans is to assist any small business concern in continuing in business at its existing location, in reestablishing its business, in purchasing a business or in establishing a new business, if the Administration determines that such concern has suffered substantial economic injury as the result of its displacement by, or location in, adjacent to, or near, a program or project constructed by or with funds provided in whole or in part by the Federal Government. Such assistance may also be granted if such injury is caused by a program or project undertaken by a State or local government or public service entity which has the authority to exercise the right of eminent domain on such program or project.

(Sec. 402, Pub. L. 95-89, 91 Stat. 559, (15 U.S.C. 636).)

4. Section 123.5 is amended as follows:

Paragraph (a) is amended by adding to the end of the lead-in paragraph; and paragraph (c) is amended by adding a new subparagraph (2) to read as follows:

§ 123.5 Amount of loan and interest rates.

(a) The amount of any disaster loan shall not exceed the actual physical loss or economic injury suffered as a result of a disaster except as may be permitted under § 123.3(a) (2) and (3), (c) through (i). In loans made to repair or replace physical loss due to a disaster which occurred on or after April 1, 1977, but prior to January 1, 1978, the amount of the loan may be increased by a maximum of \$2,000 to finance the installation of insulation devices. Such increase is allowed only if the uninsured damaged portion of the property is 10 percent or more of the market value of the property at the time of the disaster. This increase for insulation is in addition to the administrative limit on loans set forth in paragraphs (a) (1) and (2) of this section.

(1)(i) ***

(c) Interest rates on disaster loans are as follows:

(1) ***

(2) On loans made as a result of a physical disaster occurring on or after

[6750-01]

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

SUBCHAPTER A—ORGANIZATION, PROCEDURES AND RULES OF PRACTICE

PART 0—ORGANIZATION

Washington, D.C., Regional Office

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: This rule change eliminates the Washington, D.C., Regional Office. By this action, the Commission hopes to heighten the sensitivity of its headquarters staff to the range of local problems and thereby provide more focused assistance to the people of the metropolitan Washington area.

EFFECTIVE DATE: March 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Isaiah T. Creswell, Director of Federal/State and Consumer Relations, Federal Trade Commission, Washington, D.C. 20580, 202-523-3747.

SUPPLEMENTARY INFORMATION: By press release issued November 30, 1977, the Commission announced that it was absorbing its Washington, D.C., Regional Office into its headquarters and other organizational units. The FTC currently has 11 such offices around the country.

By this action, the Commission hopes to heighten the sensitivity of its headquarters staff to the range of local problems and thereby provide more focused assistance to the people of the metropolitan Washington area. A special headquarters unit is being established for this purpose. It will be directed by Isaiah T. Creswell, FTC's Coordinator of Federal/State and Consumer Relations. Mr. Creswell's staff will channel metropolitan Washington consumer and anticompetition complaints to the appropriate headquarters attorneys.

This action also brings the FTC into closer cost-effective alignment with other Federal agencies, most of which serve the Nation with 10 regional offices.

The other areas currently served by the Washington, D.C., office are distributed in the following way:

Responsibility for Virginia is assumed by the Atlanta Regional Office; The Chicago Regional Office absorbs Kentucky from the Atlanta region; and The Cleveland Regional Office assumes responsibility for the remaining Washington, D.C., territory: West Virginia, Delaware, Maryland (except for the D.C. metropolitan area), and all of Pennsylvania.

Accordingly, paragraph (11) of § 0.18(b) of 16 CFR is deleted.

(15 U.S.C. 46(g) and 5 U.S.C. 552.)

July 1, 1976, and prior to October 1, 1978, the interest rate is:

(i) One percent on the first \$10,000 of a loan to repair or replace a primary residence or personal property; 3 percent on such loan over \$10,000 but not exceeding \$40,000, and at the statutory formula rate on any amount exceeding the repair and replacement costs or \$40,000, whichever is less.

(ii) All loans other than those described in the preceding subdivision (i) of this subparagraph shall bear interest at the rate of 3 percent on the first \$250,000 of such loan and the statutory formula interest rate on amounts in excess of that figure.

(iii) Economic injury loans resulting from a physical disaster bear interest at the rate of 3 percent on the first \$25,000 of such loan and the statutory formula interest rate on amounts in excess of that figure. All other economic injury loans bear interest only at the statutory formula interest rate.

(iv) All repayments of principal on the administration's share of any loan made under the above provisions shall first be applied to reduce the principal of such loan which bears interest at the lowest rate.

(Secs. 403 and 405, Pub. L. 95-89, 91 Stat. 560-61, (15 U.S.C. 636).)

6. Section 123.17 is revised by changing the caption and dividing it into paragraphs (a) and (b), to read as follows:

§ 123.17 Evidence of use of proceeds and penalty for misuse.

(a) Recipients of SBA disaster loans resulting from a physical disaster, economic injury, or product disaster as described in §§ 123.1(a), (b) (1) and (3) are required to retain evidence that the loan proceeds were used for the purposes authorized, for a period of three (3) years after final disbursement of the loan. Such evidence shall be made available to SBA personnel or other authorized government personnel upon demand.

(b) Any disaster loan recipient who wrongfully misapplies such loan proceeds shall be civilly liable to the SBA Administrator in an amount equal to one and one-half times the original principal amount of the loan.

(Catalog of Federal Domestic Assistance Program Nos. 59.002, 59.008, 59.010, 59.014, 59.017, 59.018, 59.020, 59.022-25.)

Dated: February 6, 1978.

A. VERNON WEAVER,
Administrator.

(FR Doc. 78-4146 Filed 2-14-78; 8:45 am)

a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community of from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Middle River Canal (C-13)	Florida Turnpike	8
Plantation Canal (C-12)	Inverrary Dr.	8
Middle River Canal tributary	U.S. Highway 441	7
	Florida Turnpike	7
	Northwest 31st St	8
	U.S. Highway 441	8

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: December 27, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[4210-01]

[Docket No. FI-3538]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATIONS AND JUDICIAL REVIEW

Final Flood Elevation Determinations for Clayton County, Ga.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in Clayton County, Ga. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for Clayton County, Ga.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for Clayton County, are available for review at Clayton County

Courthouse, McDonough Street, Jonesboro, Ga.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for Clayton County, Ga.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Hurricane Creek	Turner Rd.	782
	New Hope Rd.	800

[Docket No. FI-3493]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATIONS AND JUDICIAL REVIEW

Final Flood Elevation Determinations for City of Ringgold, Catoosa County, Ga.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the City of Ringgold, Catoosa County, Ga.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the city of Ringgold, Ga.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the city of Ringgold, are

available for review at City Hall, 301 Mountain Street, Ringgold, Ga.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the city of Ringgold, Ga.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
South Chickamauga Creek	Georgia Highway 2	761
	Georgia Highway 151	760
	U.S. Highways 41 and 76	756

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: December 28, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

	Florida Ave. North.	874
	Douglas Dr.....	870
	34th Ave. North ..	867
	Brunswick Ave. North.	856
	32d Ave. North	848
	29th Ave. North ..	847
Bassett Creek	South corporate limit.	848
	East corporate limit.	847

RULES AND REGULATIONS

[4210-01]

[Docket No. FI-3422]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATIONS AND JUDICIAL REVIEW

Final Flood Elevation Determinations for Nash County, N.C.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in Nash County, N.C. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for Nash County, N.C.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for Nash County, are available for review at Nash County Courthouse, Main Street, Nashville, N.C.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for Nash County, North Carolina.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in

flood-prone areas in accordance with 24 CFR Part 1910.

[Docket No. FI-3152]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATIONS AND JUDICIAL REVIEW

Final Flood Elevation Determinations for City of New Bern, Craven County, N.C.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the City of New Bern, Craven County, N.C. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the City of New Bern, N.C.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of New Bern, are available for review at City Hall, New Bern, N.C.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the City of New Bern, N.C.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Neuse River	Atlantic and East Carolina RR, east of South Glenburnie Rd. Broad St., east of U.S. 70-U.S. 17 Junction.	12
	Pembroke Rd., northeast of extraterritorial limits.	12

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: December 28, 1977.

(Docket No. FI-3244)

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for City of La Villa, Hidalgo County, Tex.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the City of La Villa, Hidalgo County, Tex. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the City of La Villa, Hidalgo County, Tex.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of La Villa, Hidalgo County, Tex., are available for review at City Hall, La Villa, Tex.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the City of La Villa, Hidalgo County, Tex.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Shallow flooding...	Intersection of Parker and George Sts.	57
	Intersection of Lackland and Lull Sts.	57
	Intersection of East Ave. and Parker St.	58
	Center St. (between Branch St. and Yarbrough Ave.).	58

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: December 28, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the Village of Glenwood, Cook County, Ill. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM), showing base (100-year) flood elevations, for the Village of Glenwood, Cook County, Ill.

RULES AND REGULATIONS

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Village of Glenwood, Cook County, Ill., are available for review at the lobby of the Village Hall, 13 South Rebecca Street, Glenwood, Ill.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of his final determinations of flood elevations for the Village of Glenwood, Cook County, Ill.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Thorn Creek	Chessie System RR Bridge	614
	Chicago Heights-Glenwood Rd	615
	Chessie System Corporate limits (upstream)	615
	Chessie System Corporate limits (downstream)	616
Butterfield Creek	Chicago Heights-Glenwood Rd	615
	Confluence of Gay Stream	616
	Halsted St	618
Deer Creek	C&E L&N RR Bridge downstream	618
	C&E L&N RR Bridge upstream	620
	Young St.	620

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance

Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: December 28, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER A—INCOME TAX

[T.D. 7533]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

SUBCHAPTER F—PROCEDURE AND ADMINISTRATION

PART 301—PROCEDURE AND ADMINISTRATION

DISC Rules on Procedure and Administration; Rules on Export Trade Corporations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document provides final regulations relating to domestic international sales corporation (DISC) rules on procedure and administration and rules relating to export trade corporations. Changes to the applicable tax law were made by the Revenue Act of 1971. These regulations provide necessary guidance to DISC and export trade corporations for compliance with the law.

EFFECTIVE DATE: In general, the regulations are effective for taxable years ending after December 31, 1971.

FOR FURTHER INFORMATION CONTACT:

David B. Cubeta of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 (Attention CC:LR:T) (202-566-3926).

SUPPLEMENTARY INFORMATION:

BACKGROUND

On Thursday, September 16, 1976, the FEDERAL REGISTER published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under sections 971, 6011, 6071, 6072, and 6081 of the Internal Revenue Code of 1954 and to the regulations on Procedure and Administration (26 CFR Part 301) under sections 6011, 6072, 6501, and 6686 of the Internal Revenue Code of 1954, 41 FR 39762. The amendments were proposed to conform the regulations to sections 504 and 505(c) of the Revenue Act of 1971 (85 Stat. 550). No public comments were received regard-

ing the proposed amendments. Those amendments are adopted by this Treasury decision except that this Treasury decision: (1) deletes from the proposed amendments the statutory provisions whose corresponding Code sections were amended (e.g. Code section 971(a) was amended, § 1.971 was deleted); (2) revises references to Code section 6011(c)(2) in the proposed amendments in three places to read as 6011(c)(2) (these changes are made to conform to amendments made to the Internal Revenue Code of 1954 by 1904(b)(10)(A)(ii) of the Tax Reform Act of 1976 (90 Stat. 1817)); and (3) corrects a cross reference.

QUALIFYING AS AN EXPORT TRADE CORPORATION

Section 505(c) of the Revenue Act of 1971 amends section 971(a) to provide that a controlled foreign corporation may not qualify as an export trade corporation for a taxable year beginning after October 31, 1971, unless it so qualified for a taxable year beginning before such date and the corporation continues to qualify. Section 1.971-1(a)(1) is amended to reflect this rule.

FILING REQUIREMENTS FOR DISC'S

Section 504 of the Revenue Act of 1971 amends sections 6011, 6072, and 6501, and adds a new section 6686. Section 6011 is amended to require a DISC or former DISC to furnish such information to its shareholders and to the Secretary or his delegate and to keep such records as may be required by regulations. Also, a DISC is required to file such return for its taxable year as may be required by forms or regulations. A new § 1.6011-2 is added to provide that a DISC must maintain the records prescribed pursuant to section 6001 and must furnish to each of its shareholders a copy of Schedule K (Form 1120-DISC) disclosing the amount of distributions to such shareholder for the taxable year. Section 1.6011-2 also requires that a DISC or former DISC file a return on Form 1120-DISC, which return is an income tax return.

Section 6072 is amended to require that a return of a DISC be filed on or before the 15th day of the 9th month following the close of its taxable year. Section 1.6072-2 is amended to reflect this rule. In addition, §§ 1.6071-1, 1.6081-1, and 1.6081-3 are amended to provide that a DISC shall not be allowed an extension of time for filing of its return.

Section 6501 is amended to provide that a corporation which determines in good faith that it is a DISC and files a return as such will have such return deemed to be the return of a corporation which is not a DISC if such corporation is later held not to be a DISC during the taxable year for

RULES AND REGULATIONS

such year. Section 301.65-1(g)-1 is amended to reflect this rule.

New section 6686 sets forth penalties for failure to file a DISC return or to supply information not excused by reasonable cause. Section 301.6686-1 elaborates upon these penalties.

DRAFTING INFORMATION

The principal author of this regulation was Marcus B. Blumkin of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

ADOPTION OF AMENDMENTS TO THE REGULATIONS

Accordingly, the proposed amendments are adopted with changes as set forth below:

Paragraph 1. Paragraph 1 of the proposed amendments is revised to read as follows: "Section 1.971 is deleted."

Par. 2. Paragraph 3 of the proposed amendments is revised to read as follows: "Section 1.6011 is deleted."

Par. 3. Paragraph 6 of the proposed amendments is revised to read as follows: "Section 1.6072 is deleted."

Par. 4. Paragraph 7 of the proposed amendments is revised by changing "6011(e)(2)" to "6011(c)(2)" and by changing "\$1.6081-3(a)" to "\$1.6081-3(e)" in paragraph (e) of § 1.6072-2.

Par. 5. Paragraph 9 of the proposed amendments is revised by changing "6011(e)(2)" in paragraph (e) of § 1.6081-3 to "6011(c)(2)".

Par. 6. Paragraph 10 of the proposed amendments is revised to read as follows: "Section 301.6011 is deleted."

Par. 7. Paragraph 11 of the proposed amendments is revised to read as follows: "Section 301.6072 is deleted."

Par. 8. Paragraph 12 of the proposed amendments is revised to read as follows: "Section 301.6501(g) is deleted."

Par. 9. Paragraph 13 of the proposed amendments is revised by changing "6011(e)(2)" in paragraph (c) of § 301.6501(g)-1 to "6011(c)(2)".

Par. 10. Paragraph 14 of the proposed amendments is revised by—

(a) Revising the instructional paragraph to read as follows: "Par. 14. New § 301.6686-1 is added immediately after 301.6685-1. This added provision reads as follows:";

(b) Deleting § 301.6686; and by

(c) Changing "6011 (e)" in paragraphs (a) and (b) of § 301.6686-1 to "6011(c)."

This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue

Code of 1954 (68A Stat. 917, 26 U.S.C. 7805).

WILLIAM E. WILLIAMS,
Acting Commissioner of
Internal Revenue.

Approved: January 27, 1978.

DONALD C. LUBICK,
Acting Assistant Secretary
of the Treasury.

Paragraph 1. Section 1.971 is deleted.

§ 1.971 [Deleted]

Par. 2. Section 1.971-1(a)(1) is revised by adding the following material to the end thereof:

§ 1.971-1 Definitions with respect to export trade corporations.

(a) *Export trade corporations*—(1) In general. * * * However, no controlled foreign corporation may qualify as an export trade corporation for any taxable year beginning after October 31, 1971, unless it qualified as an export trade corporation for any taxable year beginning before such date. In addition, if a corporation fails to qualify as an export trade corporation for a period of any 3 consecutive taxable years beginning after October 31, 1971, then for any taxable year beginning after such 3 year period, such corporation shall not be included within the term "export trade corporation".

PAR. 3. Section 1.6011 is deleted.

§ 1.6011 [Deleted]

PAR. 4. A new § 1.6011-2 is added immediately after § 1.6011-1. This added provision reads as follows:

§ 1.6011-2 Returns, etc., of DISC's and former DISC's.

(a) *Records and information*. Every DISC and former DISC (as defined in section 992 (a)) must comply with section 6001 and the regulations thereunder, relating to required records, statements, and special returns. Thus, for example, a DISC is required to maintain the books of account or records described in § 1.6001-1(a). In addition, every DISC must furnish to each of its shareholders on or before the last day of the second month following the close of the taxable year of the DISC a copy of Schedule K (Form 1120-DISC) disclosing the amounts of actual distributions and deemed distributions from the DISC to such shareholder for the taxable year of the DISC. In the case of a deficiency distribution to meet qualification requirements, see § 1.992-3(a)(4) for requirements that distribution be designated in the form of a communication sent to a shareholder and service center at the time of distribution.

(b) *Returns*—(1) *Requirement of return*. Every DISC (as defined in sec-

tion 992 (a) (1)) shall make a return of income. A former DISC (as defined in section 992 (a) (3)) shall also make a return of income in addition to any other return required. The return required of a DISC or former DISC under this section shall be made on Form 1120-DISC. The provisions of § 1.6011-1 shall apply with respect to a DISC and former DISC. A former DISC should indicate clearly on Form 1120-DISC that it is making a return of income as a former DISC (for example, by labeling at the top of the Form 1120-DISC "Former DISC"). In the case of a former DISC, those items on the form which pertain to the computation of taxable income shall not be completed, but Schedules J, K, L, and M must be completed. Except as otherwise specifically provided in the Code or regulations, the return of a DISC or former DISC is considered to be an income tax return.

(2) *Existence of DISC.* A corporation which is a DISC and which is in existence during any portion of a taxable year is required to make a return for that fractional part of its taxable year during which it was in existence.

PAR. 5. Section 1.6071-1(b) is revised to read as follows:

§ 1.6071-1 Time for filing returns and other documents.

(b) *Return for a short period.* In the case of a return with respect to tax under subtitle A of the Code for a short period (as defined in section 443), the district director or director of the Internal Revenue Service Center may, upon a showing by the taxpayer of unusual circumstances, prescribe a time for filing the return for such period later than the time when such return would otherwise be due. However, the district director or director of the Internal Revenue Service Center may not extend the time when the return for a DISC (as defined in section 992(a)(1)) must be filed, as specified in section 6072(b).

PAR. 6. Section 1.6072 is deleted.

§ 1.6072 [Deleted]

PAR. 7. Section 1.6072-2 is revised by redesignating paragraph (e) as paragraph (f) and by adding a new paragraph (e). This added provision reads as follows:

§ 1.6072-2 Time for filing returns of corporations.

(e) *DISC's and former DISC's.* The return required under section 6011(c)(2) of a corporation which is a DISC (as defined in section 992(a)

shall be filed on or before the 15th day of the 9th month following the close of the taxable year. For the rule that a DISC may not have an extension of time in which to file such return, see §§ 1.6071-1(b), 1.6081-1(a), and 1.6081-3(e). The return required under § 1.6011-2(b)(1) by a former DISC shall be filed at the time it is required to file its income tax return.

PAR. 8. Section 1.6081-1(a) is amended by revising the second sentence thereof to read as follows:

§ 1.6081-1 Extension of time for filing returns.

(a) *In general.* . . . However, other than in the case of taxpayers who are abroad, such extensions of time shall not be granted for more than 6 months, and an extension of time for the filing of a return of a DISC (as defined in section 992(a)), as specified in section 6072(b), shall not be granted.

PAR. 9. Section 1.6081-3 is amended by adding a new paragraph (e) immediately after paragraph (d) to read as follows:

§ 1.6081-3 Automatic extension of time for filing corporation income tax returns.

(e) Paragraphs (a) through (d) of this section shall not apply to returns filed by a DISC pursuant to section 6011(c)(2).

PROCEDURE AND ADMINISTRATION REGULATIONS

PAR. 10. Section 301.6011 is deleted.

§ 301.6011 [Deleted]

PAR. 11. Section 301.6072 is deleted.

§ 301.6072 [Deleted]

PAR. 12. Section 301.6501(g) is deleted.

§ 301.6501 [Deleted]

PAR. 13. Section 301.6501(g)-1 is revised by adding a new paragraph (c). This added provision reads as follows:

§ 301.6501(g)-1 Certain income tax returns of corporations.

(c) *DISC.* If a corporation determines in good faith that it is a DISC (as defined in section 992(a)(1)) for a taxable year and files a return as such pursuant to section 6011(c)(2), and if the corporation is thereafter held to be a corporation which is not a DISC for the taxable year for which the return was filed, then—

(1) Such return shall be deemed to be the return of the corporation for the purpose of section 6501.

(2) Such return if filed within the time required by section 6072(b) for filing a DISC return shall be deemed to be filed within the time required by section 6072(b) for filing of a return by a corporation which is not a DISC, and

(3) Interest on underpayment and overpayments allowed by chapter 67 of the Code and additions to the tax, additional amounts and assessable penalties allowed by Chapter 68 of the Code, when determined by reference to the time for filing of a return, shall be determined by reference to the time required by section 6072(b) for filing of a return by a DISC.

PAR. 14. New section § 301.6686-1 is added immediately after § 301.6685-1. This added provision reads as follows:

§ 301.6686-1 Failure of DISC to file returns.

(a) *In general.* In addition to the penalty imposed by section 7203 (relating to willful failure to file a return, supply information, or pay tax) any person who is required to supply information or to file a return under section 6011(c) (relating to records and returns of DISC's) and who fails to supply such information or file such return at the time prescribed in sections 6072(b) and 1.6072-2(c) shall pay a penalty of \$100 for each failure to supply information (provided that the total amount imposed on the delinquent person for all such failures during a calendar year shall not exceed \$25,000) and a penalty of \$1,000 with respect to each failure to file a return, unless it is shown that such failure is due to a reasonable cause.

(b) *Showing of reasonable cause.* The penalty imposed by section 6686 shall not apply to any person with respect to a failure to supply information, or to file a return, under section 6011(c) if it is established to the satisfaction of the district director or director of the Internal Revenue Service Center that such failure was due to reasonable cause. An affirmative showing of reasonable cause must be made in the form of a written statement, which contains a declaration by such person that the statement is made under the penalties of perjury, and sets forth all the facts alleged as reasonable cause.

Title 42—Public Health

CHAPTER IV—HEALTH CARE FINANCING ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

MEDICARE PROGRAM; MEDICAL ASSISTANCE PROGRAM

Designation of Section Numbers; Correction of Agency Title and Cross References

AGENCY: Health Care Financing Administration, HEW.

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule regarding amendments that were made to the regulations governing the medicare program (Title XVIII, Social Security Act) and the medical assistance program (Title XIX, Social Security Act). These amendments were published at 42 FR 65112 on December 29, 1977.

FOR FURTHER INFORMATION CONTACT:

Margaret O. Schnoor, 202-245-1960.

In FR Doc. 77-36997 appearing at pages 65113-65122 in the FEDERAL REGISTER of Thursday, December 29, 1977 (Part V of that issue), the following corrections are made.

1. On page 65113, the amendatory language "42 CFR Chapter IV, Parts 405, 445, 452, and 460 through 480 are revised as follows:" should read "42 CFR Chapter IV, Parts 405, 445 through 452 and 460 through 480 are revised as follows:".

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

2. On page 65114, under item i, "\$ 405.903(c)" should read "\$ 405.904(c)".

3. On page 65114, item 5 which reads "In the following 'Bureau of Health Insurance' is change to 'Medicaid Bureau:'" should read "In the following 'Bureau of Health Insurance' is changed to 'Medicare Bureau:'".

4. On page 65114, under item 8, "Actuary" should read "Actuarial".

PART 448—COVERAGE AND CONDITIONS OF ELIGIBILITY FOR MEDICAL ASSISTANCE

5. On page 65116, under item 12 (first column, second entry), "\$ 448.1(a)(1)(ii); (b)(2) (ii) and (iii); and (c) (i) and (ii)" should read "\$ 448.1(a)(1)(ii); (b)(2) (ii) and (iii); and (c) (1) and (2)".

PART 449—SERVICES AND PAYMENT IN MEDICAL ASSISTANCE PROGRAMS

6. On page 65117, under item 13 (10th item under fourth column) "\$ 449.33 (a)(8)(i) and (l) (A) and (B);

and" is deleted. The regulation section cited has been revoked.

PART 450—ADMINISTRATION OF MEDICAL ASSISTANCE PROGRAMS

7. On page 65120, item 33 is deleted. Section 450.25 has already been amended to reflect the abolishment of the Social and Rehabilitation Service.

8. On page 65120, under item 26, "\$ 450.90(a)(1)(ii)(B)" should read "\$ 450.90(b)(1)(ii)(B)".

Dated: February 3, 1978.

L. DAVID TAYLOR,
Acting Deputy Assistant Secretary for Management Analysis and Systems.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 21208; RM-2766]

PART 73—RADIO BROADCAST SERVICES

Television Broadcast Stations in Bloomington, Highland, and Kieler, Wis.; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: This action assigns UHF-TV channels to three communities in southwest Wisconsin for high power noncommercial educational translator use to carry programming of the Wisconsin educational television network.

EFFECTIVE DATE: March 23, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mark N. Lipp, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION: In the matter of amendment of § 73.606(b), Table of assignments, television broadcast stations, (Bloomington, Highland, and Kieler, Wis.), Docket No. 21208; RM-2766. *Report and order.*

Adopted: February 7, 1978.

Released: February 9, 1978.

By the Chief, Broadcast Bureau:

1. The Commission has under consideration the Notice of Proposed Rule Making, adopted April 15, 1977, 42 FR 21631, proposing the assignments of Television Channels "49" to Bloomington, Wis., "51 to Highland, Wis., and "46 to Kieler, Wis., each to be reserved for noncommercial educational use.

Petitioner originally requested Channel "38 for assignment to Bloomington. However, that is no longer possible since the chan-

nel was assigned to Fort Madison, Iowa, Docket No. 20878, adopted September 6, 1977. However, petitioner has stated it has no objection to the assignment of Channel "49 to Bloomington instead.

Petitioner operates Station WPNE (Channel "38) Green Bay; Station WHWC-TV (Channel "28), Menomonie; Station WHLA-TV (Channel "31), La Crosse; Station WHRM-TV (Channel "20), Wausau; and is permittee of Station WLEP-TV (Channel "36), Park Falls; with network affiliates WHA-TV (Channel "21) in Madison, and WMVS (Channel "10) in Milwaukee.

High powered UHF translator stations may operate only on assigned channels. See Sections 74.702(g) and 74.735(e) of the Commission's Rules.

2. The Notice indicated that the proposal was designed to extend petitioner's statewide service by utilizing high-powered translators on the requested channels to bring Wisconsin ETV network service to an area now lacking it. Petitioner states in its comments that it will apply for the proposed channels if assigned and construct promptly if authorized to do so.

3. Pertinent data regarding the three communities were adequately set forth in the Notice and will not be repeated here.

4. The Commission finds that the public interest would be served by adoption of the proposal. The use of the three channels in the southwest portion of the state will extend the statewide educational network service which now serves over 97 percent of the State's population (including service to be provided from the proposed Park Falls station) to an additional 25,000 persons. All applicable mileage separation requirements can be met.

5. Accordingly, it is ordered, That the Television Table of Assignments, § 73.606(b) of the Commission's Rules, is amended to read as follows for the communities listed below effective March 23, 1978.

City and channel No.

Bloomington, Wis., "49.
Highland, Wis., "51.
Kieler, Wis., "46+.

6. Authority for the action taken herein is contained in Sections 4(i), 5(d)(1), 303 (g) and (r) of the Communications Act of 1934, as amended, and Section 0.281 of the Commission's Rules.

7. It is further ordered, That this proceeding is terminated.

nel was assigned to Fort Madison, Iowa, Docket No. 20878, adopted September 6, 1977. However, petitioner has stated it has no objection to the assignment of Channel "49 to Bloomington instead.

Petitioner operates Station WPNE (Channel "38) Green Bay; Station WHWC-TV (Channel "28), Menomonie; Station WHLA-TV (Channel "31), La Crosse; Station WHRM-TV (Channel "20), Wausau; and is permittee of Station WLEP-TV (Channel "36), Park Falls; with network affiliates WHA-TV (Channel "21) in Madison, and WMVS (Channel "10) in Milwaukee.

High powered UHF translator stations may operate only on assigned channels. See Sections 74.702(g) and 74.735(e) of the Commission's Rules.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; 47 U.S.C. 154, 155, 303.)

FEDERAL COMMUNICATIONS
COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[FR Doc. 78-4140 Filed 2-14-78; 8:45 am]

[6712-01]

[Docket No. 21355; RM-2834]

PART 73—RADIO BROADCAST SERVICES

**FM Broadcast Station in Cape Charles, Va.;
Changes Made in Table of Assignments**

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: This action assigns Channel 241 to Cape Charles, Virginia, (pop. 1,689), as its first FM channel assignment. Although Class B channels are normally assigned only to larger communities, the Commission has found it beneficial to provide such wide-area coverage service to this area of Virginia, since there are few population centers to which Class A channels could be assigned.

EFFECTIVE DATE: March 22, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mark N. Lipp, Broadcast Bureau,
202-632-7792.

SUPPLEMENTARY INFORMATION: In the matter of amendment of §73.202(b), Table of Assignments, FM Broadcast Stations, (Cape Charles, Va.) Docket No. 21355 RM-2834.

Report and order (Proceeding Terminated).

Adopted: February 3, 1978.

Released: February 9, 1978.

By the Chief, Broadcast Bureau:

1. The Commission has before it the Notice of Proposed Rule Making, 42 FR 41304, released August 10, 1977, proposing to assign Channel 241 to Cape Charles, Va., as its first FM channel assignment. Petitioner, J. Grayson Duer, has filed comments and reply comments. Opposing comments were submitted by Parker-Rew Enterprises ("Parker-Rew"), licensee of AM Station WEXM, Jamesville, Va., and FM Station WEXM-FM, Exmore, Virginia. A letter in opposition was sent by Edward A. Parry, a local merchant.

2. The Notice proposed to assign Channel 241 to Cape Charles (pop. 1,689) as its first FM assignment. The

¹All population data are taken from the 1970 U.S. Census, unless otherwise indicated.

Notice indicated that the proposal would conform to all mileage separation requirements and that the only community without local service precluded by the proposed assignment would have another FM channel available for assignment. It was noted by petitioner that a Class B station could provide a second aural service to an area of 62 square kilometers (24 square miles) with 1,374 persons if the station operated with facilities of 30 kW at 91 meters (300 feet) HAAT.

3. Parker-Rew argues against an exception to the Commission's policy of assigning Class B or Class C channels only to larger communities. This, it says, is warranted only where a substantial first and second FM service would be provided. In this case it insists that the proposed amount of such service, if correct, is insubstantial and that the area in question appears to be uninhabitable. This area is described by Parker-Rew's engineering statement as consisting of tidal mudflats and low marshy islands. Thus, it claims that the method used to derive a population figure for this area is invalid. Parker-Rew also argues that the Class B proposal should be denied because Cape Charles already receives six FM services chiefly from stations in the Norfolk-Portsmouth and Newport News-Hampton urbanized areas. Finally, it contends that since Cape Charles is located near these urbanized areas and the proposed station would place a 1 mV/m signal over the area, it is unrealistic to believe that the proposal is designed to provide service to Cape Charles.

4. In reply, petitioner points out that Parker-Rew is licensed to serve Exmore (pop. 1,421) and asserts that its only interest is to prevent competition.² In response to the contention that Cape Charles is too small to warrant a Class B station, petitioner responds that Exmore (with a Class B station) is smaller than Cape Charles, and there is no larger community in the area without local service to which the channel could be assigned. As to its showing that a second aural service would be provided, it notes that its method of estimating population is the one specified by the Commission and indicates that there is no basis for concluding that the area in question is uninhabitable.

5. Finally, petitioner argues that the allegation that its proposal is designed to serve the Norfolk and Newport News urbanized areas, is irrelevant to

²In a letter, Edward A. Parry expresses concern about the economic impact of an additional radio station in this area. However, as we have consistently held, the resolution of any such issues involving competitive impact are best left to the application stage. Melbourne and Satellite Beach, Fla., 47 F.C.C. 2d 717 (1974); Ogallala, Nebr., 41 FR 23955, Docket 20070.

the rule making proceeding and, in any event, that its proposed station's 3.16 mV/m contour will not reach the Norfolk or Newport News areas.

6. Before dealing with the Commission's policy with respect to assigning Class B stations to small communities, a few preliminary matters should be addressed. First petitioner's method of calculating population totals by assuming equal distribution over an area is an acceptable procedure. If Parker-Rew had a better estimate then it should have made that information known. Secondly, petitioner is correct that the 70 dBu (3.16 mV/m) contour of a maximum Class B Cape Charles facility would not reach Norfolk, Virginia Beach, or Newport News, and would cover only an insignificant portion of Hampton. Thus, there is no basis at this point for believing that the station is realistically designed to serve a community other than Cape Charles.

7. On the matter of the class of channel, Parker-Rew is correct that we have a general policy which seeks to assign Class B/C channels only to larger communities. However, on previous occasions, when taking a closer look at the southern portion of the Delmarva peninsula, we found that the area has few population centers and that to insure effective service, it usually would be necessary to utilize Class B channels. See Tasley, Va., 5 R.R. 2d 1754, 1761 (1965), and Exmore, Va., 18 R.R. 2d 1605, 1608 (1970), where the need for wide-area coverage stations was stressed in assigning Class B channels to these communities of 762³ and 1,421 persons, respectively. Likewise, support is found in Princess Anne and Pocomoke City, Md., 42 F.C.C. 2d 338 (1973), and Ocean City, Md., 35 F.C.C. 2d 473, 24 R.R. 2d 1903, 1905 (1972). Following this approach, we find the same considerations justifying a Class B assignment to Cape Charles. The surrounding area, especially to the north and east, has few services and the proposal could provide some second aural service. We therefore feel that assignment of Channel 241 to Cape Charles would represent effective utilization of the channel.

8. Accordingly, it is ordered, That the FM Table of Assignments, Section 73.202(b) of the Commission's Rules, IS AMENDED with respect to the following community; Effective: March 22, 1978.

City and Channel No.

Cape Charles, Va., 241.

9. The Commission's authority for the above action is contained in sec-

³This population estimate was taken from information provided in the pleadings in that case. There is no Census figure for Tasley.

tions 4(i), 5(d)(1), 303(g) and (r) of the Communications Act of 1934, as amended, and §0.281 of the Commission's Rules.

It is further ordered, That this proceeding is terminated.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; 47 U.S.C. 154, 155, 303.)

[Docket No. 21205; RM-2781]

PART 73—RADIO BROADCAST SERVICES

**Television Broadcast Station in Lihue (Kauai)
Hawaii; Changes Made in Table of Assignments**

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: This action assigns Channel *67 to Lihue, Hawaii, for high-power noncommercial educational translator use. The proponent, Hawaii Public Broadcasting Authority, which already operates noncommercial educational stations in Honolulu and Wailuku, seeks to rebroadcast its programming throughout the State with the use of translator stations.

EFFECTIVE DATE: March 23, 1978.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mark N. Lipp, Broadcast Bureau,
202-632-7792.

SUPPLEMENTARY INFORMATION:

In the matter of amendment of §73.606(b), table of assignments, television broadcast stations (Lihue [Kauai], Hawaii), Docket No. 21205 RM-2781.

Report and order (proceeding terminated).

Adopted: February 7, 1978.

Released: February 9, 1978.

By the Chief, Broadcast Bureau:

1. The Commission has before it the Notice of Proposed Rule Making, adopted April 15, 1977, 42 FR 22183, proposing the assignment of UHF TV Channel *67 to Lihue, Hawaii, and reserving it for noncommercial educational use. Petitioner, the Hawaii Public Broadcasting Authority, licensee of Station KHET (Channel 11), Honolulu, Hawaii, and Station KMEB-TV (Channel 10), Wailuku, Hawaii (satellite of Station KHET), submitted comments¹ reaffirming its intent to apply for the channel if assigned and to construct a station promptly if issued a permit.

2. Lihue (pop. 3,124),² the seat of Kauai Island (pop. 27,761), is located approximately 160 kilometers (100 miles) northwest of Honolulu. Lihue has no local TV service but receives the programming of many stations via locally operated translators.

3. The Notice indicated that petitioner sought the assignment of Channel *67³ to Lihue so that it may oper-

¹Petitioner submitted its comments after the announced cut-off date. However, we believe it appropriate to accept them so as to avoid the delay involved if we required petitioner to refile its proposal.

²All population data are taken from the 1970 U.S. Census.

³The Notice also stated that although Channels *21 and *27 were assigned to Lihue and available for noncommercial edu-

ate a high-powered (one kilowatt) translator station.⁴ Petitioner states that it intends, through the use of translators, to implement a statewide plan which would provide noncommercial educational programming throughout the Hawaiian Islands.

4. The Commission believes the public interest would be served by adoption of the proposal. This assignment will provide noncommercial educational programming for Lihue and Kauai Island and represents an efficient utilization of available frequencies. All mileage separation requirements have been met.

5. Accordingly, it is ordered, That effective March 23, 1978, the Television Table of Assignments, Section 73.606(b) of the Commission's Rules, is amended to read as follows for the community listed:

City and channel No.

Lihue, Hawaii, 3+, *8-, 10+, 12-, 15-, *21-, *27-, *67

6. Authority for the action taken herein is contained in Sections 4(i), 5(d)(1), 303 (g) and (r) of the Communications Act of 1934, as amended, and Section 0.281 of the Commission's Rules.

7. It is further ordered, That this proceeding is terminated.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; 47 U.S.C. 154, 155, 303.)

DEPARTMENT OF ENERGY

[10 CFR Part 209]

INTERNATIONAL VOLUNTARY AGREEMENTS

Recordkeeping Requirements

AGENCY: Department of Energy.

ACTION: Notice of proposed rulemaking and request for public comments.

SUMMARY: These proposed amendments to the rules relating to recordkeeping in connection with communications between or among participants in the Voluntary Agreement and Plan of Action to Implement the International Energy Program are intended to simplify, reduce the volume of, and augment the information contained in, records maintained by participants in the Voluntary Agreement. These recordkeeping requirements would be amplified as necessary during actual allocation of oil under Chapter III and IV of the Agreement on an International Energy Program or during an allocation systems test conducted in conjunction with the International Energy Agency (IEA).

EFFECTIVE DATE: Date of Issuance.

DATES: Comments must be received by March 13, 1978, 4:30 p.m., e.s.t.

REQUEST TO SPEAK

By February 28, 1978, 4:30 p.m., e.s.t.

HEARING STATEMENTS

By March 8, 1978, 4:30 p.m., e.s.t.

HEARING DATE

March 10, 1978, 9:30 a.m., e.s.t.

ADDRESSES: All comments to:

Office of Regulations Management,
Box RS, Department of Energy,
Room 2214, 2000 M Street NW.,
Washington, D.C. 20461.

REQUESTS TO SPEAK

of Energy, Room 2214, 2000 M
Street N.W., Washington, D.C.
20461.

HEARING LOCATION

Room 2105, 2000 M Street N.W.,
Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Martin S. Kaufman or Robert C. Goodwin, Jr., Office of General Counsel, Department of Energy, Room 5116, The Federal Building, 1200 Pennsylvania Avenue N.W., Washington, D.C. 20461, telephone, 202-566-9380.

SUPPLEMENTARY INFORMATION:

- I. Background
- II. Purpose of Proposed Amendments
- III. Comments Previously Received
- IV. Comments and Hearings
- V. Proposed Amendments

I. BACKGROUND

On August 26, 1976, the Federal Energy Administration (FEA) issued proposed amendments to Part 209 of Chapter II, Title 10, Code of Federal Regulations, in order to clarify, simplify and make consistent the recordkeeping requirements applicable to international voluntary agreements (41 F.R. 37128, et seq., September 2, 1976). By notice published on September 22, 1976 (41 FR 41432), the period for comments was extended through November 1, 1976. Three comments were received with regard to the proposed amendments, but no hearing was held because of lack of sufficient interest. The proposed amendments were not embodied in a final rule.

Because of the time which has elapsed since the first issuance of the proposed amendments and because the establishment of the Department of Energy (DOE) has resulted in new administrative procedures, DOE deems it advisable to reissue the proposed amendments, revised to take into account certain of the comments previously received. Further comments are invited.

II. PURPOSE OF THE PROPOSED AMENDMENTS

Since their publication in February 1976, FEA and DOE have monitored the effectiveness of the recordkeeping requirements applicable to participants in the Voluntary Agreement under Part 209 of its regulations. FEA and DOE have observed that a large number of duplicative records dealing with routine matters have been submitted. In addition, there is a need for some clarification with respect to the information needed for antitrust monitoring required under the Energy Policy and Conservation Act ("EPCA") (Pub. L. 94-163, 42 U.S.C. § 6272). In order to rectify this situation, and to alleviate the burdens on both the gov-

ernment and participants in the Voluntary Agreement, DOE hereby proposes to amend Part 209 of Chapter II, Title 10, Code of Federal Regulations, to minimize recording of non-substantive matters while at the same time providing further guidance with respect to those matters which should be recorded in detail.

Where any communication is written and demonstrates on its face that it was already furnished to the appropriate official of DOE, the amended regulation would exempt a participant from making a record thereof and from sending an additional copy to DOE. The description of "written communication" has been clarified as including several forms of electronically or photoelectrically transmitted or recorded data commonly used.

Where the communication is procedural, administrative or ministerial (for example, if it involves the location of a record, the place of a meeting, establishment or adjustment of a meeting agenda, travel arrangements or similar matters), it would not need to be recorded in detail. Such communications which occurred during an actual emergency or an allocation systems test at IEA headquarters would not have to be recorded at all since U.S. Government monitors would be present at IEA headquarters.

To the extent that any communication involves matters which recapitulate material already contained in a full and complete record, the regulation would be amended to provide that the substance of such matters need not be recorded in detail, so long as reference is made to the record and the portion thereof where the material is fully set out.

The requirement that records be deposited "promptly" would be amended to permit their deposit within fifteen days after the end of the month in which they were prepared so as to enable participants to aggregate records and deposit them on a monthly basis during non-emergencies. However, it is anticipated that written records which are provided by one participant to other participants would be provided contemporaneously to DOE.

Under the proposal, § 209.34, providing for maintenance of records during the carrying out of voluntary agreements, would be amended in a similar fashion. In addition to the amendments discussed above, this section would also be amended to provide that where there are several communica-

tions within the same day involving the same participants, a cumulative record for the day may be kept. The requirement providing for "prompt" deposit of records would, as in the case of § 209.24, be amended to permit deposit within fifteen days after the end of the month in which they were prepared.

In view of the fact that DOE (and previously FEA) has received several records of communications between participants and U.S. Government personnel, it should be noted that such communications are exempt from recordation, since both §§ 209.24 and 209.34 do not apply to communications with governmental or international organizations. Sections 209.24 and 209.34 would also be amended to provide for keeping of records of communications between a participant and any other member of a petroleum industry group or subgroup created by the IEA. This change is consistent with the most recent amendment to Section 5(b) of the Voluntary Agreement.

Section 209.34 would further be amended by the addition of a new subsection (e), which provides that for international oil allocation pursuant to Chapters III and IV of the Agreement on an International Energy Program, or for an IEA allocation systems test, the recordkeeping requirements stated in § 209.34 may be further amplified through the issuance of such guidelines as DOE determines to be necessary and appropriate.

DOE believes these amendments to §§ 209.24 and 209.34 would simplify and reduce recording of material which is not essential to antitrust monitoring.

III. COMMENTS PREVIOUSLY RECEIVED

Certain persons submitting comments suggested that the language in § 209.24(b)(3), dealing with administrative communications, be made consistent with that used in the corresponding § 209.34(b)(3). DOE agrees with this suggestion, and accordingly has revised § 209.34(b)(3) to parallel § 209.24(b)(3).

Some comments also questioned the proposed amendment of § 209.34(b)(2) which added a definition of "substance" to the requirement that the record of a communication between participants include "a description of the communication in sufficient detail to convey adequately its substance." Such comments objected that this was contrary to Congressional intent that communications during emergencies be prepared on a simplified basis, and to FEA's acknowledgment in the preamble to Part 209 that the language of § 209.34 was "sufficiently flexible so as to permit a lesser amount of detail during emergencies" (41 FR 6754). The regulation proposed herein does not attempt to define "substance," but

retains the requirement that records of communications be kept in sufficient detail to convey the substance thereof.

Certain comments suggested that in connection with proposed § 209.24(b)(2) and § 209.34(b)(2), the regulation should be amended to provide that where a communication indicates on its face that a copy has been sent to any official of DOE, or to DOE itself, this will satisfy the requirement of §§ 209.24(c) and 209.34(c) that a copy be deposited with the Secretary. DOE agrees with this suggestion in principle, but believes that permitting omission of filing when a copy of a communication has been sent to "any" DOE official gives rise to a possibility of communications being inadvertently sent to a DOE official not concerned with the matter. Therefore, § 209.24(b) and 209.34(b) have been revised to permit omission of filing when a copy of a communication shows it has been sent to the proper DOE official.

Finally, some persons objected to the proposed revision to the requirements of § 209.24(c) and 209.34(c), that records be deposited "promptly." As originally proposed, those sections required that records be deposited within seven days of their preparation during an emergency, and within thirty days of their preparation during nonemergencies. It was suggested that these requirements would be burdensome, because records prepared daily would necessarily have to be deposited on a daily basis, and since participants would no longer have the convenience of aggregating records on the basis of a representative period. In order to reduce the burden imposed by these requirements, §§ 209.24(c) and 209.34(c) have been revised to provide that records may, except during IEA emergency allocation or allocation systems tests, be deposited within fifteen days after the month of their preparation, and during actual oil allocation or tests of the allocation system, within seven days after the week (ending Saturday) of their preparation. Thus, during normal periods, participants will be able to deposit their records on a monthly basis, and will have two weeks after the close of the month to assemble them; during actual oil allocation or tests of the allocation system, records shall be deposited on a weekly basis, with a week after the close of the week in question available for aggregation. As with other recordkeeping requirements, the rules with respect to deposit of records may be modified during an actual international oil allocation or during a test of the allocation system. DOE believes that this will improve the efficiency of the present requirements.

IV. COMMENTS AND HEARINGS

A. WRITTEN COMMENTS

Interested persons are invited to submit written data, comments or arguments with respect to these proposed amendments. Comments should be identified on the outside of the envelope and on the documents submitted with the designation "Recordkeeping Relating to International Voluntary Agreements." Fifteen (15) copies should be submitted. All comments received by 4:30 p.m., March 16, 1978, will be considered by the DOE in evaluating the proposed amendments.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. The DOE reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

B. PUBLIC HEARINGS

The times and places for the hearings and date and location for requesting to speak at the hearings are indicated at the beginning of this notice. If necessary to hear all testimony, the hearing will be continued at 9:30 a.m. of the next business day following the first day of the hearings. Any person who has an interest in these recommendations or who is representative of a group or class of persons which has such an interest, may make a written request for an opportunity to make oral presentation. The person making the request should be prepared to describe the interest concerned; if appropriate, to state why he is a proper representative of a group or class of persons which has such an interest; and to give a concise summary of the proposed oral presentation and a phone number where he may be contacted through March 9, 1978. Each person selected to be heard will be so notified by the DOE before 4:30 p.m., e.s.t., March 2, 1978, and must submit 100 copies of his statements to Office of Regulations Management, DOE, Room 2214, 2000 M Street NW., Washington, D.C. 20461, before 4:30 p.m., e.s.t., March 8, 1978.

The DOE reserves the right to select the persons to be heard at these hearings, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearings. The length of each presentation may be limited, based on the number of persons requesting to be heard.

A DOE official will be designated to preside at the hearing. The hearings will not be judicial or evidentiary in nature. Questions may be asked only by those conducting the hearings. There will be no cross-examination of persons presenting statements. Any decision made by the DOE with re-

spect to the subject matters of the hearings will be based on all information available to the DOE. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested persons may submit questions to be asked of any person making a statement at the hearings to Office of Regulations Management, Room 2214, 2000 M Street NW., Washington, D.C. 20461, before 4:30 p.m., e.s.t., February 28, 1978. Any person who makes an oral statement and who wishes to ask a question at the hearings may submit the question, in writing, to the presiding officer at the time of the hearing. The DOE, or the presiding officer if the question is submitted at the hearings, will determine whether the question is relevant, and whether time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearings will be announced by the presiding officer.

A transcript of the hearings will be made and the entire record of the hearings, including the transcript, will be retained by the DOE and made available for inspection in the DOE Freedom of Information Office, Room 2107, Federal Building, 1200 Pennsylvania Avenue NW., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. Any person may purchase a copy of the transcript from the reporter.

This proposal is procedural only, and the requirement in Section 7(c)(1) of the Federal Energy Administration Act, that proposals "affecting the quality of the environment" be reviewed by the Environmental Protection Agency prior to issuance, is hereby deemed not to apply.

NOTE.—The proposed rule has been reviewed in accordance with Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107 and has been determined not to be a major proposal requiring evaluation of its economic impact as provided for therein.

(Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended; E.O. 11790, 39 FR 23185; E.O. 11930, 41 FR 32399; Energy Policy and Conservation Act, Pub. L. 94-163; E.O. 11912, 41 FR 15825; Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 565; E.O. 12009, 42 FR 46267.)

In consideration of the foregoing, it is proposed to amend Part 209 of Chapter II, Title 10, Code of Federal Regulations, as set forth below.

Issued in Washington, D.C., February 10, 1978.

WILLIAM S. HEFFELFINGER,
Director of Administration.

V. PROPOSED AMENDMENTS

1. Section 209.24 is amended in paragraphs (b) and (c) to read as follows:

§ 209.24 Maintenance of records.

(b)(1) Except as provided in subparagraphs (2) through (4) of this paragraph, participants shall keep a full and complete record of any communications (other than in a meeting held pursuant to this subpart) between or among themselves for the purpose of developing a voluntary agreement under this part. When two or more participants are involved in such a communication, they may agree among themselves who shall keep such record. Such record shall include the names of the parties to the communication and the organizations, if any, which they represent; the date of the communication; the means of communication; and a description of the communication in sufficient detail to convey adequately its substance.

(2) Where any communication is written (including, but not limited to, telex, telegraphic, telecopied, microfilm, and computer printout material), and where such communication demonstrates on its face that the originator or some other source furnished a copy of the communication to the proper official of DOE, no participant need record such a communication or send a further copy to the Department of Energy. Where such communication demonstrates that it was sent to the proper official of the Department of Energy, it shall satisfy paragraph (c) of this section for the purpose of deposit with the Department of Energy.

(3) To the extent that any communication is procedural, administrative or ministerial (for example, if it involves the location of a record, the place or time of a meeting, establishment or adjustment of a meeting agenda, travel arrangements, or similar matters), only a brief notation of the date, time, persons involved and description of the communication need be recorded.

(4) To the extent that any communication involves matters which recapitulate matters already contained in a full and complete record, the substance of such matters shall be identified, but need not be recorded in detail, provided that reference is made to the record and the portion thereof in which the substance is fully set out.

(c) Except where the Department of Energy otherwise provides, all records and transcripts prepared pursuant to

paragraphs (a) and (b) of this section shall be deposited within fifteen (15) days after the close of the month of their preparation together with any agreement resulting therefrom, with the Department of Energy, and shall be available to the Attorney General, the Federal Trade Commission, and the Department of State. Such records and transcripts shall be available for public inspection and copying to the extent set forth in Subpart D. Any person depositing material pursuant to this section shall indicate with particularity what portions, if any, the person believes are not subject to the disclosure to the public pursuant to Subpart D and the reasons for such belief.

2. Section 209.34 is amended in paragraphs (b) and (c) and by adding a new paragraph (e) to read as follows:

§ 209.34 Maintenance of records.

(b)(1) Except as provided in subparagraph (2) through (4) of this paragraph, participants shall keep a full and complete record of any communication (other than in a meeting held pursuant to this subpart) between or among themselves or with any other member of a petroleum industry group created by the International Energy Agency, or subgroup thereof, for the purpose of carrying out a voluntary agreement or developing or carrying out a plan of action under this subpart, except that where there are several communications within the same day involving the same participants, they may keep a cumulative record for the day. The parties to a communication may agree among themselves who shall keep such record. Such record shall include the names of the parties to the communication and the organizations, if any, which they represent; the date of the communication; the means of communication; and a description of the communication in sufficient detail to convey adequately its substance.

(2) Where any communication is written (including, but not limited to, telex, telegraphic, telecopied, microfilm, and computer printout material), and where such communication demonstrates on its face that the originator or some other source furnished a copy of the communication to the proper official of DOE, no participant need record such a communication or send a further copy to the Department of Energy. Where such communication demonstrates that it was sent to the proper official of the Department of Energy, it shall satisfy paragraph (c) of this section for the purpose of deposit with the Department of Energy.

(3) To the extent that any communication is procedural, administrative or ministerial (for example, if it involves the location of a record, the place or time of a meeting, establishment or adjustment of a meeting agenda, travel arrangements, or similar matters) only a brief notation of the date, time, persons involved and description of the communication need be recorded; except that during an IEA emergency allocation exercise or an allocation systems test such a non-substantive communication between members of the Industry Supply Advisory Group (ISAG) which occur within IEA headquarters need not be recorded at all.

(4) To the extent that any communication involves matters which recapitulate matters already contained in a full and complete record, the substance of such matters shall be identified, but need not be recorded in detail, provided that reference is made to the record and the portion thereof in which the substance is fully set out.

(c) Except where the Department of Energy otherwise provides, all records and transcripts prepared pursuant to paragraphs (a) and (b) of this section shall be deposited within seven (7) days after the close of the week (ending Saturday) of their preparation during an international energy supply emergency or a test of the IEA emergency allocation system, and within fifteen (15) days after the close of the month of their preparation during periods of non-emergency, together with any agreement resulting therefrom, with the Department of Energy and shall be available to the Attorney General, the Federal Trade Commission, and the Department of State. Such records and transcripts shall be available for public inspection and copying to the extent set forth in Subpart D. Any person depositing materials pursuant to this section shall indicate with particularity what portions, if any, the person believes are not subject to disclosure to the public pursuant to Subpart D and the reasons for such belief.

(e) During international oil allocation under Chapters III and IV of the IEP or during an IEA allocation systems test, the Department of Energy may issue such additional guidelines amplifying the requirements of these regulations as DOE determines to be necessary and appropriate.

Economic Regulatory Administration

[10 CFR Parts 211 and 212]

EMERGENCY STANDBY MANDATORY CRUDE OIL AND REFINERY YIELD CONTROL PROGRAMS

Proposed Rulemaking; Public Hearing

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of proposed rulemaking and public hearing.

SUMMARY: In order to meet U.S. international energy program commitments and provide for the distribution of strategic petroleum reserve (SPR) crude oil, the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) is proposing two special rules: (1) An emergency standby crude oil allocation program; and (2) special pricing provisions governing mandatory sales. The ERA proposed to distribute available crude oil supplies equitably to refiners during a supply interruption by means of a buy/sell list calculated so that each refiner operates at the same monthly rate relative to a recent 12-month base period. The U.S. Government will be a seller of crude oil under the program when and if SPR crude oil is made available for distribution. The price for all buy/sell transactions except those involving SPR crude oil will be set by ERA monthly with differentials for quality. These proposed regulations would supersede certain existing regulations when activated.

DATES: Comments by March 21, 1978, 4:30 p.m.; requests to speak by March 6, 1978, 9:30 a.m.

HEARING DATES

Washington hearing: March 28 and 29, 1978, 9:30 a.m.; Dallas hearing: March 21, 1978, 9:30 a.m.; San Francisco hearing: March 23, 1978, 9:30 a.m.; Chicago hearing: March 20, 1978, 9:30 a.m.

ADDRESSES: All comments to: Public Hearing Management, Room 2313, Department of Energy, Box RU, 2000 M St. NW., Washington, D.C. 20461.

REQUESTS TO SPEAK

Washington hearing: Attn.: Public Hearing Management, Room 2313, Department of Energy, Box RU, 2000 M St. NW., Washington, D.C. 20461; Dallas hearing: Department of Energy, Attn.: Arlene Millard, 2626 West Mockingbird Lane, Dallas, Tex. 75235; San Francisco hearing: Department of Energy, Attn.: R. Laffel, 111 Pine Street, San Francisco, Calif. 94111; Chicago hearing: Department of Energy, Attn.: Charles Swank, 175 West Jackson Boulevard, Chicago, Ill. 60604.

HEARING LOCATIONS

Washington hearing: Room 2105, 2000 M St. NW., Washington, D.C. 20461; Dallas hearing: Department of Energy, Training Room 250, 2626 West Mockingbird Lane, Dallas, Tex. 75235; San Francisco hearing: U.S. Post Office and Courthouse, Courtroom 14, 7th and Mission Street, San Francisco, Calif. Chicago hearing: Everett McKinley Dirksen Building, Room 204A, 219 South Dearborn Street, Chicago, Ill. 60604.

Sabina Cooper or William Mayo Lee (Office of General Counsel), 12th and Pennsylvania Avenue NW., Room 5138, Washington, D.C. 20461, 202-566-2454 (Cooper), 202-566-9567 (Lee).

SUPPLEMENTARY INFORMATION:

- I. Background.
- II. Proposed programs.
 - A. Emergency mandatory crude oil allocation program.
 - B. Refinery yield control program.
 - C. Supplier/purchaser rule and entitlements program.
 - D. Emergency mandatory allocated crude oil pricing program.
- III. Comment procedures.
 - A. Written comments.
 - B. Public hearings.

I. BACKGROUND

The first crude oil allocation program was promulgated in January 1974 in order to alleviate supply shortages of crude oil, residual fuel oil and refined petroleum products. The Federal Energy Office (FEO) undertook to carry out the express mandate of Congress in section 4(a) of the Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159 (EPAA), that the President impose temporary mandatory allocations of available supplies of crude oil, residual fuel oil, and refined petroleum products in amounts and at prices to be specified by regulations. The goal of the allocation program was to provide for overall equitable distribution of available crude oil and refined product supplies in order to mitigate the adverse economic consequences of the shortages.

There were two major elements to FEO's original crude oil allocation pro-

gram. The first was the so-called supplier/purchaser rule which froze in place all supplier/purchaser relationships for domestic crude oil that existed on December 1, 1973. The second element of the program, which is more relevant for present purposes, was the crude oil buy/sell program. The initial crude oil buy/sell program mandated certain sales of crude oil from one refiner to another in order that each refiner would have access to available supplies of crude oil at the national average supply-to-capacity ratio for all refiners. The national average supply-to-capacity ratio was calculated by the FEO based on refinery capacity and estimated crude oil supplies. Crude oil supplies were estimated based on the refiner's current stocks and expected deliveries of crude oil over a 3-month allocation period. Refiners with a supply-to-capacity ratio greater than the national average were required to sell their crude oil supplies that were in excess of the national average supply-to-capacity ratio. Refiners with less than the national average supply-to-capacity ratio were entitled to purchase sufficient crude oil from those refiners with such excess supplies so as to increase their supply levels to the national average supply-to-capacity ratio.

The maximum price of crude oil sold pursuant to these rules was calculated by taking the weighted average price of all crude oil delivered to a seller in either Petroleum Administration for Defense (PAD) Districts I-IV or in PAD District V, depending on where the sale was made, and adding to that amount a 6-percent handling fee plus certain adjustments for transportation costs and gravity differentials. In addition, refiner-sellers were permitted an 84-cent-per-barrel passthrough (for each barrel of crude oil sold pursuant to the program) on products refined by the refiner-seller to allow the refiner-seller to recoup an approximation of the profit that would have been made by refining each barrel of crude oil required to be sold under the allocation program.

The regulations provided for publication by the FEO of a "buy-sell list" showing required sales volumes and purchase opportunities for each refiner. This buy-sell list was the basis for allocation sales for the first quarter. At the beginning of each subsequent quarter, the FEO was required to publish a new buy-sell list that incorporated new projections made for refinery capacity and supply availability in that quarter. In addition, any differences between the estimated available supply of crude oil for a refiner in the first quarter and that refiner's actual deliveries of crude oil (as shown in monthly and quarterly reports to the FEO) would result in an adjustment to the refiner's allocation or sales obligation.

tion in a succeeding quarter. The first crude oil allocation program was therefore self-correcting for unexpected shortfalls or excess supplies of crude oil realized in a particular quarter and also for any calculation errors in the information used to compute the buy-sell list for an allocation quarter.

In May 1974, after the embargo was lifted, the FEO substantially revised the mandatory crude oil allocation program. In the changed supply situation, the revision was designed to remove the disincentives for increased production and importation of crude oil which existed under the original program, as well as to eliminate specific features of the original program involving allocations between major oil companies and certain product dislocations.

The revised program eliminated allocations to major oil companies by limiting the receipt of allocated oil to small and independent refiners. Each small and independent refiner was designated a refiner-buyer and was eligible to purchase during each allocation quarter a fixed amount of crude oil equal to one quarter of its crude oil runs to stills in the year 1972 less the volume of crude oil runs to stills for the period February through April 1974, with certain adjustments. Provision was also made for allocation of crude oil with respect to new or expanded refinery capacity. The 15 major refiners were designated as the only refiner-sellers and were required to offer crude oil for sale to refiner-buyers. Sales obligations were distributed proportionally according to each refiner-seller's percentage share of the total refining capacity of all refiner-sellers as of January 1, 1973. Refiner-sellers could replace any crude oil which was sold under the program without having such replacement crude oil subject to allocation. The pricing provisions were not changed significantly, although the six-percent handling fee was changed to a 30-cent per barrel fee.

As more normal supply conditions returned to the petroleum industry, the mandatory crude oil allocation program was reevaluated and further modified. The Federal Energy Administration (FEA) amended the crude oil buy/sell program in August 1975 to ensure that sellers would be treated equally when use of the program either declined in periods of adequate supply or increased during a future supply shortage. These amendments were also intended to accommodate the reduced use of the program that followed upon the provision of crude oil cost equalization benefits under the entitlements program (§ 211.67), which was implemented in November 1974. However, the buy/sell program did continue to serve a significant, al-

though reduced, supply function for small and independent refiners.

In April 1976, FEA amended the pricing of buy/sell program sales in an attempt to eliminate price advantages to purchasing under the program. Since refiner-sellers were previously required to charge a price based upon the weighted average cost of crude oil inventory of that refiner, purchases under the program were often cheaper to purchasers than purchases of the alternate imported crude oils. Sales prices were determined by calculating the refiner-seller's weighted average cost of its crude oil deliveries of imported crude oil (other than from Canada), with no pricing distinctions based on PAD Districts and with a uniform gravity adjustment. A five-cent per barrel handling fee was substituted for the thirty-cent per barrel handling fee.

Effective October 1, 1977, FEA revised the buy/sell program significantly to limit purchases under the program to those refiner-buyers which had a demonstrated need for allocations of crude oil based on lack of access to adequate supplies of domestic and foreign crude oil. Small refiners that were initially determined to have access to sufficient supplies of crude oil, and that were therefore ineligible to participate in the program, were permitted to reenter the program in the event that they experienced a significant reduction in domestic crude oil supplies. The pricing provisions for sales of allocated crude oil also were modified to take into account crude oil quality differentials and thus reflect more accurately the actual market value of crude oil sold under the program. These modifications permit refiner-sellers to determine their costs for imported high sulfur and low sulfur crude oil separately, thus ensuring that imported sweet and sour crude oil is sold under the program at prices approximating the fair market values for such crude oils. The pricing provision pertaining to transportation expenses recoverable by refiner-sellers was modified to assure that only actual transportation costs will be charged or incurred in transactions involving allocated crude oil.

The FEA believed that the administrative complexities of the program were unduly burdensome on participants, particularly refiner-sellers, in relationship to the limited usefulness of the program in a period of plentiful crude oil supplies. By late 1975, refiner-buyers were exercising only approximately 30 percent of their purchase opportunities under the program and, in many cases, appeared to be purchasing under the program only to obtain a price advantage.

II. PROPOSED PROGRAMS

The present crude oil buy/sell program simply addresses certain small

refiners' current needs for additional crude oil supply in the context of world-wide plentiful supply. The current program presumes that supplies generally are adequate. For this reason, it is necessary to have a revised program available on a standby basis in the event of another major supply interruption. We are proposing this emergency standby program in two separate special rules: The first (Special Rule No. 10 for Subpart C of Part 211) provides for the changes to the buy/sell program itself; and, the second (Special Rule No. 2 for Subpart F of Part 212) provides for the pricing of allocated crude oil, other than Strategic Petroleum Reserve crude oil. We are also issuing, contemporaneously with this Notice, a Notice of Proposed Rulemaking to implement Section 251 of the Energy Policy and Conservation Act of 1975 (EPCA) (Pub. L. 94-163). That Section provides authority to establish a regulatory program whereby the United States can carry out its supply obligations or purchase rights under the mandatory phase of the Agreement on an International Energy Program (IEP) (TIAS 8278), to which the United States is a party.

We intend to propose in the near future emergency standby product allocation regulations that would become effective in the event of a major crude oil supply interruption.

A. EMERGENCY MANDATORY CRUDE OIL ALLOCATION PROGRAM

The mandatory crude oil allocation regulations and the related pricing provisions proposed today would become effective only in the event of a significant crude oil supply interruption, i.e., when the emergency allocation provisions of the Agreement on an International Energy Program are activated (unless the Secretary of Energy undertakes action to nullify the automatic trigger), or when otherwise ordered by the Administrator of the ERA. They provide for the mandatory allocation of crude oil produced in or imported into the fifty states, the Virgin Islands, Guam, the Hawaiian Free Trade Zone, and Puerto Rico under the authority of the Emergency Petroleum Allocation Act of 1973, as amended. To implement the policy decisions of the U.S. Government as to the sale price and drawdown rate of Strategic Petroleum Reserve crude oil, these proposed regulations also provide for the distribution of the quantity, if any, of Strategic Petroleum Reserve crude oil made available. To the extent provision is made for distribution of Strategic Petroleum Reserve crude oil, this proposal is issued pursuant to the authority contained in Section 161(e) of the Energy Policy and Conservation Act.

The emergency mandatory allocation of crude oil under this proposal

is similar but not identical to that adopted by the FEO for the 1973-1974 oil embargo, and is based on the calculation of a national utilization rate for refiners on a monthly basis. This rate would be obtained by dividing the national estimated available crude oil supply by the base period average monthly crude oil runs to stills of all U.S. refiners (rather than by their capacity, as under the original program). Refiners' crude oil runs to stills would be calculated with reference to a base period (the twelve consecutive calendar month period ending with the second month immediately preceding the month in which these special rules become operative unless otherwise determined by the Administrator). The allocation period would be a calendar month.

Under this proposal, there would be no differing treatment or classification for small, independent, or major integrated refiners. The rationale for this particular aspect of the proposal is that in a supply shortage the way to allocate crude oil insofar as refiners and their marketing areas and customers are concerned could well be to permit all refiners to purchase or require them to sell on the same basis. Our initial conclusion in this regard is that this proposed method of allocation will also minimize market distortions in a shortage. We invite comments on the appropriateness of this feature of the proposal, and solicit specific suggestions on whether and in what manner various types of refiners (i.e., major integrated, independent, or small) should receive differing treatment in their allocations under the program.

In each allocation period, refiner-buyers would be entitled to purchase sufficient crude oil to permit operation of their refineries at the national utilization rate, and refiner-sellers would be required to sell any crude oil supplies that would permit refiner operation in excess of the national utilization rate.

The national estimated available supply of crude oil would be calculated by the ERA by taking the total estimated available supply of crude oil (including any Strategic Petroleum Reserve crude oil made available) for all domestic refiners and subtracting the quantity of crude oil that: (1) is subject to directed sales pursuant to § 211.71, or (2) the ERA plans to direct to product importers, if any, in the manner explained below. The estimated available supply of crude oil for a particular refiner would include that quantity of crude oil to which a refiner had access and intended to run during the allocation period.

We request that comments specifically address whether the quantity of crude oil a refiner intended to retain in inventory during the allocation

period should be included in the refiner's estimated available supply: *Provided*, That in its normal business operations the refiner would not have refined that crude oil in the allocation period. Comments are invited as to whether specific pre-supply interruption inventory levels (that are in excess of normal working inventory levels) should be "grandfathered," i.e., rendered exempt from the operation of the allocation program, to provide incentives for increased storage by refiners to be available in the event of a supply interruption and, if so, how such inventory could be identified and exempted. Additionally, the DOE is interested in any proposal directed toward providing incentives to increase storage levels of crude oil in anticipation of an interruption.

The national average monthly crude oil runs to stills for any allocation period would be the total of all crude oil runs to stills by all U.S. refiners in the base period divided by the number of days in the year (365 or 366) and multiplied by the number of days in the allocation period. In other words, the average daily crude runs to stills for all U.S. refiners during the base period would be multiplied by the number of days in the month to determine base period average monthly crude oil runs to stills.

The maximum quantity of crude oil the ERA would permit a refiner to purchase or require a refiner to sell during the allocation period would be determined by multiplying the refiner's average base period monthly crude oil runs to stills by the national utilization rate (national estimated available supply divided by national base period average monthly crude oil runs to stills). By subtracting the refiner's estimated available supply from the refiner's allowed crude oil runs to stills, the ERA would determine the refiner's buy/sell obligation.

If a refiner had a greater estimated available supply than the above calculation permitted the refiner to refine, the refiner would be required to offer such excess supply for sale. Conversely, if the refiner's estimated available supply was less than the refiner was permitted to refine under the above calculations, the refiner would be eligible to buy such amount of crude oil.

The following examples illustrate the use of the proposed allocation formula. The terms of the formula are defined as follows:

X=quantity of crude oil a refiner-buyer is entitled to purchase (if x is a positive number) or required to sell (if x is a negative number) during the allocation period

A=refiner's estimated available crude oil supply during the allocation period

B=refiner's average base period monthly crude oil runs to stills

C=national estimated available crude oil supply for all U.S. refiners for the allocation period

D national average base period monthly crude oil runs to stills by all U.S. refiners.

A mathematical expression of the formula is:

$$\left(\frac{C \cdot B}{D}\right) A = X$$

If a refiner's total estimated available crude oil supply for the allocation period (e.g., A = 200 barrels) as compared to its average base period monthly runs to stills (e.g., B = 800 barrels) multiplied by the national utilization ratio (e.g., C/D = $\frac{1}{2}$ as calculated by dividing the national estimated available crude oil supply, e.g., C = 6,000 barrels, by the national base period average monthly crude oil runs to stills, e.g., D = 12,000 barrels), results in a positive number, then that refiner would be entitled to purchase crude oil from another refiner with a supply in excess of its permitted runs to stills. $((\frac{1}{2})(800)) - (200) = +200$. If a refiner's total for an allocation period (e.g., A = 600 barrels) as compared to its average based period monthly crude oil runs to stills (e.g., B = 800 barrels) multiplied by the national utilization ratio of $\frac{1}{2}$, results in a negative number, then that refiner would be required to offer for sale that part of its supply that was in excess of its permitted runs to stills: $((\frac{1}{2})(800)) - (600) = -200$. A refiner-buyer would be permitted to process crude oil purchased pursuant to this special rule at any of its refineries regardless of the historical crude oil runs to stills of the refiner's particular refinery. A refiner-buyer would be required to process the crude oil, have the crude oil processed, or exchange the crude oil and have it processed within 45 days from the date of execution of the purchase/sale agreement.

The first allocation period would commence 15 days subsequent to the day this special rule becomes effective. It will be composed of the number of days remaining in the month when the allocation period begins plus the following calendar month.

Adjustments to a refiner's base period crude oil runs to stills could be made for non-recurring or unusual operating reasons or to reflect refining capacity in operation for less than the base period time period. However, any adjustment to the base period crude oil runs to stills for purposes of the program would have to be approved by the ERA. As to refineries in operation for less than one full calendar month on the date this special rule comes into force or that commenced operations after such date, application for an exception pursuant to 10 CFR Part 205 would be required to establish base period crude oil runs to stills.

This proposal as currently written makes no provision for including in the calculation of a refiner's runs to stills the amount of crude oil pro-

cessed in the refinery of another firm pursuant to a processing or exchange agreement. It does, however, include all crude oil runs to stills of refineries owned, operated, or controlled by the refiner that were in operation at least one full calendar month prior to the activation of this proposed special rule, including the month prior to the month in which the rule becomes effective. We specifically invite comments on how leased refining capacity and exchange or processing agreements should be treated with respect to the calculations of crude oil runs to stills and estimates of available supply.

To integrate the emergency standby crude oil allocation program with the operation of the IEP, the Administrator would adjust a refiner's purchase opportunity or sale obligation under the program to reflect purchases or sales made by the refiner pursuant to the IEP in previous allocation periods. In the event of a significant IEP sale for the refiner concerned, the Administrator could issue a supplemental notice for the current allocation period to ensure that the refiner's operations would not be severely impacted by reason of the sale. These adjustment provisions would operate only where the refiner had not already adjusted its estimated available crude oil supply for the allocation period to reflect IEP voluntary sales to be made in that allocation period. The effect of these adjustments would be to compensate refiners for IEP sales by either increasing their purchase opportunity or decreasing their sale obligation by the volumes of crude oil sold under the IEP, and to reflect IEP purchases in an appropriate manner.

The proposed rule also provides authority for the Administrator of ERA to allocate crude oil to a firm that is not a U.S. refiner but has historically been engaged in the business of importing a petroleum product, provided that a critical shortage of such petroleum product was determined to exist and that the shortage would be alleviated by such action. As proposed, the rule would require the importer to have the crude oil refined in a U.S. refinery, except that, if unsuccessful in negotiating a processing agreement with a U.S. refiner, the importer could have the oil processed in a non-U.S. refinery, as long as the product that is refined from the crude oil is imported into the area of critical shortage on a barrel-for-barrel basis. We expressly invite comments as to whether crude oil should be allocated to a product importer for processing by that importer to help alleviate a critical product shortage in the region served by that importer, the conditions under which such allocation should occur, the amount of crude oil required to produce a given volume of product, a

formula for determining the quantity of crude oil which should be allocated to product importers, and as to appropriate rules to govern the processing of this crude oil, with specific reference to the time frame for the processing and as to the location (whether non-U.S. or U.S.) of the refineries that are to process the crude oil.

The Administrator would also have the authority (1) to order a refiner to sell crude oil out of its inventory to another refiner, and (2) to include the quantity, if any, of crude oil made available from the Strategic Petroleum Reserve in the national estimated supply of crude oil.

Although no such provision is contained in the proposed regulation, we also invite comments as to the desirability of providing an incentive to encourage refiner-sellers to continue to import crude oil since the proposed program is structured so that imports in excess of estimated available supplies could be required to be offered for sale to refiner-buyers. If such an incentive is thought to be desirable, commentators should provide suggestions as to the form such an incentive might take.

In addition, we invite comments as to whether the definition of "crude oil" set forth in §211.51 is appropriate for purposes of calculating base period crude oil runs to stills and estimated available supply in the emergency allocation program. Current regulations include Canadian plant condensate as part of crude oil runs to stills for the purpose of the entitlements program (10 CFR 211.67(d)(3)) but exclude it for the purpose of the buy/sell program. We specifically invite comments as to whether Canadian plant condensate should be incorporated into the definition of crude oil for the purpose of these emergency regulations.

The buy/sell notice for the emergency allocation program would be published at least 10 days prior to the beginning of the allocation period. Refiner-buyers and refiner-sellers would have 10 days from that publication date in which to negotiate purchases and sales, and all crude oil subject to a contract negotiated pursuant to the special rule would be required to be refined within 45 days after execution of the contract.

The conditions of sale for other than crude oil from the Strategic Petroleum Reserve, and the procedures to be invoked in the event of a failure to negotiate a transaction, would remain substantially similar to those specified in 10 CFR 211.65 for the allocation program currently in effect. However, under the special rule: (1) Refiner-sellers would be required to deliver crude oil to any refinery specified by a buyer. *Provided*, That the buyer retains title to the products refined from the purchased crude oil; (2) refiner-

buyers that are unable to consummate transactions would have to request ERA assignment of a refiner-seller within ten days of publication of the buy/sell notice; and (3) in order for a product importer to process allocated crude oil at a foreign refinery, it would be required to submit an application to that effect within 10 days of publication of the buy/sell notice. Contracting procedures for, and terms and conditions of the sale of, crude oil from the Strategic Petroleum Reserve are not covered by the proposed regulations except to the extent specifically indicated, and will require separate treatment to be announced by DOE at a later time.

Monthly reports of estimated supply for the next allocation period and actual data for the preceding allocation period would be filed by all refiners with the ERA no later than the tenth day of the current allocation month. Transactions under the program would be required to be reported by telephone within 24 hours of the completion of the arrangements for the sale and then confirmed in writing.

B. REFINERY YIELD CONTROL PROGRAM

The refinery yield control program would remain substantially as currently in effect, the ERA having the authority to adjust the percentage yield of a particular product or residual fuel oil that is in short supply. Orders under the refinery yield program would be keyed to a particular refined product or products for a specific refinery, or could be on a regional or national basis. We request comments on whether the refinery yield program should be further amended for purposes of the emergency standby crude oil allocation program.

C. SUPPLIER/PURCHASER RULE AND ENTITLEMENTS PROGRAM

No change has been proposed for either the crude oil supplier/purchaser rule (10 CFR 211.63) or the entitlements program (10 CFR 211.67). However, we request comments on whether these programs should be changed in any respects, to permit a proper interface with the proposed emergency mandatory buy/sell program.

EMERGENCY STANDBY MANDATORY ALLOCATED CRUDE OIL PRICING PROGRAM

The pricing provisions proposed in Special Rule No. 2, Subpart F, Part 212, permit the Administrator to establish on a monthly basis the prices, along with appropriate gravity and sulfur differentials, for high and low sulfur crude oil sold under the emergency standby mandatory crude oil allocation program. The Administrator would consider the weighted average per barrel landed costs of high and low

sulfure crude oil in the preceding month, prices between affiliated entities, and other relevant data. As in the current rule, adjustments would be made to reflect transportation costs, which would be paid by the refiner-buyer. Additionally, the ERA specifically requests comments on the appropriate amount for a handling fee for refiner-sellers.

III. COMMENT PROCEDURES

A. WRITTEN COMMENTS

You are invited to participate in this notice of proposed rulemaking by submitting data, views or arguments with respect to the issues set forth in this notice. Comments should be identified on the outside envelope and on documents submitted with the designation "Crude Oil Allocation-Standby Regulations", Box RU. Fifteen copies should be submitted. All comments received by the ERA will be available for public inspection in the DOE Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday.

You should identify any information or data considered by you to be confidential and submit it in writing, one copy only. We reserve the right to determine the confidential status of the information or data and to treat it according to our determination.

B. PUBLIC HEARINGS

1. *Request Procedure.* The times and places for the hearings are indicated in the "DATES" section of this notice. If necessary to present all testimony, the hearing will be continued to 9:30 a.m. of the next business day following the first day of the hearing.

You may make a written request for an opportunity to make an oral presentation. If so, you should be prepared to describe the interest concerned, if appropriate, to state why you are a proper representative of a group or class of persons that has such an interest, and to give a concise summary of the proposed oral presentation and a phone number where you may be contacted through the day before the hearing.

If you are selected to be heard, you will be so notified by the ERA before 4:30 p.m., one week prior to the hearing, and you must bring 100 copies of your statement to the location of the hearing on the day testimony is presented.

2. *Conduct of the Hearings.* We reserve the right to select the persons to be heard at these hearings (in the event there are more requests to be heard than time allows), to schedule their respective presentations, and to establish the procedures governing the conduct of the hearings. The length of each presentation may be limited,

based upon the number of persons requesting to be heard.

An ERA official will be designated to preside at each of the hearings. These will not be judicial or evidentiary-type hearings. Questions may be asked only by those conducting the hearings, and there will be no cross-examination of persons presenting statements. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

You may also submit questions to be asked of any person making a statement at the hearings. Such questions must be submitted to the same address indicated above for requests to speak, three days prior to the hearing at the location concerned. Any person who wishes to ask a question at the hearings may submit the question, in writing, to the presiding officer. The presiding officer, if the question is submitted at the hearings, will determine whether the question is relevant, and whether time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of a hearing will be announced by the presiding officer.

Transcripts of the hearings will be made and the entire record of the hearings, including the transcripts, will be retained by the ERA and made available for inspection at the Freedom of Information Office, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday. You may purchase a copy of the transcript of a particular hearing from the reporter.

In the event that it becomes necessary to cancel a hearing, we will make every effort to publish advance notice in the FEDERAL REGISTER of such cancellation. Moreover, we will notify all persons scheduled to testify at the hearings. However, it is generally not possible for us to give actual notice of cancellations or changes to persons not identified to us as participants. Accordingly, persons desiring to attend a hearing are advised to contact ERA on the last working day preceding the date of the hearing to confirm that it will be held as scheduled.

As required by section 7(c)(2) of the Federal Energy Administration Act of 1974, Pub. L. 93-275, a copy of this notice has been submitted to the Administrator of the Environmental Protection Agency for his comments concerning the impact of this proposal on the quality of the environment. The Administrator had no comments on this proposal.

NOTE.—The ERA has determined that this document does not contain a major proposal requiring preparation of an Inflationary Impact Statement under Executive Order 11821 and OMB Circular A-107.

Pursuant to the requirements of section 404(a) of the Department of Energy Organization Act (Pub. L. 95-91), this proposed rule has been referred, concurrently with the issuance hereof, to the Federal Energy Regulatory Commission for a determination whether the proposed rule would significantly affect any matter within the Commission's jurisdiction.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185; Department of Energy Organization Act, Pub. L. 95-91; E.O. 12009, 42 FR 46267.)

Issued in Washington, D.C., on February 10, 1978.

DAVID J. BARDIN,
Administrator, Economic
Regulatory Administration.

APPENDIX

TITLE 10, CHAPTER II, PART 211, SUBPART C SPECIAL RULE NO. 10

EMERGENCY STANDBY MANDATORY CRUDE OIL AND REFINERY YIELD CONTROL PROGRAMS

1. *Scope.* This Special Rule No. 10, to Subpart C, Part 211, sets forth the DOE Emergency Standby Mandatory Crude Oil Buy/Sell and Refinery Yield Control Programs. This special rule provides for the allocation of such Strategic Petroleum Reserve crude oil as will be made available to this program to be sold by the United States Government, but does not provide for determination of the amounts of such oil to be sold and, except as expressly indicated, does not govern the contracting procedures, terms or conditions for the sale of such crude oil.

2. *Applicability.* (a) This special rule is effective beginning on the day:

(i) When the emergency allocation provisions of the Agreement on an International Energy Program (IEP) take effect, unless the Secretary of Energy determines that such automatic triggering of this rule shall not occur; or

(ii) When ordered by the Administrator.

(b) During the time period this special rule is in effect, the definitions of crude oil runs to stills, refiner, refiner-buyer, refiner-seller, and refining capacity in § 211.62, all of § 211.65, and all of § 211.71, Title 10, Chapter II, Part 211, Subpart C (Crude Oil and Refinery Yield Control) are superseded.

(c) This special rule expires when ordered by the Administrator. Upon expiration of this special rule, §§ 211.62, 211.65, 211.66, and 211.71, as set forth in Title 10, Chapter II, Part 211, Subpart C (Crude Oil and Refinery Yield Control) are in effect.

3. For purposes of this special rule, certain definitions are amended and several new definitions are added to § 211.62 as follows:

"Additional crude oil supply" means the total quantity of crude oil to which a refiner has access during an allocation period, in-

cluding but not limited to crude oil in associated storage, nonassociated storage, and in transit, less the refiner's estimated available crude oil supply for the allocation period.

"Administrator" means the Administrator of the Economic Regulatory Administration, Department of Energy.

"Allocation period" means a calendar month, except as otherwise specified in this rule.

"Base period" means the twelve (12) consecutive calendar months ending with the second month prior to the month in which this special rule becomes effective unless otherwise specified by the Administrator.

"Base period average monthly crude oil runs to stills" means a refiner's total crude oil runs to stills of all its refineries during the base period as reported on the Bureau of Mines Form P-320, divided by the number of days in the base period and multiplied by the number of days in the allocation period.

"Buyer" means any firm which is eligible to purchase crude oil pursuant to the provisions of this special rule.

"Crude oil runs to stills" means, in the case of a refiner other than a petrochemical producer, the total number of barrels of crude oil input to distillation units processed by a refiner and measured in accordance with Bureau of Mines Form P-320 and, in the case of a petrochemical producer, the total number of barrels of crude oil input to processing units for conversion into petrochemicals.

"DOE" means the Department of Energy, established by Public Law 95-91 (August 14, 1977).

"ERA" means the Economic Regulatory Administration, Department of Energy.

"Estimated available crude oil supply" means the quantity of crude oil a refiner has available and intends to run to stills for all of its refineries in the normal course of business during the allocation period.

"Firm" means any association, company, corporation, estate, individual, joint-venture, partnership, or sole proprietorship or any other entity however organized including charitable, educational, or other eleemosynary institutions, and the Federal government including corporations, departments, Federal agencies, and other instrumentalities, and State and local governments. The ERA may, in regulations and forms issued in this part, treat as a firm: (1) A parent and the consolidated and unconsolidated entities (if any) which it directly or indirectly controls, (2) a parent and its consolidated entities, (3) an unconsolidated entity, or (4) any part of a firm.

"IEA" means the International Energy Agency established to implement the IEP.

"IEP" means the International Energy Program established pursuant to the Agreement on an International Energy Program signed at Paris on November 18, 1974, including (a) the Annex entitled "Emergency Reserves", (b) any amendment to such Agreement that includes another nation as a Party to such Agreement, and (c) any technical or clerical amendment to such Agreement.

"National base period average monthly crude oil runs to stills" means the total base period average monthly crude oil runs to stills of all U.S. refiners.

"National estimated available crude oil supply" means, for any allocation period, the total quantity of estimated crude oil supply for all U.S. refiners plus the quantity, if any, of Strategic Petroleum Reserve

crude oil made available minus the quantity of crude oil the Administrator intends to direct to product importers pursuant to this special rule, and minus the quantity of crude oil directed to all refiners pursuant to § 211.71 of this special rule.

"National utilization rate" means national estimated available crude oil supply for any allocation period divided by national base period average monthly crude oil runs to stills.

"New refining capacity" means, for each refiner, the capacity of its refineries operated continuously in the normal course of such refiner's business for at least one full calendar month, which must include the month preceding the month of the effective date of this special rule, but for less than 12 months of the base period as certified by the DOE.

"Petrochemical plants" means those industrial plants, regardless of capacity, that process petrochemical feedstocks and obtain at least thirty (30) percent conversion, by weight, to petrochemicals or other products that are converted to petrochemicals, as long as the weight of hydrocarbon contained in the final petrochemical is equal to at least thirty (30) percent of the initial petrochemical feedstock fed to the plant under consideration.

"Product importer" means any importer of record which imported a refined petroleum product or residual fuel oil during the base period, but shall not include a refiner.

"Refiner" means a firm which owns, operates or controls the operations of one or more refineries within the United States.

"Refiner-buyer" means any refiner whose estimated available crude oil supply during the allocation period is less than the national utilization rate multiplied by that refiner's base period average monthly crude oil runs to stills.

"Refiner-seller" means (1) any refiner whose estimated available crude oil supply during the allocation period is greater than the national utilization rate multiplied by that refiner's base period average monthly crude oil runs to stills, or (2) the United States Government when selling SPR crude oil.

"Refinery" means an industrial plant, regardless of capacity, processing crude oil feedstock and manufacturing refined petroleum products, residual fuel oil or petrochemicals, and shall include a petrochemical plant operated continuously in the normal course of business during the base period.

"Seller" means any firm which is required to offer crude oil for sale pursuant to the provisions of this special rule.

"SPR crude oil" means crude oil that is made available from the Strategic Petroleum Reserve pursuant to Section 161 of the EPCA, and which is included in the calculations of the buy-sell list.

"United States" means the several states, the District of Columbia, Puerto Rico, and the territories and possessions of the United States other than the Panama Canal Zone.

4. *Method of Allocation.* For purposes of this special rule, § 211.65 shall read as follows:

§ 211.65 *Emergency mandatory crude oil allocation program.*

(a) *General rule.* (1) In each allocation period a refiner-buyer shall be entitled to purchase and a refiner-seller shall be required to offer for sale an amount of crude oil equal to the difference between:

(i) The national utilization rate multiplied by the refiner's base period average monthly crude oil runs to stills and

(ii) The refiner's estimated available crude oil supply during the allocation period.

(2) *Definitions.*

X = quantity of crude oil a refiner-buyer is entitled to purchase (if X is a positive number) or required to offer for sale (if X is a negative number) during the allocation period

A = refiner's estimated available crude oil supply during the allocation period

B = refiner's base period average monthly crude oil runs to stills

C = national estimated available crude oil supply for all U.S. refiners for the allocation period

D = national base period average monthly crude oil runs to stills by all U.S. refiners

(3) *Formula.*

$$(C/D \times B) - A = X$$

(4) *Calculation procedure.* For each allocation period, the amount of crude oil a refiner is eligible to buy or required to offer for sale shall be calculated as follows:

(i) Each U.S. refiner shall submit its estimate of available crude oil supply to the ERA for the allocation period.

(ii) For each allocation period, the ERA shall compute the national estimated available crude oil supply based on the total estimated crude oil supply for all U.S. refiners for that allocation period. This estimate shall include any quantity of SPR crude oil made available and shall not include any quantity of crude oil the Administrator intends to direct to product importers pursuant to this special rule or to direct to refiners pursuant to § 211.71 of this special rule.

(iii) The ERA shall, on a one-time basis, compute the average daily crude oil runs to stills during the base period for each domestic refiner by dividing the total volume of that refiner's crude oil runs to stills in the base period by the number of days in the base period (365 or 366).

(iv) The ERA shall multiply this daily average volume of crude oil runs to stills for each refiner by the number of days in the allocation period, to determine the refiner's base period average monthly crude oil runs to stills for the allocation period.

(v) The ERA shall compute a national base period average monthly crude oil runs to stills by aggregating the base period average monthly crude oil runs to stills of all U.S. refiners for the allocation period.

(vi) The ERA shall divide the national estimated available supply of crude oil (clause (ii)) for the allocation period by the national base period average monthly crude oil runs to stills (clause (v)) to determine the national utilization rate for the allocation period.

(vii) The ERA shall multiply the national utilization rate by the refiner's base period average monthly crude oil runs to stills for the allocation period (clause (iv)) to determine the refiner's allowable crude oil runs to stills during the allocation period.

(viii) The ERA shall subtract the refiner's estimated available crude oil supply (clause (i)) from the refiner's allowable crude oil runs to stills during the allocation period (clause (vii)) to determine the refiner's purchase or sale obligation.

(ix) If the result of the calculation in clause (viii) is positive, the refiner is entitled to purchase that quantity of crude oil.

(x) If the result of the calculation in clause (viii) is negative, the refiner is required to offer that quantity of crude oil for sale.

(5) *First allocation period.* The first allocation period shall commence on the 15th day following the day when this special rule becomes effective and shall be composed of the remaining days in the month the allocation period commences plus the following calendar month.

(b) *Refiner-buyers.* Each refiner-buyer shall:

(1) Be entitled to purchase, either directly or through exchange, from a refiner-seller, a quantity of crude oil equal to the amount computed pursuant to paragraph (a) of this section, and

(2) Be required to refine or have processed any crude oil purchased or exchanged for crude oil purchased pursuant to this special rule within 45 days following the date of execution of the sale/purchase agreement.

(c) *Refiner-sellers.* Each refiner-seller shall be required to offer for sale, directly or through exchange, to refiner-buyers a quantity of crude oil equal to the amount computed pursuant to paragraph (a) of this section.

(d) *Adjustments to purchase and sale amounts.* The ERA shall recalculate the buy/sell list for each allocation period based on actual crude oil runs to stills and then make adjustments in a subsequent allocation period, except that positive adjustments to a refiner-buyer's allocations or negative adjustments to refiner-seller's sales obligations in subsequent allocation periods will not be made if that refiner-buyer failed to purchase its total allocations during the allocation period in which the sales were made. Such recalculation shall be for the purpose of correcting errors in estimates, and to

(1) Increase a refiner-seller's sales obligation in any allocation period to reflect crude oil offered for sale by that refiner-seller but not purchased by a refiner-buyer in a prior allocation period;

(2) Decrease a refiner-seller's sales obligation in any allocation period to deduct crude oil sales in excess of the amount required to be offered for sale in a prior allocation period pursuant to paragraphs (f) and (i)(3) of this section; or

(3) Either decrease a refiner's sales obligation or increase its purchase opportunities in any allocation period as the case may be, to account for sales made by that refiner under the IEP in the current or one or more previous allocation periods, where the IEP sales were not shown as an adjustment to that refiner's estimated available crude oil supply for the allocation period in question and shall also make appropriate adjustments to reflect any purchases under the IEP by a refiner.

(e) *New refining capacity.* The ERA may adjust a refiner's base period average monthly crude oil runs to stills to reflect new refining capacity.

(f) *Adjustments to base-period crude oil runs to stills and Administrator's authority to direct certain transactions.* (1) Prior to the first day of the second allocation period, a refiner may request the Administrator to adjust its base period crude oil runs to stills for unusual and non-recurring operating conditions during the base period at one or more of its refineries. If the Administrator does not approve, in whole or in part, or disapprove the request within fifteen (15) business days of receipt of the request, it shall be deemed denied.

(2) Notwithstanding the provisions of this special rule, the Administrator may:

(i) Order a refiner to offer to sell crude oil to a product importer, provided the Administrator determines that a critical shortage of a refined petroleum product or residual fuel oil exists or may exist in the immediate future in a specific geographic area; and

provided further, That the product importer arranges (A) to have the crude oil refined into an equivalent volume of such refined petroleum product or residual fuel oil and sell such product or residual fuel oil in the geographic area of critical shortage, or (B) to exchange the crude oil therefor;

(ii) Order a refiner to offer to sell crude oil to reduce its inventory thereof; and

(iii) Order a refiner purchasing crude oil under this special rule to place that crude oil in its inventory.

(g) *Buy/sell notice and negotiation of transactions.* (1) A buy/sell notice shall be published at least 10 days prior to the beginning of the allocation period except for the first allocation period. Each buy/sell notice shall list the quantity of crude oil each refiner-buyer is eligible to purchase and the quantity of crude oil that each refiner-seller will be obligated to offer for sale to refiner-buyers. Upon publication of the notice, refiner-buyers and refiner-sellers shall negotiate purchases and sales of crude oil allocated pursuant to the notice. All sales, except directed sales pursuant to paragraph (i) of this section, must be contracted for within ten (10) days after the publication of the buy/sell notice, and all deliveries must be completed within thirty (30) days following the date of execution of the sale/purchase agreement.

(2) The ERA may issue a supplemental notice for an allocation period to reflect adjustments under paragraph (d)(3) of this section for voluntary or mandatory sales under the IEP for that allocation period, where the operations of the refiner making the sale could be adversely affected by reason of the sale.

(h) *Terms and conditions of sales.* (1) The terms and conditions of each sale, processing agreement, or exchange of crude oil, other than sales prices, shall be consistent with normal business practices.

(2) Sellers shall deliver crude oil purchased pursuant to this special rule to any refinery designated by the buyer, whether or not it is operated by the buyer. *Provided,* The buyer (i) has title to the product or products refined from the purchased crude oil when the refining process is completed, or (ii) exchanges such product in accordance with normal business practices.

(3) Crude oil offered for sale must be suitable for processing in the refiner-buyer's refinery or the refinery designated by the refiner-buyer. Crude oil is deemed to be suitable for processing in a refinery if it has historically been processed in the refinery or if it has the same or similar characteristics as crude oil that has historically been processed in the refinery.

A refiner-seller may not be required to supply a specific type of crude oil to refiner-buyer's refinery if the volume of the crude oil that would account for a greater percentage of the refinery's total crude oil runs to stills in the allocation period concerned than was the case during the previous twenty-four month period.

(4) Crude oil offered to a refiner-buyer must be practical for delivery to and physically capable of being delivered to the refiner-buyer's refinery or a refinery designated by the refiner-buyer.

an economic dislocation which justifies the designation of a region or business sector as eligible for the economic injury loans authorized by section 404 of Pub. L. 95-89. The proposed rule defines an economic dislocation as an extraordinary and severe event which has a temporary adverse financial impact on a small business firm and which is (1) independent from any decision or situation created by the firm, and (2) not reasonably foreseeable by the firm's ownership or management. This definition, based on specific requirements in the legislation, makes clear that the loan authority is not the equivalent of business continuation insurance. The definition also precludes a designation as a result of depressed or other general market conditions such as inflation, recession, or the generally recognized risks of doing business in a free enterprise system such as strikes, or a shortage of material and supplies.

Four examples of the type of economic dislocation contemplated were cited by the Conference Committee. These were: lack of snow in ski areas, the Mexican peso devaluation, Indian tribal claims to land in Mashpee, Mass., and the extreme cold weather of the winter of 1967-77. The proposed regulation requires that any economic dislocation should fit the general pattern identified by these four situations. Situations on which comments are requested include (by way of example and not of limitation): Disruption of services of utility or telephone companies; abandonment of railroad lines requiring establishment of alternate supply routes; closing of a major customer of numerous small concerns; events in foreign countries (boycotts, natural disasters, strikes) which affect U.S. manufacturers and suppliers.

The Administration also recognizes its general responsibility to exercise its authority in a manner which is consistent with and in furtherance of national policy and in coordination with the activities and policies of other government agencies.

The proposed rules set forth the procedures by which the Governor of a State may request the designation of a region or business sector as being subject to temporary economic dislocation. The law requires that a substantial number of small businesses be adversely affected and SBA has determined that a minimum of five businesses is necessary in a sparsely populated area, but that a larger number may be required in a densely populated area. The Governor must identify the event which has caused an economic dislocation, the number of small businesses affected, the area affected, the expected duration of the economic dislocation and certify that financial assistance is not available on reasonable terms.

The proposed rules also define the purpose for which loans may be used. Loans are limited to working capital, and to the refinancing of debt to commercial lenders if this can be accomplished without a reduction of the commercial lenders' exposure. Loans are limited by law to \$100,000 but will be based on the amount of economic injury suffered by the small business. In common with other economic injury loans, the maximum term is 30 years but the term will be determined by the need of the small business. Payment of principal and interest will be deferred for one year at the request of the borrower. The interest rate is at a statutory formula based on cost of money to the government.

Pursuant to the authority of Section 5(b)(6) of the Small Business Act (15 U.S.C. 634), Part 123, Chapter I, Title 13 of the Code of Federal Regulations is amended as follows:

1. Section 123.1(b) is amended by adding a new subparagraph (9) as follows:

§ 123.1 General

(9) Which is located in a region or is part of a business sector designated pursuant to § 123.2(b)(8) as suffering from economic dislocation if SBA determines such loan is necessary to enable an otherwise financially sound concern to remain in business or to return quickly to its former level of operation (Economic Dislocation Assistance).

2. Section 123.2(a) is amended by adding a new subparagraph (6), by including economic dislocation in paragraph (b) and adding a new subparagraph (8) under paragraph (b) as follows:

§ 123.2 Eligibility.

(a)
(1)

ECONOMIC DISLOCATION

(6)(i) The Administrator of SBA makes designations that small business concerns in certain regions or business sectors are suffering from an economic dislocation due to an extraordinary, severe, or temporary natural or other temporary specific condition which is not due to any decision, or risk assumed by the small business concerns affected and which was not reasonably foreseeable by the concerns' ownership or management. To be considered temporary, an economic dislocation should be expected to end within 12 months of the date of designation by SBA.

(ii) The designation of an area of economic dislocation may be made based on the Administrator's knowl-

edge of conditions affecting small businesses or as a result of a certification from the Governor of a State which identifies the cause of the economic dislocation, the region or business sector affected, its anticipated duration, the number of small concerns affected (which must be at least five and more if the region or business sector includes numerous businesses), that SBA assistance is necessary to enable otherwise financially sound concerns to remain in business or return quickly to their former levels of operation and that financial assistance is not otherwise available on reasonable terms. Such certifications are sent to the Regional Directors in whose jurisdiction the area of economic dislocation is. The Regional Director forwards it with his recommendation to the Associate Administrator for Operations for submission to the Administrator.

(iii) No designation will be made if the assistance would:

(A) Conflict with national policy (for example, no designation will be made because of a lock-out or a strike, since both are recognized economic tools in labor relations); (B) be granted because of depressed market conditions, inflation, recession, effects of competition (foreign or domestic), or other generally accepted risks of doing business in a free enterprise system; (C) make duplicate assistance available if a natural disaster declaration covering the area was issued or if natural disaster assistance has been made available pursuant to § 123.2(a)(4)(i) D; or (D) be granted for other causes not considered within SBA's legislative authority.

(iv) Designations will not be published in the FEDERAL REGISTER, but will be publicized in the affected region.

(b) *Displaced business, regulatory, strategic arms, base closing, emergency energy shortage, water pollution control, air pollution control and economic dislocation loans.* (1)

(8) *Special consideration—economic dislocation loans.* To qualify for an economic dislocation loan, an applicant must be in a region or business sector which has been designated by SBA as affected by an economic dislocation. It must be financially sound, but for the effects of the economic dislocation.

3. Section 123.3 is amended by adding at the end thereof a new paragraph (m) to read as follows:

§ 123.3 Purposes of loans.

(m) *Economic dislocation loan assistance.* (1) The purpose is to provide working capital to small concerns which have suffered substantial economic injury to enable them to remain in operation, or return to their former

level of operation, when the effects of the economic dislocation have ceased, or adjustments in operations have been made to compensate for the economic dislocation. Funds may be used to carry accounts receivable, pay accounts payable, bring current long term debt and for general operating expense.

(2) Refinancing of existing debt is permissible if such refinancing does not reduce the exposure of any other lender. Thus, refinancing is limited to debts owed to commercial lenders as defined in § 123.1(c)(2) who will participate with SBA in a guaranteed or immediate participation loan at least to the extent of the debt being refinanced, but in no event less than 10%.

4. Section 123.5 is amended by rewording paragraph (a) to read as follows:

§ 123.5 Amount of loan and interest rates.

(a) The amount of any disaster loan shall not exceed the actual physical loss or economic injury suffered as a result of a disaster except as may be permitted under § 123.3(a)(2) and (3)(c) through (1). Economic dislocation loans as described in 123.3(m) are limited by law to a maximum of \$100,000 and a maximum term of thirty years.

5. Section 123.8 (c) is amended to read as follows:

§ 123.8 Repayment

(c) Except as described in paragraphs (a) and (b) of this section, and in the case of borrowers whose income is received on an annual or seasonal basis, all loans shall be repaid in equal monthly installments which will include principal and interest. In economic dislocation loans made pursuant to § 123.2(b)(8) the borrower, upon his request, shall be permitted to defer payments of principal and interest for one year from the date of the note.

(Sec. 404, Pub. L. 95-89, 91 Stat. 560 (15 U.S.C. 636).)

(Catalog of Federal Domestic Assistance Programs Nos. 59.028.)

Dated: February 9, 1978.

CIVIL AERONAUTICS BOARD

[14 CFR Part 207]

[EDR-342A; Docket No. 31861; Dated: February 10, 1978]

CHARTER TRIPS AND SPECIAL SERVICES

Off-Route Charter Limitations; Extension of Time for Comments

AGENCY: Civil Aeronautics Board.

ACTION: Supplemental Notice of Proposed Rulemaking.

SUMMARY: This notice extends for 30 days the time for filing comments in EDR-342, a proposal to alter the rules concerning off-route charters. The extension was requested by attorneys for the National Air Carrier Association (NACA).

DATES: Comments by March 29, 1978. Comments and other relevant information received after this date will be considered by the Board only to the extent practicable.

ADDRESSES: Twenty copies of comments should be sent to Docket 31861, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Individuals may submit their views as consumers without filing multiple copies. Comments may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. as soon as they are received.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard B. Dyson, Office of General Counsel, Rules Division, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, 202-673-5444.

SUPPLEMENTARY INFORMATION: In its notice EDR-342, 42 FR 64704, December 28, 1977, the Board proposed to eliminate all restrictions on off-route cargo charters by all-cargo carriers, to modify the frequency restrictions for foreign off-route charters, to raise the volume restrictions, and to allow optionally the use of available seat miles as the basis for volume limits. Comments were due February 27, 1978.

By letter of February 7, 1978, attorneys for NACA have requested that the time for submitting comments on EDR-342 be extended 30 days. They noted that some scheduled carriers had not yet submitted certain required reports that included information on their charter operations, which NACA believed was needed in order to make a meaningful statistical presentation in its comments on the proposal.

The undersigned finds good cause to grant this request for an extension of time for the preparation of views on the proposed rule.

Accordingly, pursuant to authority delegated in § 385.20(d) of the Board's Organization Regulations (14 CFR 385.20(d)), the time for filing comments in EDR-342 is extended to March 29, 1978.

(Sec. 204, Federal Aviation Act of 1958, 72 Stat. 743, (49 U.S.C. 1324).)

SIMON J. EILENBERG,
Associate General Counsel,
Rules Division.

[EDR-344; Docket No. 31728; Dated: February 9, 1978]

FREE AND REDUCED RATE TRANSPORTATION

Proposed Rulemaking

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: This notice proposes to amend the Board's regulations to allow air carriers to make student fares available to natives of Guam, American Samoa and the Trust Territory of the Pacific Islands between the student's home and his school or vocational training program in Alaska, Hawaii or the mainland United States.

DATES: Comments by March 16, 1978.

ADDRESSES: Comments should be sent to Docket 31728, Docket Section, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Docket comments may be examined in Room 711 at the address above as they are received.

FOR FURTHER INFORMATION CONTACT:

Richard Juhnke, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, 202-673-5436.

SUPPLEMENTARY INFORMATION: In the "Pacific Overseas Fares Investigation," Order 77-10-134, the Board found that various fares conditioned on the status of the passenger, including youth and student fares, were unjustly discriminatory within the meaning of section 404(b) of the Federal Aviation Act of 1958. While we ordered those fares canceled, we noted that section 403(b) of the Act authorizes the Board to specify by rulemaking categories of persons eligible for free and reduced-rate overseas air transportation, and we invited the carriers to petition the Board for authority to offer student fares in various Pacific overseas markets.

Pan American World Airways has petitioned the Board to authorize stu-

dent fares between the United States and Guam and the United States and American Samoa. Continental Air Lines and Air Micronesia have jointly petitioned the Board in Docket 31742 to allow student fares in those markets and between the United States and the Trust Territory of the Pacific Islands.¹ These carriers ask that the fares be limited to native students traveling to and from their school or vocational training program. The legislature of American Samoa has answered those petitions and generally favors student fares so long as rate-making adjustments are applied to assure that normal fare U.S.-Pago Pago passengers will not bear the burden of any consequent revenue dilution.²

The record in the "Pacific Overseas Fares Investigation" portrays an unusual combination of financial need, geographic isolation, and U.S. obligation to the inhabitants of the islands which persuade us to propose authorizing reduced student fares on those markets on a limited basis. It shows that the one university in Guam is insufficient to satisfy the educational needs of the entire area and that a large number of students leave the islands each year to attend school in the United States. It also shows that the full round-trip air fare from Saipan to Los Angeles, the closest destination in the continental United States, is more than 15 percent greater than the median annual income of a Trust Territory family. Because of the natives' low incomes and the extreme isolation of islands, it is obvious that the absence of reduced-rate transportation could effectively deny students the opportunity of higher education.

We believe it may be desirable for the Board to help resolve this problem because the United States' obligation to the natives of Guam, who are U.S. citizens, the natives of American Samoa, who are U.S. nationals, and the natives of the Trust Territory, whose education we have pledged to promote, might otherwise go unfulfilled. The Board is given the power to prescribe regulations allowing reduced fares such as those we now propose by section 403(b) of the Act. In keeping with the above-outlined factual predicate for student fares, the proposed amendment would limit their availability to native students traveling between their home in the islands and their school or vocational training program.

¹The Board has decided to consolidate the Continental/Air Micronesia petition into Docket 31728.

²Pan American has filed a motion for leave to file an unauthorized document which argues that no adjustment should be made. We have considered that document in drafting this proposed rule and grant leave for Pan Am to file the document.

We tentatively agree with the legislature of American Samoa that the U.S.-Pago Pago student discount should be treated as an ordinary discount for purposes of fixing normal fares in that market. That is, student traffic should not increase the level of normal fares.³ It is true that our exercise of discretion to permit student fares under section 403(b) is premised on various considerations, not all of which are strictly related to the cost of carrying such traffic. It is not our intention to require the carriers to offer these fares, however, and we would permit them to limit their availability in any way they see fit—e.g., by standby restrictions and black-out periods. Thus the carriers will have the capability of assuring that the marginal costs of carrying the students are very low. Accordingly, there is no reason to believe that the revenues from these fares will not cover the costs of this service, and we see no reason to build a dilution factor into normal fares to compensate for student traffic.

PROPOSED RULE

The Board proposes to amend Part 223 of its Economic Regulations (14 CFR Part 223) as follows:

Amend § 223.2 by adding a new paragraph (g) as follows:

223.2 Persons to whom free and reduced-rate transportation may be furnished.

In addition to the persons specified in Subparts B and C of this part:

(g) Any air carrier may, to the extent authorized in its certificate or elsewhere, provide reduced-rate overseas air transportation to students who are native to Guam, American Samoa, or the Trust Territory of the Pacific Islands: *Provided, however*, That the student must be enrolled in, or enroute to or from enrolling in, a college, university, trade school or similar bona fide educational or vocational program at the time of travel; the student fares may be made available only to students traveling between their homes in Guam, American Samoa and the Trust Territory and their schools and vocational training programs in Alaska, Hawaii and the mainland United States; and the carrier shall file with the Board tariffs showing all fares, rates, charges and applicable rules for air transportation provided under this subsection.

³In markets other than U.S.-Pago Pago, we have not yet determined to set rates on the basis of normal-fare standard load factors; in those markets, student discounts will therefore be treated like all other discounts in determining costs and revenue needs.

REQUEST FOR COMMENTS

Interested persons may take part in the rulemaking by submitting 20 copies of written data, views, or arguments on the subjects discussed. The Board will consider all relevant material received by the date shown at the beginning of this notice before taking final action on the proposed rules.

Individual members of the general public who wish to express their interest as consumers by informally taking part in this proceeding may do so by submitting comments in letter form to the Docket Section without having to file additional copies.

FEDERAL TRADE COMMISSION

[16 CFR Part 13]

[File No. 772 3017]

ALDENS, INC.

Consent Agreement with Analysis to Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Provisional consent agreement.

SUMMARY: In settlement of alleged violations of Federal law prohibiting unfair acts and practices and unfair methods of competition, this provisionally accepted consent agreement, among other things, would require a Chicago, Ill. mail order house to cease discriminating against credit applicants on basis of sex or marital status, and to cease failing to timely provide rejected applicants with the reasons for such adverse action. Further, when denial of credit is based on consumer credit reports, the firm is required to furnish affected parties with the names and addresses of reporting companies.

ADDRESS: Comments should be directed to: Office of the Secretary, Federal Trade Commission, 6th and Pennsylvania Ave. NW., Washington, D.C. 20580.

DATE: Comments must be received on or before April 14, 1978.

FOR FURTHER INFORMATION CONTACT:

Lewis H. Goldfarb, Asst. Director for Credit Practices, Bureau of Consumer Protection, Federal Trade Commission, 6th and Pennsylvania Ave. NW., Washington, D.C. 20580, 202-724-1139.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the F.T.C. Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and provisionally accepted by the Commission, has been placed on the public record, together with material submitted to the Commission that is not exempt from public disclosure under the Freedom of Information Act, for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with Section 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

UNITED STATES OF AMERICA BEFORE FEDERAL TRADE COMMISSION

In the Matter of ALDENS, INC., a corporation.

File No. 772 3017, Agreement Containing Consent Order To Cease and Desist.

The Federal Trade Commission having initiated an investigation of certain acts and practices of Aldens, Inc., a corporation, and it now appearing that Aldens, Inc., a corporation, hereinafter sometimes referred to as proposed respondent, is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated.

It is hereby agreed by and between Aldens, Inc., by its duly authorized officer and its attorneys, and counsel for the Federal Trade Commission that:

1. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the facts as alleged in the draft complaint here attached are true or that any law has been violated.

2. Proposed respondent Aldens, Inc. is a corporation organized, existing and doing business under and by virtue of the laws of the State of Illinois, with its office and principal place of business located at 5000 West Roosevelt Road, Chicago, Ill. 60607.

3. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint here attached.

4. Proposed respondent waives: (a) Any further procedural steps; (b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and (c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

5. This agreement shall not become a part of the official record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released; and such acceptance may be withdrawn by the Commission if comments or views submitted to the Com-

mission disclose facts or considerations which indicate that the order contained in the agreement is inappropriate, improper or inadequate.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of Section 2.34(b) of the Commission's Rules, the Commission may, without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and shall become final and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service on respondent. Mailing of the complaint and decision containing the agree to order to the undersigned officer at proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby, and it understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order, and that it may be liable for a civil penalty in the amount provided by law for each violation of the order after it becomes final.

8. It is agreed that the relief for consumers set forth in the order contained herein fully satisfies any claim for consumer redress which the Commission has under sections 5(b) and 19 of the Federal Trade Commission Act, as amended, arising out of the acts and practices alleged in the draft of complaint, prior to the effective date of this order. By its final acceptance of this agreement, with such modifications, if any, which the parties may make prior to said final acceptance, the Commission waives its right to commence a civil action under section 19 of the Federal Trade Commission Act, as amended, with respect to the acts and practices alleged in the Commission's draft of complaint, prior to the effective date of this order.

9. It is further agreed that to the extent the provisions of Subparagraphs 7(c) and 7(d) of Order 1 of the agreed to order differ from the provisions of any final order issued by the Commission against Montgomery Ward and Company, Incorporated which deals with the determination and disclosure of reasons for denial, respondent, upon petition to the Commission, shall be entitled to modification of Subparagraphs 7(c) and 7(d) of Order 1 to conform to the terms of such final order.

ORDER

Definitions: For the purposes of this Order the following definitions are applicable:

(a) "Regulation B" shall refer to that version of Regulation B (12 C.F.R. § 202) of the Equal Credit Opportunity Act, 15 U.S.C. §§ 1691-1691e, as amended by Pub. L. No. 94-239, in effect on and after March 23, 1977.

(b) The terms "account," "applicant," "application," "contractually liable," "consumer credit," "creditor," "credit transaction," "discriminate against an applicant," "inadvertent error," "marital status" and "open end credit" shall be defined as provided by section 202.2 of Regulation B.

(c) The terms "consumer report" and "consumer reporting agency" shall be defined as provided in section 603(d) and 603(f), respectively, of the Fair Credit Reporting Act (15 U.S.C. § 1681a (d) and (f) (1970)).

ORDER I

It is ordered that respondent Aldens, Inc., a corporation, its successors and assigns, and its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with every application for consumer credit do forthwith cease and desist from:

1. Discriminating, against applicants for credit on the basis of sex or marital status with respect to any aspect of a credit transaction in violation of section 202.4 of Regulation B.

2. Taking sex or marital status into account in a credit scoring system or other method of evaluating applications in violation of section 202.6(b)(1) of Regulation B.

3. Failing to consider child support payments, where disclosed by the applicant as income in evaluating applications, to the extent that such payments are likely to be consistently made, as required by section 202.6(b)(5) of Regulation B.

4. Requesting, where the applicant applies for an unsecured separate account in a State other than a community property State, the name of the applicant's spouse in violation of section 202.5(d)(1) of Regulation B.

5. Requesting or considering information concerning an applicant's spouse (or former spouse under (e) below) unless:

(a) the spouse will be permitted to use the account; or

(b) the spouse will be contractually liable upon the account; or

(c) the applicant is relying on the spouse's income as a basis for repayment of the credit requested; or

(d) the applicant resides in a community property State or property upon which an applicant is relying as a basis for repayment of the credit requested is located in such a State; or

(e) the applicant is relying on alimony, child support or separate maintenance payments from a spouse or former spouse as a basis or repayment of the credit requested, in violation of section 202.5(c) of Regulation B.

6. Failing to preserve records including (1) written consumer reports received from consumer reporting agencies, (2) worksheets on which information given orally by a consumer reporting agency concerning the applicant's credit history was recorded by respondent's employees, (3) worksheets on which information concerning the applicant derived from telephone calls to various natural persons, corporations and partnerships was recorded by respondent's employees and (4) written documents on which the points

assigned by respondent's point scoring system to applicant's answers to various items on the Aldens charge application were recorded by respondent's employees, as required by section 202.12 of Regulation B.

7. Failing to provide applicants against whom adverse action is taken with a statement of specific reasons for the action taken, either at the time of notifying the applicant of such action or within 30 days of receiving an oral or written request for the reasons from the applicant within 60 days of notification of adverse action, as required by section 202.9 of Regulation B.

(a) Provided that if respondent cannot locate the applicant's file after good faith efforts because the applicant did not supply the file number assigned to that application, the respondent shall be deemed to be in compliance with the provisions of this paragraph only if it had clearly and conspicuously advised the applicant in the notification of adverse action of the file number and that the respondent will be unable to furnish the reason(s) for denial unless the applicant furnishes the file number with the request for reasons. Where respondent is unable to locate the applicant's file as a result of the applicant's failure to supply the file number with the request for reasons, the respondent shall so notify the applicant of that fact.

(b) Respondent shall not be deemed to have violated the requirements of this paragraph if it cannot locate the applicant's file after good faith efforts because of an inadvertent error; provided that, (1) the respondent so notifies the applicant, and (2) upon discovering the error the respondent corrects it as soon as possible and commences compliance with this paragraph.

(c) Provided further that where an application for credit is denied by respondent based on the failure of the applicant to obtain a sufficient number of points under a point scoring system, a statement of the specific reasons for the action taken complies with this paragraph only if it includes:

(i) A brief explanation of respondent's point scoring system which informs the applicant that: (1) the system assigns a value to a number of different creditworthiness criteria taken from the face of the application or other sources, (2) the applicant's total score on all criteria determines whether respondent will grant or deny credit, and (3) the factor(s) disclosed are those which most significantly affected the respondent's decision (an example of an explanation that complies with this subparagraph is set forth in Appendix A; an explanation which is substantially similar to Appendix A will be considered to be in compliance with the provisions of this subparagraph to the extent to which it accurately describes respondent's scoring system); and

(ii) the criteria, not fewer than four (4), in respondent's point scoring system which most significantly affected respondent's adverse decision, except that (1) disclosure of a single criterion complies with this paragraph if that criterion would cause an adverse decision were the applicant to achieve a maximum rating on the other criteria used in evaluating applicants, and (2) respondent shall not disclose a criterion on which the applicant scored the maximum number of points even if this results in the disclosure of fewer than four criteria. For the purpose of this paragraph (7) the term "criterion" means any item of information to which the respondent assigns points, for example, "length of employment" and "no

telephone at residence." The most significant criteria are to be determined by selecting the criteria which produced the greatest differential between the applicant's score and the maximum number of points obtainable for each criterion. Respondent shall not be deemed to have violated the requirements of this paragraph if it does not list the criteria which most significantly affected respondent's adverse decision because of an inadvertent error.

(d) Respondent shall notify the Commission if within ten (10) years from the effective date of this order it changes the credit scoring system in use at the time of execution of this order in a manner which would materially affect the accuracy of the reasons provided under subparagraph 7(c)(ii); provided that any changes in respondent's credit scoring system (e.g., addition or deletion of specific criteria, increase or reduction of the points assigned to specific criteria) which are made in good faith to adjust respondent's bad debt losses, to reduce respondent's operating expenses, or to increase the availability of credit shall be presumed not to materially affect the accuracy of reasons given under subparagraph 7(c)(ii).

(e) Provided further, that subsequent approval of an application which respondent initially denied shall not relieve respondent of its obligation to provide the statement of specific reasons for the initial denial as required by section 202.9 of Regulation B and this paragraph.

8. Failing to provide a statement of the reasons(s) for denial as set forth in paragraph 7, above, to all applicants who were denied credit and requested the reason(s) for denial during the period January 31, 1976 through March 22, 1977.

(a) Provided that if respondent subsequently opened an account for any applicant who was denied credit and requested the reason(s) for denial during the period from January 31, 1976, through March 22, 1977, respondent shall not be required to furnish such applicants the reason(s) for denial provided for in this paragraph if the applicant expressly accepted the account through acceptance of merchandise ordered on the account or submission of subsequent orders for merchandise.

9. Failing to review the applications of all persons employed as waitresses who were denied credit during the period October 28, 1975, through March 22, 1977, and send such applicants by first-class mail a notice in the language and form shown in Appendix B, which shall contain as an enclosure a current Aldens Charge Application. Respondent shall review the charge applications which are mailed to the Company in response to the notice letter (Appendix B) according to the credit granting standards in effect at the time that the charge application is received and in effect on August 1, 1976, except that no less than two (2) points shall be awarded for occupation. Respondent shall open accounts for those applicants who qualify under either set of credit granting standards. If the applicant qualifies under both standards, the applicant shall be granted the higher of the two credit limits. Respondent shall send each such applicant a notification of action taken as required by section 202.9 of Regulation B and a notification of the amount of the credit limit, if any, established on the account.

ORDER II

It is further ordered that respondent, Aldens, Inc., a corporation, its successors and assigns, and its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with any application for credit that is primarily for personal, family or household purposes, and in connection with either the receipt or consideration of any consumer report, do forthwith cease and desist from:

1. Failing whenever credit for personal, family or household purposes involving the consumer is denied either wholly or partly because of information contained in a consumer report from a consumer reporting agency, to so advise the consumer against whom such adverse action has been taken and to supply the name and address of the consumer reporting agency making the report as required by section 615(a) of the Fair Credit Reporting Act.

(a) Provided that respondent shall not be liable for a civil penalty for any violation of this Paragraph if: (i) respondent shows by a preponderance of the evidence that the violation was caused by inadvertent error; and (ii) upon discovery of the violation the respondent corrects it as soon as possible by sending the notice required by this section to the consumer.

2. Failing to advise each applicant who was denied credit for personal, family or household purposes involving the consumer based in whole or in part on information contained in a consumer report from a consumer reporting agency, for a period of three (3) years prior to the date of execution of this order, of such action and to supply the name and address of the consumer reporting agency making the report as required by section 615(a) of the Fair Credit Reporting Act.

(a) Provided that to the extent that respondent's records reflect that the notice required by section 615(a) of the Fair Credit Reporting Act was previously given to the applicant respondent shall be deemed in compliance with the provision as to such applicants.

(b) Provided further that where the applicant was denied credit on the basis of a "credit index" report, respondent shall also advise the applicant that the information used may have concerned items of adverse information relating not to the applicant but to individuals residing at the applicant's address.

It is further ordered that respondent shall preserve evidence of compliance with the requirements imposed under this order for a period of not less than 25 months after respondent notifies each applicant of the reasons for denial pursuant to paragraph 8 of order I, above, the action taken on applications for new accounts pursuant to paragraph 9 of order I, above, and the name and address of any consumer reporting agency pursuant to paragraph 2 of order II, above. Respondent shall upon request permit the Commission through its duly authorized representatives to inspect such records.

It is further ordered that respondent shall deliver a copy of this order to cease and desist to all present and future supervisory employees engaged in reviewing, evaluating or otherwise processing applications for credit.

It is further ordered that respondent notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution,

arrangement or sale resulting in the emergence of successor corporations, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

It is further ordered that respondent shall within sixty (60) days after service upon it of this order, file with the Commission a written report setting forth in detail the manner and form in which it has complied with this order. Respondent shall also within one hundred twenty (120) days after service upon it of this order file with the Commission a supplemental written report setting forth in detail the manner and form in which it has complied with paragraph 9 of order I of this order.

APPENDIX A

In reviewing your application, Aldens used a credit scoring system that is based on our experience with other applicants. This system assigns points to various items of information on your application (and, as applicable, other sources of the information scored, such as credit reports). We scored the information which you supplied in your application (or, as applicable, other sources), totaled the points and found that you did not achieve the minimum score required for purchases in the amount requested by your order.

We have listed below the four factors which most significantly affected our decision to deny your application for credit.

APPENDIX B

ALDENS, 5000 WEST ROOSEVELT ROAD,
CHICAGO, ILL.

Ms. _____
(Street Address)
(City, State)

DEAR MS. _____: We regret that due to an oversight in our initial evaluation of your recent application for credit, we were unable to open an account for you. Aldens has now modified its credit granting standards and would appreciate the opportunity to review your application for credit again.

Should you desire to open an Aldens Credit Account, please complete and send us the enclosed charge application. We'll evaluate your application and notify you of our decision as soon as possible.

Thank you for considering Aldens.

ALDENS, INC.,
CHARLES ARTHUR,
New Account Manager.

ALDENS, INC.

ANALYSIS OF PROPOSED CONSENT ORDER
TO AID PUBLIC COMMENT

The Federal Trade Commission has accepted an Agreement Containing a Consent Order to Cease and Desist from Aldens, Inc., 5000 West Roosevelt Road, Chicago, Ill. 60607.

The proposed consent order has been placed on the public record for sixty (60) days for receipt of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission

will review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order. The agreement states that it is for settlement purposes only and does not constitute an admission by the proposed respondent that the law has been violated as alleged in the complaint.

The complaint that led to the proposed order to cease and desist alleges violations of two separate Acts: The Equal Credit Opportunity Act ("ECOA") and the Fair Credit Reporting Act ("FCRA"). The alleged violations and corresponding order provisions of each of these Acts will be discussed separately below.

1. *Equal Credit Opportunity Act allegations and order provisions*

The complaint contains allegations of nine separate violations of the ECOA and Regulation B as in effect between October 28, 1975 and March 23, 1977. The proposed order provisions are designed to provide prospective relief as well as retroactive relief in some instances.

(1) *Denial of credit to waitresses.* The complaint alleges that Aldens discriminated on the basis of sex because it denied credit to all female applicants who were "waitresses" but gave a positive value in its credit scoring system to the occupation of "waiter". The proposed order would require Aldens to cease discriminating on the basis of sex and also require Aldens to send a letter inviting all waitresses who were denied credit during the period October 28, 1975 to March 22, 1977 to reapply for credit in light of changes to Aldens' credit scoring standards. Aldens would be required to evaluate these resolicited applications without regard to the applicant's sex.

(2) *Failure to consider child support payments.* The complaint alleges that Aldens failed to consider child support payments as income. The proposed order would require Aldens to consider child support payments to the extent they are likely to be consistently made.

(3) *Requesting the name of an applicant's spouse.* The complaint alleges that Aldens wrongfully asked applicants for unsecured separate accounts in states other than community property states to disclose the name of their spouse. The proposed order would require Aldens to cease and desist from asking an applicant who has applied for a separate, unsecured account in a state other than a community property state for the name of his or her spouse.

(4) *Requesting the marital status of the applicant.* The complaint alleges that Aldens' practice of requesting the nonapplicant spouse's name in the circumstances described above amounts

to a request for the marital status of the applicant. This alleged violation would be remedied by the provision prohibiting Aldens from obtaining the name of the spouse in impermissible circumstances, as described above.

(5) *Ordering credit bureau reports on a nonapplicant spouse.* The complaint alleges that Aldens used the name of the spouse to order credit bureau reports on nonapplicant spouses in situations not permitted by Regulation B. The complaint also alleges that Aldens ordered and used credit bureau reports in a discriminatory manner by ordering credit bureau reports on the husbands of female applicants for separate credit but not ordering credit bureau reports on the wives of male applicants for separate credit. The proposed order would require Aldens to cease and desist from ordering credit bureau reports on nonapplicant spouses, except where specifically permitted by Regulation B, and to cease discriminating on the basis of sex and marital status in the evaluation of creditworthiness.

(6) *Use of credit reports from Hooper-Holmes Credit Index.* The complaint alleges that Aldens used credit reports from Credit Index (a consumer reporting agency subsidiary of Hooper-Holmes Bureau, Inc.) in a manner which had the effect of discriminating against married applicants. These reports consist of lists of adverse information concerning persons who live at the applicant's address who have the same last name as the applicant. Because Aldens denied applications if any person at the applicant's address with the same last name had a bad credit history, the complaint alleges that Aldens' policy has the effect of discriminating against married persons. The proposed order would prohibit Aldens from discriminating on the basis of marital status in any aspect of a credit transaction.

(7) *Refusal to issue joint accounts where the wife uses her maiden name.* The complaint alleges that Aldens has refused to issue joint accounts to married couples where the wife uses her maiden name or her first name and a combined surname. The order would remedy this alleged violation by prohibiting Aldens from discriminating on the basis of sex or marital status.

(8) *Failure to preserve records.* The complaint alleges that Aldens failed to retain for 15 months certain written records as required by the original Regulation B, including point scoring sheets, credit bureau reports and credit evaluation worksheets. The order would require Aldens to prospectively preserve all documents as required by amended Regulation B.

(9) *Failure to provide reasons for denial.* The complaint alleges that Aldens failed to comply with the original Regulation B requirement that

Aldens provide all rejected applicants with the reasons for denial, upon request. Aldens advised some applicants that their application could not be located and therefore Aldens could not tell them why it was denied. Other applicants were advised that the denial was due to information from a credit bureau report which was obtained after the request for reasons had been received. The complaint further alleges that Aldens also failed to answer oral requests for reasons. The proposed order would require Aldens to retroactively provide all applicants who had made requests for reasons for denial during the period of January 31, 1976 through March 22, 1977 with the specific reasons for denial. The proposed order would also require Aldens to prospectively provide specific reasons for denial in accordance with the requirements of amended Regulation B. When a denial is due to a low score in Alden's credit scoring system, the proposed order would require Aldens to briefly explain its credit scoring system and disclose the four criteria in its system which most significantly affected Alden's decision to deny the application. Aldens would not be permitted to group several criteria together under one generic heading but would have to disclose the actual criteria used. Aldens would also have to provide reasons for the initial denial even if it later reevaluates the account and decides to approve it.

II. Fair Credit Reporting Act allegations and order provisions.

The complaint alleges that Aldens violated Section 615(a) of the Fair Credit Reporting Act. Section 615(a) provides, in pertinent part, that whenever consumer credit is denied either wholly or partly because of information contained in a consumer report ("credit report"), from a consumer reporting agency ("credit bureau"), the creditor must so advise the consumer and supply the name and address of the consumer reporting agency making the report. The complaint alleges that subsequent to April 25, 1971 Aldens violated Section 615(a) in three ways. First, it alleges that Aldens rejected applications for credit in whole or in part because of adverse information obtained from Credit Index concerning persons who resided at the applicant's addresses with the same or similar last name without providing the FCRA notice. Second, it alleges that Aldens rejected applications for credit in whole or in part because of information from consumer reporting agencies which contradicted or failed to confirm information on the application without providing the FCRA notice. Third, it alleges that Aldens rejected applications for credit in whole or in part because reports from consumer reporting agencies failed to pro-

vide sufficient information regarding the applicant's creditworthiness. The proposed order would require Aldens to retroactively provide all applicants who were denied in whole or in part because of information in a consumer report during the three year period prior to the effective date of this order with the notification of that fact and the name and address of the consumer reporting agency that provided the report. The proposed order would also prospectively require Aldens to comply with Section 615(a) and would require Aldens to notify consumers who are denied credit because of information contained in a Credit Index Consumer report that the information used may also have concerned adverse information relating to persons other than the applicant who reside at the applicant's address.

The proposed consent order would require Aldens to file compliance reports and to deliver a copy of the order to all present and future supervisory employees engaged in reviewing, evaluating or otherwise processing applications for credit.

The purpose of this analysis is to facilitate public comment on the proposed order and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

CAROL M. THOMAS,
Secretary.

JOINT BOARD FOR THE ENROLLMENT OF ACTUARIES

[20 CFR Part 901]

SUSPENSION AND TERMINATION OF ENROLLMENT OF ACTUARIES

Proposed Adoption of Provisions Governing Grounds and Procedures for Suspension or Termination of Enrolled Actuaries

AGENCY: Joint Board for the Enrollment of Actuaries.

ACTION: Proposed rule.

SUMMARY: The proposed rule amends the regulations governing the performance of actuarial services with respect to plans to which the Employee Retirement Income Security Act of 1974 (ERISA) applies. The amendments specify grounds for the suspension or termination of enrollment to perform such services. Such grounds include specified acts of disreputable conduct, failure to discharge duties imposed by ERISA, and failure to satisfy the requirements for enrollment in effect at the time an enrollee applied for enrollment. The amendments also provide procedures to be followed in initiating and conducting proceed-

ings for suspension or termination of an individual's enrollment. In addition, a standard of performance required of enrolled actuaries, reflecting the intent of Congress, has been added to those already delineated in the regulations.

The proposed rule is intended to provide standards for the exercise of the authority conferred upon the Joint Board by Section 3042(b) of ERISA, Title 29 U.S. Code, Section 1242(b).

DATES: Comments must be in writing (preferably seven copies) and must be received on or before April 17, 1978. No hearing is contemplated but one may be held at a time and place set in a later notice in the FEDERAL REGISTER, if requested by an interested person desiring an opportunity to comment orally and raising a genuine issue. The effective date will be 30 days after publication of the anticipated final rule in the FEDERAL REGISTER.

ADDRESS: Comments should be addressed to the Office of the Executive Director, Joint Board for the Enrollment of Actuaries, U.S. Department of the Treasury, Washington, D.C. 20220.

FOR FURTHER INFORMATION CONTACT:

Mr. Leslie S. Shapiro, Executive Director, 202-634-5071.

SUPPLEMENTARY INFORMATION: These proposed regulations are to be issued under the authority contained in Section 3042, Subtitle C of Title 3 of the Employee Retirement Income Security Act of 1974 (88 Stat. 1002, 29 U.S.C. 1242).

GROUND FOR DISCIPLINARY ACTION

Section 901.31(a) of the proposed regulations permits suspension or termination of an actuary's enrollment if it is found that he/she did not satisfy the eligibility requirements in effect at the time of application. Individuals who applied before January 1, 1976 must have satisfied the requirements contained in 20 CFR 901.12. Those requirements include experience and successful completion of protored societal examinations, a Joint Board examination, or qualifying formal education. An additional requirement for enrollment is that an applicant not have engaged in certain categories of disreputable conduct. Such disreputable conduct includes conduct evidencing fraud, dishonesty or breach of trust; conviction of an offense referred to in Section 411 of ERISA; and the knowing submission of false or misleading information on an application for enrollment or a report presenting actuarial information. Individuals who apply for enrollment on or after January 1, 1976 must satisfy the requirements for enrollment contained in 20 CFR 901.13. Those requirements in-

clude experience, and demonstration of knowledge of basic actuarial mathematics and pension actuarial matters. The disreputable conduct for which an individual who applies on or after January 1, 1976 can be denied enrollment is specified by 20 CFR 901.13(c).

Section 901.31(b) provides that an enrolled actuary's failure to discharge his/her duties under ERISA, which include those enumerated in 20 CFR 901.20 (42 FR 39204), may also constitute grounds for suspension or termination of enrollment. Some of the duties in 20 CFR 901.20 are derived from Sections 102(a)(4), 103(d) and 1033(a) of ERISA, which specify duties of enrolled actuaries.

Finally, Section 901.31(c) permits suspension or termination of enrollment if, after applying for enrollment, an individual has engaged in conduct specified in Section 901.13(e)(1), or other conduct evidencing fraud, dishonesty or breach of trust. The conduct specified in Section 901.13(e)(1) includes certain adjudications or determinations that the actuary has engaged in conduct evidencing fraud, dishonesty or breach of trust; participation in any way in knowingly giving false or misleading information to Treasury, Labor, or the Pension Benefit Guaranty Corporation; commission of specified tax offenses; attempting, offering or agreeing to attempt to exert improper influence on the official action of a Treasury, Labor, or Pension Benefit Guaranty Corporation employee; disbarment or suspension from the practice of certain professions; and contemptuous conduct in connection with a matter before Treasury, Labor, or the Pension Benefit Guaranty Corporation. The other conduct for which enrollment may be suspended or terminated is specified in proposed Section 901.31(c)(1)-(5). Although section 3042(b) of ERISA is not clear as to the precise scope of the conduct for which enrollment may be suspended or terminated, the Joint Board believes that the proposed rule reflects Congressional intent as shown by the legislative history of ERISA, i.e., that actuaries' duties were to be similar to those required for attorneys, certified public accountants and enrolled agents who practice before the Internal Revenue Service. S. Rep. No. 383, 93d Cong., 68 (1973); H. Rep. No. 807, 93d Cong., 93 (1974). (The duties imposed on those who practice before the Internal Revenue Service appear in 31 CFR Part 10.)

DISCIPLINARY PROCEDURES

Other than the requirement in Section 3042(b) for notice and an opportunity for a hearing, ERISA itself does not mandate pursuit of any particular procedures in suspending or terminating an actuary's enrollment. However, the legislative history is again instruc-

tive. The Report of the Ways and Means Committee of the House on H.R. 12855, H. Rep. 807 93d Cong., 94 (1974) states:

Your committee intends that proceedings brought against enrolled actuaries will be instituted in the same general manner as proceedings against others practicing before the Service and will follow the same general procedure as other disciplinary proceedings. Generally disciplinary proceedings would involve a complaint served on the actuary, an opportunity to answer, and an evidentiary hearing before a hearing examiner who would render a decision. . . .

Each of the procedural elements referred to in H. Rep. No. 83-807 has been incorporated in these proposed regulations (except for appeal to the Secretary of the Treasury which would have been inappropriate under ERISA as enacted). The procedures proposed are modeled after those in 31 CFR Part 10. Under Section 901.33, the Executive Director initiates a proceeding for the suspension or termination of an actuary's enrollment when there is reason to believe that such actuary has violated any provision of the laws or regulations governing enrollment. It is intended that a disciplinary action will not be instituted capriciously. Sections 901.50 and 901.51 provide that either the Executive Director or the respondent may appeal an administrative law judge's decision to the joint board. These procedures parallel those employed in cases of attorneys, certified public accountants and enrolled agents whose eligibility to practice before the Internal Revenue Service is called into question because of alleged disreputable conduct. See 31 CFR 10.54, 10.71 and 10.72.

STANDARDS OF CONDUCT

In order to carry out the Congressional intent (See S. Rep. No. 93-383, 93d Cong., 68 (1973)), a standard of performance of actuarial service has been proposed requiring an enrolled actuary to notify the appropriate office when he/she discovers that a required statement signed by the enrolled actuary has not been filed.

In consideration of the foregoing, it is proposed to amend 20 CFR Part 901 as set forth below.

Dated: February 9, 1978.

ROWLAND E. CROSS,
Chairman, Joint Board
for the Enrollment of Actuaries.

Approved:
RAY MARSHALL,
Secretary of Labor.
WM. BLUMENTHAL,
Secretary of Treasury.

§ 901.13 [Amended]

1. By amending § 901.13(e)(ii), (iv), and (vi) by adding, "or the Pension Benefit Guaranty Corporation" following the words "the Department of Labor," in each of those provisions.

2. By amending § 901.20 by adding the following paragraph:

§ 901.20 Standards for performance of actuarial services.

(h) *Notification.* An enrolled actuary shall provide written notification of the non-filing of any actuarial document he/she has signed upon discovery of the non-filing. Such notification shall be made to the office of the Internal Revenue Service, the Department of Labor, or the Pension Benefit Guaranty Corporation where such document should have been filed.

3. By adding new Subparts D and E as follows:

Amend the table of contents to read as follows:

Subpart D—Suspension or Termination of Enrollment	
Sec.	
901.30	Authority to suspend or terminate enrollment.
901.31	Grounds for suspension or termination of enrollment.
901.32	Receipt of information concerning enrolled actuaries.
901.33	Initiation of proceeding.
901.34	Conferences.
901.35	Contents of complaint.
901.36	Service of complaint and other papers.
901.37	Answer.
901.38	Supplemental charges.
901.39	Reply to answer.
901.40	Proof; variance; amendment of pleadings.
901.41	Motions and requests.
901.42	Representation.
901.43	Administrative Law Judge.
901.44	Hearings.
901.45	Evidence.
901.46	Depositions.
901.47	Transcript.
901.48	Proposed findings and conclusions.
901.49	Decision of the Administrative Law Judge.
901.50	Appeal to the Joint Board.
901.51	Decision of the Joint Board.
901.52	Effect of suspension or termination of enrollment, surrender of enrollment certificate.
901.53	Notice of suspension or termination of enrollment.
901.54	Petition for Reinstatement.
Subpart E—General Provisions	
901.70	Records.
901.71	Special orders.
AUTHORITY:	Sec. 3042(b), ERISA, Title 29 U.S. Code, Sec. 1242(b).

Subpart D—Suspension or Termination of Enrollment

§ 901.30 Authority to suspend or terminate enrollment.

Under Section 3042(b) of ERISA the Joint Board may, after notice and op-

portunity for a hearing, suspend or terminate the enrollment of an enrolled actuary if the Joint Board finds that such enrolled actuary

(a) has failed to discharge his/her duties under ERISA, or

(b) does not satisfy the requirements for enrollment in effect at the time of his/her enrollment.

§ 901.31 Grounds for suspension or termination of enrollment.

(a) *Failure to satisfy requirements for enrollment.* The enrollment of an actuary may be terminated if it is found that the actuary did not satisfy the eligibility requirements set forth in §§ 901.12 or 901.13, whichever is applicable.

(b) *Failure to discharge duties.* The enrollment of an actuary may be suspended or terminated if it is found that the actuary, following enrollment, failed to discharge his/her duties under ERISA. Such duties include those set forth in § 901.20.

(c) *Disreputable conduct.* The enrollment of an actuary may be suspended or terminated if it is found that the actuary has, at any time after he/she applied for enrollment, engaged in any conduct set forth in § 901.13(c)(1) or other conduct evidencing fraud, dishonesty, or breach of trust. Such other conduct includes, but is not limited to, the following:

(1) Conviction of any criminal offense under the laws of the United States, (including Section 411 of ERISA, 29 U.S.C. 1111), any State thereof, the District of Columbia, or any territory or possession of the United States, which evidences fraud, dishonesty, or breach of trust.

(2) Filing false or altered documents, affidavits, financial statements or other papers on matters relating to employee benefit plans or actuarial services.

(3) Knowingly making false or misleading representations, either orally or in writing, on matters relating to employee benefit plans or actuarial services, or failure to disclose information relative thereto.

(4) The use of false or misleading representations with intent to deceive a client or prospective client, or of intimations that the actuary is able to obtain special consideration or action from an officer or employee of any agency or court authorized to determine the validity of pension plans under ERISA.

(5) Willful violation of any of the regulations contained in this part.

§ 901.32 Receipt of information concerning enrolled actuaries.

If an officer or employee of the Department of the Treasury, the Depart-

ment of Labor, the Pension Benefit Guaranty Corporation, or a member of the Joint Board has reason to believe that an enrolled actuary has violated any provision of this part, or if any such officer, employee or member receives information to that effect, he/she may make a written report thereof, which report or a copy thereof shall be forwarded to the Executive Director. If any other person has information of any such violation, he/she may make a report thereof to the Executive Director or to any officer or employee of the Department of the Treasury, the Department of Labor, or to the Pension Benefit Guaranty Corporation.

§ 901.33 Initiation of proceeding.

Whenever the Executive Director has reason to believe that an enrolled actuary has violated any provision of the laws or regulations governing enrollment, such individual may be reprimanded or a proceeding may be initiated for the suspension or termination of such individual's enrollment. A reprimand as used in this paragraph is a statement informing the enrolled actuary that, in the opinion of the Executive Director, his/her conduct is in violation of the regulations and admonishing the enrolled actuary that repetition of the conduct occasioning the reprimand may result in the institution of a proceeding for the suspension or termination of the actuary's enrollment. A proceeding for suspension or termination of enrollment shall be initiated by a complaint naming the respondent actuary, signed by the Executive Director and filed in the Executive Director's office. Except in cases where the nature of the proceeding or the public interest does not permit, a proceeding will not be initiated under this section until the facts which may warrant such a proceeding have been called to the attention of the actuary in writing and he/she has been given an opportunity to respond to the allegations of misconduct.

§ 901.34 Conferences.

(a) *In general.* The Executive Director may confer with an enrolled actuary concerning allegations of his/her misconduct whether or not a proceeding for suspension or termination has been initiated against him/her. If the conference results in agreement as to certain facts or other matters in connection with such a proceeding, such agreement may be entered in the record at the request of the actuary or the Executive Director.

(b) *Voluntary suspension or termination of enrollment.* An enrolled actuary, in order to avoid the initiation or conclusion of a suspension or termi-

nation proceeding, may offer his/her consent to suspension or termination of enrollment or may offer his/her resignation. The Executive Director may accept the offered resignation or may suspend or terminate enrollment in accordance with the consent offered.

§ 901.35 Contents of complaint.

(a) *Charges.* A complaint initiating a suspension or termination proceeding shall describe the allegations which are the basis for the proceeding, and fairly inform the respondent of the charges against him/her.

(b) *Answer.* In the complaint, or in a separate paper attached to the complaint, notice shall be given of the place at, and time within which the respondent shall file an answer, which time shall not be less than 15 days from the date of service of the complaint. Notice shall be given that a decision by default may be rendered against the respondent if an answer is not filed as required.

§ 901.36 Service of complaint and other papers.

(a) *Complaint.* The complaint or a copy thereof may be served upon the respondent by certified mail, or first-class mail as hereinafter provided, by delivering it to the respondent, or the respondent's attorney or agent of record either in person or by leaving it at the office or place of business of the respondent, the attorney or agent, or in any other manner which may have been agreed to in writing by the respondent. Where the service is by certified mail, the return post office receipt signed by or on behalf of the respondent shall be proof of service. If the certified matter is not claimed or accepted by the respondent and is returned undelivered, complete service may be made upon the respondent by mailing the complaint to him/her by first-class mail, addressed to the respondent at the last address known to the Executive Director. If service is made upon the respondent or his/her attorney or agent in person or by leaving the complaint at the office or place of business of the respondent, attorney or agent, the verified return by the person making service, setting forth the manner of service, shall be proof of such service.

(b) *Service of papers other than complaint.* Any paper other than the complaint may be served upon the respondent as provided in paragraph (a) of this section or by mailing the paper by first-class mail to the respondent at the last address known to the Executive Director or by mailing the paper by first-class mail to the respondent's attorney or agent. Such mailing shall constitute complete service. Notices

may also be served upon the respondent or his/her attorney or agent by telegraph.

(c) *Filing of papers.* Whenever the filing of a paper is required or permitted in connection with a suspension or termination proceeding, and the place of filing is not specified by this subpart or by rule or order of the Administrative Law Judge, the paper shall be filed with the Executive Director of the Joint Board for the Enrollment of Actuaries, Treasury Department, Washington, D.C. 20220. All papers shall be filed in duplicate.

§ 901.37 Answer.

(a) *Filing.* The respondent's answer shall be filed in writing within the time specified in the complaint or notice of initiation of the proceeding, unless, on application, the time is extended by the Executive Director or the Administrative Law Judge. The answer shall be filed in duplicate with the Executive Director.

(b) *Contents.* The answer shall contain a statement of facts which constitute the grounds of defense and it shall specifically admit or deny each allegation set forth in the complaint, except that the respondent shall not deny a material allegation in the complaint which he/she knows to be true, or state that he/she is without sufficient information to form a belief when in fact the respondent possesses such information. The respondent may also state affirmatively special matters of defense.

(c) *Failure to deny or answer allegations in the complaint.* Every allegation in the complaint which is not denied in the answer shall be deemed to be admitted and may be considered as proven, and no further evidence in respect of such allegation need be adduced at a hearing. Failure to file an answer within the time prescribed in the notice to the respondent, except as the time for answer is extended by the Executive Director or the Administrative Law Judge, shall constitute an admission of the allegations of the complaint and a waiver of hearing, and the Administrative Law Judge may make a decision by default, without a hearing or further procedure.

§ 901.38 Supplemental charges.

If it appears to the Executive Director that the respondent in his/her answer falsely and in bad faith denies a material allegation of fact in the complaint or states that the respondent has no knowledge sufficient to form a belief when he/she in fact possesses such knowledge, or if it appears that the respondent has knowingly introduced false testimony during proceedings for suspension or termination of his/her enrollment, the Executive Director may file supplemental charges against the respondent. Such

supplemental charges may be tried with other charges in the case, provided the respondent is given due notice thereof and is afforded an opportunity to prepare a defense thereto.

§ 901.39 Reply to answer.

No reply to the respondent's answer shall be required, but the Executive Director may file a reply at his/her discretion or at the request of the Administrative Law Judge.

§ 901.40 Proof; variance; amendment of pleadings.

In the case of a variance between the allegations in a pleading and the evidence adduced in support of the pleading, the Administrative Law Judge may order or authorize amendment of the pleading to conform to the evidence, provided that the party who would otherwise be prejudiced by the amendment is given reasonable opportunity to meet the allegations of the pleading as amended. The Administrative Law Judge shall make findings on any issue presented by the pleadings as so amended.

§ 901.41 Motions and requests.

Motions and requests may be filed with the Executive Director or with the Administrative Law Judge.

§ 901.42 Representation.

A respondent or proposed respondent may appear at conference or hearing in person or may be represented by counsel or other representative. The Executive Director may be represented by an attorney or other employee of the Treasury Department.

§ 901.43 Administrative Law Judge.

(a) *Appointment.* An Administrative Law Judge, appointed as provided by section 11 of the Administrative Procedure Act, 60 Stat. 244 (5 U.S.C. 3105), shall conduct proceedings upon complaints for the suspension or termination of enrolled actuaries.

(b) *Powers of Administrative Law Judge.* Among other powers, the Administrative Law Judge shall have authority, in connection with any suspension or termination proceeding of an enrolled actuary, to do the following:

(1) Administer oaths and affirmations;

(2) Make rulings upon motions and requests, which may not be appealed before the close of a hearing except at the discretion of the Administrative Law Judge;

(3) Determine the time and place of hearing and regulate its course of conduct;

(4) Adopt rules of procedure and modify the same as required for the orderly disposition of proceedings;

(5) Rule upon offers of proof, receive relevant evidence, and examine witnesses;

(6) Take or authorize the taking of depositions;

(7) Receive and consider oral or written argument on facts or law;

(8) Hold or provide for the holding of conferences for the settlement or simplification of the issues by consent of the parties;

(9) Perform such acts and take such measures as are necessary or appropriate to the efficient conduct of any proceeding; and

(10) Make initial decisions.

§ 901.44 Hearings.

(a) *In general.* The Administrative Law Judge shall preside at the hearing on a complaint for the suspension or termination of an enrolled actuary. Hearings shall be stenographically recorded and transcribed and the testimony of witnesses shall be taken under oath or affirmation. Hearings will be conducted pursuant to Section 7 of the Administrative Procedure Act, 60 Stat. 241 (5 U.S.C. 556).

(b) *Failure to appear.* If either party to the proceeding fails to appear at the hearing, after due notice thereof has been sent to the parties, the Administrative Law Judge may make a decision against the absent party by default.

§ 901.45 Evidence.

(a) *In general.* The rules of evidence prevailing in courts of law and equity are not controlling in hearings on complaints for the suspension or the termination of the enrollment of enrolled actuaries. However, the Administrative Law Judge shall exclude evidence which is irrelevant, immaterial, or unduly repetitious.

(b) *Depositions.* The deposition of any witness taken pursuant to § 901.46 may be admitted.

(c) *Proof of documents.* Official documents, records, and papers of the Department of the Treasury, the Department of Labor, the Pension Benefit Guaranty Corporation, the Joint Board for the Enrollment of Actuaries or the Office of the Executive Director of the Joint Board for the Enrollment of Actuaries shall be admissible into evidence without the production of an officer or employee to authenticate them. Any such documents, records, and papers may be evidenced by a copy attested to or identified by an officer or employee of the Department of the Treasury, the Department of Labor, the Pension Benefit Guaranty Corporation, the Joint Board for the Enrollment of Actuaries, or the Office of the Executive Director of the Joint Board for the Enrollment of Actuaries, as the case may be.

(d) *Exhibits.* If any document, record, or other paper is introduced into evidence as an exhibit, the Administrative Law Judge may authorize the withdrawal of the exhibit subject

to any conditions which he/she deems proper.

(e) *Objections.* Objections to evidence shall state the grounds relied upon, and the record shall not include argument thereon, except as ordered by the Administrative Law Judge. Rulings on such objections shall be part of the record. No exception to the ruling is necessary to preserve the rights of the parties.

§ 901.46 *Depositions.*

Depositions for use at a hearing may, with the written approval of the Administrative Law Judge, be taken by either the Executive Director or the respondent or their duly authorized representatives. Depositions may be taken upon oral or written interrogatories, upon not less than 10 days written notice to the other party, before any officer duly authorized to administer an oath for general purposes or before an officer or employee of the Department of the Treasury, the Department of Labor, the Pension Benefit Guaranty Corporation, or the Joint Board who is authorized to administer an oath. Such notice shall state the names of the witnesses and the time and place where the depositions are to be taken. The requirement of 10 days notice may be waived by the parties in writing, and depositions may then be taken from the persons and at the times and places mutually agreed upon by the parties. When a deposition is taken upon written interrogatories, any cross-examination shall be upon written interrogatories. Copies of such written interrogatories shall be served upon the other party with the notice, and the copies of any written cross-interrogatories shall be mailed or delivered to the opposing party at least five days before the date of taking the depositions, unless the parties mutually agree otherwise. A party upon whose behalf a deposition is taken must file it with the Administrative Law Judge and serve one copy upon the opposing party. Expenses in the reporting of depositions shall be borne by the party at whose instance the deposition is taken.

§ 901.47 *Transcript.*

In cases where the hearing is stenographically reported by a Government contract reporter, copies of the transcript may be obtained from the reporter at rates not to exceed the maximum rates fixed by contract between the Government and the reporter. Where the hearing is stenographically reported by a regular employee of the Department of the Treasury, the Department of Labor, the Pension Benefit Guaranty Corporation, or the Joint Board, a copy thereof will be supplied to the respondent either without charge or upon the payment of a reasonable fee. Copies of exhibits intro-

duced at the hearing or at the taking of depositions will be supplied to parties upon the payment of a reasonable fee (31 U.S.C. 483a).

§ 901.48 *Proposed findings and conclusions.*

Except in cases where the respondent has failed to answer the complaint or where a party has failed to appear at the hearing, the Administrative Law Judge, before making his/her decision, shall give the parties a reasonable opportunity to submit proposed findings and conclusions and supporting reasons therefor.

§ 901.49 *Decision of the Administrative Law Judge.*

As soon as practicable after the conclusion of a hearing and the receipt of any proposed findings and conclusions timely submitted by the parties, the Administrative Law Judge shall make the initial decision in the case. The decision should be based solely upon the pleading, the testimony and exhibits received in evidence at the hearing or specifically authorized to be subsequently submitted under the applicable laws and regulations. The decision shall include (a) a statement of findings and conclusions, as well as the reasons or basis therefor, upon all the material issues of fact or law presented on the record, and (b) an order of suspension, termination or reprimand or an order of dismissal of the complaint. The Administrative Law Judge shall file the decision with the Executive Director and shall transmit a copy thereof to the respondent or his/her attorney or agent of record. In the absence of an appeal to the Joint Board or review of the decision upon motion of the Joint Board, the decision of the Administrative Law Judge shall without further proceedings become the decision of the Joint Board 30 days from the date of the Administrative Law Judge's decision.

§ 901.50 *Appeal to the Joint Board.*

Within 30 days from the date of the Administrative Law Judge's decision, either party may appeal to the Joint Board for the Enrollment of Actuaries. The appeal shall be filed with the Executive Director in duplicate and shall include exceptions to the decision of the Administrative Law Judge and supporting reasons for such exceptions. If an appeal is filed by the Executive Director, a copy thereof shall be transmitted to the respondent. Within 30 days after receipt of an appeal or copy thereof, the other party may file a reply brief in duplicate with the Executive Director. If the reply brief is filed by the Executive Director, a copy of it shall be transmitted to the respondent. Upon the filing of an appeal and a reply brief, if any, the Executive Director

shall transmit the entire record to the joint board.

§ 901.51 *Decision of the Joint Board.*

On appeal from or review of the initial decision of the Administrative Law Judge, the Joint Board for the Enrollment of Actuaries will make the final decision. In making its decision the Joint Board will review the record of such portions thereof as may be cited by the parties to permit limiting of the issues. A copy of the Joint Board's decision shall be transmitted to the respondent by the Executive Director.

§ 901.52 *Effect of suspension, termination or resignation of enrollment; surrender of enrollment certificate.*

If the respondent's enrollment is suspended, the respondent shall not thereafter be permitted to perform actuarial services under ERISA during the period of suspension. If the respondent's enrollment is terminated, the respondent shall not thereafter be permitted to perform actuarial services under ERISA unless and until authorized to do so by the Executive Director pursuant to § 901.54. The respondent shall surrender his/her enrollment certificate to the Executive Director for cancellation in the case of a termination or resignation of enrollment or for retention during a period of suspension.

§ 901.53 *Notice of suspension, termination or resignation of enrollment.*

Upon the resignation or the issuance of a final order suspending or terminating the enrollment of an actuary, the Executive Director shall give notice thereof to appropriate officers and employees of the Department of the Treasury, the Department of Labor, the Pension Benefit Guaranty Corporation, and to other interested departments and agencies of the Federal Government.

§ 901.54 *Petition for reinstatement.*

Any individual whose enrollment has been terminated may petition the Executive Director for reinstatement after the expiration of five years following such termination. Reinstatement may not be granted unless the Executive Director, with the approval of the Joint Board, is satisfied that the petitioner is not likely to conduct himself/herself thereafter contrary to the regulations in this part, and that granting such reinstatement would not be contrary to the public interest.

Subpart E—General Provisions

§ 901.70 *Records*

(a) *Availability.* There are made available for public inspection at the Office of the Executive Director of the Joint Board for the Enrollment of Actuaries a roster of all persons enrolled

to perform actuarial services under ERISA and a roster of all persons whose enrollments to perform such services have been suspended or terminated. Other records may be disclosed upon specific request, in accordance with the applicable disclosure and privacy statutes.

(b) *Disciplinary procedures.* A request by an enrolled actuary that a hearing in a disciplinary proceeding concerning him/her be public, and that the record thereof be made available for inspection by interested persons may be granted if written agreement is reached in advance to protect from disclosure tax information which is confidential, in accordance with applicable statutes and regulations.

§ 901.71 *Special orders.*

The Joint Board reserves the power to issue such special orders as it may deem proper in any case within the purview of this part.

4. By deleting § 901.40 as follows:

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Assistant Secretary for Housing—Federal Housing Commissioner
[24 CFR Part 888]

[Docket No. R-78-505]

FAIR MARKET RENTS FOR NEW CONSTRUCTION AND SUBSTANTIAL REHABILITATION

Guam Market Area

AGENCY: Office of Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Proposed rule.

SUMMARY: This proposed rule would add Fair Market Rents for semi-detached/row dwelling units to the schedule of Fair Market Rents for the Guam market area. The U.S. Housing Act of 1937 requires that Fair Market Rents be published in the FEDERAL REGISTER for public comment before they can become effective.

DATE: Interested parties are invited to submit written comments, data suggestions, or objections by March 2, 1978.

ADDRESS: Rules Docket Clerk, Office of General Counsel, Room 5218, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410, 202-755-6703.

FOR FURTHER INFORMATION CONTACT:

Henry F. P. Cassagne, Chief Ap-

praiser, Office of Technical Support, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410, 202-472-4810.

SUPPLEMENTARY INFORMATION: Recent data and comments have been received from the Honolulu Area Office indicating an immediate need to publish Fair Market Rents for semi-detached/row dwelling units for the Guam market area. It has been determined that it is impracticable and unnecessary to provide a 30-day period for comments on these proposed revisions and that a 15-day period is reasonable and in the public interest.

A Finding of Inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A copy of this finding of inapplicability will be available for public inspection during regular business hours at the office of the Rules Docket Clerk, Room 5218, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410.

NOTE.—It is hereby certified that the economic and inflationary impacts of this regulation have been carefully evaluated in accordance with Executive Order 11821.

MARKET AREA	STRUCTURE TYPE	NUMBER OF BEDROOMS				
		0	1	2	3	4 or more
GUAM	DETACHED	---	---	444	515	556

	WALKUP					
	ELEVATOR-2-4 Sty 5 + Sty					

Accordingly, the Secretary proposes to incorporate in Part 888, Subpart A, a revised Schedule A for the Guam market area as set forth below.

(Sec. 7(d) Department of HUD Act (42 U.S.C. 3535(d).)

Issued at Washington, D.C. on January 30, 1978.

LAWRENCE B. SIMONS,
Assistant Secretary for Housing—Federal Housing Commissioner.

SCHEDULE A—FAIR MARKET RENTS FOR NEW CONSTRUCTION AND SUBSTANTIAL REHABILITATION (INCLUDING HOUSING FINANCE AND DEVELOPMENT AGENCIES PROGRAM)

These Fair Market Rents have been trended ahead two years to allow time for processing and construction of proposed new construction and substantial rehabilitation rental projects.

NOTE.—The Fair Market Rents for (1) dwelling units designed for the elderly or handicapped are those for the appropriate size units, not to exceed 2-Bedroom, multiplied by 1.05 rounded to the next higher whole dollar, (2) congregate housing dwelling units are the same as for non-congregate units and (3) single room occupancy dwelling units are those for 0-Bedroom units of the same type.

FAIR MARKET RENTS FOR NEW
CONSTRUCTION AND SUBSTANTIAL
REHABILITATIONNewark, Asbury Park, North Bergen, and
Freehold, N.J., Market AreasAGENCY: Office of Assistant Secretary for Housing—Federal Housing
Commissioner, HUD.

ACTION: Proposed rule.

SUMMARY: This proposed rule would
amend the schedules of fair market
rents for Newark, Asbury Park, North
Bergen, and Freehold, N.J. market
areas. The U.S. Housing Act of 1937
requires that Fair Market Rents be
published in the Federal Register for
public comment before they can
become effective.DATE: Interested parties are invited
to submit written comments, data sug-
gestions, or objections by March 2,
1978.ADDRESS: Rules Docket Clerk,
Office of General Counsel, Room 5218,
Department of Housing and Urban
Development, 451 7th Street SW.,
Washington, D.C. 20410, 202-755-
7603.FOR FURTHER INFORMATION
CONTACT:Henry F. P. Cassagne, Chief Ap-
praiser, Office of Technical Support,
Department of Housing and Urban
Development, 451 7th Street SW.,
Washington, D.C. 20410, 202-472-
4810.SUPPLEMENTARY INFORMATION:
Recent data and comments have been
received from the Newark Area Office
indicating an immediate need to
amend the fair market rents for the
Newark, Asbury Park, North Bergen,
and Freehold, N.J., market areas. It
has been determined that it is imprac-
ticable and unnecessary to provide a
30-day period for comments on these
proposed revisions and that a 15-day
period is reasonable and in the public
interest.A Finding of Inapplicability respect-
ing the National Environmental Policy
Act of 1969 has been made in accor-

ADMINISTRATIVE PROCEDURES

Guidance on Permitting Artificial Fishing Reefs

AGENCY: U.S. Army Corps of Engi-
neers, DOD.ACTION: Notice of proposed rulemak-
ing.SUMMARY: The Corps of Engineers
proposes to establish guidelines to be
used by district engineers in connec-
tion with the review of permit appli-
cations for artificial fishing reefs. The
proposed guidance places particular
emphasis on the safety of navigation
to assure the continued effectiveness
of the program.DATE: Written comments must be re-
ceived on or before 15 March 1978.ADDRESS: Please send comments to:
Office of the Chief of Engineers,
DAEN-CWO-N, Washington, D.C.
20314.FOR FURTHER INFORMATION
CONTACT:

Mr. Ralph T. Eppard, 202-693-5070.

SUPPLEMENTARY INFORMATION:
In very general terms, artificial fishing
reefs are clusters of manmade or natu-
ral materials intentionally placed in
selected areas of U.S. coastal waters,
rivers and lakes to duplicate natural
reefs and to produce increases in both
numbers and availability of finfish
and shellfish.Pursuant to section 10 of the River
and Harbor Act of 1899, Department
of the Army permits are required for
structures or work in or over the navi-
gable waters of the United States and
territorial seas. On 19 July 1977, the
Secretary of the Army (acting through
the Chief of Engineers) promulgated
regulations in 33 CFR Parts 320
through 329 governing the regulatory
program of the Corps of Engineers.The proposed guidelines are intend-
ed for use by the district engineers in
evaluating applications for permits for
artificial fishing reefs as a means to
insure uniformity nationwide. The
guidelines are in addition to the re-
quirements of 33 CFR 320-329 and will
in no way contravene the require-ments of those regulations. We are
considering the following guidelines
for artificial reef permit applications
in the Administrative Procedures sec-
tion of 33 CFR:§ 209.210 Guidelines for evaluating arti-
ficial fishing reef permit applications.(a) In addition to the requirements
of 33 CFR Parts 320-329 which estab-
lishes the regulatory program of the
Corps of Engineers, the following
guidelines shall be followed by the dis-
trict engineers when evaluating appli-
cations for artificial fishing reefs.(1) No artificial reefs will be autho-
rized within the limits of the following
areas: (i) Natural or improved chan-
nels in general use by navigation.(ii) Safety fairways/traffic separa-
tion schemes.

(iii) Anchorages or pilot stations.

(iv) Adjacent to or in close proximity
to the above areas if the district engi-
neer determines the proposed reef to
be a hazard to navigation.(2) The depth of water over an arti-
ficial reef shall not be less than 50 feet
below mean low water where depths in
the area generally exceed this depth.
The district engineer may extend this
requirement to include provisions for
increasing the clearance over reefs au-
thorized in natural depths exceeding
100 feet below MLW.(3) No artificial reefs will be autho-
rized by the Corps if their establish-
ment would be inimical to the national
interest and the welfare of the general
public as determined after consulta-
tion with the U.S. Navy, the U.S.
Coast Guard and approval by the En-
vironmental Protection Agency.(4) Permits for the construction of
artificial reefs shall include the condi-
tion that the reef shall be marked as
required by the U.S. Coast Guard with
costs of installation and maintenance
to be borne by the permittee.(5) Permits for the construction of
reefs shall include conditions to assure
that reefs are placed within permitted
coordinates and sufficient notice in ad-
vance of construction to allow Feder-
al/State monitoring and inspection.NOTE.—The Corps of Engineers has deter-
mined that this document does not containa major proposal requiring preparation of
an Inflation Impact Statement under Ex-
ecutive Order 11821 and OMB Circular A-
107.

(33 U.S.C. 403)

Dated: February 1, 1978.

[BC Docket No. 78-49; RM-2921]

FM BROADCAST STATION BOCA CHICA KEY,
FLA.

Proposed Changes in Table of Assignments

AGENCY: Federal Communications
Commission.ACTION: Notice of proposed rulemak-
ing.SUMMARY: This action proposes the
assignment of Channel 228A to Boca
Chica Key, Fla., as its first FM chan-
nel assignment. Comments are re-
quested on the extent of business and
civic activity there to determine
whether it can be recognized as a com-
munity. Also the issue of whether the
proposal is designed to serve nearby
Key West, Florida, is to be discussed
in comments.DATES: Comments must be filed on
or before April 7, 1978, and reply com-
ments on or before April 27, 1978.ADDRESS: Federal Communications
Commission, Washington, D.C. 20554.FOR FURTHER INFORMATION
CONTACT:Mark N. Lipp, Broadcast Bureau,
202-632-7792.SUPPLEMENTARY INFORMATION:
In the matter of amendment of
§ 73.202(b), table of assignments, FM
Broadcast Stations, (Boca Chica Key,
Fla.), BC Docket No. 78-49 RM-2921.

Adopted: February 6, 1978.

Released: February 9, 1978.

By the Chief, Broadcast Bureau:
1. *Petitioner and Proposal.* (a) Peti-
tion for rulemaking, submitted by
John T. Galanes and Wayne R. Sie-
fert, requesting the assignment of
Channel 228A to Boca Chica Key, Fla.,
as its first FM channel. The channel
could be assigned in full compliance
with the minimum distance separation
requirements.Public Notice of the filing of the petition
was given July 18, 1977 (Report No. 1064).
Galanes is identified as the Vice Presi-
dent and General Manager of Station
WGFT(AM), Youngstown, Ohio. Siefert is
listed in *Broadcasting Yearbook* as Program
Director of that station and is also Adminis-
trative Assistant to Galanes.

FEDERAL REGISTER, VOL. 43, NO. 32—WEDNESDAY, FEBRUARY 15, 1978

(b) An opposition was filed by Florida Keys Broadcasting Corporation, licensee of Stations WKIZ(AM) and WFYN-FM, Key West, Florida.

(c) Petitioners filed a reply and an addendum.

2. *Community Data.* (a) *Location:* Boca Chica Key is one of the islands in the Lower Keys Division of Monroe County, located in the southernmost portion of Florida, approximately 8 kilometers (5 miles) northeast of Key West.

(b) *Population:* Boca Chica Key (pop. 2,817).² Lower Keys Division (pop. 10,352), Monroe County (pop. 52,586).

(c) *Local Broadcast Services:* Boca Chica Key has no local aural service. It receives service from Key West Stations WKIZ(AM), WKWF(AM) and WFYN-FM (Channel 223). Stations authorized on two other FM channels assigned to Key West are not yet in operation—Station WVKF (Channel 238) and Station WIIS (Channel 296A).

3. *Preclusive Impact:* Preclusion would occur on the co-channel affecting only two communities with populations over 1,000, Key West (pop. 29,312) and Marathon (pop. 4,397). Key West, as noted above, has three FM assignments while Marathon has one FM station.

4. *Additional Considerations:* Florida Keys raises two issues in its opposition which we believe requires some discussion. First it argues that there is insufficient business activity and local support for an FM assignment at Boca Chica Key, and therefore, by necessity, such a station will primarily serve the larger community of Key West. As such, it urges the proposal be denied since Key West already has three FM channel assignments, a number already in excess of the Commission's population guidelines which set a limit of 1 to 2 FM channels for communities with less than 50,000 population. Secondly, it is alleged by Florida Keys that Boca Chica Key lacks the characteristics of a community which would qualify it for an FM channel assignment. In this regard it notes that the Key West Naval Air Station occupies most of Boca Chica Key and that electrical service is provided to only 195 residences and 5 business customers besides the air station. It asserts that most of the military personnel stationed there reside at Key West reducing the population of Boca Chica Key to less than 1,000 persons. Finally it states that the prospect of future growth is unlikely due to the naval air station occupancy and to unspecified environmental and ecological considerations. Florida Keys asserts that these latter concerns have prompted the

state to prohibit further development in low areas throughout the Keys.⁴

5. Petitioners respond that Florida Keys' argument that Boca Chica Key lacks community status is erroneous since the U.S. Census figures take into account military personnel actually residing at Boca Chica Key and that the number of electrical connections referred to does not give a true picture of the extent of such service. Moreover, petitioners note that the Commission has recognized that military installations have needs which warrant broadcasting service.⁵ Petitioners also disagree that future development is restricted, contending that there are many undeveloped areas in the Lower Keys Division near Boca Chica Key which are unaffected by environmental restrictions. Regarding community status, petitioners assert that incorporation is not necessary and that provision of certain basic services by the county is irrelevant. Regarding the contention that the assignment could become a Key West Station, petitioners point out that § 73.203 of the Commission's Rules would prohibit such licensing and the Commission would require that the station serve Boca Chica Key.

6. *Community Status:* The evidence submitted so far is sketchy and inconclusive on the issue of community status. Interested parties should be advised that data on this matter should be submitted and include information concerning community or civic organizations such as the Chamber of Commerce, businesses, local newspapers, shopping centers, post offices, utility services, schools, and views of residents and prominent citizens as to Boca Chica Key's status. In short, the data should show that the residents have common interests which are manifested by local concerns or organizations. See North Naples and Immokalee, Fla., 42 FR 63887, released December 21, 1977. We do recognize that the U.S. Census lists Boca Chica Key as a distinct entity but this factor is of limited value for our purposes. Although petitioner is correct in noting that the Commission has previously held that military installations can be treated as a community for the purposes of station licensing, it has not explained how this has any clear relevance here, since its proposal is not one of the military reservation itself.

7. *Service to Boca Chica Key:* We, of course, would expect a station authorized to Boca Chica Key to actually

²Florida Keys also argues that the proposal would have an economic impact that would impair the overall service now rendered to the public by other stations in the area. However, this so-called Carroll issue is not appropriate for discussion at the rule-making stage.

³Citing cases involving Fort Campbell, Ky., and Ft. Leonard Wood, Mo.

serve that community, if this proposal were adopted. Regarding this matter, we would not assign a channel to Boca Chica Key if we did not first satisfy ourselves that it has needs to be served which differ from those of the larger city of Key West. Thus, interested parties should show the nature of those needs and the extent to which they are separate and distinct from those of Key West. To help clarify this point, petitioners (or any other proponent) should indicate their proposed transmitter location and the area this station would serve.

8. Accordingly, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules, with regard to the city below as follows:

City and channel No.

Boca Chica Key, Fla., present —, proposed, 228A.

8. The Commission's authority to institute rulemaking proceedings, showings required, cut-off procedures, and filing requirements are contained in the material set forth below and are incorporated herein.

NOTE.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

9. Interested parties may file comments on or before April 7, 1978, and reply comments on or before April 27, 1978.

FEDERAL COMMUNICATIONS
COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended and § 0.281(b)(6) of the Commission's Rules, it is proposed to amend the FM Table of Assignments, Section 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be consid-

ered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in Sections 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b), and (c) of the Commission Rules.)

5. *Number of copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

[BC Docket No. 78-47; RM-2995]

FM BROADCAST STATION IN LEROY, ILL.

Proposed Change in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Action taken herein proposes the assignment of a Class A FM channel to LeRoy, Ill., as that community's first FM assignment. Petitioner,

Sono Mag Corp., states the proposed channel could provide a first local aural broadcast service to LeRoy.

DATES: Comments must be received on or before March 31, 1978, and reply comments on or before April 20, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

In the matter of amendment of § 73.202(b), table of assignments, FM broadcast stations. (LeRoy, Ill., BC Docket No. 78-47 RM-2995.

Adopted: February 3, 1978.

Released: February 10, 1978.

By the Chief, Broadcast Bureau:

1. *Petitioner, Proposal, Comments:* (a) Petition for rulemaking, filed November 3, 1977, by Sono Mag Corp. ("petitioner"), proposing the assignment of Channel 224A to LeRoy, Ill., as a first FM assignment to that community. No responses were made to the proposal.

(b) The channel can be assigned in conformity with the minimum distance separation requirements if the transmitter site is located 4.8 kilometers (3 miles) north northeast of the community.

(c) Petitioner states it will promptly apply for a construction permit to utilize the channel, if assigned.

2. *Community Data:* (a) *Location:* LeRoy, in McLean County, is located approximately 217 kilometers (135 miles) south of Chicago, and 24 kilometers (15 miles) southeast of Bloomington, Ill.

(b) *Population:* LeRoy—2,435; McLean County—104,389.²

(c) *Local Broadcast Service:* There is no local aural broadcast service in LeRoy, but LeRoy is served by a weekly newspaper.

3. *Economic Data:* Petitioner states that LeRoy is governed by a mayor-council form of government. We are told that the surrounding rural area is agricultural with the farming industry contributing heavily to the overall income of McLean County. It adds that the community relies on some manufacturing as well as retail trade and services, the largest manufacturer being Permabilt of Illinois which manufactures custom built homes. In support of its petition, petitioner has submitted information with respect to education, transportation, churches, medical and recreational facilities, and civic organizations.

¹Public Notice of the petition was given on November 29, 1977 (Report No. 1091).

²Population figures are taken from the 1970 U.S. Census.

4. In view of the apparent need for a first local aural broadcast service in LeRoy, Illinois, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules, as follows:

City and channel No.

LeRoy, Ill.; Present: —; Proposed: 224A.

5. Authority to institute rulemaking proceedings, showings required; cut-off procedures; and filing requirements are contained below and are incorporated herein. Note: A showing of continuing interest is required by paragraph 2 below before a channel will be assigned.

6. Interested parties may file comments on or before March 31, 1978, and reply comments on or before April 20, 1978.

FEDERAL COMMUNICATIONS
COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended and section 0.281(b)(6) of the Commission's Rules, it is proposed to amend the FM Table of Assignments, Section 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rulemaking to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rulemaking to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission Rules.)

(b) With respect to petitions for rulemaking which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in Sections 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rulemaking to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b), and (c) of the Commission Rules.)

5. *Number of copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

[BC Docket No. 78-46; RM-2904]

TELEVISION BROADCAST STATIONS IN HATCH AND SILVER CITY, NEW MEXICO

Proposed changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: This action proposes to reassign educational TV Channel *12 from Hatch, New Mexico, to Silver City, New Mexico. In addition, the current reservation for noncommercial educational use of Channel *10 at Silver City, would be deleted to reflect its present use as a commercial television translator station.

DATES: Comments must be filed on or before March 31, 1978, and reply comments on or before April 20, 1978.

FOR FURTHER INFORMATION CONTACT:

Mark N. Lipp, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

In the matter of amendment of § 73.606(b), Table of assignments, television broadcast stations. (Hatch and Silver City, N. Mex.), BC Docket No. 78-46 RM-2904.

Adopted: February 3, 1978.

Released: February 9, 1978.

By the Chief, Broadcast Bureau:

1. The Commission has under consideration a petition from Hubbard Broadcasting, Inc., to remove the non-commercial educational TV reservation from Channel *10 on which it operates TV translator Station K10KF (Channel *10), Silver City, N. Mex. The petition also requests the reassignment of TV Channel *12 from Hatch, N. Mex. to Silver City, to make a channel available for a noncommercial educational translator station. Also, in this connection, we received a copy of a letter from the Governor's Commission on Public Broadcasting for the State of New Mexico. No other comments have been submitted.

2. Silver City (pop. 8,557)*, the seat of Grant County (pop. 22,030), is located in southwest New Mexico approximately 70 kilometers (44 miles) east of the Arizona border. There are two VHF TV channels assigned to Silver City—Channel 6 and Channel *10, both of which are used for 100 watt commercial translator stations. Hatch, N. Mex. (pop. 867), is located in Dona Ana County (pop. 69,773) approximately 105 kilometers (65 miles) east of Silver City. Hatch has no local TV service. Virtually all of Dona Ana County, including Hatch, receives non-commercial educational service from Station KRWG-TV, Channel *22, Las Cruces, N. Mex., licensed to New Mexico State University.

3. Petitioner states that its translator station is permitted to operate on Channel *10 only as long as no other TV service (commercial or noncommercial educational) is proposed for the channel. Since a state agency is attempting to establish a noncommercial station in Silver City, petitioner requests that Channel *12 be reassigned there and made available for that purpose. Petitioner believes that by reassigning Channel *12 to Silver City, the Commission will make possible the use of an assignment which would otherwise lie fallow. In addition, by deleting the reservation on Channel *10, the present translator use can remain intact at least for the present. In a letter to the Commission, the Governor's

*Station K10KF retransmits the programming of its own TV Station KOB-TV, Channel 14, Albuquerque, N. Mex.

*All population data are taken from the 1970 U.S. Census.

*Petitioner notes that Channel 12 was originally assigned to Silver City but in 1962, in response to a request by the State Board of Education, the channel was reserved and reassigned to Hatch. However, that assignment was never activated at Hatch. Instead, the State's plans were revised and the Las Cruces station was utilized, starting in 1973, for noncommercial educational programming for this area of southwestern New Mexico.

nor's Commission on Public Broadcasting states that it supports the petition and intends to, according to its revised plans, activate a noncommercial educational translator station on Channel *12 if reassigned to Silver City.

4. With the above facts in mind, we believe that the reassignment of Channel *12 should be pursued in a rulemaking proceeding. The Governor's Commission has stated that it has no plans for a station at Hatch, which we note is already provided non-commercial educational service by the Las Cruces station. The proposed educational translator usage at Silver City would extend this service in the southwestern portion of the state. As for the deletion of the reservation for Channel *10 at Silver City, we find that it would be appropriate to explore this proposal to reflect the channel's present commercial usage.

5. The proposal meets all minimum spacing requirements and no site restrictions would have to be placed. Mexican concurrence of the proposal will have to be obtained since the communities are located within 320 kilometers (199 miles) of the Mexican border.

6. Accordingly, it is proposed, That the Television Table of Assignments, Section 73.606(b) of the Commission's Rules, be amended for the cities listed below:

City and Channel No.

Hatch, N. Mex.: Present: *12; Proposed:—. Silver City, N. Mex.: Present: 6, *10+; Proposed: 6, 10+, *12.

7. The Commission's authority to institute rulemaking proceedings, showings required, cut-off procedures and filing requirements are contained below and are incorporated by reference herein. Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

8. Interested parties may file comments on or before March 31, 1978, and reply comments on or before April 20, 1978.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rulemaking to which this Appendix is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rulemaking to which this Appendix is attached.

Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial to the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in § 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rulemaking to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission Rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[49 CFR Part 393]

[BMCS Docket No. MC-58-1; Notice 78-3]

PARTS AND ACCESSORIES NECESSARY FOR SAFETY OPERATION

Step, Handhold, and Deck Requirements on Commercial Motor Vehicles

AGENCY: Federal Highway Administration, DOT.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: Public comments are sought on a proposal to amend the Federal Motor Carrier Safety Regulations applicable to motor vehicles manufactured after January 1, 1981, to require (1) step, deck, and handhold requirements on high profile cab-over-engine (COE) type tractors; (2) step, handhold, and deck requirements on the rear of all other truck tractors; and (3) step, and handhold requirements on the front of trucks as well as all truck tractors. Slips and falls are a substantial problem in the motor carrier industry. The proposal to afford the driver and other personnel with three points of contact on high profile COE truck tractors will serve to provide increased stability and safety. The requirements regarding front and rear access will also provide safe working surfaces in other critical areas.

DATE: Comments must be received on or before May 16, 1978.

ADDRESS: Submit comments (original and 2 copies) to: BMCS Docket No. MC-58-1; Notice No. 78-3, Room 3402, Bureau of Motor Carrier Safety, Federal Highway Administration, Department of Transportation, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Gerald J. Davis, Chief, Driver Requirements Branch, Bureau of Motor Carrier Safety, 202-426-9767; Principal Lawyer, Attorney, Gerald M. Tierney, Motor Carrier and Highway Safety Law Division, Office of Chief Counsel, 202-426-0834; Federal Highway Administration, Department of Transportation, Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. e.s.t., Monday through Friday.

SUPPLEMENTARY INFORMATION: This Notice of Proposed Rulemaking proposes to issue specific requirements for steps, handholds, and deck plating to afford individuals increased stability and safety while entering and exiting the cab and while performing work-related duties on other areas of the vehicle. The requirements for the

high profile COE truck tractors basically set forth details as to the number, location, size and type of steps and handholds to allow a person to have three limbs on the system at all times, including transition between intermediate positions.

The criteria for this proposal is based on the "Recommended Practice 404" developed by the Cab and Driver Study Group of the ATA Regular Common Carrier Conference Maintenance Committee, as well as other prior recommended designs.

NEED FOR IMPROVEMENT

As far back as 1966 and 1967 the high percentage of workmen's compensation cases, attributed to getting in and out of the cab, attracted attention. A study issued in 1967 by Liberty Mutual Insurance Company of Boston, Massachusetts, indicated that falls from tractors amounted to 25.3 percent, 22.2 percent and 16.0 percent of total human on-job injuries for three large motor carriers. Although driver trainers were spending a considerable amount of time training new drivers on proper mounting and dismounting techniques, efforts were not entirely successful because of the poor design of most step and grab-handles, especially on COE models. Information supplied to the Department of Transportation by several motor carriers showed that, slips and falls accounted for 20 percent of all injuries sustained by drivers. In a separate study done by the Transportation Safety Association of Ontario, Canada, it was reported that slips and falls in and around motor vehicles accounted for 40 percent of the total of all types of slip and fall accidents in their association. It was also reported that there was evidence that particular troublesome problems occurred, and were most severe, in the case of trailers and semi-trailers used to haul automobiles and in tank vehicles.

ADVANCE NOTICE OF PROPOSED RULEMAKING

As a result of evidence reported, an Advance Notice of Proposed Rulemaking was issued on May 21, 1974, with the purpose of soliciting comments on whether nonslip surfaces and handholds should be made mandatory on equipment operated in interstate or foreign commerce.

The majority of comments indicated that further proof was needed that slips and falls were occurring frequently enough to warrant a regulation. In an effort to be responsive to these comments, further accident information was sought before developing a mandatory regulation. Several sources were investigated, including State organizations, transportation insurance groups, labor statistics offices and other safety organizations. However,

the information obtained was not detailed. It was concluded, as a result of unsuccessful attempts to obtain precise, specific data, that an actual slip and fall survey and analysis should be conducted.

SLIPS AND FALLS SURVEY

The Bureau of Motor Carrier Safety conducted a "Slips and Falls" survey and analysis during the period of December 1975 to August 1976. A total of 46 carriers were surveyed, centering on four types of vehicles (cargo tanks, car carriers, vans, and flat bed or heavy hauling equipment). The statistics and information were collected for the year 1974. Approximately 22,000 employees' records were reviewed. Detailed information was collected on each slip and fall, including, medical costs, workmen's compensation costs, part of the body injured, person's age, environment, part of the vehicle where injury occurred and type of equipment used. Other areas of concern were also discussed with carrier representatives, namely, various types of non-slip surfaces being used, training and retraining of drivers regarding proper entry/egress, incentive awards for safety practices, workmen's compensation costs for different States, and improvements made as a result of some costly slips and falls. Pictures were also taken of equipment being used.

The results of the survey indicated:

1. Slips and Falls accounted for 14 percent of all driver personal injury accidents and 9 percent of all carriers' personal injury accidents.
2. Slip and Fall medical costs accounted for 11 percent of carriers' total medical costs.
3. Slip and Fall workmen's compensation costs accounted for 10 percent of carriers' total workmen's compensation costs.
4. Approximately 54 percent of the slip and fall incidents happened on the tractor or driver area and 46 percent happened on the trailer or cargo area.
5. Tank carriers had the highest percentage of driver slips and falls (23 percent); followed by auto transporters (14 percent); van-type (11 percent); and flat bed (9 percent).

COSTS ASSOCIATED WITH PERSONAL INJURY ACCIDENTS

According to information published by the American Trucking Associations, Inc., employee injuries are up 50 percent from 1968 to 1974; average injury costs have quadrupled since 1970; and the 1973 compensation costs are up 75 percent compared to 1968. Their estimate of an average injury was \$1,409.27 for 1975, and that the most frequent cause of injury was falling. The average maximum compensation benefit, nationwide, is now \$136.95 per week, compared to \$78.82 in 1970—and it is considerably higher in some States. Even heavier compensation expenses are forecasted.

Like the tip of an iceberg, the insured costs of accidents are only a small part of the total costs. Accidents directly affect profit and loss, and may even involve the company's ability to stay in business. Along with the cost of workmen's compensation, there is the loss of employee's services, knowledge and experience and the resulting loss in productivity, as well as the cost of hiring and training replacement labor. An accident also may lower employee morale, which could affect efficiency.

The recent survey indicated the following cost data:

1. Medical costs ranged from 0 to \$6,039.15 per individual slip and fall case.
2. Compensation costs ranged from 0 to \$8,834 per individual slip and fall case.
3. The combined medical/compensation costs ranged from 0 to \$14,873.15 per individual slip and fall case.
4. The average combined medical cost/compensation cost of slip and fall incidents was \$290.92.

These costs take into account only the medical and compensation figures paid out. It is reasonable to assume that the actual costs of each slip and fall are considerably more when the other costs mentioned are considered.

DISCUSSION OF PROPOSED RULE

In the preparation of the proposed sections regarding cab entry/exit, rear of cab access and front of cab access, appropriate literature from several sources has been consulted. The references include, (1) Liberty Mutual Study, Driver Falls While Mounting or Dismounting Cab Over Engine Tractor Trailer Cabs, Charles H. Irvine, March 10, 1967; (2) Recommended Practice No. 404, ATA, Regular Common Carrier Conference, Cab and Driver Study Group, January 1976; (3) SAE J185, Access Systems for Construction and Industrial Equipment, Part II SAE Handbook 1977; (4) SAE J833a, U.S.A. Male and Female Physical Dimensions for Construction and Industrial Equipment Design, Part II, SAE Handbook 1977; (5) U.S. Army Specification, Body Van, Vehicle-Mounted, General Specifications For, MIL-B-13207D (ME) CX1966, 12 August 1976; and (6) Human Factors Engineering Guide to Equipment Design, Joint Army-Navy-Air Force Steering Committee, 1972. While the proposed rule does not directly reflect any one of these references exactly, it does represent the most appropriate aspects of all of them. What results is an already proven set of requirements that represents the best design practices the industry can expect.

The requirements are in no way intended to be design restrictive but rather are intended to encourage manufacturers to include in their designs, accommodations for drivers while on the vehicle.

The proposed regulations are, like all the Federal Motor Carrier Safety Regulations, minimum requirements. It is hoped that where more stringent requirements are recommended improvements will be made. The development of RP 404 indicates that need for a better step/handhold system.

The requirements of RP 404 with regard to cab entry/exit have been similarly adopted in our proposed amendment. Our first attempt in the cab entry/exit area is directed at high profile COE truck tractors, as preliminary indications revealed this type vehicle is more prone to driver slips and falls. It is believed that the system proposed, i.e., to have 3 limbs in contact with the truck tractor at any time, including transition between intermediate positions, will insure a safe, stable means for the driver to climb into or descend from the cab of the high profile COE.

Although the vertical height from ground level has been minimally proposed at 610 millimeters (24.0 inches) the 5th percentile group may not comfortably reach this step. However, as mentioned earlier the proposed regulation is minimum.

Access to the rear of the vehicle and the front of the vehicle has not been limited to high profile COE's. There must be a safe access to the front area of all truck tractors and trucks in order to perform such duties as window washing, checking water and oil levels, and to raise the hood on conventional type vehicles.

If electrical and air connections can be reached from the ground level, thereby eliminating the need to climb upon the rear section, the step, handhold and deck plating requirements will be nil.

With regard to construction material, it is believed that self-cleaning material is necessary to prevent element build-up. The material should have no sharp edges, and openings must be such to prevent finger entrapment. Since door sills are used as steps it is being proposed that slip retardant material, commonly used on sill steps, will be acceptable. Although step construction is important, step spacing, depth, and clearance requirements are also necessary.

The proposed handhold requirements are also needed. A person should be able to reach the handhold before ascending. The proposed spacing requirements should provide a balanced comfortable system for any driver.

The proposed strength requirements are needed to ensure that all handholds, steps, and plates will support not only the weight of the individual, but meet certain rigidity requirements for purposes of stability. Without the deflection requirements, the handholds, steps, or plates could flex or

give, thereby jeopardizing the stability of the individual. It should also be noted that the strength requirements have been given in terms of "weight" rather than "mass" that produces a load or force, so as to provide a better understanding to the average individual.

In consideration of the foregoing, it is proposed to amend Chapter III of Subtitle B in Title 49, Code of Federal Regulations by adding a new Subpart J to Part 393 to read as follows:

Subpart J—Step, Handhold and Deck Requirements on Commercial Motor Vehicles

- Sec.
393.200 Purpose and scope.
393.201 Cab entry and exit.
393.202 Rear of cab access.
393.204 Front of cab access.

AUTHORITY: Sec. 204, 49 Stat. 546 as amended (49 U.S.C. 304); sec. 6, Pub. L. 89-670; 80 Stat. 937 (49 U.S.C. 1655); 49 CFR 1.48 and 49 CFR 301.60.

Subpart J—Step, Handhold and Deck Requirements on Commercial Motor Vehicles

§ 393.200 Purpose and scope.

This subpart prescribes step, handhold and deck requirements on commercial motor vehicles. These requirements are intended to enhance the safety of motor carrier employees.

§ 393.201 Cab entry and exit.

(a) *Application of the rule in this section.* The section applies to all high profile COE truck tractors (floor height from ground greater than 1.016 millimeters (40.0 inches) manufactured on and after January 1, 1981).

(b) *General rule.* Any person entering or exiting the cab of a high profile COE truck tractor shall be afforded sufficient steps and handholds to allow the user to have at least 3 limbs in contact with the tank tractor at any time. This rule applies to intermediate positions as well as transition between intermediate positions during cab entry and exit.

(c) *Specifications.* All high profile COE truck tractors with seats on both sides of the vehicle shall be equipped on both sides of vehicle with—

(1) Steps of a sufficient number to afford safe and easy access and meet the following minimum requirements:

(i) *Vertical height from ground level.* The first step shall be no more than 609 mm (24.0 in) from ground level.

(ii) *Vertical height between steps.* The vertical height between steps up to and including the sill step shall comply with "Step Spacing Chart" shown below:

STEP SPACING CHART

If horizontal step offset * is—	The vertical spacing between steps must be no more than—
At least 508 mm (20.0 in) but less than 610 mm (24.0 in).	102 mm (4.0 in).
At least 610 mm (24.0 in) or greater.	0 mm (0 in).

*Horizontal step offset equal the horizontal distance between step midplanes.

(iii) *Construction material.* Each step shall be constructed of or covered with a self-cleaning safety material. Openings in the safety material shall be of a size that will prevent finger entrapment and be free of sharp edges. *Exception.* The sill step must be covered with a slip retardant material, but it does not have to be self-cleaning.

(iv) *Step tread depth.* Each step shall have a tread depth of at least 102 mm (4.0 in).

(v) *Step clearance.* There must be at least 51 mm (2.0 in) clearance between the back edge of the step and any part of the truck tractor to allow the user to step on the ball of his or her foot.

(A) *Exception.* Any step with a tread depth of at least 153 mm (6.0 in) or more is not required to have step clearance.

(B) *Exception.* A sill step with a tread depth of 102 mm (4.0 in) or more is not required to have step clearance.

(vi) *Step width.* The first step shall have a tread width of at least 153 mm (6.0 in). The width of succeeding steps shall increase and be located closer to the door sill as you ascend. If the sill step is not at least 407 mm (16.0 in) wide with a tread depth of at least 153 mm (6.0 in) a step immediately below the sill step is required. This step shall be at least 305 mm (12.0 in) wide, with the rear of the step (with respect to the front of the truck tractor) no farther forward than a line drawn vertically from the forward edge of the driver's seat in its rearward most position. This step shall also meet the requirements in subparagraphs (1)(iii), (1)(iv), (1)(v) and (2)(vii) of this section.

(vii) *Step strength.* Each step must withstand the vertical static load, produced by the weight of a person of at least 204.1 kilograms (450 pounds), at any point on the tread with a vertical deflection of no more than 5mm (0.2 in) at any point on the tread and be affixed in such a manner that there will be no horizontal movement of the step or tread.

(2) Handholds of a sufficient number and design to afford safe and easy access and meet the following minimum requirements:

(i) *Location.* Dual handholds must be located directly above the first step to enable a person to reach the handhold before he begin his ascent. Additionally, a handhold must be located at or immediately above the top of the door envelope and extend from the

rear of the door envelope forward, at least two-thirds of the door envelope's width.

(ii) *Height from ground level.* The dual handholds shall start no more than 1,524 mm (60.0 in.) from the ground level. One of the dual handholds nearest to the swinging edge of the cab door shall extend at least 1,219 mm (48.8 in) vertically from the door sill;

(iii) *Exterior mounting specifications.* Each handhold, affixed exterior of the vehicle, shall have at least 51mm (2.0 in) clearance between the surface on which it is mounted and the handhold.

(iv) *Unobstructed length.* Each handhold shall be mounted without obstructions or mid-brackets to allow continuous movement to the hand over the entire length;

(v) *Size and shape.* Each handhold shall be free of sharp edges and have a circumference no greater than 119.6 mm (4.71 in) nor less than 59.8 mm (2.36 in). *Exception.* Recessed handholds, pre-formed into the inside of the cab body may be used only if they are designed in a manner that will afford safe and easy use and meet the requirements set forth in subparagraphs (2)(i), (2)(iii), and (2)(v) of this section.

(vi) *Handhold strength.* Each handhold shall be solidly affixed to withstand the static load, produced by the weight of a person of at least 113.4 kg (250 lbs), in any direction with a deflection of no more than 5 mm (0.2 in) in any direction.

§ 393.202 Rear of cab access.

(a) *Application of the rule in this section.* This section applies to all truck tractors manufactured on and after January 1, 1981.

(b) *General rule.* When a person is required to climb upon the rear portion of a truck tractor to couple or uncouple air and electrical connections, the truck tractor shall be equipped with—

(1) Steps of a sufficient number to afford safe and easy access and meet the following minimum requirements.

(i) *Vertical height from ground level.* The first step shall be no more than 609 mm (24.0 in) from ground level;

(ii) *Vertical height between steps.* Vertical distances between steps shall comply with the "Step Spacing Chart" shown in § 393.201 of this chapter;

(iii) *Construction material.* Each step shall be constructed of or covered with a self-cleaning safety material. Openings in the safety material shall be of a size that will prevent finger entrapment and be free of sharp edges;

(iv) *Step tread depth.* Each step shall have a tread depth of at least 102 mm (4.0 in);

(v) *Step clearance.* There must be at least 51 mm (2.0 in) clearance between

the back edge of the step and the vehicle to allow the user to step on the ball of his or her foot. *Exception.* Any step with a tread depth of at least 153 mm (6.0 in) or more is not required to have step clearance;

(vi) *Step width.* Each step shall have a tread width of at least 204 mm (8.0 in); and

(vii) *Step strength.* Each step must withstand the vertical static load, produced by the weight of a person of at least 204.1 kg (450 lbs), at any point on the tread with a vertical deflection of no more than 5 mm (0.2 in) at any point on the tread and be affixed in such a manner that there will be no horizontal movement of the step or tread.

(2) Handholds of a sufficient number number and design to afford safe and easy access and meet the following minimum requirements:

(i) *Height from ground level.* The lowest part of any handhold shall be no more than 1,524 mm (60.0 in) from ground level;

(ii) *Exterior mounting specifications.* Each handhold, affixed exterior of the vehicle, shall have at least 51 mm (2.0 in) clearance between the surface on which it is mounted and the handhold;

(iii) *Unobstructed length.* Each handhold shall be mounted without obstructions of mid-brackets to allow continuous movement of the hand over the entire length;

(iv) *Size and shape.* Each handhold shall be free of sharp edges and have a circumference no greater than 119 mm (4.7 in) nor less than 61 mm (2.4 in). *Exception.* Recessed handholds preformed into the tractor body may be used only if they are designed in a manner that will afford safe and easy use and meet the requirements set forth in subparagraphs (2)(i), (2)(iii), and (2)(v) of this section.

(v) *Handhold strength.* Each handhold shall be solidly affixed to withstand the static load, produced by the weight of a person of at least 113.4 kg (250 lbs), at any point in any direction with a deflection of no more than 5 mm (.2 in) at any point in any direction.

(3) deck plates, mounted on the rear of the truck tractor in all areas where the driver must step or stand in order to provide safe footing and meet the following minimum requirements:

(i) *Construction material.* Each deck plate shall be constructed of, or covered with a self-cleaning safety material. Openings in the safety material shall be of a size that will prevent finger entrapment and be free of sharp edges;

(ii) *Mounting.* Each deck plate shall span the distance between the frame or frame extension brackets in such a manner that it can be held in place with a type of hold down device(s)

that will allow ready removal for vehicle service; and

(iii) *Deck plate strength.* Each deck plate must be capable of withstanding the vertical static load, produced by the weight of a person of at least 204.1 kg (450 lbs), at any point with a vertical deflection at any point of no more than 5 mm (.2 in).

§ 393.203 Front of cab access.

(a) *Application of the rule in this section.* This section applies to all trucks and truck tractors manufactured on and after January 1, 1981.

(b) *General rule.* When a person is required to climb upon the front of a truck or truck tractor, the vehicle shall be equipped with—

(1) steps of a sufficient number to afford safe and easy access and meet the following minimum requirements:

(i) *Vertical height from ground level.* The first step shall be no more than 609 mm (24.0 in) from ground level, any succeeding steps shall comply with the "Step Spacing Chart" shown in § 393.201;

(ii) *Construction material.* Each step shall be constructed of or covered with an anti-slip material. Any openings in the tread surface shall be of size that will prevent finger entrapment and be free of sharp edges;

(iii) *Steps preformed within bumper—(A) Tread width.* Each step shall have a tread width of at least 153 mm (6.0 in);

(B) *Step tread area.* Each step must have a bearing surface tread area of at least 7,742 mm² (12.0 in²);

(C) *Prevention of liquid build-up.* The step tread area must be perforated or sloped downwardly with respect to the horizontal plane no less than .0873 rad (5°) nor more than .1745 rad (10°);

(D) *Step clearance.* There shall be sufficient clearance between the back edge of each step and any other surface to allow any person to place the ball of his or her foot on the step tread area; and

(E) *Step strength.* Each step must withstand the vertical static load, produced by the weight of a person of at least 204.1 kg (450 lbs), at any point with a vertical deflection of no more than 5 mm (.1 in) at any point on the tread and be affixed in such a manner that there will be no horizontal movement of the step or tread;

(iv) *Step preformed or attached to exterior of bumper—(A) Tread width.* Each step shall have a tread width of at least 153 mm (6.0 in).

(B) *Step tread area.* Each step must have a bearing surface area of at least 11,613 mm² (18.0 in²);

(C) *Step clearance.* There shall be sufficient clearance between the back edge of the step and any other surface

to allow any person to place the ball of his or her foot on the step tread area:

Exception. Any step with a tread depth of at least 153 mm (6.0 in) or more is not required to have step clearances.

(D) *Step strength.* Each step must withstand the vertical static load, produced by the weight of a person of at least 204.1 kg (450 lbs), at any point on the tread and be affixed in such a manner that there will be no horizontal movement of the step or tread; and

(v) *Bumper.* The top of any bumper that is used as a stepping or standing surface must be covered with an anti-slip material.

(2) handholds of a sufficient number and design to afford safe and easy access and meet the following minimum requirements:

(i) *Height from ground level.* The lowest part of any handhold shall be no more than 1828 mm (72 in) from ground level.

(ii) *Clearance.* Each handhold shall have at least 51 mm (2 in) clearance between the surface on which it is mounted and the handhold;

(iii) *Size and shape.* Each handhold shall be free of sharp edges and have circumference no greater than 119.6 mm (4.71 in) nor less than 59.8 mm (2.36 in).

(iv) *Handhold strength.* Each handhold shall be solidly affixed to withstand the static load, produced by the weight of a person of at least 113.4 kg (250 lbs), in any direction with a deflection of no more than 5 mm (.1 in) in any direction.

Interested persons are invited to submit their views on these proposals. Communications should identify the docket number and the notice number which appear at the beginning of this notice.

All comments received will be available for examination by interested persons at the Bureau of Motor Carrier Safety, Room 3402, Department of Transportation, 400 7th Street SW., Washington, D.C., 20590.

(Sec. 204, 49 Stat. 546 as amended (49 U.S.C. 304); sec. 6, Pub. L. 89-670; 80 Stat. 937 (49 U.S.C. 1655); 49 CFR 1.48 and 49 CFR 301.60.)

NOTE.—It has been determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and 11949 and OMB Circular A-107.

Issued on February 8, 1978.

ROBERT A. KAYE,

Director,

Bureau of Motor Carrier Safety.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

GRAIN STANDARDS

Kansas Grain Inspection Point

Statement of considerations. The Kansas State Department of Agriculture, Topeka, Kans., is designated to operate as an official agency in accordance with the provisions of section 7 (f) of the United States Grain Standards Act (7 U.S.C. 79(f)). The Kansas State Department of Agriculture has been providing official inspection service for approximately 23 years at Newton, Kans., as a designated inspection point. A designated inspection point is defined as a city, town, or other location assigned under the regulations to an official agency for the conduct of official inspections, and within which the official inspection agency, or one or more of its licensed inspectors, is located (7 CFR 26.1(b)(13)).

The Kansas State Department of Agriculture has requested that its designation be amended to revoke Newton, Kans., as a designated inspection point in accordance with section 26.99(b) of the regulations (7 CFR 26.99(b)). Notwithstanding the revocation of Newton, Kans., as a designated inspection point, the Kansas State Department of Agriculture proposes to continue to provide official services there upon request.

The Kansas State Department of Agriculture has requested this amendment of assignment because of its determination that the demand for inspection services at Newton, Kans., does not warrant the full-time employment of an Inspector at that location.

As a point of clarification, it should be noted that the United States Grain Standards Act (7 U.S.C. 71 et seq.), hereinafter referred to as the "Act," has been amended by Pub. L. 94-582, effective November 20, 1976, and by Pub. L. 95-113, effective October 1, 1977, to extensively modify the official inspection system.

Under the amended Act, the Administrator of the Federal Grain Inspection Service (FGIS), upon application by any State or local governmental agency, or person, and after conducting investigations and other studies,

shall designate official agencies or persons to provide official inspection services at interior points. The amended Act further provides that existing agencies may continue to operate without a designation under the new law until the Administrator either grants or denies such designation to them or sets a period of time for its termination, not to exceed 2 years from November 20, 1976.

Accordingly, the present amendment of assignment (voluntary revocation of an assigned inspection point) would, if approved by FGIS, not alter the existing designation of the applicant as an official inspection agency which continues until the Administrator of FGIS either grants or denies an official designation under the amended Act or sets a period of time for its termination.

Interested persons are hereby given opportunity to submit written views or comments with respect to this matter

NOTE.—Section 7(f) of the Act (7 U.S.C. 79(f)) generally provides that not more than one official agency shall be operative at one time for any geographic area as determined by the Administrator.

All views or comments should be submitted in writing to the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250. All materials should be in duplicate and mailed to the Hearing Clerk not later than

All materials submitted pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)). Consideration will be given to the views or comments to be filed with the Hearing Clerk and to all other information available to the U.S. Department of Agriculture before final determination is made with respect to this matter.

(Sec. 7, Pub. L. 94-582, 90 Stat. 2872 (7 U.S.C. 79(g)(2)); 7 CFR 26.99(b); 7 CFR 26.101.)

Done in Washington, D.C., on February 7, 1978.

D. R. GALLIART,
Acting Administrator.

Forest Service

COOPERATIVE WESTERN SPRUCE BUDWORM, DRAFT ENVIRONMENTAL STATEMENT

Availability of Draft Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a Draft Environmental Statement for control of the western spruce budworm in Washington, USDA-FS-R6-DES(Adm)-78-6.

The Environmental Statement sets forth several management alternatives for managing western spruce budworm populations in 1978. Eight alternatives are presented, ranging from no treatment to intensive chemical control on Federal, State, and private lands in Whatcom, Kittitas, Chelan, and Okanogan Counties in Wash. during the spring and summer of 1978 with carbaryl.

This Draft Environmental Statement was transmitted to EPA on February 6, 1978.

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Room 3210, 12th St. and Independence Ave. SW., Washington, D.C. 20013.
USDA, Forest Service, Pacific Northwest Region, 319 SW. Pine Street, Portland, Ore. 97204
Okanogan National Forest, 219 Second Avenue South, Okanogan, Wash. 98840.
Wenatchee National Forest, 301 Yakima Street, Wenatchee, Wash. 98801
National Park Service, Pacific Northwest Region, 4th and Pike, Seattle, Wash. 98101.
Washington State Department of Natural Resources, Public Lands Building, Room 201, Olympia, Wash. 98504.

A limited number of single copies are available upon request to Regional Forester R. E. Worthington, Pacific Northwest Region, P.O. Box 3623, Portland, Ore. 97208.

Copies of the Draft Environmental Statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public and from the State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environ-

mental impact involved for which comments have not been requested specifically.

Comments concerning the action alternatives and requests for additional information should be addressed to Regional Forester R. E. Worthington, Pacific Northwest Region, P.O. Box 3623, Portland, Oreg. 97208. Comments must be received by April 7, 1978, in order to be considered in the preparation of the final Environmental Statement.

Dated: February 6, 1978.

H. W. PARKER,
Budget Officer.

[6320-01]

CIVIL AERONAUTICS BOARD

[Docket 31960; Order 78-2-43]

FRONTIER AIRLINES, INC.

Order Granting Exemption

Issued under delegated authority, February 9, 1978.

By application filed January 6, 1978, Frontier Airlines, Inc. (Frontier), requests an emergency exemption from Order 74-12-109¹ to the extent necessary to permit it to establish a fare between Lawton and Tulsa, Okla., which will match the fare charged by Metroflight, Inc. (Metro), a commuter air carrier operating in this market pursuant to a replacement agreement with Continental Air Lines, Inc. (Continental).²

In support of its application, Frontier states it is the only certificated air carrier providing service between Lawton and Tulsa; on December 1, 1977, Metro inaugurated service in this market at a fare level of \$32.41; and it desires to match Metro's fare in this market, but is precluded from doing so by the coach fare formula or Phase 9 of the Domestic Passenger-Fare Investigation (DPFI) which sets the lowest fare at \$33.33. Frontier's current charge in the market. Frontier contends this fare level puts it at a competitive disadvantage; and the Board has in the past granted Frontier an exemption in similar situations;³ the Board has explicitly recognized that certificated carriers should be allowed to establish fares below those prescribed by Phase 9, to meet competition from non-certificated carriers; and the Board has similarly held, in

¹The Board's Opinion and Order on Reconsideration in Phase 9 of the Domestic Passenger-Fare Investigation (DPFI), December 27, 1974.

²Order 77-10-92, October 20, 1977.

³Orders 77-1-164, January 31, 1977; 77-1-92, January 14, 1977; and 76-2-98, February 25, 1976.

NOTICES

Investigation of Interstate and Intrastate Fares in California and Texas Markets,⁴ that fares of certificated carriers may be lowered below Phase 9 minima to the extent necessary to meet competition from intrastate carriers. Finally, the carrier argues that the policy established by the Board with respect to matching fares of intrastate carriers is equally applicable to the situation with which Frontier is now confronted.

No answers have been filed in opposition to Frontier's application.

Upon review of the statements contained in the application and all other relevant matters we find that enforcement of the requirements of Phase 9 of the DPFI, insofar as they would prevent Frontier from matching coach fares offered by Metro between Lawton and Tulsa would be an undue burden on the carrier by reason of the limited extent of and unusual circumstances affecting its operations and would not be in the public interest.

We believe that granting the requested exemption authority comports with our long-standing policies according the maximum possible pricing flexibility to local service carriers and permitting certificated carriers, generally, to match genuinely competitive fares.

Accordingly, pursuant to the Federal Aviation Act of 1958, as amended, and particularly sections 203(a), 403, 404, and 1002, and the authority duly delegated to the Board's Regulations, 14 CFR 385.14(b),

It is ordered, That: 1. Frontier Airlines, Inc., is exempted from the requirements of Order 74-12-109 to the extent necessary to permit it to file tariffs containing fares between Lawton and Tulsa, Okla., matching the published fare of Metroflight, Inc., in this market;

2. To the extent not granted herein, the application Docket 31960 is denied; and

3. A copy of this order be served upon all U.S. certificated air carrier parties in Phase 9 of the Domestic Passenger-Fare Investigation⁵ and Metroflight, Inc.

Persons entitled to petition the Board for review of this order pursuant to the Board's Regulations, 14 CFR 385.50, may file such petition within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period unless within such period a petition for review thereof is filed, or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

⁴Order 76-7-23.

⁵Order 74-12-100, December 27, 1974.

By James L. Deegan, Chief, Passenger and Cargo Rates Division, Bureau of Pricing and Domestic Aviation.

PHYLLIS T. KAYLOR,
Secretary.

National Oceanic and Atmospheric Administration

NORTH PACIFIC FISHERY MANAGEMENT COUNCIL AND ITS SCIENTIFIC AND STATISTICAL COMMITTEE AND ADVISORY PANEL

Public Meeting With Partially Closed Session

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C., Appendix I, as amended, notice is hereby given (1) of a joint meeting of the North Pacific Fishery Management Council established by Section 302(a) of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265), and its Scientific and Statistical Committee (SSC), and Advisory Panel (AP), both established under Section 302(g), of the Act, (2) separate meetings of the SSC and AP.

The SSC and AP will meet separately on March 21-22, 1978, in the Council offices, Suite 32, 333 West 4th Avenue, Post Office Mall Building, Anchorage, Alaska, beginning at 9 a.m.

The Council and its SSC and AP will meet jointly on Thursday and Friday, March 23-24, 1978, in the Anchorage Westward Hilton, 3rd and E Streets, Anchorage, Alaska. The meeting will convene at 8:30 a.m., and adjourn at approximately 4:30 p.m. The meetings may be extended or shortened depending upon progress on the agenda.

MARCH 23

Proposed Agenda: (1) Executive Director's Report and other Council administrative business; (2) Reports from Scientific and Statistical Committee and Advisory Panel; (3) Progress report and update from Council's Drafting Management Planning Teams; (4) Closed Session to discuss classified material on preparations for and actual negotiations in connection with the International North Pacific Fisheries Commission (INPFC), and the International Pacific Halibut Commission (IPHC) and continuing negotiations with the Canadians; (5) Period for public comment; (6) Review of foreign fishing activities.

MARCH 24

(1) Discussions of management plans: Tanner Crab off Alaska; Gulf of Alaska Groundfish Fishery during 1978; Commercial Troll Fisheries off the Coast of Alaska; Bering Sea Clam Fishery; King Crab, and Bering Sea Groundfish Fishery; (2) Other Council business.

The SSC and AP meetings will be open to the public, as will all but the early afternoon of the first day of the Council meeting. For information on seating arrangements, changes to the agenda, and/or written comments, contact: Mr. Jim H. Branson, Executive Director, North Pacific Fishery Management Council, P.O. Box 3136DT, Anchorage, Alaska 99510; Telephone 907-274-4563.

A closed session of the Council is planned for the early afternoon of the first day, March 23, 1978, from 1:30 p.m. to 3:30 p.m. to hear and discuss Department of State security classified reports concerning preparations and actual negotiations in connection with the International North Pacific Fisheries Commission, the International Pacific Halibut Commission, and continuing negotiations with the Canadians.

Only those Council members and staff having security clearances will be allowed to attend this closed session.

The Assistant Secretary for Administration of the Department of Commerce, with the concurrence of its General Counsel, formally determined on January 5, 1978, pursuant to Section 10(d) of the Federal Advisory Committee Act, that the agenda items covered in the closed session may be exempt from the provisions of the Act relating to open meetings and public participation therein because these items will be concerned with matters that are within the purview of 5 U.S.C. 552b(c)(1) as information which is properly classified pursuant to Executive Order 11652. (A copy of the determination is available for public inspection and copying in the Public Reading Room, Central Reference and Record Inspection Facility, Room 5317, Department of Commerce.)

NOTICES

Dated: February 3, 1978.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

DEPARTMENT OF ENERGY

REQUESTS FOR INTERPRETATION FILED WITH THE OFFICE OF GENERAL COUNSEL

Month of January 1978

Notice is hereby given that during the month of January 1978, the Requests for Interpretation listed in the Appendix to this notice were filed pursuant to 10 CFR Part 205, Subpart F with the Office of General Counsel, Department of Energy (DOE). Notice of subsequently received requests will be published at the end of each calendar month. Copies of the Requests for Interpretation listed herein are on file in DOE's Public Reading Room, Information Access Office, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Interested parties may submit written comments on the listed interpretation requests within 30 days of the publication of this notice. Comments should be identified on the outside envelope and on documents submitted with the file number of the interpretation request and all comments should be filed with the Office of General Counsel, Department of Energy, Room 5134, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461, Attention: Diane Stubbs. Aggrieved parties, as defined in 10 CFR 205.2, will continue to receive actual notice of pending interpretation requests in accordance with the current practice of the Office of General Counsel.

For further information, contact Diane Stubbs, Office of General Counsel, 12th and Pennsylvania Avenue NW., Room 5138, Washington, D.C. 20461, 202-566-9070.

WILLIAM S. HEFFELFINGER,
Director of Administration,
Department of Energy.

FEBRUARY 9, 1978.

APPENDIX—LIST OF REQUESTS FOR INTERPRETATION RECEIVED BY THE OFFICE OF GENERAL COUNSEL

MONTH OF JANUARY 1978

Date Received, Name, Location of requestor,
and File No.

January 3, 1978, Ethyl Corp., Arnold H. Quint, Hunton & Williams, 1730 Pennsylvania Avenue NW., P.O. Box 19230, Washington, D.C. 20036, A-266.

Issue: Must a firm be involved in the "trade or business" of selling a covered product in order to qualify as a "reseller" as defined in 10 CFR 212.31.

January 4, 1978, Shell Oil Co., Michael R. Grover, Esq., Shell Oil Co., One Shell

Plaza, P.O. Box 2463, Houston, Tex. 77001, A-267.

Issue: The manner in which increased excise taxes for motor gasoline should be treated and whether such increased taxes can be automatically added to the sales price of covered products calculated in accordance with 10 CFR 212.83.

January 4, 1978, Special Jet Services, Inc., Charles B. Watkins, McClure & Watkins, P.C., 1410 Grant Building, Pittsburgh, Pa. 15219, A-268.

Issue: Whether a fee (in the nature of a tax) imposed by a governmental authority upon fixed base operators who resell aviation fuel would be an element of the maximum allowable price computation set forth in 10 CFR 212.93.

January 6, 1978, Viersen & Cochran, Bland Williamson, Pray, Scott, Williamson & Marlar, Fourth National Bank Building, Tulsa, Okla. 74119, A-269.

Issue: Is the stripper well property exemption set forth in 10 CFR 212.54 applicable to a well producing liquid hydrocarbons which existed in the reservoir in a liquid phase at the time of the well's original completion, regardless of whether or not the well produces from more than one zone or reservoir.

January 9, 1978, General American Oil Co. of Texas, Charles E. Brown, General American, Meadows Building, Dallas, Tex. 75206, A-270.

Issue: May the firm recertify certain volumes of domestic crude oil notwithstanding the provisions of 10 CFR 212.131.

January 20, 1978, Independent Oil Compounds Association, William W. Scott, Collier, Shannon, Rill, Edwards & Scott, 1055 Thomas Jefferson Street, Washington, D.C. 20007, A-272.

Issue: Is the refiner price rule set forth at 10 CFR Part 212, Subpart E applicable to the sales of finished lubricants by members of the Independent Oil Compounds Association.

January 23, 1978, Elm City Filling Stations, C. David Goldman, Esq., Brenner, Saltzman & Wallman, 271 Whitney Avenue, New Haven, Conn. 06511, A-273.

Issue: May sales to three of the firm's purchasers be classified as sales to a new market as set forth in 10 CFR 212.111(a)(2).

January 18, 1978, Air Conditioning and Refrigeration Institute, Frederick A. Ballard, Esq., Ballard, Beasley & Nelson, 505 Commerce Building, 1700 K Street NW., Washington, D.C. 20006, A-274.

Issue: Are packaged terminal air conditioners a consumer product under 10 CFR Part 430, which prescribes test procedures for air conditioners.

January 25, 1978, Sun Gas Co., Frank B. Sweeney, Esq., Sun Gas Co., Two Northpark East, P.O. Box 20, Dallas, Tex. 75221, A-275.

Issue: Does Sun's processing of another company's natural gas, the BTU content of which is returned to pre-processing levels afterwards by Sun, constitute natural gas shrinkage measurable by the price of Sun's residual gas. 10 CFR 212.162, 212.166(b)(3).

January 25, 1978, Tesoro Petroleum Corp., Michael L. McReynolds, Esq., Tesoro Pe-

6644

NOTICES

troleum Corp., 8700 Tesoro Drive, San Antonio, Tex. 78286, A-276.

Issue: Is a proposed foreign exchange of residual fuel oil by Tesoro with a foreign customer an export sale under the DOE entitlement program as set forth in 10 CFR 211.67(d)(2).

Federal Energy Regulatory Commission

[Docket Nos. G-3894, et al.]

APPLICATIONS FOR CERTIFICATES, ABANDONMENT OF SERVICE AND PETITIONS TO AMEND CERTIFICATES¹

FEBRUARY 6, 1978.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as de-

¹This notice does not provide for consolidation for hearing of the several matters covered herein.

scribed herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 10 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before February 13, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

²Applicant submits that the rates, terms and conditions of Opinion 770, as clarified by Order of Oct. 21, 1976, are applicable to its filing. Applicant is also filing under Gas Purchase Contract dated July 2, 1973, amended by amendment dated Sept. 15, 1976.

³Applicant is filing under Gas Purchase and Sales Agreement dated Sept. 24, 1976 and Addendum to Gas Purchase and Sales Agreement dated Dec. 27, 1977.

⁴Applicant is willing to accept the applicable national rate pursuant to Opinion No. 770, as amended.

⁵Applicant is filing under Gas Purchase Contract dated Nov. 26, 1952, amended by amendments dated Dec. 31, 1973 and Jan. 5, 1978.

⁶Applicant is willing to accept an initial rate pursuant to Opinion No. 699H and is filing under Gas Purchase Contract dated Nov. 1, 1977.

Filing code:

- A—Initial service.
- B—Abandonment.
- C—Amendment to add acreage.
- D—Amendment to delete acreage.
- E—Succession.
- F—Partial succession.

[Docket No. RI76-147]

MARSHALL EXPLORATION, INC.

Order Granting Special Relief

FEBRUARY 6, 1978.

On October 1, 1977, pursuant to the provisions of the Department of Energy Organization Act (DOE Act), Pub. L. 95-91, 91 Stat. 565 (August 4, 1977) and Executive Order No. 12009, 42 Fed. Reg. 46267 (September 15, 1977), the Federal Power Commission ceased to exist and its functions and regulatory responsibilities were transferred to the Secretary and the Federal Energy Regulatory Commission (FERC) which, as an independent commission within the Department of Energy, was activated on October 1, 1977.

The "saving provisions" on section 705(b) of the DOE Act provide that proceedings pending before the FPC on the date the DOE Act takes effect shall not be affected and that orders shall be issued in such proceedings as if the DOE Act had not been enacted. All such proceedings shall be continued and further actions shall be taken by the appropriate component of DOE now responsible for the function under the DOE Act and regulations promulgated thereunder. The functions which are the subject of these proceedings were specifically transferred to the FERC by Section 402(a)(1) of the DOE Act.

The joint regulation adopted on October 1, 1977, by the Secretary and the FERC entitled "Transfer of Proceedings to the Secretary of Energy and the FERC," 10 CFR—, provided that

this proceeding would be continued before the FERC. The FERC takes action in this proceeding in accordance with the above-mentioned authorities.

On August 26, 1976, Marshall Exploration, Inc. (Marshall) filed a petition for special relief in Docket No. RI76-147 pursuant to section 2.56b(h) of the Commission's regulations. Marshall requests a total rate of 50 cents per Mcf for sales of 100% of the gas produced from the Huhn No. 1 and the Young No. 7-1 wells in the Grand Cane Field, Desoto Parish, La., and from the Adams Estate No. 1, Averett No. 2, and Levi Burkett No. 1 wells in the Logansport Field, Desoto Parish, La. The gas from the Grand Cane Field is being sold to Texas Eastern Transmission Corp. (Texas Eastern) while the gas from the Logansport Field is being sold to Southern Natural Gas Co. (Southern).

Notice of the petition was published in the FEDERAL REGISTER. No interventions have been filed.

The subject sales are being made pursuant to a small producer certificate issued to Marshall in Docket No. CS71-853 on January 25, 1972. Marshall is currently receiving a base rate of 35.7 cents per Mcf for these sales under contracts dated April 9, 1970, and February 2, 1966, with Texas Eastern and Southern, respectively. Texas Eastern and Southern have agreed to pay any rate authorized by the Commission in this docket by their letters of September 23, 1977, and October 6, 1977, respectively, to Marshall.

Marshall states that it is not economically feasible to continue gas sales from the subject wells at the current base rate of 35.7 cents per Mcf. Although no additional investment is proposed, Marshall contends that spe-

cial relief is necessary in order to cover the cost of additional dehydration and compression and to avoid the premature abandonment of the estimated 212,658 Mcf of remaining recoverable reserves.

In a petition where no additional work has been proposed, it has been the Commission's policy to deny a return of or on book investment. Accordingly, the cost study conducted by Staff utilizes out-of-pocket costs and is based on data submitted by Marshall in its petition and in responses to Staff's requests for additional information. These estimated costs, which include dehydration and compression charges of 22 cents per Mcf for the Grand Cane Field wells and 25 cents per Mcf for the Logansport Field wells, were escalated at an annual rate of 5% for inflation for the first five years. In this manner operating costs for Huhn No. 1 and Young No. 7-1 wells combined were estimated to be \$6,685 over a 0.75 year remaining life; for the Averett No. 2 well, \$17,867 over a two-year remaining life; and for the Levi Burkett No. 1 Well, \$63,229 over a 5.5-year remaining life.

Marshall did not request an allowance for any increase in federal income tax resulting from the Tax Reform Act of 1975, and Staff did not include such an allowance in its calculations. It is the Staff's opinion that the volumes entailed herein will not prejudice Marshall's ability to continue the use of statutory depletion.

Staff's cost study follows traditional methodology and indicates that the requested rate is cost justified. Upon consideration of the data submitted by

¹See Appendix A, attached hereto.

Marshall and Staff's analysis thereof, we conclude that the petition should be granted.

The Commission orders:

(A) The petition for special relief filed by Marshall in docket No. RI76-147 is hereby granted.

(B) Marshall is hereby authorized to collect a total rate of 50 cents per Mcf at 15.025 p.s.i.a. for the subject sales of gas to Texas Eastern and Southern effective as of the date of issuance of this order.

(C) Marshall shall file within 30 days hereof executed contract amendments signed by Texas Eastern and Southern providing for payment of the rate approved herein.

By the Commission.

KENNETH F. PLUMB,
Secretary.

APPENDIX A

ENVIRONMENTAL PROTECTION AGENCY

(FRL 856-4)

ACCEPTABLE FUEL SAMPLING ANALYSIS METHODS FOR DEMONSTRATING COMPLIANCE BY SULFUR DIOXIDE SOURCES IN OHIO

United States Environmental Protection Agency (U.S. EPA) is publishing the following policy statement on an acceptable alternate method of demonstrating compliance with the federally promulgated Ohio Sulfur Dioxide regulation in response to requests from several sources in Ohio for clarification of what alternate methods would be acceptable. See 40 CFR § 52.1882 (a)(5) and (b)(5).

The Ohio implementation plan regulation for the control of sulfur dioxide

(SO₂) emissions (40 CFR 52.1881, 41 FR 36324 as amended by 41 FR 52455 and 41 FR 27588) requires that sources emitting 100 tons or greater of SO₂ per year which are in compliance with the regulation's emission limitation must certify that fact of compliance to the Administrator. 40 CFR 52.1882 (a)(5) and (b)(5). Compliance is required to be demonstrated through stack emission tests performed pursuant to the procedures specified in 40 CFR 60.46. While the regulation does not provide for demonstrating compliance by methods other than those specified in 40 CFR 60.46, the Agency has determined that for fossil fuel-fired steam generators certain fuel sampling analysis methods provide an acceptable alternative method and therefore may be submitted by Ohio SO₂ sources to U.S. EPA to demonstrate compliance.

Specifically, coal analysis conducted in accordance with ASTM method D3176 based on a twenty-four (24) hour period of fuel average or other equivalent methods approved by U.S. EPA in writing may be submitted by such Ohio sources to U.S. EPA to demonstrate compliance. Thus an owner or operator of a fossil fuel-fired steam generator may certify compliance by demonstrating through fuel analysis results based upon twenty-four (24) hour fuel averaging that the SO₂ emissions from the source will not exceed the applicable emission limitations 40 CFR 52.1881(b).

The use of fuel sampling analysis methods to demonstrate compliance is intended to eliminate the necessity of conducting a stack test on every emitting source in Ohio. However, acceptance by U.S. EPA of compliance certifications based on fuel analysis does not preclude the Administrator from requiring stack tests at a later time pursuant to Section 114 of the Clean Air Act or initiating enforcement actions based upon the results of subsequent stack tests.

Dated: February 9, 1978.

GEORGE R. ALEXANDER, Jr.,
Regional Administrator.

[6560-01]

ENVIRONMENT AND CONSERVATION IN NONNUCLEAR ENERGY RESEARCH AND DEVELOPMENT

(FRL 856-6)

Public Hearing

The Environmental Protection Agency (EPA) announces a Public Hearing on Environment and Conservation in Nonnuclear Energy Research and Development to be held at the General Services Administration Auditorium, 7th and D Streets, SW., Washington, D.C. from 9 a.m. to 4:30

p.m., March 29-31, 1978. The public is invited to attend.

Section 11 of the Nonnuclear Energy Research and Development Act of 1974 (Pub. L. 93-577) directs the responsible agency (formerly the Council on Environmental Quality, currently EPA) to carry out a continuing analysis of the Federal nonnuclear energy research and development program to evaluate the adequacy of attention to: (1) Energy conservation methods; and (2) Environmental protection from, and environmental consequences of the application of nonnuclear energy technologies.

Public views are an important component of this continuing analysis. Under direction of the Act, annual public hearings are held to provide the opportunity for interested individuals or groups to testify on environmental and conservation aspects of the research and development program. In particular, the 1978 hearing will focus on the Department of Energy's research programs directed at the following subjects:

- (a) Future energy patterns and coal use (March 29).
- (b) Energy conservation and solar energy development (March 30).
- (c) Oil shale and synthetic fuels from coal (March 31).

Transcripts of the hearings will be available to the public and will be transmitted to the President, the Congress, and the Secretary of the Department of Energy.

Additional information about this hearing may be obtained by phoning David Graham (202-755-0205) or Steven Plotkin (202-755-0645). Individuals or organizations wishing to testify should submit, on or before March 1, 1978, a brief summary of their intended testimony to:

Steven R. Rezek, Acting Deputy Assistant Administrator for Energy, Minerals, and Industry (Attention: Section 11 Hearing), RD-681, U.S. Environmental Protection Agency, Washington, D.C. 20460.

Witnesses may submit written testimony and/or deliver an oral statement of up to ten minutes in length. Additional time will be reserved for questions and comments from a panel of experts and written questions from the audience.

Dated: January 30, 1978.

STEPHEN J. GAGE,
Acting Assistant Administrator,
for Research and Development.

(FRL 856-3)

STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES AND NATIONAL EMISSIONS STANDARDS FOR HAZARDOUS AIR POLLUTANTS

Delegation of Authority to State of Delaware

On December 23, 1971 (36 FR 24876) and on March 8, 1974 (39 FR 9308), pursuant to Section 111 of the Clean Air Act, as amended, the Administrator of the Environmental Protection Agency (EPA) promulgated regulations establishing standards of performance for certain categories of new stationary sources (NSPS). On April 6, 1973 (38 FR 8820), pursuant to Section 111 of the Clean Air Act, as amended, the Administrator promulgated national emission standards for certain hazardous air pollutants (NESHAPS). Sections 113(c) and 112(d) direct the Administrator to delegate his authority to implement and enforce NSPS and NESHAPS to any State which has submitted adequate procedures. Nevertheless, the Administrator retains concurrent authority to implement and enforce the standards following delegation of authority to the State.

On September 7, 1977, the Honorable Pierre S. DuPont IV, Governor, State of Delaware, submitted to the EPA Regional Office a request for delegation of authority. Included in the request were copies of and references to pertinent Delaware statutes and regulations governing the control of air pollution, which provide the State with the requisite authority to enforce certain NSPS and NESHAPS. After a thorough review of that request, the Regional Administrator has determined that for the source categories set forth in paragraphs A and B of the following official letter the Honorable Pierre S. DuPont IV, Governor of the State of Delaware, delegation is appropriate subject to the conditions set forth in paragraph 1 through 9 of that letter:

SEPTEMBER 30, 1977.

Certified Mail Return Receipt Requested

Re Delegation of authority of new source performance standards and national emissions standards for hazardous air pollutants pursuant to sections 111(c) and 112(d), Clean Air Act, as amended.

Hon. PIERRE S. DUPONT IV,
Governor, State of Delaware,
Dover, Del. 19901

DEAR GOVERNOR DUPONT: This is in response to your letter of September 7, 1977, requesting delegation of authority for implementation and enforcement of certain Standards of Performance for New Stationary Sources (NSPS) and certain National Emissions Standards for Hazardous Air Pollutants (NESHAPS) to the State of Delaware's Department of Natural Resources and Environmental Control (the Department).

We have reviewed the pertinent laws of the State of Delaware and its Regulations governing the control of air pollution, and have determined that they provide an adequate and effective procedure for implementation and enforcement of the NSPS and NESHAPS regulations by the Department. Therefore, we hereby delegate authority to the Department, as follows:

A. The Department is delegated and shall have authority for all sources located in the State of Delaware subject to the following Standards for Performance for New Stationary Sources promulgated in 40 CFR Part 60: Fossil fuel-fired steam generators; incinerators; nitric acid plants; asphalt concrete plants; storage vessels for petroleum liquids; and sewage treatment plants.

B. The Department is delegated and shall have authority for all sources located in the State of Delaware subject to the following National Emissions Standards for Hazardous Air Pollutants promulgated in 40 CFR Part 61: Asbestos; beryllium; and mercury.

This delegation is based upon the following conditions:

1. Quarterly reports will be submitted to EPA by the Department, including:

(A) For New Source Performance Standards:

(1) Sources determined to be applicable during that quarter;

(2) Applicable sources which started operation during that quarter or which started operation prior to that quarter which have not been previously reported;

(3) The compliance status of the above, including the summary sheet from the compliance test(s); and

(4) Any legal actions which pertain to NSPS sources.

(B) For National Emission Standards for Hazardous Air Pollutants:

(1) NESHAPS sources granted a permit to construct;

(2) NESHAPS sources inspected during that quarter and their compliance status (except under § 61.22(d) and (e));

(3) The number of inspections under § 61.22(d) and (e); and

(4) The requirements of (A) above.

2. Enforcement of the NSPS and NESHAPS regulations in the State of Delaware will be the primary responsibility of the Department.

Where the Department determines that such enforcement is not feasible and so notified EPA, or where the Department acts in a manner inconsistent with the terms of this delegation, EPA will exercise its concurrent enforcement authority pursuant to section 113 of the Clean Air Act, as amended, with respect to sources within the State of Delaware subject to NSPS and NESHAPS regulations.

3. Acceptance of this delegation of certain promulgated NSPS and NESHAPS does not commit the State of Delaware to request or accept delegation of other present or future standards and requirements. A new request for delegation will be required for any standards not included in the State's request of September 7, 1977.

4. The Department will at no time grant a waiver of compliance under the NESHAPS regulations.

5. The Department will not grant a variance from compliance with the applicable NSPS or NESHAPS regulations if such variance delays compliance with the Federal

Standards (Parts 60 and 61). Should the Department grant such a variance, EPA will consider the source receiving the variance to be in violation of the applicable Federal regulations and may initiate enforcement action against the source pursuant to Section 113 of the Clean Air Act. The granting of such variances by the Department shall also constitute grounds for revocation of delegation by EPA.

6. The Department and EPA will develop a system of communication sufficient to guarantee that each office is always fully informed regarding the interpretation of applicable regulations. In instances where there is a conflict between a Department interpretation and a Federal interpretation of applicable regulations, the Federal interpretation must be applied if it is more stringent than that of the Department.

7. If at any time there is a conflict between a department regulation and a Federal regulation (40 CFR Parts 60 and 61), the Federal regulation must be applied if it is more stringent than that of the Department. If the Department does not have the authority to enforce the more stringent Federal regulation, this portion of the delegation may be revoked.

8. The Department will utilize the methods specified in 40 CFR Parts 60 and 61, in performing source tests pursuant to the regulations.

9. If the Regional Administrator determines that a Department program for enforcing or implementing a NSPS or NESHAPS regulation is inadequate, or is not being effectively carried out, this delegation may be revoked in whole or in part. Any such revocation shall be effective as of the date specified in a Notice of Revocation to the Department.

A Notice announcing this delegation will be published in the *FEDERAL REGISTER* in the near future. The Notice will state, among other things, that effective immediately, all reports required pursuant to the above-mentioned Federal NSPS and NESHAPS regulations by sources located in the State of Delaware should be submitted to the State of Delaware, Department of Natural Resources and Environmental Control, Edward Tatnall Building, Dover, Del. 19901, in addition to EPA, Region III. Any such reports which have been or may be received by EPA, Region III, will be promptly transmitted to the Department.

Since this delegation is effective immediately, there is no requirements (sic) that the Department notify EPA of its acceptance. Unless EPA receives from the Department written notice of objections within ten (10) days of receipt of this letter, the State of Delaware's Department of Natural Resources and Environmental Control will be deemed to have accepted all of the terms of the delegation.

Sincerely,

JACK J. SCHRAMM,
Regional Administrator.

Therefore, pursuant to the authority delegated to him by the Administrator, the Regional Administrator notified the Honorable Pierre S. DuPont IV, Governor, State of Delaware, on September 30, 1977, that authority to implement and enforce certain standards of performance for new stationary sources and national emission standards for hazardous air pollutants was delegated to the State of Delaware.

Copies of that request for delegation of authority are available for public inspection at the Environmental Protection Agency, Region III Office, 6th and Walnut Streets, Philadelphia, Pa. 19106.

Effective immediately, all reports required pursuant to the standards of performance for new stationary sources and the national emission standards for hazardous air pollutants listed in the above letter should be submitted to the Delaware Department of Natural Resources and Environmental Control, Edward Tatnall Building, Dover, Del. 19901, with copies to EPA, Region III. However, reports required pursuant to 40 CFR 60.7(c) (excess emissions and malfunctions) should be sent to the Delaware Department of Natural Resources and Environmental Control, only.

This Notice is issued under the authority of sections 111 and 112 of the Clean Air Act, as amended, 42 U.S.C. 1857c-6 and 7.

Dated: January 31, 1978.

JACK J. SCHRAMM,
Regional Administrator.

[FRL 855-8; OPP-42037C]

STATE OF COLORADO

Intent To Implement a Federal Plan for Certification of Pesticide Applicators

INTRODUCTION

Under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, 7 U.S.C. 136 et seq., the Administrator of the U.S. Environmental Protection Agency (EPA) has the authority to classify all registered pesticide uses as either "restricted use" or "general use". Use of a restricted use pesticide by, or retail sale of a restricted use pesticide to, an individual who is not certified or acting under the direct supervision of a certified applicator, is a violation of the amended FIFRA.

It was the intent of Congress that persons desiring to use restricted use pesticides should be able to obtain certification under state programs approved by EPA. The criteria for such approval are published at 40 CFR Part 171. Each state, however, must accept or decline to accept responsibility for developing and administering an approvable state program. While it is EPA's position that state programs are best suited to the needs of the state and its citizens, EPA has no authority to require states to develop their own programs.

Between April and November 1976, the Colorado Department of Agriculture, in coordination with the EPA, Region VIII, Pesticides Branch and

Regional Counsel, developed an applicator certification plan and drafted proposed pesticide legislation necessary to provide legal authority for the administration of a state plan. On November 17, 1976, Colorado Governor Richard Lamm submitted the State's Plan for the Certification of Pesticide Applicators to EPA. Approval was requested contingent on passage of the proposed pesticide legislation and promulgation of implementing regulations.

On January 4, 1977, EPA, Region VIII, Denver, Colorado, published a notice in the *FEDERAL REGISTER* (42 FR 839) announcing the Agency's intent to approve on a contingency basis Colorado's State Plan. Following a 30-day comment period, during which no comments were received, a notice was published in the *FEDERAL REGISTER* on March 14, 1977 (42 FR 13861) announcing the Agency's contingent approval of the Colorado State Plan. Contingent approval for the Colorado State Plan was granted until May 1, 1977.

On April 28, 1977, the Regional Administrator, EPA, Region VIII, signed a *FEDERAL REGISTER* notice announcing an extension of the contingent approval for Colorado's State Plan until June 18, 1977. This extension was granted to allow additional time for the Colorado State Legislature to consider the pending pesticide applicator certification legislation. This notice was published in the *FEDERAL REGISTER* on May 20, 1977 (42 FR 25912). On June 22, 1977, the Colorado State Legislature officially adjourned without formal consideration of the proposed legislation.

Any state agency desiring to certify pesticide applicators under the amended FIFRA must have the required legal authority to develop and administer the program, as required by section 4 of the amended FIFRA and 40 CFR Part 171. The failure of the Colorado State Legislature to enact pesticide applicator certification legislation denied the State's Department of Agriculture the legal authority to administer an approvable pesticide applicator certification program. Consequently, the terms of EPA's contingent approval of Colorado's Plan have not been met and EPA must assume responsibility to provide a certification program for the citizens of the State of Colorado.

In accordance with the provisions of Section 4(a)(1) of the FIFRA, as amended, the 40 CFR Part 171, notice is hereby given that the EPA, Region VIII, will conduct a program within the State of Colorado to certify applicators of restricted use pesticides.

The entire EPA Plan, together with all attached appendices, may be examined during normal business hours at the following locations:

(1) Room 227, 1860 Lincoln Street, Denver, Colo. 80295, Pesticides Branch, Air and Hazardous Materials Division, EPA, Region VIII, telephone 303-837-3926.

(2) Room M2709, Waterside Mall, 401 M Street SW., Washington, D.C. 20460, Operations Division, WH-570, Office of Pesticide Programs, EPA, telephone 202-755-0356.

A summary of the EPA certification program for the State of Colorado follows.

SUMMARY OF CERTIFICATION PLAN

The EPA, Region VIII, Denver, Colo. (hereafter called "Region VIII") will be the lead agency for the administration of the pesticide applicator certification program in the State of Colorado, with the Air and Hazardous Materials Division, Pesticides Branch, responsible for the program's implementation and coordination. The Colorado State University (CSU) Cooperative Extension Service has the responsibility for administering statewide the EPA approved pesticide applicator training program. This includes preparing and conducting training courses for applicators as well as preparing and distributing training materials. The Pesticides Branch will review all training materials and courses to ensure that they meet the requirements of the amended FIFRA and its regulations.

Legal authority for EPA to conduct the applicator certification program is found primarily in section 4 of the amended FIFRA, regulations at 40 CFR 171.1 through 171.10, and proposed regulations at 40 CFR 171.11. Additional enforcement authorities are found in sections 8, 9, and 12 of the amended FIFRA and at U.S. Code, Title 18, section 1001.

Region VIII has adequate resources to conduct a certification program in Colorado which meets the requirements of the amended FIFRA and regulations at 40 CFR Part 171. These resources include funding which was originally budgeted for grant assistance to the Colorado Department of Agriculture for program development, implementation and administration. EPA also has funding available for applicator training by the CSU Cooperative Extension Service.

Region VIII personnel will be responsible for the maintenance of the Colorado certification program. Additional personnel may be assigned to Region VIII, as needed. In addition, EPA anticipates contracting with commercial firms to lessen the need to hire additional permanent personnel.

Region VIII will prepare an annual report on or before March 31 of each year. Copies of this report will be made available to the Governor of Colorado, Commissioner of the Colorado Department of Agriculture, and Director of the CSU Cooperative Extension Service. Copies of this report will

be available for public inspection at the EPA, Region VIII, Pesticides Branch Office at 1860 Lincoln Street, Denver, Colo., between 9 a.m. and 3:30 p.m., Monday through Friday.

Region VIII estimates that approximately 3,000 commercial applicators and 20,000 private applicators will need to be certified in Colorado. Qualified commercial and private applicators will be issued certification credentials.

Region VIII will use the same commercial applicator categories as outlined at 40 CFR 171.3(b). No additional major categories or subcategories will be used in the Colorado program at this time. The standards of Competency for commercial applicators will be those outlined at 40 CFR 171.4 (b) and (c) and 171.6.

All individuals seeking certification as commercial applicators will be required to take and successfully pass written examinations prior to being certified. These examinations will cover the general standards at 40 CFR 171.4(b) and 171.6 and the standards for each category in which the applicator wishes to be certified, at 40 CFR 171.4(c)(1) through 171.4(c)(10). A score of 70 percent or better is required for passage of each examination. All commercial applicators will be required to be recertified by written examination every two years.

If adequate resources are available, written examinations for commercial applicators will be administered by Region VIII at various locations in Colorado. Information concerning times, dates and locations of examination sessions will be prepared and published. Examinations may also be taken by appointment at the Pesticides Branch office, 1860 Lincoln Street, Denver, Colo.

Region VIII will make provision to issue commercial certification credentials in the appropriate category(ies) valid in the State of Colorado to commercial applicators who hold a certificate valid in other States or Indian Reservations with EPA approved plans. Applicators will be required to present written documentation of certification to the Pesticides Branch office prior to being issued an EPA certification credential for Colorado. All commercial applicators seeking certification through this means must have met the same requirements as commercial applicators who have obtained initial certification from this Agency in accordance with the preceding two paragraphs. Certification issued in this manner will be valid for two years from the date of issuance of the credential or upon termination of the original certification, whichever occurs first.

The standards of competency for private applicators will be those at 40 CFR 171.5 and 171.6. Individuals may

be certified as private applicators in Colorado by completing one of the following options:

1. *Successful completion of an approved training course.* Approved training courses may include but are not limited to courses sponsored by EPA, the CSU Cooperative Extension Service, the Colorado Division of Occupational Education (Vo-Ag), or private educational institutes. Each training session for certification must be approved by Region VIII and include at a minimum: (a) Coverage of private applicator standards which are listed at 40 CFR 171.5 and 171.6 and, (b) completion of the required no pass/no fail written questionnaire or receipt of a passing grade for a course offered by a recognized educational institution.

The CSU Cooperative Extension Service, in cooperation with Region VIII, will conduct training sessions for private applicators at various locations in Colorado. Information concerning times, dates and locations of these training courses will be made available through the local county extension agents.

2. *Successful completion of a written examination.* To pass the written exam, a score of 70 percent or better will be required. This exam will cover the standards listed at 40 CFR 171.5 and 171.6.

If adequate resources are available, written examinations for private applicators will be administered by representatives of the EPA at various locations in Colorado. Information concerning times, dates and locations of examinations will be prepared and published. Examinations may also be taken by appointment at the Region VIII office.

(Although Section 4 of the amended FIFRA prohibits EPA from requiring individuals to be certified as private applicators only by written examination, it is the Agency's view that applicators should be given this option. In many cases individuals seeking certification as private applicators may not have the time or desire to be certified by completion of training. In these cases an applicator may have the opportunity to be certified, on a voluntary basis, by written examination.)

3. *Successful completion of a self-study program.* An individual seeking certification as a private applicator may choose the optional requirement of completing the EPA programmed instruction learning course "Apply Pesticides Correctly" in the presence of an official of the Region VIII office or an EPA designated official. This official will verify that the applicator has completed the program and is qualified for certification. If adequate resources are available, the EPA will conduct sessions in various locations throughout Colorado where applica-

tors can complete the program under Agency guidance. Information concerning times, dates and locations will be developed and made public.

4. *Submitting evidence of certification as a private applicator in any other State having an EPA approved applicator certification program.* A private applicator will be required under this option to submit written evidence (copy of certification credential, license, etc.) of certification to Region VIII before receiving private applicator certification in Colorado. Applicants seeking certification under this mechanism must have met requirements equal to those established above. Certification issued in this manner will be valid for three years from date of issuance or the expiration date of the certificate upon which EPA certification was based, whichever occurs first.

5. *Non-Readers.* Region VIII will certify non-readers for the use of a single product for specific use(s), if the individual seeking certification successfully completes an approved training course or passes an oral examination approved by Region VIII. Such training or testing shall incorporate a specific procedure relating to label comprehension, as described at 40 CFR 171.5(b)(1).

All private applicators will be required to be recertified every three years. Private applicators may be recertified by successful completion of one of the options available for original certification.

To ensure that certified applicators comply with standards for the use of restricted use pesticides and to provide adequate supervision of noncertified applicators, EPA inspectors will investigate incidents, accidents and complaints related to pesticide use. EPA inspectors will also make routine inspections of pesticide manufacturers, distributors, dealers and users.

In cases where misuse occurs, EPA may, if appropriate, modify, suspend or revoke a certificate or take action under section 14 of the amended FIFRA. Under section 14, EPA has the authority to assess both civil and criminal penalties. Commercial applicators, wholesalers, dealers, retailers or other distributors can be assessed up to a \$5,000 fine for each offense as civil penalties and up to a \$25,000 fine or imprisonment, for not more than one year, or both, for each offense as criminal penalties. Private applicators, subsequent to receiving a written warning, can be assessed a civil penalty up to \$1,000, or a criminal penalty of not more than a \$1,000 fine and/or imprisonment for not more than 30 days, for each offense.

PUBLIC COMMENTS

Interested persons are invited to submit written comments on the pro-

posed Federal certification program for the State of Colorado to the Chief, Pesticides Branch, Region VIII, Environmental Protection Agency, 1860 Lincoln Street, Suite 103, Denver, Colo. 80295. Comments must be received on or before March 17, 1978, and should bear the identifying notation (OPP-42037C). All written comments filed pursuant to this notice will be available for public inspection at the above mentioned location from 8:30 a.m. to 3:30 p.m., Monday through Friday.

Dated: February 3, 1978.

JERRY W. RAISCH,
Acting Regional Administrator,
Region VIII.

FEDERAL COMMUNICATIONS COMMISSION

(Report No. I-431)

INTERNATIONAL AND SATELLITE RADIO

Applications Accepted for Filing.

JANUARY 30, 1978.

The Applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications if, upon further examination, it is determined they are defective and not in conformance with the Commission's Rules, Regulations and its Policies. Final action will not be taken on any of these applications earlier than 31 days following the date of this notice. Section 309(d)(1).

For the Federal Communications Commission.

WILLIAM J. TRICARICO,
Secretary.

SATELLITE COMMUNICATIONS SERVICES

Texas, 219-DSE-P/L-78 Community Telecommunications, Inc., Huntsville Texas., for authority to construct, own and operate a domestic communications receive-only Earth station at this location. Lat. 30°41'56" N. Long. 95°33'39" W. Rec. freq: 3500-4200 MHz. Emission 36000F9. With a 5 meter antenna.

Oklahoma, 255-DSE-AL-78 Kansas State Network, Inc., Chickasha, Oklahoma (KE89), assignment of license to Kansas State Network, Inc. From: Cablevision of Chickasha Co.

South Dakota, 248-DSE-P/L-78 Central Plains Cable TV, Inc., Mitchell, South Dakota, authority to construct, own and operate a domestic communications satellite receive-only Earth station at this location. Lat. 43°42'02" N. Long. 98°00'39" W. Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 5 meter antenna.

Florida, 249-DSE-P/L-78 Teleprompter Corp., New Fort Richey, Fla., authority to construct, own and operate a domestic communications satellite receive-only

Earth station at this location. Lat. 28°14'40" N. Long. 82°42'05" W. Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 6 meter antenna.

New Mexico, 250-DSE-P/L-78 Teleprompter Corp., Lovington, New Mex., authority to construct, own and operate a domestic communications satellite receive-only Earth station at this location. Lat. 32°57'32" N. Long. 103°21'15" W. Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 4.5 meter antenna.

Tennessee, 251-DSE-P/L-78 FNI Communications Co., Cookeville, Tennessee, authority to construct, own and operate a domestic communications satellite receive-only Earth station at this location. Lat. 36°09'44" N. Long. 85°29'49" W. Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 4.3 meter antenna.

New Mexico, 252-DSE-P/L-78 Teleprompter Corp., Portales, New Mex., authority to construct, own and operate a domestic communications satellite receive-only Earth station at this location. Lat. 34°09'48" N. Long. 103°20'20" W. Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 4.5 meter antenna.

Mississippi, 253-DSE-P/L-78 Vicksburg Video, Inc., Vicksburg, Miss., authority to construct, own and operate a domestic communications satellite receive-only Earth station at this location. Lat. 32°21'21" N. Long. 90°48'50" W. Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 4.5 meter antenna.

Wisconsin, 254-DSE-P/L-78 American Television & Communications Corp., Eau Claire, Wis., authority to construct, own and operate a domestic communications satellite receive-only Earth station at this location. Lat. 44°48'34" N. Long. 91°34'06" W. Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 5 meter antenna.

New Mexico, 256-DSE-P/L-78 Sun Cable TV, Inc., Deming, N. Mex., authority to construct, own and operate a domestic communications satellite receive-only Earth station at this location. Lat. 32°18'24" N. Long. 107°45'10" W. Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 5 meter antenna.

Louisiana, 257-DSE-P/L-78 Telecable, Inc., Jonesboro, La., authority to construct, own and operate a domestic communications satellite receive-only Earth station at this location. Lat. 32°15'11" N. Long. 92°42'46" W. Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 5 meter antenna.

Alaska, 258-DSE-P-78 University of Alaska, Fairbanks, Alaska, authority to construct, own and operate a domestic communications satellite receive-only Earth station at this location. Lat. 64°55'30" N. Long. 147°59'38" W. Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 10 meter antenna.

SATELLITE COMMUNICATIONS SERVICES

New Mexico, 262-DSE-P/L-78 Hurley Cable TV, Inc. (near) Hurley, N. Mex. Authority to construct, own and operate a domestic communications satellite receive-only Earth station at this location. Lat. 32°42'44" N. Long. 108°07'54" W. Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 6 meter antenna.

Washington, 261-DSE-P/L-78 American Satellite Corp., Kent, Wash. Authority to construct, and operate a transmit/receive

Earth station at this location. Lat. 47°25'06" N. Long. 122°15'31" W. Transmit freq: 5925-6425 MHz. and Rec. freq: 3700-4200 MHz. Emission 90P9Y. With a 5 meter antenna.

North Carolina, 264-DSE-P/L-78 Southern Communications Corp., Roanoke Rapids, N.C. Authority to construct, own and operate a domestic communications satellite receive-only Earth station at this location. Lat. 36°25'16" N. Long. 77°38'25" W. Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 5 meter antenna.

West Virginia, 265-DSE-P/L-78 Video Cable Co., Inc., Princeton, W. Va. Authority to construct, own and operate a domestic communications satellite receive-only Earth station at this location. Lat. 37°24'03" N. Long. 81°05'19" W. Rec. freq: 3700-4200 MHz. Emission 36000F9. With a 5 meter antenna.

4-DSS-P-78, 5-DSS-P-78, 6-DSS-P-78, 7-DSS-P-78, 8-DSS-P-78, 9-DSS-P-78, 10-DSS-P-78 Western Union Space Communications, Inc. Applications for authority to construct commercial systems of 7 space stations for Advanced WESTAR domestic satellite communications in the 4/6/12/14 GHz bands.

The proposed construction program consists of 5 complete satellites and components for sixth and seventh satellites. Commercial domestic satellite services would be provided by means of the following facilities to be incorporated into each satellite:

(a) 12 transponders transmitting in the 3700-4200 MHz band and receiving in the 5925-6425 MHz band, nominal 36000F9 emission, with a nominal EIRP of 33 dBW and a nominal G/T of -7.4 dB/K over the continental United States, and transponder transmit center frequencies of 3720, 3760, 3800, 3840, 3880, 3920, 3960, 4000, 4040, 4080, 4120 and 4160 MHz (horizontal polarization);

(b) 4 transponders transmitting in the 11.7-12.2 GHz band and receiving in the 14.0-14.5 GHz band, nominal 225000F9 emission (supporting 250 Mbps QPSK), obtained through the use of multiple antenna beams, cross-polarization and satellite switched TDMA, transponder transmit center frequencies are at 11.8126 and 12.0875 GHz with horizontal, vertical and circular polarizations, with nominal EIRP's between 42.0 and 50.3 dBW and nominal G/T's between -5.0 and 4.4 dB/K.

Normal commercial T.T. & C. operations are to be conducted at 11.939 GHz (telemetry), 14.236 GHz (Command) and 14.250 GHz (pilot).

New Mexico, 263-DSE-P-78 Western Union Space Communications, Inc., White Sands, N. Mex. Application for authority to construct a T.T. & C. Earth station for operations with Advanced WESTAR satellites. Lat. 32°30'03" N. Long. 106°36'31" W. Trans. freq: 14.2359625 GHz, 14.250 GHz, 3000F9, 64 dBW EIRP. Rec. freq: 11.939 GHz, 10000F9 with a 4.5 meter antenna.

Informative.—Each of these spacecraft will be capable of operating as government radio stations in the 2.0-2.3, 13.4-14.05 and 14.6-15.23 GHz bands in the Tracking and Data Relay Satellite System of NASA or as commercial domestic satellite facilities in

the bands specified above. The planned in-orbit configuration consists of two satellites dedicated to TDRSS, one dedicated for advanced WESTAR at 103° West Longitude, and an in-orbit spare for all 3 at 99° West Longitude, with the fifth complete satellite an on-the-ground spare. Alternative orbital locations for the dedicated Advanced WESTAR and in-orbit spare satellites are discussed in the applications, and orbital locations will be assigned by the Commission taking all factors into account, including international frequency coordination.

FM AND TV TRANSLATOR APPLICATIONS READY AND AVAILABLE FOR PROCESSING

Adopted: February 7, 1978.

Released: February 13, 1978.

Notice is hereby given, pursuant to §1.572(c) and 1.573(d) of the Commission's rules, that on April 16, 1978, the TV and FM translator applications listed in the attached appendix will be considered as ready and available for processing. Pursuant to §1.227(b)(1) and §1.519(b) of the Commission's rules, and application, in order to be considered with any application appearing on the attached list or with any other application on file by the close of business on April 15, 1978, which involves a conflict necessitating a hearing with any application on this list, must be substantially complete and submitted for filing at the offices of the Commission in Washington, D.C., by the close of business on April 15, 1978. The attention of prospective applicants is directed to the fact that some contemplated proposals may not be eligible for consideration with an application appearing in the attached appendix by reason of conflicts between the listed applications and applications appearing in previous notices published pursuant to §1.573(d) of the Commission's rules.

The attention of any party in interest desiring to file pleadings concerning any pending TV and FM translator application, pursuant to section 309(d)(1) of the Communications Act of 1934, as amended, is directed to §1.580(i) of the Commission's rules for provisions governing the time for filing and other requirements relating to such pleadings.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,

Secretary.

FM TRANSLATOR APPLICATIONS

BMPFT-57 (K296BB), Rifle and Anvil Points, Colo., Mesa Broadcasting Co. Req: Change output frequency to Channel 261, 100.1 MHz, change principal community to Rifle, Colo.

BMPFT-59 (K252AB), Livingston, Mont., Christian Enterprises, Inc. Req: Change output frequency to Channel 257, 99.3 MHz.

BPFT-488 (new), East Salt Creek and West Douglas Creek rural area, Colorado, Mesa Broadcasting Co. Req: Channel 261, 100.1 MHz, 10 watts. Primary: KQIX-FM, Grand Junction, Colo.

BPFT-489 (new), Weaverville, Douglas City Junction, Calif., Weaverville Translator Co., Inc. Req: Channel 288, 105.5 MHz, 10 watts. Primary: KPAY-FM, Chico, Calif.

BPFT-490 (new), Weaverville, Douglas City Junction, Calif., Weaverville Translator Co., Inc. Req: Channel 292, 106.3 MHz, 10 watts. Primary: KFMP-FM, Chico, Calif.

BPFT-492 (new), Roanoke, Sugar Loaf area, Va., Commonwealth of Virginia, State Board for Community Colleges, Virginia Western Community College. Req: Channel 211, 90.1 MHz, 1 watt. Primary: WVWR-FM, Roanoke, Va.

BPFT-493 (new), Monticello-Blanding and Canyonlands National Park, Utah, Radio San Juan, Inc. Req: Channel 285, 104.9 MHz, 10 watts. Primary: KRSJ-FM, Durango, Colo.

BPFT-496 (new), "up country", Maui, Hawaii, Maui Broadcasting Corp. Req: Channel 244, 96.7 MHz, 10 watts. Primary: KAOI-FM, Wailuku, Hawaii.

BPFT-497 (new), Homer, Alaska, KSRM, Inc. Req: Channel 265, 100.9 MHz, 10 watts. Primary: KOOK-FM, Kenai, Alaska.

UHF TV TRANSLATOR APPLICATIONS

BPTT-3490 (K66AD), Redwood Falls, Minn., Redwood TV Improvement Corp. Req: Change frequency to Channel 58, 734-740 MHz.

BPTT-3491 (K80AL), Redwood Falls, Minn., Redwood TV Improvement Corp. Req: Change frequency to Channel 66, 782-788 MHz.

BPTT-3492 (K82BN), Redwood Falls, Minn., Redwood TV Improvement Corp. Req: Change frequency to Channel 68, 794-800 MHz.

BPTT-3493 (new), Wolf Point, Mont., Poplar TV District. Req: Channel 55, 716-722 MHz, 100 watts. Primary: KFBB-TV, Great Falls, Mont.

BPTT-3494 (new), Goodlett, Acme, Quanah, and Chillicothe, Tex., Copper Breaks TV Translator System. Req: Channel 63, 764-770 MHz, 20 watts. Primary: KAMR-TV, Amarillo, Tex.

BPTT-3495 (new), Goodlett, Acme, Quanah, and Chillicothe, Tex., Copper Breaks TV Translator System. Req: Channel 65, 776-782 MHz, 20 watts. Primary: KAUZ-TV, Wichita Falls, Tex.

BPTT-3496 (new), Goodlett, Acme, Quanah, and Chillicothe, Tex., Copper Breaks TV Translator System. Req: Channel 67, 788-794 MHz, 100 watts. Primary: KVIL-TV, Amarillo, Tex.

BPTT-3497 (new), Hollis, Gould, Duke, Vinson, and Reed, Okla., Southwest TV Translator System. Req: Channel 55, 716-722 MHz, 100 watts. Primary: KAMR-TV, Amarillo, Tex.

BPTT-3498 (new), Hollis, Gould, Duke, Vinson, and Reed, Okla., Southwest TV Translator System. Req: Channel 57, 728-734 MHz, 100 watts. Primary: KAUZ-TV, Wichita Falls, Tex.

BPTT-3499 (new), Hollis, Gould, and Duke, Okla., Southwest TV Translator System. Req: Channel 59, 740-746 MHz, 100 watts. Primary: KVIL-TV, Amarillo, Tex.

BMPTT-969 (K78CG), Salmon, Idaho, Lemhi Television Corp. Req: Change frequency to Channel 65, 776-782 MHz.

BPTT-3500 (new), Stroudsburg, Pa., NEP Communications, Inc. Req: Channel 66, 782-788 MHz, 100 watts. Primary: WNEP-TV, Scranton-Wilkes Barre, Pa.

BPTT-3501 (new), Rock Rapids and surrounding area, Iowa, State Educational Radio and Television. Req: Channel 25, 536-542 MHz, 1 watt. Primary: KSIN-TV, Sioux City, Iowa.

BPTT-3502 (new), Sibley and surrounding area, Iowa, State Educational Radio and Television Facility Board. Req: Channel 33, 584-590 MHz, 1 watt. Primary: KSIN-TV, Sioux City, Iowa.

BPTT-3503 (new), Fort Madison and surrounding area, Iowa, State Educational Radio and Television Facility Board. Req: Channel 38, 614-620 MHz, 1 watt. Primary: KIIN-TV, Iowa City, Iowa.

BPTT-3504 (new), Keosauqua and surrounding area, Iowa, State Educational Radio and Television Facility Board. Req: Channel 54, 710-716 MHz, 100 watts. Primary: KIIN-TV, Iowa City, Iowa.

BPTT-3509 (new), Alexandria and Douglas County, Minn., Central Minnesota Television Co. Req: Channel 60, 746-752 MHz, 100 watts. Primary: KDAL-TV, Duluth, Minn.

BPTT-3510 (new), Alexandria and Douglas County, Minn., Central Minnesota Television Co. Req: Channel 58, 734-740 MHz, 100 watts. Primary: WIRT-TV, Hibbing, Minn.

BPTT-3511 (K57AL), Indian Village and Fort Wingate, N. Mex., The Navajo Tribe. Req: Change principal community to Thoreau, N. Mex.

BPTT-3512 (K72CN), Indian Village and Fort Wingate, N. Mex., The Navajo Tribe. Req: Change frequency to Channel 55, 718-722 MHz, change principal community to Thoreau, N. Mex., increase output power to 100 watts.

BPTT-3513 (K80CA), Indian Village and Fort Wingate, N. Mex., The Navajo Tribe. Req: Change frequency to Channel 59, 740-746 MHz, change principal community to Thoreau, N. Mex., increase output power to 100 watts.

BPTT-3514 (K55AY), Window Rock and Fort Defiance, Ariz., The Navajo Tribe. Req: Change frequency to Channel 67, 788-794 MHz, add St. Michaels, Ariz., to present principal community.

BPTT-3515 (K72AP), Window Rock, Fort Defiance, and St. Michaels, Ariz., The Navajo Tribe. Req: Change frequency to Channel 85, 776-782 MHz, increase output power to 100 watts.

BPTT-3516 (K80AM), Window Rock, Fort Defiance, and St. Michaels, Ariz., The Navajo Tribe. Req: Change frequency to Channel 89, 800-806 MHz, increase output power to 100 watts.

BPTT-3505 (new), Alexandria, Minn., Selective TV, Inc. Req: Channel 62, 758-764 MHz, 100 watts. Primary: KTCA-TV, St. Paul, Minn.

BPTT-3524 (new), Alexandria, Minn., Selective TV, Inc. Req: Channel 58, 722-728 MHz, 100 watts. Primary: WCCO-TV, Minneapolis, Minn.

BPTT-3525 (new), Alexandria, Minn., Selective TV, Inc. Req: Channel 40, 828-832 MHz, 100 watts. Primary: KMSP-TV, Minneapolis, Minn.

BPTT-3528 (new), Alexandria, Minn., Selective TV, Inc. Req: Channel 38, 614-620 MHz, 100 watts. Primary: WTCN-TV, Minneapolis, Minn.

VHF TV TRANSLATOR APPLICATIONS

BPTTV-6003 (new), West Glacier, Martin City, Coram, and Hungry Horse, Mont., Desert Mountain TV Association. Req: Channel 10, 192-198 MHz, 5 watts. Primary: KHQ-TV, Spokane, Wash.

BPTTV-6004 (K07IT), West Glacier, Mont., Desert Mt. TV Association. Req: Add Coram, Martin City, and Hungry Horse, Mont., to present principal community increase output power to 5 watts.

BPTTV-6005 (K11KH), West Glacier Area, Mont., Desert Mt. TV Association. Req: Change frequency to Channel 12, 204-210 MHz, add Coram, Martin City, and Hungry Horse, Mont., to present principal community, increase output power to 5 watts.

BPTTV-6006 (new), Soda Springs, Grace, and Bancroft, Idaho, Caribou County TV Association. Req: Channel 12, 204-210 MHz, 10 watts. Primary: KBGL-TV, Pocatello, Idaho.

BPTTV-6007 (K130K), Silver Springs, Nev., American Legion Post No. 13. Req: Change frequency to Channel 12, 204-210 MHz.

BPTTV-6008 (new), Poplar, Mont., Poplar TV District. Req: Channel 13, 210-216 MHz, 10 watts. Primary: KFBB-TV, Great Falls, Mont.

BPTTV-6009 (new), Dayton, Nev., Senior Citizens of Dayton, Nevada, Inc. Req: Channel 6, 82-88 MHz, 10 watts. Primary: KOLO-TV, Reno, Nev.

BPTTV-6010 (new), Dayton, Nev., Senior Citizens of Dayton, Nevada, Inc. Req: Channel 11, 198-204 MHz, 10 watts. Primary: KCRL-TV, Reno, Nev.

BPTTV-6011 (new), Dayton, Nev., Senior Citizens of Dayton, Nevada, Inc. Req: Channel 13, 210-216 MHz, 10 watts. Primary: KTVN-TV, Reno, Nev.

BPTTV-6012 (K13JK), Newcastle, Wyo., Newcastle TV Association, Inc. Req: Add Lak Draw, Skull Creek, and Mondell, Wyo., to present principal community, increase output power to 10 watts and change primary TV station to KIVV, channel 5, Lead, S. Dak.

BPTTV-6013 (K04GW), Spearfish, S. Dak., State Board of Directors for Educational Television. Req: Change primary station to KPSD-TV, Channel 13, Eagle Butte, S. Dak.

[BC Docket No. 78-48; File No. BRED-54; FCC 78-73]

RESEARCH EDUCATIONAL FOUNDATION, INC.; STATION KVTT(FM)

Renewal of License; Order and Notice of Apparent Liability

Adopted: February 6, 1978.

Released: February 8, 1978.

By the Commission: Commissioner White concurring and issuing a statement in which Commissioners Washburn and Brown join.

1. The Commission has before it for consideration the captioned application and its inquiries into the operation by Research Educational Foundation, Inc., of Station KVTT(FM), Dallas, Tex.

2. Information before the Commission raises serious questions as to whether the captioned applicant possesses the qualifications to be or to remain a licensee of the captioned station. In view of these questions, the Commission is unable to find that a grant of the renewal application would serve the public interest, convenience and necessity, and must, therefore designate the application for hearing.

3. Accordingly, *It is ordered*, That the captioned application is designated for hearing pursuant to section 309(e) of the Communications Act of 1934, as amended, at a time and place specified in a subsequent Order, upon the following issues:

(a) To determine whether the current officers and directors of the licensee corporation assumed control of Station KVTT(FM) without the required Commission authorization, in violation of Section 310(d) of the Communications Act.

(b) To determine whether, and if so, the extent to which, officers and directors of the licensee corporation made misrepresentations to the Commission or were lacking in candor.

(c) To determine whether the station has broadcast programs containing announcements promoting the sales of products or services in violation of § 73.503(d) of the Commission's Rules.

(d) To determine whether the station has charged program suppliers for broadcast time in violation of § 73.503(c) of the Commission's Rules.

(e) To determine, in light of the evidence adduced under the preceding issues, whether the applicant possesses the requisite qualifications to be or to remain a licensee of the Commission, and whether a grant of the captioned application would serve the public interest, convenience and necessity.

4. *It is further ordered*, That the Chief, Broadcast Bureau, is directed to serve upon the captioned applicant within thirty (30) days of the release of this Order, a Bill of Particulars with respect to Issues (a), (b), (c), and (d).

5. *It is further ordered*, That, if it is determined that the hearing record does not warrant an Order denying the captioned application for renewal of license for Station KVTT(FM), it shall also be determined whether the applicant has willfully or repeatedly violated §§ 73.503(c) and 73.503(d) of the Commission's Rules, and Section 310(d) of the Communications Act. If so, it shall also be determined whether an Order of Forfeiture pursuant to section 503(b) of the Communications Act of 1934, as amended, in the amount of \$10,000 or some lesser

See Bill of Particulars for specific dates and details of each alleged violation.

amount, should be issued for violations which occurred within one year preceding the issuance of the Bill of Particulars in this matter.

6. *It is further ordered*, That this document constitutes a Notice of Apparent Liability for forfeiture for violation of §§ 73.503(c) and 73.503(d) of the Commission's Rules. The Commission has determined that, in every case designed for hearing involving revocation or denial of renewal of license for alleged violations which also come within the purview of section 503(b) of the Act, it shall, as a matter of course, include this forfeiture notice so as to maintain the fullest possible flexibility of action. Since the procedure is thus a routine or standard one, we stress that the inclusion of this notice is not to be taken as in any way indicating what the initial or final disposition of the case should be; that judgement is, of course, to be made on the facts of each case.

7. *It is further ordered*, That the Broadcast Bureau proceed with the initial presentation of the evidence with respect to issues (a), (b), (c), and (d) and the applicant then proceed with its evidence and have the burden of establishing that it possesses the requisite qualifications to be a licensee of the Commission and that a grant of its application would serve the public interest convenience and necessity.

8. *It is further ordered*, That to avail itself of the opportunity to be heard, the applicant herein, pursuant to section 1.221 of the Commission's Rules, in person or by attorney, shall file with the Commission, within twenty (20) days of the mailing of this Order, a written appearance in triplicate, stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

9. *It is further ordered*, That the applicant herein, pursuant to section 311(a)(2) of the Communications Act of 1934, as amended, and Section 1.594 of the Commission's Rules, shall give notice of the hearing within the time and in the manner prescribed in such rule and shall advise the Commission thereof as required by section 1.594(g) of the Rules.

10. *It is further ordered*, That the Secretary of the Commission send a copy of this Order by Certified Mail, Return Receipt Requested to Research Educational Foundation, Inc., licensee KVTT-FM, Dallas, Tex.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

STATEMENT OF COMMISSIONER MARGITA E. WHITE, JOINED BY COMMISSIONERS TYRONE BROWN AND ABBOTT M. WASHBURN

I concur with the decision of the Commission to designate this application for hearing. I do not agree, however, that Issue (C), concerning Rule 73.503(d), should have been included.

APPENDIX

The sole basis for this issue arises apparently from one "commercial" which was taped by a rival broadcaster and sent to the Commission, the suspicions of the Commission staff, and a statement of KVTT officials that there may have been "a few (3 or 4) programs with commercial content which slipped by." On the other hand, KVTT officials also stated that the policy is to delete all commercial content; none of KVTT's program suppliers contacted by the Commission staff gave any evidence of commercial broadcasts; and tapes of FCC monitoring during the investigation of the station, over 3 days, do not contain any commercials.

I believe the Commission should designate issues for hearing and issue notices of apparent liability only where the evidence on hand, if true, would reasonably support a forfeiture or other penalty. In my judgment the evidence in this case is insufficient to support a forfeiture for either "willful or repeated" violation of the rule, and I therefore would not include the issue in the designation order.

[6712-01]

STANDARD BROADCAST APPLICATIONS READY AND AVAILABLE FOR PROCESSING

Adopted: February 7, 1978.

Released: February 13, 1978.

Notice is hereby given, pursuant to § 1.571(c) of the Commission's Rules, that on April 6, 1978, the standard broadcast applications listed in the attached Appendix will be considered as ready and available for processing. Pursuant to § 1.227(b)(1) and § 1.591(b) of the Commission's Rules, an application, in order to be considered with any application appearing on the attached list or with any other application on file by the close of business on April 5, 1978, which involves a conflict necessitating a hearing with any application on this list, must be substantially complete and tendered for filing at the offices of the Commission in Washington, D.C., by the close of business on April 5, 1978. The attention of prospective applicants is directed to the fact that some contemplated proposals may not be eligible for consideration with an application appearing in the attached Appendix by reason of conflicts between the listed applications and applications appearing in previous notices published pursuant to § 1.571(c) of the Commission's rules.

The attention of any party in interest desiring to file pleadings concerning any pending standard broadcast applications, pursuant to section 309(d)(1) of the Communications Act of 1934, as amended, is directed to § 1.580(i) of the Commission's Rules for provisions governing the time for filing and other requirements relating to such pleadings.

FEDERAL MARITIME COMMISSION

(Docket No. 77-35)

PUBLICATION OF INACTIVE TARIFFS BY CARRIERS IN FOREIGN COMMERCE

Persons not actively carrying cargo (or clearly committed to commence carrying cargo) between ports named in a published tariff at the rates stated therein are not common carriers by water within the meaning of Shipping Act section 18(b) and Part 536 of the Commission's rules, and their tariffs in such unserved trades are subject to cancellation.

Stanley O. Sher, John R. Attanasio, for Concordia Line, Edward Aptaker, for Farrell Lines, Inc. John Robert Ewers, Paul J. Kaller, Bert I. Weinstein, Hearing Counsel.

REPORT AND ORDER

By the Commission: (Richard J. Daschbach, Chairman; Thomas F. Moakley, Vice Chairman; Karl E. Bakke, James V. Day, and Clarence Morse, Commissioners).

This proceeding was commenced by an Order directing some 338 common carriers by water in the foreign commerce of the United States (Respondents) to show cause why 752 specified tariffs published by them and maintained on file with the Commission should not be cancelled on the grounds that said tariffs do not reflect an active, bona fide offering of common carrier service.

Fifty-nine Respondents filed amendments expressly cancelling 170 of the subject tariffs, thereby mooted any need to inquire further into their status.¹ Another group of 246 Respondents either did not reply to the Show Cause Order and its invitation to submit supporting affidavits of fact and memoranda of law, or consented to cancellation insofar as another 484 tariffs were concerned.² In light of these Respondents' failure to contest cancellation and failure to amend the subject tariffs for at least 18 months, it is concluded that the tariffs in question do not describe an active common carrier service and should be cancelled as contrary to section 18(b) of the Shipping Act, 1916, and the Commission's tariff filing regulations (46 CFR Part 536). Publication of Inactive Tariffs, 17 SRR 471, 472 (1977); Sugar From Virgin Islands to United States, 1 U.S.M.C. 695, 699-700 (1938); Intercoastal Schedules of Hammond Shipping Co., Ltd., 1 U.S.S.B. 606, 607 (1936); Intercoastal Investigation, 1935, 1 U.S.S.B. 400, 449 (1935).

¹This group of tariffs and their cancellation dates are listed in Appendix "A" hereto.

²Some carriers in this group did raise objections concerning other of their tariffs, however.

A total of 40 Respondents opposed the cancellation of 68 different tariffs, some by filing a timely affidavit as required by the Commission's Show Cause Order, but most by submitting unsworn written communications or tariff amendments.³ A Reply Memorandum was filed by the Commission's Bureau of Hearing Counsel, and seven carriers responded to that Memorandum.⁴ These submissions contain sufficient evidence of common carrier activity or of oversights in the Show Cause Order to warrant the continued publication of 29 of the subject tariffs by their respective carriers.⁵ We turn now to those relatively few tariffs whose status remains a matter of controversy.

Twelve Respondents filed brief, unsworn statements asserting that certain tariffs were indeed active.⁶ Their letters do not even suggest that actual

³Alcoa Steamship Co.; Baltic Shipping Co.; Blue Star Line, Ltd.; British M/V "Dram Buoy"; British M/V "Fendo"; British M/V "Mary Ann Kate"; British M/V "Primavera"; Central Gulf Contramar Line; Central Gulf Lines, Inc.; Campagne Generale Maritime; Compania Maritima Del Nervion, S.A.; Concordia Line; Constellation Line; Dart Container Line, Inc.; Deppe Line; The East Asiatic Co., Ltd.; Farrell Lines, Inc.; Hapag-Lloyd, A.O.; Thos. & Jas. ⁶Hellenic Lines, Ltd. (FMC-3, FMC-8, FMC-9, FMC-11, FMC-12 and FMC 23); Leonard Cephas (FMC-1); Bernard W. Roberts (FMC-1); Koninklijke Nedlloyd (FMC-1).

(Continued)

cargo carrying, regularly scheduled voyages, or ongoing cargo solicitation were being provided. No recent bills of lading, sailing schedules, agency contracts, trade advertisements or other evidence of serious and continuing commercial activity were furnished. Such a meager response is insufficient to overcome the presumption that active common carrier service has ceased which is created by Respondents' failure to amend the subject tariffs for the last two to eight years. Accordingly, the tariffs of these twelve carriers will be cancelled.

A. P. Moller-Maersk Line (Maersk) asserts that trade to the Red Sea/Gulf of Aden, and to India, Pakistan and Ceylon is heavily one-sided inbound from the United States. Such a situation might sufficiently explain some 18 months of tariff inactivity by Maersk if Maersk had actually been serving the inbound trades during the same period (thereby providing regular outbound cargo capacity). Maersk admits, however, that its vessels only "pass through the Red Sea," and come within "geographical proximity of India, Pakistan, and Ceylon." This standing-in-the-wings arrangement cannot be considered a bona fide common carrier service to the Near East ports listed in the subject tariffs. Accordingly, Maersk's Tariff Nos. FMC-67, FMC-68 and FMC-69 will be cancelled.

Alcoa Steamship Co., Inc (Alcoa), also admits that it does not serve Haiti or the Netherlands Antilles, but, unlike Maersk, it further claims to be actively soliciting Haitian business through a "long-standing relationship" with a shipping agency in Port-au-Prince, while maintaining regular voyages to nearby Caribbean islands. Alcoa did not present evidence of recent cargo carryings or other factors which would demonstrate that the subject tariff represents a commercially realistic offer of transportation service. A tariff maintained solely for the purpose of obtaining a competitive edge over carriers who have not filed tariffs in a given trade—by avoiding the 30 days' notice or FMC Special Permission requirements of Shipping Act section 18(b) prior to entering a trade—is a "paper tariff." Paper tariffs do not contain rates which are commercially attractive to ordinary shippers, but do allow the carrier to quickly reduce rates whenever a large enough shipment is tendered to make

(Continued)

1); Koninklijke Nedlloyd (Nedlloyd, Inc.—FMC-11); Koninklijke Nedlloyd, B.V. (FMC-19 and FMC-53); Kirkpride Shipping Co., Ltd. (FMC-1); British M/V "Dram Buoy" (FMC-1); British M/V "Fendo" (FMC-3); British M/V "Mary Ann Kate" (FMC-12); British M/V "Primavera" (FMC-1); and Sands Construction & Shipping Co., Inc. (FMC-1).

NOTICES

a vessel call profitable. The Commission does not permit the filing of such tariffs because they are essentially misleading to the shipping public, potentially unfair to smaller shippers and carriers attempting to maintain regular schedules in the trade, encourage misunderstandings and sharp practices (if not actual malpractices), and impose an unnecessary administrative burden upon the Commission's staff. Accordingly, Alcoa's Tariff No. FMC-15 will be cancelled.

Baltic Shipping Co. (Baltic); Torm Lines; Farrell Lines, Inc.; Concordia Line; Hapag-Lloyd, A.G. (Hapag); Compagnie Generale Maritime (French Line); and Compania Maritima Dei Nervion, S.A. (Nervion Line), present essentially the same arguments as Maersk and Alcoa. They wish to retain tariffs to areas not now receiving vessel service in order to facilitate prompt entry into trades geographically related to those in which they do offer regular voyages. In each instance, actual common carrier service is in fact conditioned upon the appearance of sufficient quantities of cargo to make a special vessel call worthwhile. The Commission will therefore cancel Baltic's Tariff No. FMC-3; Farrell Line's Tariff Nos. FMC-27, FMC-31 and FMC-32; Torm Lines' Tariff Nos. FMC-27, FMC-34 and FMC-35; Concordia Lines' Tariff Nos. FMC-1, FMC-12 and FMC-14; Hapag's Tariff No. FMC-102; French Line's Tariff No. FMC-16 and Nervion Line's Tariff Nos. FMC-6, FMC-7 and FMC-8.

Maritime Co. of the Philippines (MCP) opposed the cancellation of its tariffs from Hawaii and Puerto Rico to the Far East because "pending sugar mill movements" make them "potentially active," despite the absence of vessel calls at Hawaii and Puerto Rico in recent years. Without further information establishing that the "pending sugar movements" are reasonably imminent and likely to result in actual vessel calls at the rates stated in MCP's tariffs, MCP Tariff Nos. FMC-6 and FMC-10 must also be deemed "paper tariffs," subject to cancellation for not reflecting a bona fide common carrier service.

Farrell and Concordia further argue that because the Shipping Act, 1916, does not require a carrier to maintain service with a "prescribed regularity" the Commission may not prohibit carriers from publishing tariffs which provide for vessel calls on a "by inducement" basis. This proposition is untenable. Shipping Act section 18(b) applies only to common carriers by water and the Commission has held that carriers who serve a trade "by inducement only" are not common carriers by water for the purpose of pub-

lishing a tariff covering that trade.⁷ It has, in effect, defined common carriage for tariff filing purposes as commercial activity which demonstrates a clear intention to move cargo under the proffered tariff within a commercially reasonable period of time subsequent to filing. It is unnecessary to find that Respondents have actually refused cargoes tendered for carriage at their published tariff rates as occurred in *Ghezzi Trucking, Inc.*, 13 F.M.C. 253 (1970) and *Intercoastal Charters*, 2 U.S.M.C. 154 (1939).⁸ It is enough that there has been an extended period within which no common carrier service has been provided to the subject trades.

Concordia also claims that the instant proceeding is unfair because it challenges the legitimacy of only those tariffs which have not recently been amended and does not include (1) tariffs which have been so amended, but are nonetheless inactive, or (2) tariffs which list "ranges" of ports served, without noting that the publishing carrier customarily withholds vessel calls from one or more ports within the specified range.

The Commission is not favoring form (mere tariff amendment) over substance (carrier inactivity). Suffice it to say, the present method of proceeding was chosen for the sake of administrative convenience as a rational first step dictated by the difficulty of gathering current and detailed operating data on the almost 1,000 different common carriers by water operating under FMC tariffs. When carrier inactivity is in fact established, appropriate action will be taken without regard to the length of time which has elapsed between tariff amendments. See discussion of Trans-Globe Shipping in Publication of Inactive Tariffs, supra, at 472. Moreover, the Commission's revisions to its foreign commerce tariff filing regulations (General Order 13, 42 FR 59265) which take effect January 1, 1978 will curb the practice of calling at individual ports within a stated range of ports on a "by inducement only" basis.⁹ 42 FR 59269;

⁷Cases cited above. Respondents attempt to distinguish three of these decisions on the grounds that they dealt with domestic offshore rather than foreign commerce, but this distinction is without present significance. The fact that 30 days' notice must be given before section 2 tariffs may be canceled is not relied upon therein, and there is no substantive difference between the requirements of Intercoastal Shipping Act section 2 and Shipping Act section 18(b) concerning common carrier status.

⁸Both *Ghezzi* and *Intercoastal Charters* do, however, reflect the governing principle that tariffs may not hold out services which are not routinely performed by the carrier.

⁹These regulations were first adopted in October 1975 (40 FR 47770), but were stayed pending disposition of reconsideration petitions. Newly effective section 536.5(a)(4) does not, however, preclude a carrier from

(Continued)

46 CFR 536.5(a)(4)(i). This practice has never been permitted in domestic offshore commerce under 46 CFR 531.5(a)(c).

Therefore, it is ordered, That the designated tariffs of the Respondent carriers listed in Appendix "B" hereto are canceled effective immediately; Provided, however, that this cancellation is without prejudice to said carriers filing new tariffs covering the subject trades at such time as they actually commence common carrier service in these trades.

By the Commission.

FRANCIS C. HURNEY,
Secretary.

APPENDIX B

TARIFFS CANCELLED EFFECTIVE ON THE SERVICE DATE OF THE COMMISSION'S ORDER

The tariffs which are ordered cancelled by this order are those listed in Appendix A of the Commission's Order to Show Cause in this proceeding (42 FR 36875; July 17, 1977), with the deletion of those tariffs listed in footnote 5 of this order (not cancelled) and those listed in Appendix A of this order (cancelled voluntarily).

[6325-01]

FEDERAL PREVAILING RATE ADVISORY COMMITTEE

OPEN COMMITTEE MEETINGS

Pursuant to the provisions of section 10 of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that meetings of the Federal Prevailing Rate Advisory Committee will be held on:

Thursday, March 2, 1978
Thursday, March 16, 1978
Thursday, March 23, 1978
Thursday, March 30, 1978

The meetings will convene at 10 a.m., and will be held in Room 5A06A, Civil Service Commission Building, 1900 E Street NW., Washington, D.C.

The Federal Prevailing Rate Advisory Committee is composed of a Chairman, representatives of five labor unions holding exclusive bargaining rights for Federal blue-collar employees, and representatives of five Federal agencies. Entitlement to membership on the Committee is provided for in 5 U.S.C. 5347.

The Committee's primary responsibility is to review the prevailing rate system and other matters pertinent to the establishment of prevailing rates under subchapter IV, chapter 53, 5 U.S.C., as amended, and from time to time advise the Civil Service Commission thereon.

These scheduled meetings will convene in open session with both labor and management representatives attending. During the meeting either the labor members or the management members may caucus separately with the Chairman to devise strategy

and formulate positions. Premature disclosure of the matters discussed in these caucuses would impair to an unacceptable degree the ability of the Committee to reach a consensus on the matters being considered and disrupt substantially the disposition of its business. Therefore, these caucuses will be closed to the public on the basis of a determination made by the Chairman of the Civil Service Commission under the provisions of section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) and 5 U.S.C. section 552b(c)(9)(B). These caucuses may, depending on the issues involved, constitute a substantial portion of the meeting.

Annually, the Committee publishes for the Civil Service Commission, the President, and Congress a comprehensive report of pay issues discussed, concluded recommendations thereon, and related activities. These reports are also available to the public, upon written request to the Committee Secretary.

Members of the public are invited to submit material in writing to the Chairman concerning Federal Wage System pay matters felt to be deserving of the Committee's attention. Additional information concerning this meeting may be obtained by contacting the Secretary, Federal Prevailing Rate Advisory Committee, Room 1338, 1900 E Street NW., Washington, D.C. 20415, 202-632-9710.

JEROME H. ROSS,
Chairman, Federal Prevailing
Rate Advisory Committee.

FEBRUARY 9, 1978.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary

CASH EQUIVALENT OF IN-KIND INCOME

Program Results

Pursuant to Section 606 of the Community Services Act of 1974, (Pub. L. 93-644) 42 U.S.C. 2946, this agency announces the results, findings, data, and recommendations reported as a result of activities associated with HEW project entitled, "The Cash Equivalent of In-Kind Income."

Currently available data on the distribution of income and poverty status of families are seriously lacking in consideration of in-kind income. In-kind income from the government (food stamps, Medicare, Medicaid, housing assistance) and from private employers (fringe benefits such as health insurance) are ignored in the evaluation of total income. This study addresses the fundamental analytic issues sur-

rounding the valuation and inclusion of in-kind income on income and poverty statistics.

The study first reviewed definitions of income that have been used in the economic literature and found that most include many types of in-kind income, private as well as governmental. The next objective was valuing the income to the recipient. When income is received in money, recipient families are free to purchase goods they desire at market prices. However, when income is received in-kind, particularly when price subsidies or constraints on amounts are involved, there is no market to which one can turn for a value. The study thus evaluated several valuation possibilities, primarily valuation at government or employer cost and cash equivalent or utility terms (defined as the money that would leave a recipient as well-off as the in-kind income). The study found that no valuation alternative is fully consistent with money income, further results show that government or employer cost may bear little relationship to recipient values.

Precise mathematical formulas were derived for cash equivalent values and approximations to cash equivalent values were developed. Finally, using recently available data from the 1972-73 Consumer Expenditure Survey, values were estimated for food stamps, low-rent public housing, Medicaid and employer-provided health insurance using various valuation alternatives. While these estimates are extremely crude, they do show that in-kind income can, in some cases, provide sizeable additions to money income but also that values to the recipient can be far below government and employer costs.

A copy of this report will be filed and available as soon as possible, from the National Technical Information Service, U.S. Department of Commerce, Springfield, Va. 22151

Dated: February 10, 1978.

HENRY AARON,
Assistant Secretary for
Planning and Evaluation.

[4110-12]

REVISED CRITERIA SPECIFYING THE INGREDIENTS OF ACCEPTABLE PLANS TO DESEGREGATE STATE SYSTEMS OF PUBLIC HIGHER EDUCATION

In late 1969 and early 1970, the Department of Health, Education, and Welfare (HEW) notified ten states that they had not dismantled their statewide dual systems of public higher education. The letters sent by HEW at that time advised each state

of its failure to adopt measures necessary to overcome the effects of past segregation and notified the states of their obligation to file a statewide plan for the desegregation of their public systems of higher education.

For the past seven years the Court reviewed HEW's efforts to desegregate these systems of higher education. In 1977, this Court found that the Department's effort had not been adequate and ordered the Department to require six of the original ten states to submit new desegregation plans and to set specific standards for those plans.

The Court found that "specific commitments (were) necessary for a workable higher education desegregation plan . . . concerning admission, recruitment and retention of students, concerning the placement and duplication of program offerings among institutions, the role and the enhancement of black institutions, and concerning changes in the racial composition of the faculties involved."

Specifically, this Court entered a Second Supplemental Order on April 1, 1977 directing the Department to transmit to the six states of Arkansas, Florida, Georgia, North Carolina, Oklahoma, and Virginia as well as the Court and the plaintiffs criteria specifying the ingredients of acceptable desegregation plans for their institutions of public higher education. Accordingly, on July 5, 1977, the Department published criteria which were amended one month later to take into account suggestions offered by some of the states.

The Court further directed that HEW require each state to submit, within 60 days of receipt of the criteria, a revised desegregation plan and to accept or reject such plans within 120 days thereafter. In September 1977, in response to HEW's request, the six states submitted desegregation plans. After months of intensive negotiations, the Department announced on February 2, 1978, that it was accepting the plans of Arkansas, Florida, and Oklahoma and not accepting plans submitted by Georgia, North Carolina, and Virginia. On the same date, the Department announced that it would publish in the FEDERAL REGISTER, revised criteria which are substantially similar to the criteria published in July.

Where HEW has found that a state has not eliminated the remaining vestiges of segregation in its formerly dual system of public higher education, and is, therefore, in violation of Title VI of the Civil Rights Act of 1964, it is required first to attempt to secure compliance by voluntary means. When those efforts fail, HEW is required to seek enforcement either administratively or through the courts. 42 U.S.C. 200-1; 45 CFR 2000d-

1, 45 CFR 80.7(d)(1), 80.8. These revised criteria are issued to assist such states in the preparation of desegregation plans as part of the process of securing voluntary compliance.

HEW originally developed the criteria mindful of the instructions of the Court that they comply with constitutional standards and Title VI, conform with sound educational practices, and take into account the unique importance of black colleges. Based on its experience in applying the criteria to six state systems of higher education over the past months, HEW has determined that the criteria provide specific and effective guidance to the states and at the same time, are sufficiently flexible to provide for circumstances which may vary from state to state.

PREAMBLE

I. HISTORY OF LEGAL PROCEEDINGS

The criteria set forth below initially were developed by the Department of Health, Education, and Welfare (HEW) pursuant to the specific direction of the United States District Court for the District of Columbia in *Adams v. Califano*, Civil Action No. 3095-70, Second Supplemental Order (D.D.C. April 1, 1977). The Court's Order arose from a lawsuit initiated in 1970 to require HEW to take action to enforce the provisions of Title VI of the Civil Rights Act of 1964.¹

In 1969, the Office for Civil Rights (OCR) determined that ten States² were continuing to operate segregated higher education systems in violation of Title VI of the 1964 Civil Rights Act. Although the States were notified of this finding and were requested to submit corrective plans, no administrative enforcement actions were taken when the States failed to submit plans or submitted plans unacceptable to HEW. In February 1973, the *Adams* litigation resulted in a ruling requiring that HEW take appropriate enforcement action. *Adams v. Richardson*, 356 F. Supp. 92 (D.D.C. 1973). That ruling was unanimously affirmed by the full United States Court of Appeals for the District of Columbia Circuit, although the Court of Appeals modified the District Court's order and directed HEW to attempt to secure acceptable desegregation plans from the ten States before commencing enforcement proceedings. *Adams v. Richardson*, 480 F. 2d 1159 (D.C. Cir. 1973).

¹Title VI of the Civil Rights Act of 1964 provides: "No person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. 42 U.S.C. 2000d.

²Arkansas, Florida, Georgia, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, Pennsylvania, and Virginia.

In 1974, HEW accepted desegregation plans from eight of the ten States.³ Reports covering the first year of implementation were submitted to HEW in 1975. Subsequently, the plaintiffs in the *Adams* case sought further relief and on April 1, 1977, the Court ruled that the 1974 plans did not comply with the criteria previously announced by HEW and that as implemented the plans had failed to achieve significant progress toward higher education desegregation. Based on these findings, the Court ordered HEW to develop and issue within 90 days specific criteria to guide the six States⁴ in the preparation of revised desegregation plans.

II. LEGAL AND EDUCATIONAL PRINCIPLES

A. De jure segregation

These criteria will be applied to a state which formerly operated a dual system of public higher education under state law, if the Office for Civil Rights determines after investigation that the state has failed to remove the vestiges of racial segregation in its system in violation of Title VI.

B. Affirmative duty to take effective steps to eliminate de jure segregation

Where there has been past de jure segregation, states are required to take affirmative remedial steps and to achieve results in overcoming the effects of prior discrimination. HEW's regulation implementing Title VI provides that

In administering a program regarding which the recipient has previously discriminated against persons on the ground of race . . . the recipient must take affirmative action to overcome the effects of prior discrimination. 45 CFR 80.3(b)(6)(i).

The 14th Amendment also calls for more than mere abandonment of discrimination through the state's adoption of passive or neutral policies. The United States Supreme Court has held that public school officials have "the affirmative duty to take whatever steps might be necessary to convert to a unitary system in which discrimina-

³Louisiana refused to submit a plan and was referred to the Department of Justice, which filed a lawsuit. (*United States v. Louisiana*), Civil Action No. 74-68 (M.D. La.) in January 1974. The plan submitted by Mississippi was deemed unacceptable by HEW and the matter was referred to the Department of Justice, which filed a lawsuit. *Ayers and United States v. Finch*, Civil Action No. D.C. 75-9-K (N.D. Miss.), in March 1975.

⁴The April 1, 1977, Order excludes Pennsylvania (by agreement of the parties to the *Adams* lawsuit) and Maryland, which commenced a separate injunctive suit against HEW's enforcement proceedings now pending in the United States Court of Appeals for the Fourth Circuit (*Mandel v. HEW*, No. 76-1494), as well as Louisiana and Mississippi.

tion would be eliminated root and branch." *Green v. County School Board of New Kent County*, 391 U.S. 430, 437-38 (1968).

The affirmative duty to desegregate applies with equal force to higher education. *Norris v. State Council of Higher Education*, 327 F. Supp. 1368 (E.D. Va. 1971), *aff'd per curiam*, 404 U.S. 907 (1971); *Lee v. Macon County Board of Education*, 267 F. Supp. 458 (M.D. Ala. 1967), *aff'd* 369 U.S. 215 (1967); *Geier v. Dunn*, 337 F. Supp. 573 (M.D. Tenn. 1972). Additionally, the Supreme Court has made it clear that desegregation plans are not adequate unless they are effective. See *Green v. County School Board of New Kent County*, *supra*; *Swann v. Charlotte-Mecklenburg Board of Education*, 402 U.S. 1 (1971).

Consistent with the requirements of Title VI these criteria set forth the elements of a desegregation plan which would eliminate the effects of past discrimination.

C. Statewide approach

The Court of Appeals in its en banc opinion in *Adams* directed HEW to undertake a statewide approach and noted the serious problem created by the lack of viable statewide coordinated planning in higher education:

The problem of integrating higher education must be dealt with on a statewide rather than a school-by-school basis.⁵

"It is important to note that we are not here discussing discriminatory admission policies of individual institutions. To the extent that such practices are discovered, immediate corrective action is required, but we do not understand HEW to dispute that point. This controversy concerns the more complex problem of systemwide racial imbalance. *Adams v. Richardson*, *supra*, 480 F. 2d at 1164-1165 (footnote in original).

The Department has followed this approach since 1969 because we believe statewide planning is consistent with sound educational policy. Thus, these criteria require not only that each institution pursue nondiscriminatory student admission and faculty and staff employment practices, but also that the state system as a whole develop a comprehensive and coordinated statewide desegregation plan embodying those specific affirmative, remedial steps which will prove effective in achieving significant progress toward the disestablishment of the structure of the dual system and which address the problem of "systemwide racial imbalance."

D. Specificity—goals and timetables

The District Court in *Adams* concluded that the plans previously adopted by the states had failed to achieve adequate desegregation progress and lacked specific commitments for change as concerns the desegregation of student bodies and faculties,

enhancement of traditionally black institutions, and desegregation of the governing boards in higher education systems.

The District Court directed HEW to prepare criteria which would identify for the states the specific elements to be included in their revised desegregation plans. As the District Court stated in response to plaintiffs' oral argument on January 17, 1977:

What I do want them to do though is be under the compulsion of a court order to submit to the states certain specific requirements which the states must respond to and they should be given a timetable for communicating with the states, and the states should be given some kind of timetable within which to make response. (Transcript, January 17th ruling; emphasis supplied.)

In *Geier v. Blanton*, 427 F. Supp. 644 (M.D. Tenn. 1977), the Court quoted its Order of December 23, 1969, expressing its dissatisfaction with a state submitted desegregation plan in that the plan as submitted "lacks specificity, in that there is no showing of funds to be expended, no statement of the number of students to be involved, and most importantly, no time schedules for either the implementation of the projects or the achievement of any goals." 427 F. Supp. at 646.

The Supreme Court has maintained that in a system with a history of segregation there is a need for remedial criteria of sufficient specificity to assure compliance with the law. See *Swann*, *supra* at 25-26.

In keeping with the Court's view that the Department should submit specific requirements to the states, numerical goals and timetables are set forth in the criteria. The goals are established as indices by which to measure progress toward the objective of eliminating the effects of unconstitutional de jure racial segregation and of providing equal educational opportunity for all citizens of these states. They are benchmarks and provide the states the clear and specific guidance called for by the Court.

These goals are not quotas. The Department is opposed to arbitrary quotas. Failure to achieve a goal is not sufficient evidence, standing alone, to establish a violation of Title VI. In addition, the Office for Civil Rights upon a showing of exceptional hardship or special circumstances by a state, may modify the goals and timetables. Nevertheless, the states are under a statutory obligation to devise and implement plans that are effective in achieving the desegregation of the system.

Most importantly, under these criteria and the goals they set, all applicants must be able to compete successfully. States' efforts under these criteria need not and should not lead to lowering academic standards. States may need to innovate in seeking out

talented students who will profit from higher education. They may need to broaden definitions of potential; to discount the effects of early disadvantage on the development of academic competence; and to broaden the talents measured in admissions tests. But new and different yardsticks for measuring potential are not lower standards. They can be more valid measures of true potential and talent. Taken as a whole, these criteria seek to preserve and protect academic standards of excellence.

E. Special considerations in developing criteria for desegregation in higher education

A state system of higher education, as with an elementary and secondary school district, is held to an affirmative duty to take remedial action to correct past practices of segregation and discrimination. However, the nature of the remedial action required of a higher education system will differ from that required of a local education district. The court of Appeals in *Adams* noted:

However, we are also mindful that desegregation problems in colleges and universities differ widely from those in elementary and secondary schools, and that HEW admittedly lacks experience in dealing with them. * * * As regrettable as these revelations are, the stark truth is that HEW must carefully assess the significance of a variety of new factors as it moves into an unaccustomed area. 480 F. 2d at 1164.

In *Norris v. State Council of Higher Education*, 327 F. Supp. 1368, 1373 (E.D. Va. 1971), aff'd per curiam, 404 U.S. 907 (1971), the court held:

The means of eliminating discrimination in public schools necessarily differ from its elimination in colleges, but the state's duty is as exacting.

And in *Sanders v. Ellington*, 288 F. Supp. 937, 943 (M.D. Tenn. 1968), the court stated:

Now in considering the time element for presentation of a plan, I have thought of the complexities of the problem. I recognize that the simple remedies which might be available to a county school board where there is involved a compulsory system of education, a free system of education, and assignment of students, are not available here. Colleges are not compulsory and everyone can testify that they're not free.

Higher education differs from elementary and secondary education in many other ways. Besides being voluntary rather than compulsory, higher education operates on a statewide or regional basis, not local; there are no "attendance zones" in higher education; higher education programs vary from institution to institution and are not uniform; students are free to leave the state or to attend private colleges in pursuit of a higher education.

Furthermore, from state to state significant differences are to be found

and must be taken into consideration. In some states strong centralized "system" exists including four year and two year institutions; in others, the four year and two year institutions report to separate boards; in yet others, each institution operates under its own independent board. While none of these differences relieves a state of its obligations under Title VI or its constitutional duties, they must be taken into account in fashioning an appropriate set of criteria to be applicable to six states.

Accordingly, while desegregation cases involving individual elementary and secondary school districts are a guide to a state's duty to take corrective action, they are not dispositive of the particular methods to be designed for the dismantling of a dual system of higher education, for the desegregation of a statewide system, for the removal of the vestiges of racial segregation, and for the correction of "systemwide racial imbalance." As the courts in *Adams* have noted, these are indeed "complex" issues. These criteria are designed specifically for the higher education systems of these six states based on a careful consideration of relevant statutes and court opinions and with due consideration to the unique characteristics of higher education.¹

F. The unique role of the traditionally black colleges

In keeping with the instructions of the Court, the criteria recognize the unique importance of traditionally black colleges in meeting the educational needs of black students. More than 80 percent of all black college graduates have been trained at black colleges. In the mid-seventies, black colleges continue to graduate almost forty percent of all blacks who receive college degrees.

Thus it is with good reason that the Court of Appeals in *Adams* recognized the need to take into account "the special problems of black colleges."

Perhaps the most serious problem in this area is the lack of state-wide planning to provide more and better trained minority group doctors, lawyers, engineers and other professionals. A predicate for minority access to quality post-graduate programs is viable, co-ordinated state-wide higher education policy that takes into account the special problems of minority students and of Black colleges. * * * (T)hese Black institu-

¹ For a useful discussion of these issues see Note, "The Affirmative Duty To Integrate Higher Education," 70 *Yale Law Journal* 666 (1970).

² See Elias Blake, Public Policy and the Higher Education of Black Americans, Staff Report, Subcommittee on Constitutional Rights of the Committee on the Judiciary, 94th Cong. 2d Sess. 1976.

³ National Center for Education Statistics, Earned Degrees Survey, 1975-76.

tions currently fulfill a crucial need and will continue to play an important role in Black higher education. 480 F. 2d at 1164-1165.

Again in 1977, the District Court in its Second Supplemental Order, p. 4, quoted the above language of the Court of Appeals and went on to state:

The process of desegregation must not place a greater burden on Black institutions or Black students' opportunity to receive a quality public higher education. The desegregation process should take into account the unequal status of the Black colleges and the real danger that desegregation will diminish higher education opportunities for Blacks. Without suggesting the answer to this complex problem, it is the responsibility of HEW to devise criteria for higher education desegregation plans which will take into account the unique importance of Black colleges and at the same time comply with the Congressional mandate.

The Department does not take this language to mean that the traditionally black institutions are exempt from the Constitution or the requirements of Title VI. To the contrary, traditionally black and traditionally white institutions are subject to the same constitutional and congressional mandate to provide an education to all citizens without discrimination or segregation. White and black institutions are to function as part of a unitary system free of the vestiges of state imposed racial segregation. However, as the Court has instructed, the transition to a unitary system must not be accomplished by placing a disproportionate burden upon black students, faculty, or institutions or by reducing the educational opportunities currently available to blacks.

To achieve the objectives of Title VI, precise methods will need to be fashioned for institutions within a state, each appropriate to the task of overcoming the effects of prior discrimination in the particular instance. Each method will be enforced with equal force and determination. Each method is designed to achieve the same constitutional standard.

III. CONSULTATION PROCESS

In the preparation of the criteria originally promulgated pursuant to court instruction, the Department undertook an extensive consultation process within the Department and with interested outside parties. In an effort to assure that these criteria were both legally and educationally sound, a departmental task force was established to guide their development. The task force combined the multiple disciplines and varied expertise needed to resolve the complex issues and educational policies involved in this desegregation process. Serving on the task force were the General Counsel, the Director of the Office for Civil Rights, the Assistant Secretary for Education, the Commissioner of Education, and

the Assistant Secretary for Planning and Evaluation.

The Department also embarked on a program of open dialogue and consultation with parties of interest. The task force members conferred with representatives of the six states collectively and individually. The representatives included college presidents, education officials, and aides to Governors. A special meeting was held with students who attend the public colleges in the six states and representatives of several national student organizations. Four meetings were held with officials of the amicus curiae, National Association for Equal Opportunity in Higher Education, an association of the presidents of 110 predominantly black colleges and universities, both state supported and private. Two panels of nationally recognized educators met for half day sessions to advise the Department.

Finally, plaintiffs' representatives devoted many hours to reviewing and commenting on drafts of the criteria. They also convened a meeting for the Department with 28 citizens from these six states who are most familiar with the higher education desegregation efforts in their respective states.

The Department assumes full and sole responsibility for the content of these criteria. The consultations enumerated above were exceedingly helpful to the Department in the preparation of these criteria, but these discussions do not imply concurrence in the criteria in whole or in part by other parties.

Higher educational systems in these and other states are undergoing difficult adjustments caused by fiscal and demographic trends beyond the control of individual states. Accordingly, the criteria developed for the six states under the *Adams* Order, focused on desegregation efforts to be undertaken within the next five years. Similarly, OCR will seek plans that contain five-year goals from other states which are found to have a duty to eliminate the vestiges of duality in their systems of higher education.

As each state attains the goals set forth in its plan, OCR will assess, in cooperation with that state, the progress thereby made in order to determine what additional steps, if any, are necessary to complete the desegregation process. Furthermore, OCR will periodically review these criteria to assure their adequacy in meeting constitutional requirements, their consistency with rulings of the courts in higher education desegregation, and the mandate of Title VI.

ELEMENTS OF A PLAN

I. DISESTABLISHMENT OF THE STRUCTURE OF THE DUAL SYSTEM

An acceptable plan shall commit the state to the goal of organizing and op-

erating the system and institutions of higher education in a manner that promises realistically to overcome the effects of past discrimination and to disestablish the dual system, and which assures that students will be attracted to each institution on the basis of educational programs and opportunities uninhibited by past practices of segregation.

To achieve the disestablishment of the structure of the dual system, each plan shall:

A. Define the mission of each institution within the state system on a basis other than race.

Each mission statement shall include at a minimum:

1. The level, range and scope of programs and degrees offered;

2. Geographic area served by the institution; and

3. The projected size of the student body and staff, for each year of the life of the plan.

B. Specify steps to be taken to strengthen the role of traditionally black institutions in the state system.

In support of the specific steps required by I.B., the plan shall include:

1. Commitments that necessary improvements will be made to permit the traditionally black institutions to fulfill their defined mission. These improvements will extend to physical plant and equipment; quality and range of program offerings; number and quality of faculty; student, faculty and professional staff services; student financial assistance, and other financial support;

2. Commitments that traditionally black institutions will have the resources (including those enumerated in item 1 above), which are at least comparable to those at traditionally white institutions having similar missions.

3. An assessment of the physical plant at traditionally black institutions; and

4. A detailed description of the resources, expressed in dollars and in numbers of personnel to be assigned, which the state system will provide (and the source for such funds) in order to implement the steps specified in I.B. reported by year for the life of the step or activity.

C. Commit the state to take specific steps to eliminate educationally unnecessary program duplication among traditionally black and traditionally white institutions in the same service area.

To this end, the plan shall identify existing degree programs (other than core curricula) among institutions having identical or overlapping service areas and indicate specifically with respect to each area what steps the state will take to eliminate such duplication. The elimination of such program duplication shall be carried out consis-

tent with the objective of strengthening the traditionally black colleges.

D. Commit the state to give priority consideration to placing any new undergraduate, graduate, or professional degree programs, courses of study etc., which may be proposed, at traditionally black institutions, consistent with their missions.

E. Commit the state to withhold approval of any changes in the operation of the state system or of any institutions that may have the effect of thwarting the achievement of its desegregation goals.

F. Commit the State to advise OCR of proposed major changes in the mission or the character of any institution within the state system which may directly or indirectly affect the achievement of its desegregation goals prior to their formal adoption.

Such proposed changes include but are not limited to: the establishment or major expansion of programs of study, of departments, or institutions; the alteration of two year to four year institutions; the conversion of a private to a public institution; or the closing or merger of institutions or campuses.

G. Specify timetables for sequential implementation of the actions necessary to achieve these goals as soon as possible but no later than within five years (by the close of the fifth full academic year after the plan is accepted) unless compelling justification for a longer period for compliance is provided to and accepted by the Department.

The plan shall include interim benchmarks and goals from which progress toward these objectives may be measured. These timetables and benchmarks shall be appropriate to the nature of the action to be taken. For example, studies of physical plant and resources comparability should be completed promptly; corrective actions (including capital construction) will require longer time periods.

H. Commit the state and all its involved agencies and subdivisions to specific measures for achievement of the above objectives.

Such measures may include but are not limited to establishing cooperative programs consistent with institutional missions; reassigning specified programs, course offerings, resources and/or services among institutions; realigning the land grant academic programs so that research, experiment and other educational services are redistributed on a nonracial basis; and merging institutions or branches thereof, particularly where institutions or campuses have the same or overlapping services areas. The measures taken pursuant to this section should be consistent with the objective of strengthening the traditionally black colleges. A detailed description

of these measures need not be submitted at the time the plan is filed, but should be filed as a supplementary statement within 30 days thereafter for review and comment by OCR. Measures that offer no reasonable possibility of achieving the goals listed above will be rejected by OCR. Revised measures will be required before the plan can be accepted.

II. DESEGREGATION OF STUDENT ENROLLMENT

An acceptable plan shall commit the state to the goal of assuring that the system as a whole and each institution within the system provide an equal educational opportunity, are open and accessible to all students, and operate without regard to race and on a desegregated basis.

To achieve the desegregation of student enrollment, each plan shall:

A. *Adopt the goal that for two year and four year undergraduate public higher education institutions in the state system, taken as a whole, the proportion of black high school graduates throughout the state who enter such institutions shall be at least equal to the proportion of white high school graduates throughout the state who enter such institutions.*

B. (1) *Adopt the goal that there shall be an annual increase, to be specified by each state system, in the proportion of black students in the traditionally white four year undergraduate public higher education institutions in the state system taken as a whole and in each such institution; and*

(2) *Adopt the objective of reducing the disparity between the proportion of black high school graduates and the proportion of white high school graduates entering* traditionally white four year and upper division undergraduate public higher education institutions in the state system; and adopt the goal of reducing the disparity by at least fifty per cent by the final academic year of the plan. However, this shall not require any state to increase by that date black student admissions by more than 150% above the admissions for the academic year preceding the year in which the plan is requested by HEW.**

*For the purposes of this subsection, the term entering includes first-time transfers from two year and other institutions.

*Thus, where the present entry by black students in four year traditionally white institutions is at a rate of 1,000 students per year and a fully proportional rate would be 3,000 students per year, the state's goal would be an entry rate of 2,000 students per year five years thereafter. A state where the present entry is at a rate of only 500 students per year and full proportionality would be 3,000 students per year would not by that date have to close half the gap (by a rate of 1,750 per year) but only achieve an entry rate of 1,250 students, which is 150% over its present rate of 500.

C. *Adopt the goal that the proportion of black state residents who graduate from undergraduate institutions in the state system and enter graduate study or professional schools in the state system shall be at least equal to the proportion of white state residents who graduate from undergraduate institutions in the state system and enter such schools.*

This goal (and interim benchmarks or goals) shall be separately stated for each major field of graduate and professional study. To assure that this goal can be met in the immediate future special recruitment efforts should be considered at traditionally black institutions. Particular attention should be given to increasing black student enrollment and graduation from those traditionally white four year undergraduate institutions which serve as the feeder institutions for the graduate and professional schools. Achievement of this goal is of particular importance in light of the specific concern expressed by the Court of Appeals in Adams. In assessing progress toward this goal, OCR will give consideration to the number of blacks from each state who enroll in graduate and professional schools outside the state system.

D. *Adopt the goal of increasing the total proportion of white students attending traditionally black institutions.*

Increased participation by white students at traditionally black institutions must be a part of the process of desegregation of the statewide system of higher education. However, pursuant to the admonition of the courts in Adams, "The desegregation process should take into account the unequal status of the Black colleges and the real danger that desegregation will diminish higher education opportunities for Blacks." Civil Action No. 3095-70, Second Supplemental Order at p. 4. The following steps are designed to guard against the diminution of higher educational opportunities for black students, to take into account the unique importance of traditionally black colleges and to comply with the mandate of Title VI. Establishment of numerical goals for the enrollment of white students at traditionally black institutions must be preceded by an increasing enrollment of black students in the higher education system and at the traditionally white institutions, as is required by Section II of these criteria. It must also be preceded by the accomplishment of specific steps to strengthen the role of traditionally black institutions, eliminate program duplication, locate new programs at black institutions, and by such other measures as are set forth in Section I.

OCR shall annually review the progress made by each state in increasing participation by black students in

higher education and in the disestablishment of the dual school system. Two years after the commencement of the plan, and consistent with such progress, each state system shall specify annual numerical goals for increasing the participation of white students attending the traditionally black institutions.

E. *Commit the state to take all reasonable steps to reduce any disparity between the proportion of black and white students completing and graduating from the two year, four year and graduate public institutions of higher education, and establish interim goals, to be specified by the state system for achieving annual progress.*

F. *Commit the state to expand mobility between two year and four year institutions as a means of meeting the goals set forth in these criteria.*

G. *Specify numeric goals for II. A, B, and C, and timetables for sequential implementation of actions necessary to achieve these goals as soon as possible but not later than within five years unless another date is specified in this section.*

H. *Commit the state and all its involved agencies and subdivisions to specific measures to achieve these goals.*

Such measures may include, but are not limited to reviewing, monitoring, and revising, as necessary, procedures for student recruitment, admissions, compensatory instruction, counseling, financial aid, and staff and faculty development programs. The detailed description of these measures need not be submitted at the time the plan is filed, but should be filed as a supplementary statement within 30 days thereafter for review and comment by OCR. Measures that offer no reasonable possibility of achieving the numerical goals will be rejected by OCR. Revised measures will be required before the plan can be accepted.

III. DESEGREGATION OF FACULTY, ADMINISTRATIVE STAFFS, NONACADEMIC PERSONNEL, AND GOVERNING BOARDS

An acceptable plan shall commit the state system to the goal of increasing the number and proportion of black employees, academic and non-academic, throughout the system and of increasing representation of black citizens among appointive positions on the governing boards of the state system and of individual institutions.

To achieve the desegregation of faculty, administrators, other personnel, and governing boards, each plan shall:

A. *Adopt the goal that the proportion of black faculty and of administrators at each institution and on the staffs of each governing board, or any other state higher education entity, in positions not requiring the doctoral degree, shall at least equal the proportion of black students graduating with mas-*

ters degrees in the appropriate discipline from institutions within the state system, or the proportion of black individuals with the required credentials for such positions in the relevant labor market area, whichever is greater.

B. *Adopt the goal that the proportion of black faculty and of administrators at each institution and on the staffs of each governing board or any other state higher education entity, in positions requiring the doctoral degree, shall at least equal the proportion of black individuals with the credentials required for such positions in the relevant labor market area.*

C. *Adopt the goal that the proportion of black non-academic personnel (by job category) at each institution and on the staffs of each governing board or any other state higher education entity, shall at least equal the proportion of black persons in the relevant labor market area.*

D. *Assure hereafter and until the foregoing goals are met that for the traditionally white institutions as a whole, the proportion of blacks hired to fill faculty and administrative vacancies shall not be less than the proportion of black individuals with the credentials required for such positions in the relevant labor market area.*

E. *Specify numeric goals and timetables for sequential implementation of the actions necessary to achieve these objectives including interim benchmarks from which progress toward the objectives may be measured.*

These goals, timetables, and benchmarks shall be established in light of, and shall specify, the current and projected rates of vacancies in the various job categories, present and projected labor market availability, and other relevant factors.

F. *Commit the state system to take specific measures to achieve these objectives.*

Such measures may include, but are not limited to employment programs providing centralized recruitment, vacancy and applicant listings; transfer options; faculty development programs permitting release time for black faculty to attain the terminal degree; and the interchange of faculty on a temporary or permanent basis among traditionally white and traditionally black institutions within the state system. The detailed description of these measures need not be submitted at the time the plan is filed, but should be filed as a supplementary statement within 30 days thereafter for review and comment by OCR. Measures that offer no reasonable possibility of achieving the goals listed above will be rejected by OCR. Revised measures will be required before the plan can be accepted.

G. *Adopt the goal of increasing the numbers of black persons appointed to*

systemwide and institutional governing boards and agencies so that these boards may be more representative of the racial population of the state or of the area served.

IV. SUBMISSION OF PLANS AND MONITORING

A. After HEW has determined that a state has not eliminated the vestiges of desegregation in its former dual system of public higher education, the state shall submit to OCR a desegregation plan for its system of public higher education to implement the foregoing criteria.

1. The plan shall commit the state to substantial progress toward each of the goals in the first two years of the plan.

2. The plan shall be signed by the governor and by each official or designated person representing the agencies, associations, commissions, offices, and/or institutions responsible for adopting the systemwide and institutional goals described therein. Such persons or entities must be authorized under state law to perform all actions necessary to achieve these goals.

3. The plan shall certify that achievement of the goals and interim benchmarks specified therein has been adopted as official policy of each official or agency.

B. It is recommended that each state establish a biracial citizens advisory/monitoring committee to assist the state in monitoring the implementation of the plan.

C. Each state shall submit to OCR by August 15 of each year after a plan's acceptance, a comprehensive narrative assessment of its desegregation efforts in the most recent academic year. This narrative assessment shall include:

1. A description of the specific measures which have been taken to achieve the objectives enumerated in the plan and in the criteria;

2. A description of the results achieved, including quantitative indices where appropriate or required;

3. An analysis of the reasons why any steps taken proved inadequate or insufficient; and

4. A description of the steps the state will take to achieve progress and to maintain the timetables set forth in the plan.

D. OCR shall review such narrative reports. If good cause for the failure to meet interim goals is not demonstrated, OCR may impose more stringent requirements, including advance approval by OCR of desegregation methods, in order to assure achievement of the goals of the plan. In the alternative, the Department may initiate enforcement proceedings under Title VI of the Civil Rights Act of 1964, if compliance with Title VI cannot be achieved by voluntary means.

E. Each plan shall provide that the state will furnish to OCR statistical reports, assessments, and such other information as OCR may deem necessary from time to time in order to determine the effectiveness of the state's efforts to achieve the goals described in these criteria. Such information shall include annual statistical reports in substantially the same format used previously by the affected states pursuant to earlier desegregation plans. Specific dates for the submission of the reports will be established by OCR. In the event that subsequent developments call for the submission of additional data, such requirements will be announced after consultation with the states, and the states and institutions shall have sufficient time to develop the system needed for the gathering of additional data.

V. DEFINITIONS

As used in these criteria:

A. "Department" refers to the U.S. Department of Health, Education, and Welfare. In instances where the "Department" is to take certain actions, they may be performed by the Office for Civil Rights or the Director, Office for Civil Rights, on behalf of the Department.

B. "Institution" means any school, college, junior or community college, university, professional or graduate school, administered by or as an agency of the state government. Four year institution means any school, college, or university that offers a baccalaureate or graduate degree. For the purpose of these criteria, "institution" does not refer to private schools or colleges.

C. "State system" means the aggregate of all state public institutions of higher education within the state, whether or not under the governance of the same state agency or board.

D. "Student" means any person enrolled in an instructional program, whether full-time or part-time, subject to exceptions to be specified by the Office For Civil Rights.

E. "Faculty" means all persons employed by an institution as full-time instructional personnel.

F. "Labor market area" means the geographical area in which an institution or campus traditionally recruits or draws applicants possessing the requisite credentials for vacancies in faculty, administrative, or non-academic personnel positions.

G. "Governing board" means that appointed or elected body, whether or not responsible to the governor of a state or to the state legislature, which is charged under state law with the ultimate responsibility for the administration and operation of institutions within the state system of public higher education. A "governing board" may be responsible for the entire

system, for a single campus or institution thereof, or for a specified group of campuses or institutions.

Dated: February 2, 1978.

DAVID S. TATEL,
Director, Office for Civil Rights.

DEPARTMENT OF HOUSING AND
URBAN DEVELOPMENT

Office of the Secretary

[Docket No. N-78-841]

FEDERAL EQUAL HOUSING OPPORTUNITY
COUNCIL

Establishment and Functioning

AGENCY: Department of Housing and Urban Development.

ACTION: Notice.

SUMMARY: The purpose of this notice is to place in the public record information regarding the establishment and functioning of the Federal Equal Housing Opportunity Council.

FOR FURTHER INFORMATION CONTACT:

Lloyd Davis, Director, Office of Voluntary Compliance, 451, 7th Street SW., Room 5228, Washington, D.C. 20410, Phone, 202-755-5904.

Section 1—Establishment of the Council

The provisions of Executive Order 11063 (27 FR 11527, effective November 20, 1962, and section 808 of Title VIII of the Civil Rights Act of 1968, as amended (42 U.S.C. § 3608) set forth requirements that Federal agencies function in a manner that deters housing discrimination and affirmatively promotes fair housing and equal opportunity. Further, under Title VI of the Civil Rights Act of 1964 (42 U.S.C. § 2000d) each agency is responsible for assuring nondiscrimination in programs involving Federal financial assistance. In accordance with these authorities, and in an effort to assist Federal agencies in fulfilling their fair housing and equal opportunity responsibilities, the Department of Housing and Urban Development (hereafter HUD), established the Federal Equal Housing Opportunity Council ("Council").

Section 2—Functions

The Council is chaired by the HUD Assistant Secretary for Fair Housing and Equal Opportunity, and is open to all Federal agencies and departments. The Council has developed three primary goals to be achieved by each member agency:

A. Planning federal facilities in locations where there is shown to exist, on

a nondiscriminatory basis, an adequate supply of low and moderate income housing with adequate access by public transportation from other areas of the urban center and adequate parking facilities.

B. Establishing and maintaining an Equal Housing Locator Service, either separately or in cooperation with agencies in close proximity, available to all agency employees, in headquarters and field offices.

C. Making affirmative use of agency funding authority with respect to government sponsored projects to further the purposes of Title VIII of the Civil Rights Act of 1968 (as amended).

To institutionalize the process of agency pursuit of Council goals, HUD negotiates and executes Interagency Fair Housing Agreements with member agencies. In view of HUD's leadership role under Title VIII, primary staff responsibility for the Council rests with the HUD Assistant Secretary for Fair Housing and Equal Opportunity and the Office of Voluntary Compliance.

Section 3—Meetings, Procedures and Reports

The Council meets quarterly during the fiscal year. The time and place of each meeting and the matters to be considered will be published in advance of the meeting. HUD requests biannual progress reports on agency activities to achieve Council goals, with updates as required. HUD issues an annual report on the accomplishments of the Council, titled The Federal Agencies and Fair Housing. HUD also submits reports to OMB relative to estimated cost incurred for the Council to function. Interagency Fair Housing Agreements signed with HUD will be published in the FEDERAL REGISTER and made available through the mail to interested public and private organizations.

Section 4—Council Members

HUD has requested that the head of an agency or department commencing its participation on the Council appoint a representative and an alternate to attend Council meetings and work with HUD in pursuit of the Council goals. As an appointee for the agency or department head, each representative has decisionmaking authority with respect to matters under consideration. The level of appointment allows for timely implementation of Council efforts.

Section 5—Travel Expenses, Administrative Support, Financing

Financial and administrative support for the Council is provided by the Department of HUD, Office of Fair Housing and Equal Opportunity. Travel expenses incurred by representatives in attending quarterly meetings is borne by the individual agencies.

AUTHORITY: (Section 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d)).

Issued at Washington, D.C., January 31, 1978.

CHIESTER C. MCGUIRE,
Assistant Secretary for Fair
Housing and Equal Opportunity.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

STATE DIRECTOR, CALIFORNIA

Redelegation of Authority

Under the authority of Secretarial Order No. 3003, dated April 26, 1977, subject to limitations of section 4(b) of that order, the State Director, California, is authorized to issue all initial grants, permits, and amendments thereto, across public and other appropriate Federal lands for the SOHIO pipeline and associated ancillary facilities in the States of Arizona, California, New Mexico, and Texas. This authorization is pursuant to section 28 of the Mineral Leasing Act of 1920, as amended, 30 U.S.C. 185.

The California State Director shall not redelegate this authority.

GEORGE L. TURCOTT,
Acting Director.

FEBRUARY 3, 1978.

NATIONAL ADVISORY COUNCIL ON
ECONOMIC OPPORTUNITY

MEETING

Pursuant to section 10 of the Federal Advisory Committee Act of 1972 notice is hereby given that the National Advisory Council on Economic Opportunity will hold a two-day meeting on March 13 and 14, 1978 at the Council's office at 1725 K Street NW., (Room 405), Washington, D.C.

The purpose of the two-day meeting is to review and discuss the reports of the committees charged with the study and recommendations regarding (1) coordination and (2) Community Development Corporations.

The March 13 meeting will open at 1:30 p.m. The March 14 meeting will begin at 9:30 a.m. and continue until the Council's business is concluded. Both meetings are open to the public.

The National Advisory Council on Economic Opportunity is authorized by section 605 of the Community Services Act to advise the President and the Director of the Community Services Administration on policy matters arising under the administration of the Act and to review the effectiveness and operations of programs under the Act.

Records shall be kept of all proceed-

ings and shall be available for public inspection at the office of the National Advisory Council on Economic Opportunity.

WALTER B. QUETSCH,
Executive Director.

SMALL BUSINESS ADMINISTRATION

[License No. 06/06-0195]

CAPITAL FOR TERREBONNE, INC.

Issuance of License To Operate as a Small Business Investment Company

On December 20, 1977, a notice was published in the FEDERAL REGISTER (42 FR 63841) stating that Capital for Terrebonne, Inc., 1613 Barrow Street, P.O. Box 1868, Houma, La. 70360, had filed an application with the Small Business Administration (SBA), pursuant to § 107.102 of the rules and regulations governing small business investment companies (13 CFR 107.102 (1977)) for a license to operate as a small business investment company (SBIC).

The public was given to the close of business January 4, 1978, to submit written comments to SBA. No comments were received.

Notice is hereby given that, having considered the application and all other information, SBA has issued License No. 06/06-0195 to Capital for Terrebonne, Inc., pursuant to section 301(c) of the Small Business Investment Act of 1958, as amended.

CROP DAMAGE

Physical Disaster Declaration Extensions

Notice is hereby given to extend the termination dates on the following thirteen (13) physical disaster declarations on crop damage:

(1) Declaration of Disaster Loan Area No. 1350.

GEORGIA—AMENDMENT No. 2

The above numbered Declaration (see 42 FR 39285), and Amendment No. 1 (see 42 FR 48424) are amended by extending the filing date for accepting applications for physical

damage until the close of business on January 31, 1978, and for economic injury until the close of business on August 31, 1978.

(2) Declaration of Disaster Loan Area No. 1355.

NORTH CAROLINA—AMENDMENT No. 3

The above numbered Declaration (see 42 FR 41687), and amendments thereto (see 42 FR 44863 and 42 FR 52590), are amended by extending the filing date for accepting applications for physical damage until the close of business on February 9, 1978, and for economic injury until the close of business on September 11, 1978.

(3) Declaration of Disaster Loan Area No. 1353.

FLORIDA—AMENDMENT No. 2

The above numbered Declaration (see 42 FR 40802), and Amendment No. 1 (see 42 FR 54896), are amended by extending the filing date for accepting applications for physical damage until the close of business on February 4, 1978, and for economic injury until the close of business on September 4, 1978.

(4) Declaration of Disaster Loan Area No. 1357.

SOUTH CAROLINA—AMENDMENT No. 1

The above numbered Declaration (see 42 FR 41687) is amended by extending the termination date for accepting applications for filing for physical damage until the close of business on February 10, 1978, and for economic injury until the close of business on September 11, 1978, and by adding Dillon, Horry, Marion, and Williamsburg Counties and adjacent counties within the State of South Carolina.

(5) Declaration Disaster Loan Area No. 1358.

OREGON—AMENDMENT No. 2

The above numbered Declaration (see 42 FR 44323), and Amendment No. 1 (see 42 FR 56990), are amended by extending the filing date for accepting applications for physical damage until the close of business on February 13, 1978, and for economic injury until the close of business on September 12, 1978.

(6) Declaration of Disaster Loan Area No. 1360.

ALABAMA—AMENDMENT No. 3

The above numbered Declaration (see 42 FR 42421), and amendments thereto (see 42 FR 52588 and 42 FR 60618), are amended by extending the filing date for accepting applications for physical damage until the close of business on February 28, 1978, and for economic injury until the close of business on September 28, 1978.

(7) Declaration of Disaster Loan Area No. 1361.

IDAHO—AMENDMENT No. 2

The above numbered Declaration (see 42 FR 44862 and 43 FR 2682), are amended by extending the filing date for accepting applications for physical damage until the close of business on February 24, 1978, and for economic injury until the close of business on September 24, 1978.

(8) Declaration of Disaster Loan Area No. 1364.

VIRGINIA—AMENDMENT No. 3

The above numbered Declaration (see 42 FR 44863), and amendments thereto (see 42 FR 52590 and 42 FR 58992), are amended by extending the termination date for accepting applications for filing for physical damage until the close of business on February 28, 1978, and for economic injury until the close of business on September 28, 1978.

(9) Declaration of Disaster Loan Area No. 1365.

IOWA—AMENDMENT No. 3

The above numbered Declaration (see 42 FR 44862), and amendments thereto (see 42 FR 52589 and 42 FR 59341), are amended by extending the termination date for filing applications for physical damage until the close of business on February 23, 1978, and for economic injury until the close of business on September 25, 1978.

(10) Declaration of Disaster Loan Area No. 1367.

MISSISSIPPI—AMENDMENT No. 3

The above numbered Declaration (see 42 FR 45977), Amendments No. 1 (see 42 FR 58472), and Amendment 2 (43 FR 2967) are amended by extending the filing date for accepting applications for physical damage until the close of business on February 28, 1978, and for economic injury until the close of business on September 28, 1978.

(11) Declaration of Disaster Loan Area No. 1370.

IDAHO—AMENDMENT No. 2

The above numbered Declaration (see 42 FR 56657), and amendment thereto (see 42 FR 58472), are amended by extending the filing date for accepting applications for physical damage until the close of business on March 13, 1978, and for economic injury until the close of business on October 12, 1978.

(12) Declaration of Disaster Loan Area No. 1384.

WASHINGTON—AMENDMENT No. 3

The above numbered Declaration (see 42 FR 56991), and amendments thereto (see 42 FR 59153 and 42 FR 62055), are amended by extending the filing date for accepting applications for physical damage until the close of business on April 19, 1978, and for economic

injury until the close of business on November 20, 1978.

(13) Declaration of Disaster Loan Area No. 1403.

MISSOURI—AMENDMENT No. 1

The above numbered Declaration (see 42 FR 60240) is amended by extending the filing date for accepting applications for physical damage until the close of business on May 17, 1978, and for economic injury until the close of business on December 18, 1978.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008.)

NOTICES

[4810-40]

DEPARTMENT OF THE TREASURY

Office of the Secretary

[Dept. Cir. Public Debt Series—No. 5-78]

UNITED STATES OF AMERICA TREASURY
NOTES OF FEBRUARY 29, 1980

Series L-1980

FEBRUARY 10, 1978.

1. INVITATION FOR TENDERS

1.1. The Secretary of the Treasury, under the authority of the Second Liberty Bond Act, as amended, invites tenders for approximately \$3,250,000,000 of United States securities, designated Treasury Notes of February 29, 1980, Series L-1980 (CUSIP No. 912827 HM 7). The securities will be sold at auction with bidding on the basis of yield. Payment will be required at the price equivalent of the bid yield of each accepted tender. The interest rate on the securities and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of these securities may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts may also be issued for cash to Federal Reserve Banks as agents of foreign and international monetary authorities.

2. DESCRIPTION OF SECURITIES

2.1. The securities will be dated February 28, 1978, and will bear interest from that date, payable on a semiannual basis on August 31, 1978; February 28 and August 31, 1979; and February 29, 1980. They will mature February 29, 1980, and will not be subject to call for redemption prior to maturity.

2.2. The income derived from the securities is subject to all taxes imposed under the Internal Revenue Code of 1954. The securities are subject to estate, inheritance, gift or other excise taxes, whether Federal or State, but are exempt from all taxation now or hereafter imposed on the principal or interest thereof by any State, any possession of the United States, or any local taxing authority.

2.3. The securities will be acceptable to secure deposits of public monies. They will not be acceptable in payment of taxes.

2.4. Bearer securities with interest coupons attached, and securities registered as to principal and interest, will be issued in denominations of \$5,000, \$10,000, \$100,000, and \$1,000,000. Book-entry securities will be available to eligible bidders in multiples of those amounts. Interchanges of securities of different denominations and of coupon, registered and book-entry se-

curities, and the transfer of registered securities will be permitted.

2.5. The Department of the Treasury's general regulations governing United States securities apply to the securities offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. SALE PROCEDURES

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, D.C. 20226, up to 1:30 p.m., Eastern Standard time, Thursday, February 16, 1978. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Wednesday, February 15, 1978.

3.2. Each tender must state the face amount of securities bid for. The minimum bid is \$5,000 and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.118. Common fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield. No bidder may submit more than one noncompetitive tender and the amount may not exceed \$1,000,000.

3.3. All bidders must certify that they have not made and will not make any agreements for the sale or purchase of any securities of this issue prior to the deadline established in Section 3.1. for receipt of tenders. Those authorized to submit tenders for the account of customers will be required to certify that such tenders are submitted under the same conditions, agreements, and certifications as tenders submitted directly by bidders for their own account.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and report daily to the Federal Reserve Bank of New York their positions in and borrowings on such securities, may submit tenders for account of customers if the names of the customers and the amount for each customer are furnished. Others are only permitted to submit tenders for their own account.

3.5. Tenders will be received without deposit for their own account from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United

States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from others must be accompanied by a deposit of 5% of the face amount of securities applied for (in the form of cash, maturing Treasury securities or readily collectible checks), or by a guarantee of such deposit by a commercial bank or a primary dealer.

3.6. Immediately after the closing hour, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, a coupon rate will be established, on the basis of a 1/4 of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.500. That rate of interest will be paid on all of the securities. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance or rejection of their tenders. Those submitting noncompetitive tenders will only be notified if the tender is not accepted in full, or when the price is over par.

4. RESERVATIONS

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of securities specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers

it in the public interest. The Secretary's action under this Section is final.

5. PAYMENT AND DELIVERY

5.1. Settlement for allotted securities must be made or completed on or before Tuesday, February 28, 1978, at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes or bonds (with all coupons detached) maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received at such institution no later than:

- (a) Friday, February 24, 1978, if the check is drawn on a bank in the Federal Reserve District of the institution to which the check is submitted (the Fifth Federal Reserve District in case of the Bureau of the Public Debt), or
- (b) Thursday, February 23, 1978, if the check is drawn on a bank in another Federal Reserve District.

Checks received after the dates set forth in the preceding sentence will not be accepted unless they are payable at the applicable Federal Reserve Bank. Payment will not be considered complete where registered securities are requested if the appropriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (an individual's social security number or an employer identification number) is not furnished. When payment is made in securities, a cash adjustment will be made to or required of the bidder for any difference between the face amount of securities presented and the amount payable on the securities allotted.

5.2. In every case where full payment is not completed on time, the deposit submitted with the tender, up to 5 percent of the face amount of securities allotted, shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered securities tendered as deposits and in payment for allotted securities are not required to be assigned if the new securities are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new securities are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (securities offered by this circular) in the name of (name and taxpayer iden-

tifying number)." If new securities in coupon form are desired, the assignment should be to "The Secretary of the Treasury for coupon (securities offered by this circular) to be delivered to (name and address)." Specific instructions for the issuance and delivery of the new securities, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment should be surrendered to the Federal Reserve Bank or Branch or to the Bureau of the Public Debt, Washington, D.C. 20226. The securities must be delivered at the expense and risk of the holder.

5.4. If bearer securities are not ready for delivery on the settlement date, purchasers may elect to receive interim certificates. These certificates shall be issued in bearer form and shall be exchangeable for definitive securities of this issue, when such securities are available, at any Federal Reserve Bank or Branch or at the Bureau of the Public Debt, Washington, D.C. 20226. The interim certificates must be returned at the risk and expense of the holder.

5.5. Delivery of securities in registered form will be made after the requested form of registration has been validated, the registered interest account has been established, and the securities have been inscribed.

6. GENERAL PROVISIONS

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized and requested to receive tenders, to make allotments as directed by the Secretary of the Treasury, to issue such notices as may be necessary, to receive payment for and make delivery of securities on full-paid allotments, and to issue interim certificates pending delivery of the definitive securities.

6.2. The Secretary of the Treasury may at any time issue supplemental or amendatory rules and regulations governing the offering. Public announcement of such changes will be promptly provided.

PAUL H. TAYLOR,
*Acting Fiscal
Assistant Secretary.*

COOPERATIVE STUDIES EVALUATION COMMITTEE

Meeting

The Veterans Administration gives notice pursuant to Pub. L. 92-463 that a meeting of the Cooperative Studies Evaluation Committee, authorized by 38 U.S.C. 4101, will be held at the

Holiday Inn (Civic Center), 1170 NW 11th Street, Miami, Fla., on March 13, and 14, 1978. The meeting will be for the purpose of reviewing proposed cooperative studies and advising the Veterans Administration on the relevance and feasibility of the studies, the adequacy of the protocols, the scientific validity and the propriety of technical details, including involvement of human subjects. The Committee advises the Director, Medical Research Service, through the Chief of the Cooperative Studies Program, on its findings.

The meeting will be open to the public up to the seating capacity of the room from 8 to 8:30 a.m., March 13, to discuss the general status of the program. To assure adequate accommodations, those who plan to attend should contact Dr. James A. Hagans, Coordinator of the Committee, Veterans Administration Central Office, Washington, D.C., 202-389-3702, prior to February 23.

The meeting will be closed from 8:30 a.m. to 4:30 p.m., March 13, and all day on March 14 for consideration of specific proposals in accordance with provisions set forth in Subsection 10(d) of Public Law 92-463, as amended by Public Law 94-409, and Subsection 552b(c)(6) of Title 5, United States Code. During this portion of the meeting, discussion and decisions will deal with qualifications of personnel conducting the studies and the medical records of patients who are study subjects, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Dated: February 8, 1978.

MAX CLELAND,
Administrator.

INTERSTATE COMMERCE COMMISSION

[Notice No. 589]

ASSIGNMENT OF HEARINGS

FEBRUARY 10, 1978.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 135082 (Sub-No. 45), Bursch Trucking, Inc., d.b.a., Roadrunner Trucking, Inc., now assigned February 28, 1978, at Phoenix, Ariz., will be held in the Tax Court Room No. 235, 3d Floor, Federal Building and Post Office, 522 North Central Avenue, instead of Tax Court Room No. 235, Federal Building and Post Office, 1000 Liberty Avenue.

MC 133655 (Sub-No. 99), Trans-National Truck, Inc., now assigned March 14, 1978, at Chicago, Ill., is postponed indefinitely.

MC 118130 (Sub-No. 77), South Eastern Express, Inc., now assigned February 22, 1978, at Dallas, Tex., is canceled and application dismissed.

MCC 9934, *Universal Prototype, Inc. v. Roadway Trucking Co., et al.*, is now assigned for hearing March 14, 1978 (1 day), at Chicago, Ill., at a hearing room to be later designated.

AB 43 (Sub-No. 41), Illinois Central Gulf Railroad Co. Abandonment near Bemis, Tenn., and Holly Springs, Miss., in Madison, Hardeman, and Fayette Counties, Tenn., and Benton and Marshall Counties, Miss., now assigned March 1, 1978, at Bolivar, Tenn., will be held in the Utility Building, Tennessee State Highway 18 South.

MC 143621, Tennessee Steel Haulers, Inc., now assigned March 6, 1978, at Nashville, Tenn., will be held in Room A-440, Federal Building, U.S. Courthouse, 801 Broadway.

MC 108676 (Sub-No. 110), A. J. Metler Hauling & Rigging, Inc., now assigned March 8, 1978, at Nashville, Tenn., will be held in Room A-440, Federal Building, U.S. Courthouse, 801 Broadway.

MC 124306 (Sub-No. 29), Kenan Transport Co., Inc., now assigned March 6, 1978, at Raleigh, N.C., will be held in Room 209, Federal Building, 310 New Bern Avenue.

MCC 9761, *Carolina Coach Co., et al. v. Mandrell Motor Coach, Inc.*, now assigned February 22, 1978, at Dover, Del., is postponed indefinitely.

H. G. HOMME, Jr.,
Acting Secretary.

[7035-01]

IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY-ELIMINATION OF GATEWAY LETTER NOTICES

FEBRUARY 10, 1978.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's Gateway Elimination Rules (49 CFR 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission February 27, 1978. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not oper-

ate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

The following applicants seek to operate as a common carrier, by motor vehicles, over irregular routes.

No. MC 60014 (Sub-No. E146) (Clarification), filed June 4, 1974, published in the FEDERAL REGISTER issue of July 23, 1975, republished October 28, 1975, and republished, as clarified, this issue. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: Charles A. Tell, 100 East Broad Street, Columbus, Ohio 45215. *Commodities*, the transportation of which, by reason of their size or weight, require the use of special equipment, between those points in Indiana on and south of a line beginning at Lake Michigan and extending along Indiana Highway 39 to junction U.S. Highway 35, thence along U.S. Highway 35 to junction U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. Highway 33, thence along U.S. Highway 33 to junction U.S. Highway 24/30, thence along U.S. Highway 24/30 to junction U.S. Highway 30, thence along U.S. Highway 30 to the Ohio-Indiana State line, on the one hand, and, on the other, those points in Ohio on and east of a line beginning at Lake Erie and extending along Ohio Highway 13, thence along Ohio Highway 13 to junction U.S. Highway 250, thence along U.S. Highway 250 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction Ohio Highway 61, thence along Ohio Highway 61 to junction Ohio Highway 39, thence along Ohio Highway 39 to junction Ohio Highway 13, thence along Ohio Highway 13 to junction Ohio Highway 33, thence along Ohio Highway 33 to the West Virginia-Ohio State line. The purpose of this filing is to eliminate the gateways of points in Ohio on and east and south of a line beginning at the Ohio-West Virginia State line, and extending along U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. Highway 30 and Ohio Highway 13 at Mansfield, Ohio, thence south along Ohio Highway 13 to junction U.S. Highway 33, thence along U.S. Highway 33 to Pomeroy, Ohio at the Ohio-West Virginia State line. The purpose of this republication is to clarify the gateway elimination.

No. MC 60014 (Sub-No. E242), filed August 28, 1976. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). *Iron and steel angles, bars, channels, conduit, fencing, floor-*

ing, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing, and wire in coils, from points in Rhode Island, to points in Kentucky on and west of a line beginning at the West Virginia-Kentucky State line, and extending along U.S. Highway 119 to the junction Kentucky Highway 80, thence along Kentucky Highway 80 to junction Interstate Highway 75, thence along Interstate Highway 75 to the Kentucky-Tennessee State line. The purpose of this filing is to eliminate the gateway of: (1) Between points in that part of Massachusetts on and east of a line beginning at the Massachusetts-New Hampshire State line and extending southwardly along U.S. Highway 202 to junction Massachusetts Highway 68 (at or near Baldwinville, Mass.), thence along Massachusetts Highway 68 to junction Massachusetts Highway 56 (at or near Hubbardston, Mass.), thence over Massachusetts Highway 56 to junction Massachusetts Highway 12 (near Rochdale, Mass.), thence along Massachusetts Highway 12 to the Massachusetts-Connecticut State line, (except points in Barnstable, Dukes, and Nantucket Counties, Mass.); (2) points in Massachusetts on and east of U.S. Highway 5; (3) Greenwich, Conn.; (4) points in New York; (5) Wheeling, W. Va.

No. MC 60014 (Sub-No. E300), filed August 28, 1978. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (Same as above). *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing, and wire in coils, except commodities in bulk, from points in Maine, Connecticut, and New Hampshire, to points in Alabama, Kentucky, Mississippi and Tennessee. The purpose of this filing is to eliminate the gateways of:* (1) Between points in that part of Massachusetts on and east of a line beginning at the Massachusetts-New Hampshire State line and extending southwardly along U.S. Highway 202 to junction Massachusetts Highway 68 (at or near Baldwinville, Mass.), thence along Massachusetts Highway 68 to junction Massachusetts Highway 56 (at or near Hubbardston, Mass.), thence over Massachusetts Highway 56 to junction Massachusetts Highway 12 (near Rochdale, Mass.), thence along Massachusetts Highway 12 to the Massachusetts-Connecticut State line, (except points in Barnstable, Dukes, and Nantucket Counties, Mass.); (2) points within 10 miles of Greenwich, Conn.; (3) New York, Pennsylvania, and West Virginia; (4) Wheeling, W. Va.

No. MC 60014 (Sub-No. E301), filed August 28, 1976. Applicant: AERO

TRUCKING INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing, and wire in coils, between points in that part of Massachusetts on and east of a line beginning at the Massachusetts-New Hampshire State line and extending southwardly along U.S. Highway 202 to junction Massachusetts Highway 68 (at or near Baldwinville, Mass.), thence along Massachusetts Highway 68 to junction Massachusetts Highway 56 (at or near Hubbardston, Mass.), thence over Massachusetts Highway 56 to junction Massachusetts Highway 12 (near Rochdale, Mass.), thence along Massachusetts Highway 12 to the Massachusetts-Connecticut State line, (except points in Barnstable, Dukes, and Nantucket Counties, Mass.), on the one hand, and, on the other, points in Delaware, New Jersey, Pennsylvania, and Virginia. The purpose of this filing is to eliminate the gateway of points in New York.*

No. MC 60014 (Sub-No. E302), filed August 28, 1976. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison, (same as above). *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing, and wire in coils, between points in Ohio on and west of a line beginning at Lake Erie and extending along Ohio Highway 91 to junction of U.S. Highway 422, thence along U.S. Highway 422 to junction Ohio Highway 88, thence along Ohio Highway 88 to the Ohio-Pennsylvania State line, on the one hand, and, on the other, points in Rhode Island, those points in Massachusetts on and east of a line beginning at the Massachusetts-New Hampshire State line and extending along U.S. Highway 202 to junction Massachusetts Highway 68 (at or near Baldwinville, Mass.), thence along Massachusetts Highway 68 to junction Massachusetts Highway 56 (at or near Hubbardston, Mass.), thence over Massachusetts Highway 56 to junction Massachusetts Highway 12 (near Rochdale, Mass.), thence along Massachusetts Highway 12 to the Massachusetts-Connecticut State line; those points in Connecticut on and east of a line beginning at the Massachusetts-Connecticut State line, and extending along U.S. Highway 5 to the junction Interstate Highway 91, thence along Interstate Highway 91 to the junction of Connecticut Highway 2, thence along Connecticut Highway 2 to the junction to the junction of Connecticut*

Highway 85, thence along Connecticut Highway 85 to the Block Island Sound; those points in New Hampshire on and east of a line beginning at the Vermont-New Hampshire State line, and extending along U.S. Highway 302 to junction New Hampshire Highway 112, thence along New Hampshire Highway 112 to junction New Hampshire Highway 118, thence along New Hampshire Highway 118 to junction U.S. Highway 3, thence along U.S. Highway 3 to junction New Hampshire Highway 3A/25, thence along New Hampshire Highway 3A/25 to junction New Hampshire Highway 3A, thence along New Hampshire Highway 3A to junction New Hampshire Highway 104, thence along New Hampshire Highway 104 to junction U.S. Highway 4, thence along U.S. Highway 4 to junction New Hampshire Highway 11, thence along New Hampshire Highway 11 to junction New Hampshire Highway 10, thence along New Hampshire Highway 10 to junction New Hampshire Highway 123A, thence along New Hampshire Highway 123A to junction New Hampshire Highway 123, thence along New Hampshire Highway 123 to the Vermont-New Hampshire State line. The purpose of this filing is to eliminate the gateways of: (1) Columbiana, Cuyahoga, Mahoning, Summit, and Trumbull Counties, Ohio; (2) points in that part of Ohio on and east of a line extending from Mansfield to Pomeroy, Ohio, along Ohio Highway 13 to junction thereof with U.S. Highway 33, thence along U.S. Highway 33 to Pomeroy, and on and south of U.S. Highway 30 extending from Mansfield to the Ohio-West Virginia State line; (3) New York; (4) between points in that part of Massachusetts on and east of a line beginning at the Massachusetts-New Hampshire State line and extending along U.S. Highway 202 to junction Massachusetts Highway 68 (at or near Baldwinville, Mass.), thence along Massachusetts Highway 68 to junction Massachusetts Highway 56 (at or near Hubbardston, Mass.), thence over Massachusetts Highway 56 to junction Massachusetts Highway 12 (near Rochdale, Mass.), thence along Massachusetts Highway 12 to the Massachusetts-Connecticut State line, (except points in Barnstable, Dukes, and Nantucket Counties, Mass.)

No. MC 60014 (Sub-No. E307), filed August 28, 1976. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing and wire in coils, from those points in Ohio on and east of a line be-*

ginning at Lake Erie and extending along U.S. Highway 42 to junction Ohio Highway 176, thence along Ohio Highway 176 to junction Interstate Highway 77, thence along Interstate Highway 77 to junction Ohio Highway 21, thence along Ohio Highway 21 to junction Interstate Highway 77, thence along Interstate Highway 77 to junction Ohio Highway 78, thence along Ohio Highway 78 to the Ohio-West Virginia State line, to those points in Kentucky on and south of a line beginning at the West Virginia-Kentucky State line, and extending along Kentucky Highway 40 to junction U.S. Highway 460, thence along U.S. Highway 460 to junction Kentucky Highway 30, thence along Kentucky Highway 30 to junction Kentucky Highway 638, thence along Kentucky Highway 638 to junction Kentucky Highway 80, thence along Kentucky Highway 80 to junction Kentucky Highway 178, thence along Kentucky Highway 178 to junction Kentucky Highway 800, thence along Kentucky Highway 800 to junction Kentucky Highway 109, thence along Kentucky Highway 109 to junction Kentucky Highway 56, thence along Kentucky Highway 56 to the Kentucky-Illinois State line. The purpose of this filing is to eliminate the gateway of between points in that part of Ohio on and south of U.S. Highway 30 on and east of a line beginning at junction U.S. Highway 30 and Ohio Highway 13 (near Mansfield, Ohio), and extending in a southward direction along Ohio Highway 13 to junction U.S. Highway 33 (near Athens, Ohio), thence southwardly along U.S. Highway 33 to junction Ohio Highway 33 to junction Ohio Highway 7 (near the Ohio River), thence westerly along Ohio Highway 7 and U.S. Highway 33 to Pomeroy, Ohio (except points in Licking County, Ohio).

No. MC 60014 (Sub-No. E308), filed August 28, 1976. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing and wire in coils, between points in Ohio, on the one hand, and, on the other, those points in West Virginia on and east of a line beginning at the Ohio-West Virginia State line and extending along West Virginia Highway 2, thence along West Virginia Highway 2 to junction U.S. Highway 33, thence along U.S. Highway 33 to junction West Virginia Highway 16, thence along West Virginia Highway 16 to junction West Virginia Highway 4, thence along West Virginia Highway 4 to junction Interstate Highway 79, thence along Interstate Highway*

79 to junction U.S. Highway 19, thence along U.S. Highway 19 to junction West Virginia Highway 41, thence along West Virginia Highway 41 to junction West Virginia Highway 20, thence along West Virginia Highway 20 to junction West Virginia Highway 39, thence along West Virginia Highway 39 to the West Virginia-Virginia State line. The purpose of this filing is to eliminate the gateway of between points in that part of Ohio on and east of a line extending from Mansfield to Pomeroy, Ohio, along Ohio Highway 13 to junction thereof with U.S. Highway 33, thence along U.S. Highway 33 to Pomeroy, and on and south of U.S. Highway 30 extending from Mansfield to the Ohio-West Virginia State line (except points in Licking County, Ohio).

No. MC 60014 (Sub-No. E309), filed August 28, 1976. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing and wire in coils, between those points in Indiana on and south of a line beginning at Lake Michigan, and extending along Indiana Highway 39 to junction U.S. Highway 35, thence along U.S. Highway 35 to junction U.S. Highway 30, thence along U.S. Highway 30 to junction U.S. Highway 33, thence along U.S. Highway 33 to junction U.S. Highway 24/30, thence along U.S. Highway 24/30 to junction U.S. Highway 30, thence along U.S. Highway 30 to the Ohio-Indiana State line, on the one hand, and, on the other, those points in Ohio on and east of a line beginning at Lake Erie and extending along Ohio Highway 13, thence along Ohio Highway 13 to junction U.S. Highway 250, thence along U.S. Highway 250 to junction U.S. Highway 20, thence along U.S. Highway 20 to junction Ohio Highway 61, thence along Ohio Highway 61 to junction Ohio Highway 39, thence along Ohio Highway 39 to junction Ohio Highway 13, thence along Ohio Highway 13 to junction Ohio Highway 33, thence along Ohio Highway 33 to the West Virginia-Ohio State line. The purpose of this filing is to eliminate the gateways between points in that part of Ohio on and south of U.S. Highway 30 on and east of a line beginning at junction U.S. Highway 30 and Ohio Highway 13 (near Mansfield, Ohio), and extending along in a southward direction along Ohio Highway 13 to junction U.S. Highway 33 (near Athens, Ohio), thence southwardly along U.S. Highway 33 to junction Ohio Highway 33 to junction Ohio Highway 7 (near the Ohio River), thence westerly along Ohio Highway 7*

and U.S. Highway 33 to Pomeroy, Ohio (except points in Licking County, Ohio).

No. MC 60014 (Sub-No. E 310), filed August 28, 1976. Applicant: AERO TRUCKING, INC., P.O. Box 308, Monroeville, Pa. 15146. Applicant's representative: William J. Rorison (same as above). *Iron and steel angles, bars, channels, conduit, fencing, flooring, joists, lath, mesh, piling, pipe, posts, rails, rods, roof bolt mats, roofing, strip, structurals, tank parts, tubing and wire* in coils, from points in Rhode Island, to points in Mississippi. The purpose of this filing is to eliminate the gateways (1) between points in that part of Massachusetts, on and east of a line beginning at the Massachusetts-New Hampshire State line and extending along southwarily U.S. Highway 202 to junction Massachusetts Highway 68 (at or near Baldwinville, Mass.), thence along Massachusetts Highway 668 to junction Massachusetts Highway 56 (at or near Hubbardston, Mass.), thence over Massachusetts Highway 56 to junction Massachusetts Highway 12 (near Rochdale, Mass.), thence along Massachusetts Highway 12 to the Massachusetts-Connecticut State line, (except points in Barnstable, Dukes, and Nantucket Counties, Mass.) (2) points in Massachusetts on and east of U.S. Highway 5. (3) Greenwich, Conn. (4) points in New York. (5) Wheeling, W. Va.

No. MC 83539 (Sub-No. E345), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: H. N. Cunningham, III (same as above). *Commodities*, the transportation of which, because of their size or weight, require the use of special equipment, between points in the State of Alabama, in and east of Madison, Morgan, Cullman, Blount, Jefferson, Tuscaloosa, Green, Sumter and in and west of Randolph, Tallapoosa, Macon, Bullock, Pike, Crenshaw, and Covington Counties on the one hand, and, on the other, points in the State of Connecticut. The purpose of this filing is to eliminate the gateways of points within a 50-mile radius of Philadelphia, Pa., Nashville, Tenn., and points in Kentucky.

No. MC 83539 (Sub-No. E357), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: H. N. Cunningham, III (same as above). *Commodities*, the transportation of which, because of their size or weight, require the use of special equipment, between points in the State of Arkansas, on the one hand, and, on the other, points in the State of Ohio, restricted against service in the stringing or picking up of any of the above commodities in con-

nection with main or trunk pipelines. The purpose of this filing is to eliminate the gateway of points in Kentucky.

No. MC 83539 (Sub-No. E358), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: H. N. Cunningham, III (same as above). *Commodities*, the transportation of which, because of their size or weight, require the use of special equipment, between points in the State of Colorado, on the one hand, and, on the other, points in the State of Delaware, restricted against service in the stringing or picking up of any of the above commodities in connection with main or trunk pipelines. The purpose of this filing is to eliminate the gateways of Wichita, Kans., Philadelphia, Pa., and points in Illinois, Indiana, and Missouri.

No. MC 83539 (Sub-Nos. E409, E410, E411, E412, and E418) (correction), filed May 31, 1977, published in the FEDERAL REGISTER issued of January 20, 1978, and, republished, as corrected, this issue. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: H. N. Cunningham III (same as above).

NOTICE.—The following E letter-notices were given the wrong filing date of May 31, 1974 and should read May 31, 1977 on page 3001 of January 20, 1978 FEDERAL REGISTER. The E's are E409, E410, E411, and E412. On page 3002 in the middle column—third paragraph: the filing date of May 31, 1977 and the number No. MC 83539 (Sub-No. E418) were omitted. The letter-notices should read the same as published in the previous FEDERAL REGISTER.

No. MC 83539 (Sub-No. E429), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: H. N. Cunningham III (same as above). *Commodities*, the transportation of which, because of their size or weight, require the use of special equipment and *related machinery parts* when moving in connection with such commodities; between points in Maryland on the one hand and, on the other, points in Mississippi. The purpose of this filing is to eliminate the gateways of points in Kentucky and Pennsylvania.

No. MC 83539 (Sub-No. E430), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: H. N. Cunningham III (same as above). (1) *Commodities*, the transportation of which, because of their size or weight, require the use of special equipment and (2) *related machinery parts, and related contractors' materials and supplies* when moving in connection with the commodities in (1) above, between points in Maryland

on the one hand and, on the other, points in Ohio. The purpose of this filing is to eliminate the gateways of points in Pennsylvania.

No. MC 83539 (Sub-No. E431), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: H. N. Cunningham III (same as above). *Commodities*, the transportation of which, because of their size or weight, require the use of special equipment and *parts* thereof when moving in connection with such commodities between (a) points in Maryland, on the one hand and, on the other, those points in Tennessee in and west of Macon, Smith, Wilson, Rutherford, Coffee, Moore, and Lincoln Counties, and those points in Maryland in and west of Allegany County on the one hand and, on the other, those points in Tennessee in and west of Pickett, Fentress, Cumberland, Bledsoe, Sequatchie and Marion Counties. The purpose of this filing is to eliminate the gateways of points in Pennsylvania and Kentucky, and those points within a 50-mile radius of Nashville, Tenn.

No. MC 83539 (Sub-No. E439), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: H. N. Cunningham III (same as above). (1) *Self-propelled articles*, (except in driveway service), each weighing 15,000 pounds or more and (2) *related machinery, parts, and supplies* moving in connection with self-propelled articles, between (a) points in Missouri in and west of Clark, Lewis, Marion, Ralls, Pike, Audrain, Callaway, Cole, Moniteau, Morgan, Benton, Hickory, Polk, Greene, Christian, Douglas, Howell, Oregon, Ripley, Butler, Stoddard, Scott, Mississippi, New Madrid, Pemiscot, and Dunklin Counties on the one hand and, on the other, points in West Virginia in and east of McDowell, Wyoming, Boone, Kanawha, Jackson, Wood, Pleasants, Tyler, and Wetzel Counties, (b) points in Missouri on the one hand and, on the other, points in West Virginia in and east of Preston, Tucker, Randolph, and Pocahontas Counties, restricted to commodities which are transported on trailers, and restricted against the transportation of any shipment which (1) originates at St. Louis or Kansas City, Mo., and which is destined to any point in Missouri, or (2) originates at any point in Missouri and which is destined to St. Louis or Kansas City, Mo. The purpose of this filing is to eliminate the gateways of points in Iowa, Illinois, and Indiana, or points in Arkansas and Kentucky.

No. MC 83539 (Sub-No. E440), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, Tex. 75222. Applicant's repre-

sentative: H. N. Cunningham, III (same as above). *Heavy machinery*, the transportation of which, because of size or weight, requires the use of special equipment, between points in Michigan on the one hand and, on the other, points in New Hampshire. The purpose of this filing is to eliminate the gateways of Philadelphia, Pa. and Worcester.

No. MC 83539 (Sub-No. E441), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: H. N. Cunningham, III (same as above). *Self-propelled articles* (except in driveway service), each weighing 15,000 pounds or more and *related machinery, parts, and supplies* moving in connection therewith; between points in Ohio on the one hand and, on the other, points in Texas. The purpose of this filing is to eliminate the gateways of points in Indiana or Kentucky.

No. MC 83539 (Sub-No. E442), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: H. N. Cunningham, III (same as above). (1) *Self-propelled articles* (except in driveway service), each weighing 15,000 pounds or more and (2) *related machinery, parts, and supplies* moving in connection with self-propelled articles, between: (a) points in Missouri in and west of Schuyler, Adair, Macon, Randolph, Boone, Cole, Miller, Maries, Phelps, Dent, Reynolds, Carter, Butler, Stoddard, and Scott Counties on the one hand and, on the other, points in Virginia, and (b) points in Missouri in, west, north, and south of Lincoln, Warren, Franklin, Washington, St. Francis and Ste. Genevieve Counties on the one hand and, on the other, points in Virginia in and east of Augusta, Rockbridge, Bedford, and Pittsylvania Counties, restricted against the transportation of any shipment which (1) originates at St. Louis or Kansas City, Mo., and which is destined to any point in Iowa, Kansas, or Missouri, or (2) originates at any point in Iowa, Kansas, or Missouri and which is destined to St. Louis or Kansas City, Mo. and further restricted to commodities which are transported on trailers. The purpose of this filing is to eliminate the gateways of points in Iowa, Illinois, and Indiana or points in Arkansas and Kentucky.

No. MC 83539 (Sub-No. E443), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: H. N. Cunningham, III (same as above). (1) *Self-propelled articles* (except in driveway service), each weighing 15,000 pounds or more and the transportation of which because of their size or weight require the use of

special equipment, and (2) *parts* moving in connection with the commodities in (1) above, between points in Florida on the one hand and, on the other, points in Ohio. The purpose of this filing is to eliminate the gateways of Nashville, Tenn. and points in Kentucky.

No. MC 83539 (Sub-No. E444), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: H. N. Cunningham, III (same as above). (1) *Commodities*, the transportation of which, because of their size or weight, require the use of special equipment, and (2) *related machinery, parts, and related contractors' materials and supplies* when moving in connection with the commodities in (1) above, between (a) points in Minnesota, in St. Louis, Lake, and Cook Counties, on the one hand, and, on the other, points in Missouri in, east, and south of Howell, Shannon, Reynolds, Iron, Madison, and Perry Counties; (b) points in Minnesota on the one hand, and, on the other, points in Missouri in, east, and south of Ripley, Carter, Wayne, Bollinger, and Cape Girardeau Counties, restricted against the stringing or picking up of pipe in connection with oil or gas pipelines. The purpose of this filing is to eliminate the gateways of points in Illinois.

No. MC 83539 (Sub-No. E445), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: H. N. Cunningham, III (same as above). *Machinery*, the transportation of which, because of size or weight, requires the use of special equipment, between points in Vermont in and east of Orleans, Lamoille, Washington, and Caledonia Counties, on the one hand, and, on the other, points in New Jersey in and south of Camden and Atlantic Counties. The purpose of this filing is to eliminate the gateways of points in Pennsylvania, Philadelphia, Pa., and Worcester, Mass.

No. MC 83539 (Sub-No. E569), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: H. N. Cunningham, III (same as above). (1) *Self-propelled articles* (except in drive-away service), each weighing 15,000 pounds or more and (2) *related machinery, parts, and supplies* moving in connection with the commodities in (1) above, between points in Virginia, on the one hand, and, on the other, points in Wyoming. The purpose of this filing is to eliminate the gateways of points in Indiana, Illinois, Iowa, and South Dakota.

No. MC 83539 (Sub-No. E570), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976,

Dallas, Tex. 75222. Applicant's representative: H. N. Cunningham, III (same as above). (1) *Self-propelled articles* each weighing 15,000 pounds or more (except in drive-away service), and (2) *related machinery, parts, and supplies* moving in connection with the commodities in (1) above, between points in Illinois, on the one hand, and, on the other, points in Washington, restricted to commodities which are transported on trailers. The purpose of this filing is to eliminate the gateways of points in Nebraska and those points in Montana on and west of a line extending north and south through Dupuyer and Butte, Mont.

No. MC 83539 (Sub-No. E571), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: H. N. Cunningham, III (same as above). (1) *Self-propelled articles* (except in drive-away service), each weighing 15,000 pounds or more and (2) *related machinery, parts, and supplies* moving in connection with the commodities in (1) above, between points in West Virginia, on the one hand, and, on the other, points in Wyoming. The purpose of this filing is to eliminate the gateways of points in Indiana, Illinois, Iowa, and South Dakota.

No. MC 83539 (Sub-No. E573), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: H. N. Cunningham, III (same as above). *Machinery*, the transportation of which, because of size or weight, requires the use of special equipment, between points in Colorado, on the one hand, and, on the other, points in Vermont. The purpose of this filing is to eliminate the gateways of points in South Dakota, Iowa, Illinois, Indiana, Philadelphia, and Worcester, Mass.

No. MC 83539 (Sub-No. E575), filed May 31, 1977. Applicant: C & H TRANSPORTATION, P.O. Box 5976, Dallas, Tex. 75222. Applicant's representative: H. N. Cunningham, III (same as above). *Heavy machinery*, the transportation of which, because of size or weight, requires the use of special equipment, between points in Connecticut, on the one hand, and, on the other, points in North Carolina. The purpose of this filing is to eliminate the gateways of points in Virginia and Philadelphia, Pa.

No. MC 106603 (Sub-No. E119), filed May 10, 1974. Applicant: DIRECT TRANSIT LINES, INC., P.O. Box 8099, Grand Rapids, Mich. 49508. Applicant's representative: Martin J. Leavitt, P.O. Box 400, Northville, Mich. 48167. *Such building materials* (except commodities in bulk) and *gypsum products* which are used in the manu-

facture, installation, or application of roofing and building materials, from points in Pennsylvania on and south of a line commencing at the Pennsylvania-Ohio State line and extending east on Interstate Highway 80 to junction U.S. Highway 15, thence south on U.S. Highway 15 to junction Pennsylvania Highway 61, thence southeasterly on Pennsylvania Highway 61 to junction Interstate Highway 78, thence easterly on Interstate Highway 78 to the Pennsylvania-New Jersey State line; and points in Pennsylvania on, north and east of a line commencing at the Pennsylvania-West Virginia State line and extending southeasterly on Pennsylvania Highway 844 to junction U.S. Highway 19 at or near Washington, thence southeasterly on U.S. Highway 19 to the Pennsylvania-West Virginia State line; Maryland on and north of a line commencing at the Maryland-Pennsylvania State line and extending east on U.S. Highway 40 to junction Maryland Highway 2 at or near Baltimore, thence southeasterly on Maryland Highway 2 to junction U.S. Highway 301, thence easterly on U.S. Highway 301 to the Annapolis Queenstown Bridge and including points east of Chesapeake Bay; Delaware; New Jersey on and south of a line commencing at the New Jersey-Pennsylvania State line and extending east on U.S. Highway 22 to junction Interstate Highway 287, thence easterly on Interstate Highway 287 to the Atlantic Ocean at or near Perth Amboy; and West Virginia on and north of a line commencing at the West Virginia-Ohio State line and extending east on West Virginia Highway 27 to the West Virginia-Pennsylvania State line, to points in Kentucky on and west of a line commencing at the Kentucky-Indiana State line and extending southerly along U.S. Highway 431 at Owensboro to junction U.S. Highway 62, thence southwesterly on U.S. Highway 62 to junction U.S. Highway Alternate 41, thence south on U.S. Highway Alternate 41 to the Kentucky-Tennessee State line and points in Tennessee on and west of a line commencing at the Tennessee-Kentucky State line and extending southerly on U.S. Highway Alternate 41 to Tennessee Highway 13, thence south on Tennessee Highway 13 to the Tennessee-Alabama State line. The purpose of this filing is to eliminate the gateways of the plantsite of Certain-teed Products Corp. at Avery, Ohio, and the plantsite of the National Gypsum Co., near Shoals (Martin County), Ind.

No. MC 106603 (Sub-No. E120), filed May 10, 1974. Applicant: DIRECT TRANSIT LINES, INC., P.O. Box 8099, Grand Rapids, Mich. 49508. Applicant's representative: Martin J. Leavitt, P.O. Box 400, Northville, Mich. 48167. Such building materials (except

commodities in bulk) and gypsum products which are used in the manufacture, installation, or application of roofing and building materials, from points in Maryland on and south of a line commencing at the Maryland-Pennsylvania State line and extending east along U.S. Highway 40 to Maryland Highway 2 at or near Baltimore, thence southeasterly on Maryland Highway 2 to junction U.S. Highway 301, thence east on U.S. Highway 301 to the Annapolis Queenstown Bridge, excluding points east of Chesapeake Bay; and points in Maryland on and north of a line and west of Chesapeake Bay commencing at the Annapolis Queenstown Bridge and extending west on U.S. Highway 50 to the Maryland-Virginia State line; Virginia on and north of a line commencing at the Virginia-Maryland State line and extending west on U.S. Highway 50 to the Virginia-West Virginia State line; West Virginia on and south of a line commencing at the West Virginia-Ohio State line and extending east on U.S. Highway 250 to West Virginia Highway 7, thence easterly on West Virginia Highway 7 to the West Virginia-Virginia State line; thence along commencing at the West Virginia-Maryland State line and extending east on U.S. Highway 50 to the West Virginia-Virginia State line; and Pennsylvania on, south and west of a line commencing at the Pennsylvania-West Virginia State line and extending southeasterly on Pennsylvania Highway 844 to junction U.S. Highway 19 at or near Washington, thence southeasterly to the Pennsylvania-West Virginia State line, to points in Kentucky on and west of a line commencing at the Kentucky-Indiana State line and extending southerly on U.S. Highway Alternate 41 to junction Kentucky Highway 293, thence southerly on Kentucky Highway 293 to junction Kentucky Highway 139, thence southerly on Kentucky Highway 139 to junction Kentucky Highway 80, thence southwesterly on Kentucky Highway 80 to junction Kentucky Highway 94, thence southwesterly on Kentucky Highway 94 to junction U.S. Highway 641, thence southerly on U.S. Highway 641 to the Kentucky-Tennessee State line; and Tennessee on and west of a line commencing at the Tennessee-Kentucky State line and extending southerly on U.S. Highway 641 to junction Tennessee Highway 77, thence southerly on Tennessee Highway 77 to junction U.S. Highway 70, thence southwesterly on U.S. Highway 70 to the Tennessee-Arkansas State line. The purpose of this filing is to eliminate the gateways of the plant-

site of Certain-teed Products Corp. at Avery, Ohio, and the plantsite of the National Gypsum Co., near Shoals (Martin County), Ind.

No. MC 106603 (Sub-No. E121), filed May 10, 1974. Applicant: DIRECT TRANSIT LINES, INC., P.O. Box 8099, P.O. Box 8099, Grand Rapids, Mich. 49508. Applicant's representative: Martin J. Leavitt, P.O. Box 400, Northville, Mich. 48167. Materials, equipment, and supplies used in the installation and application of roofing and building materials (except iron and steel, portland cement, and commodities in bulk), from points in New York; Pennsylvania on and north of a line commencing at the Pennsylvania-Ohio State line and extending east on Interstate Highway 80 to junction U.S. Highway 15, thence south on U.S. Highway 15 to junction Pennsylvania Highway 61, thence southeasterly on Pennsylvania Highway 61 to junction Interstate Highway 78, thence easterly on Interstate Highway 78 to the Pennsylvania-New Jersey State line; New Jersey on and north of a line commencing at the New Jersey-Pennsylvania State line and extending east along U.S. Highway 22 to junction Interstate Highway 287, thence easterly on Interstate Highway 287 to the Atlantic Ocean at or near Perth Amboy, to points in Kentucky on and east of a line commencing at the Kentucky-Indiana State line and extending southerly on Interstate Highway 65 to junction Kentucky Highway 61, thence southeasterly on Kentucky Highway 61 to junction U.S. Highway 31E, thence southerly on U.S. Highway 31E to the Kentucky-Tennessee State line; and on and west of a line commencing at the Kentucky-West Virginia State line at or near Ashland and extending southwesterly on U.S. Highway 23 to junction Kentucky Highway 80, thence southwesterly on Kentucky Highway 80 to junction U.S. Highway 421, thence southerly on U.S. Highway 421 to the Kentucky-Virginia State line. The purpose of this filing is to eliminate the gateway of the plantsite of Certain-teed Products Corp. at Avery, Ohio.

No. MC 107012 (Sub-No. E297), filed May 13, 1974. Applicant: NORTH AMERICAN VAN LINES, INC., P.O. Box 988, Fort Wayne, Ind. 46801. Applicant's representative: David D. Bishop and Gary M. Crist (same as above). New commercial and institutional fixtures, uncrated. (1) From points in New Mexico to points in Georgia, Kentucky, North Carolina, South Carolina, Tennessee, and Virginia, (2) from points in Bernalillo, Guadalupe, Los Alamos, Sandoval, San Miguel, Santa Fe, Torrance, and Valencia Counties, N. Mex., to points in Alabama, Florida; Bolivar, Carroll, Coahoma, Grenada, Holmes, Hum-

phreys, Issaquena, Leflore, Montgomery, Quitman, Sharkey, Sunflower, Tallahatchie, Warren, Washington, Yazoo, Alcorn, Benton, Calhoun, Chickasaw, Choctaw, Clay, Desoto, Itawamba, Lafayette, Lee, Lowndes, Marshall, Monroe, Oktibbeha, Panola, Pontotoc, Prentiss, Tate, Tippah, Tishomingo, Tunila, Union, Webster, and Yalobusha Counties, Miss., (3) from points in McKinley, Rio Arriba, and San Juan Counties, N. Mex., to points in Alabama; Arkansas, Cleburne, Conway, Faulkner, Garland, Grant, Hot Springs, Jefferson, Lee, Lonoke, Monroe, Perry, Phillips, Praire, Pulaski, Saline, and White Counties, Ark., points in Florida, Bolivar, Carroll, Coahoma, Grenada, Holmes, Humphreys, Issaquena, Leflore, Montgomery, Quitman, Sharkey, Sunflower, Tallahatchie, Warren, Washington, Forrest, George, Greene, Hancock, Harrison, Jackson, Jones, Lamar, Pearl River, Lake, Orange, Osceola, Pasco, Pinellas, Polk, Seminole, Sumter, Volusia, Columbia, Dixie, Franklin, Gadsen, Gilchrist, Hamilton, Jefferson, Lafayette, Leon, Liberty, Madison, Suwannee, Taylor, and Wakulla Counties, Fla.; Bolivar, Carroll, Coahoma, Grenada, Holmes, Humphreys, Issaquena, Leflore, Montgomery, Quitman, Sharkey, Sunflower, Tallahatchie, Warren, Washington, Yazoo, Alcorn, Benton, Calhoun, Chickasaw, Choctaw, Clay, Desoto, Itawamba, Lafayette, Lee, Lowndes, Marshall, Monroe, Oktibbeha, Panola, Pontotoc, Prentiss, Tate, Tippah, Tishomingo, Tunila, Union, Webster, and Yalobusha Counties, Miss., (4) from points in Chaves, Curry, De Baca, Eddy, Lea, Lincoln, Quay, and Roosevelt Counties, N. Mex., to points in Autauga, Bibb, Blount, Calhoun, Chambers, Cherokee, Chilton, Clay, Cleburne, Coosa, Cullman, Elmore, Etowah, Jefferson, St. Clair, Shelby, Talladega, Tallapoosa, Colbert, Fayette, Franklin, Lamar, Lauderdale, Lawrence, Marion, Pickens, Tuscaloosa, Walker, Winton, De Kalb, Jackson, Limestone, Madison, Marshall, Monroe, Oktibbeha, Panola, Charlotte, De Soto, Glades, Hardee, Hendry, Highlands, Lee, Manatee, Okeechobee, Sarasota, Alachua, Baker, Bradford, Clay, Duval, Flagler, Levy, Marion, Nassau, Putnam, Saint Johns, Union, Broward, Collier, Dade, Martin, Monroe, Palm Beach, Saint Lucie, Brevard, Citrus, Hernando, Hillsborough, Indian River, Lake, Orange, Osceola, Pasco, Pinellas, Polk, Seminole, Sumter, Volusia, Columbia, Dixie, Franklin, Gadsen, Gilchrist, Hamilton, Jefferson, Lafayette, Leon, Liberty, Madison, Suwannee, Taylor, and Wakulla Counties, Fla.; Bolivar, Carroll, Coahoma, Grenada, Holmes, Humphreys, Issaquena, Leflore, Montgomery, Quitman, Sharkey, Sunflower, Tallahatchie, Warren, Washington, Yazoo, Alcorn, Benton, Calhoun, Chickasaw, Choctaw, Clay, Desoto, Itawamba, Lafayette, Lee, Lowndes, Marshall, Monroe, Oktibbeha, Panola, Pontotoc, Prentiss, Tate, Tippah, Tishomingo, Tunila, Union, Webster, and Yalobusha Counties, Miss., (5) from Catron, Dona Ana, Grant, Hidalgo, Luna,

Otero, Sierra, and Socorro Counties, N. Mex.; to points in Autauga, Bibb, Blount, Calhoun, Chambers, Cherokee, Chilton, Clay, Cleburne, Coosa, Cullman, Elmore, Etowah, Jefferson, Lee, Randolph, St. Clair, Shelby, Talladega, Tallapoosa, Barbour, Bullock, Coffee, Covington, Crenshaw, Dale, Geneva, Henry, Houston, Macon, Montgomery, Pike, Russell, Colbert, Fayette, Franklin, Lamar, Lauderdale, Lawrence, Marion, Pickens, Tuscaloosa, Walker, Winston, De Kalb, Jackson, Limestone, Madison, Marshall, and Morgan Counties, Ala.; Charlotte, De Soto, Glades, Hardee, Hendry, Highlands, Lee, Manatee, Okeechobee, Sarasota, Alachua, Baker, Bradford, Clay, Duval, Flagler, Levy, Marion, Nassau, Putnam, Saint Johns, Union, Broward, Collier, Dade, Martin, Monroe, Palm Beach, Saint Lucie, Brevard, Citrus, Hernando, Hillsborough, Indian River, Lake, Orange, Osceola, Pasco, Pinellas, Polk, Seminole, Sumter, Volusia, Columbia, Dixie, Franklin, Gadsen, Gilchrist, Hamilton, Jefferson, Lafayette, Leon, Liberty, Madison, Suwannee, Taylor, and Wakulla Counties, Fla.; Bolivar, Carroll, Coahoma, Grenada, Holmes, Humphreys, Issaquena, Leflore, Montgomery, Quitman, Sharkey, Sunflower, Tallahatchie, Warren, Washington, Yazoo, Alcorn, Benton, Calhoun, Chickasaw, Choctaw, Clay, Desoto, Itawamba, Lafayette, Lee, Lowndes, Marshall, Monroe, Oktibbeha, Panola, Pontotoc, Prentiss, Tate, Tippah, Tishomingo, Tunila, Union, Webster, and Yalobusha Counties, Miss., (6) from points in Colfax, Harding, Mora, Taos, and Union Counties, N. Mex., to points in Alabama, Florida; Bolivar, Carroll, Coahoma, Grenada, Holmes, Humphreys, Issaquena, Leflore, Montgomery, Quitman, Sharkey, Sunflower, Tallahatchie, Warren, Washington, Yazoo, Covington, Forrest, George, Greene, Hancock, Harrison, Jackson, Jones, Lamar, Pearl River, Perry, Stone, Wayne, Alcorn, Benton, Calhoun, Chickasaw, Choctaw, Clay, Desoto, Itawamba, Lafayette, Lee, Lowndes, Marshall, Monroe, Oktibbeha, Panola, Pontotoc, Prentiss, Tate, Tippah, Tishomingo, Tunila, Union, Webster, and Yalobusha Counties, Miss. The purpose of this filing is to eliminate the gateway of Greene County, Ark.

No. MC 107012 (Sub-No. E298), filed May 13, 1974. Applicant: NORTH AMERICAN VAN LINES, INC., P.O. Box 988, Fort Wayne, Ind. 46801. Applicant's representative: David D. Bishop and Gary M. Crist (same as above). New commercial and institutional fixtures, uncrated. (1) from points in Oklahoma to points in Georgia, Kentucky, North Carolina, South Carolina, and Virginia, (2) from points in Alfalfa, Beckham, Blaine, Caddo, Comanche, Cotton, Custer, Dewey,

Ellis, Greer, Harmon, Harper, Jackson, Kigwa, Major, Roger Mills, Tillman, Washita, Woods, and Woodward Counties, Okla., to points in Autauga, Bibb, Blount, Calhoun, Chambers, Cherokee, Chilton, Clay, Cleburne, Coosa, Cullman, Elmore, Etowah, Jefferson, Lee, Randolph, St. Clair, Shelby, Talladega, Tallapoosa, Barbour, Bullock, Coffee, Covington, Crenshaw, Dale, Geneva, Henry, Houston, Macon, Montgomery, Pike, Russell, Colbert, Fayette, Franklin, Lamar, Lauderdale, Lawrence, Marion, Pickens, Tuscaloosa, Walker, Winston, De Kalb, Jackson, Limestone, Madison, Marshall, Morgan Counties, Ala.; Charlotte, De Soto, Glades, Hardee, Hendry, Highlands, Lee, Manatee, Okeechobee, Sarasota, Alachua, Baker, Bradford, Clay, Duval, Flagler, Levy, Marion, Nassau, Putnam, Saint Johns, Union, Broward, Collier, Dade, Martin, Monroe, Palm Beach, Saint Lucie, Brevard, Citrus, Hernando, Hillsborough, Indian River, Lake, Orange, Osceola, Pasco, Pinellas, Polk, Seminole, Sumter, Volusia, Columbia, Dixie, Franklin, Gadsen, Gilchrist, Hamilton, Jefferson, Lafayette, Leon, Liberty, Madison, Suwannee, Taylor, and Wakulla Counties, Fla.; Bolivar, Carroll, Coahoma, Grenada, Holmes, Humphreys, Issaquena, Leflore, Montgomery, Quitman, Sharkey, Sunflower, Tallahatchie, Warren, Washington, Yazoo, Alcorn, Benton, Calhoun, Chickasaw, Choctaw, Clay, Desoto, Itawamba, Lafayette, Lee, Lowndes, Marshall, Monroe, Oktibbeha, Panola, Pontotoc, Prentiss, Tate, Tippah, Tishomingo, Tunila, Union, Webster, and Yalobusha Counties, Miss.; and points in Tennessee, (3) from points in Adair, Cherokee, Craig, Delaware, McIntosh, Mayes, Muskogee, Nowata, Okmulgee, Osage, Ottawa, Rogers, Sequoyah, Tulsa, Wagoner, and Washington Counties, Okla., to points in Alabama, Florida; Ascension, Assumption, East Baton Rouge, East Feliciana, Iberia, Iberville, Jefferson, Lafourche, Livingston, Orleans, Plaquemines, Pointe Coupee, Saint Bernard, Saint Charles, Saint Helena, Saint James, Saint John the Baptist, Saint Martin, Saint Mary, Saint Tammany, Tangipahoa, Terrebonne, Washington, West Baton Rouge, and West Feliciana Parishes, Fla., points in Mississippi, and Tennessee, (4) from points in Veaver, Cimarron, and Texas Counties, Okla., to points in Alabama, Florida; Bolivar, Carroll, Coahoma, Grenada, Holmes, Humphreys, Issaquena, Leflore, Montgomery, Quitman, Sharkey, Sunflower, Tallahatchie, Warren, Washington, Yazoo, Covington, Forrest, George, Greene, Hancock, Harrison, Jackson, Jones, Lamar, Pearl River, Perry, Stone, Wayne, Attala, Clairborne, Clarke, Copiah, Hinds, Jasper, Kemper, Lauderdale, Leake, Madison, Neshoba, Newton, Noxubee,

Rice, Jr. (same as above). *Fertilizer and fertilizer ingredients* (except petroleum products and potash), from points in Georgia to points in Utah. The purpose of this filing is to eliminate the gateways of the plantsite and storage facilities of Occidental Chemical Co. in Hale County, Tex., points in that part of Texas on and west of U.S. Highway 83, and the facilities of Goodpasture, Inc., in Terry and Castro Counties, Tex.

No. MC 107064 (Sub-No. E534), filed January 19, 1976. Applicant: STEERE TANK LINES, INC., P.O. Box 2998, Dallas, Tex. 75221. Applicant's representative: H. L. Rice, Jr. (same as above). *Fertilizer and fertilizer ingredients* (except petroleum products and potash), from points in Maine to points in Arizona. The purpose of this filing is to eliminate the gateways of the plantsite and storage facilities of Occidental Chemical Co. in Hale County, Tex., and points in that part of Texas on and west of U.S. Highway 83, and the facilities of Goodpasture, Inc., in Terry and Castro Counties, Tex.

No. MC 107064 (Sub-No. E535), filed January 19, 1976. Applicant: STEERE TANK LINES, INC., P.O. Box 2998, Dallas, Tex. 75221. Applicant's representative: H. L. Rice, Jr. (same as above). *Fertilizer and fertilizer ingredients* (except petroleum products and potash), from points in Florida to points in Utah. The purpose of this filing is to eliminate the gateways of the plantsite and storage facilities of Occidental Chemical Co. in Hale County, Tex., points in that part of Texas on and west of U.S. Highway 83, and the facilities of Goodpasture, Inc., in Terry and Castro Counties, Tex.

No. MC 107064 (Sub-No. E536), filed January 19, 1976. Applicant: STEERE TANK LINES, INC., P.O. Box 2998, Dallas, Tex. 75221. Applicant's representative: H. L. Rice, Jr. (same as above). *Fertilizer and fertilizer ingredients*

from points in North Carolina to points in Utah. The purpose of this filing is to eliminate the gateways of the plantsite and storage facilities of Occidental Chemical Co. in Hale County, Tex., points in that part of Texas on and west of U.S. Highway 83, and the facilities of Goodpasture, Inc., in Terry and Castro Counties, Tex.

No. MC 107064 (Sub-No. E537), filed January 19, 1976. Applicant: STEERE TANK LINES, INC., P.O. Box 2998, Dallas, Tex. 75221. Applicant's representative: H. L. Rice, Jr. (same as above). *Fertilizer and fertilizer ingredients* (except petroleum products and potash), from points in Massachusetts to points in Arizona. The purpose of this filing is to eliminate the gateways of the plantsite and storage facilities of Occidental Chemical Co. in Hale County, Tex., and points in that part of Texas on and west of U.S. Highway 83, and the facilities of Goodpasture, Inc., in Terry and Castro Counties, Tex.

No. MC 107064 (Sub-No. E538), filed January 19, 1976. Applicant: STEERE TANK LINES, INC., P.O. Box 2998, Dallas, Tex. 75221. Applicant's representative: H. L. Rice, Jr. (same as above). *Fertilizer and fertilizer ingredients* (except petroleum products and potash), from points in North Carolina to points in Arizona. The purpose of this filing is to eliminate the gateways of the plantsite and storage facilities of Occidental Chemical Co. in Hale County, Tex., points in that part of Texas on and west of U.S. Highway 83, and the facilities of Goodpasture, Inc., in Terry and Castro Counties, Tex.

No. MC 107064 (Sub-No. E539), filed January 19, 1976. Applicant: STEERE TANK LINES, INC., P.O. Box 2998, Dallas, Tex. 75221. Applicant's representative: H. L. Rice, Jr. (same as above). *Fertilizer and fertilizer ingredients* (except petroleum products and potash), from points in Florida to points in Montana. The purpose of this filing is to eliminate the gateways of the plantsite and storage facilities of Occidental Chemical Co. in Hale County, Tex., points in that part of Texas on and west of U.S. Highway 83, and the facilities of Goodpasture, Inc., in Terry and Castro Counties, Tex.

No. MC 107064 (Sub-No. E540), filed January 19, 1976. Applicant: STEERE TANK LINES, INC., P.O. Box 2998, Dallas, Tex. 75221. Applicant's representative: H. L. Rice, Jr. (same as above). *Fertilizer and fertilizer ingredients* (except petroleum products and potash), from points in Florida to points in Wyoming. The purpose of this filing is to eliminate the gateways of the plantsite and storage facilities of Occidental Chemical Co. in Hale County, Tex., points in that part of Texas on and west of U.S. Highway 83,

and the facilities of Goodpasture, Inc., in Terry and Castro Counties, Tex.

No. MC 107064 (Sub-No. E541), filed January 19, 1976. Applicant: STEERE TANK LINES, INC., P.O. Box 2998, Dallas, Tex. 75221. Applicant's representative: H. L. Rice, Jr. (same as above). *Fertilizer and fertilizer ingredients* (except petroleum products and potash), from points in Georgia to points in California. The purpose of this filing is to eliminate the gateways of the plantsite and storage facilities of Occidental Chemical Co. in Hale County, Tex., points in that part of Texas on and west of U.S. Highway 83, and the facilities of Goodpasture, Inc., in Terry and Castro Counties, Tex.

No. MC 107064 (Sub-No. E542), filed January 19, 1976. Applicant: STEERE TANK LINES, INC., P.O. Box 2998, Dallas, Tex. 75221. Applicant's representative: H. L. Rice, Jr. (same as above). *Fertilizer and fertilizer ingredients* (except petroleum products and potash), from points in Florida to points in California. The purpose of this filing is to eliminate the gateways of the plantsite and storage facilities of Occidental Chemical Co. in Hale County, Tex., points in that part of Texas on and west of U.S. Highway 83, and the facilities of Goodpasture, Inc., in Terry and Castro Counties, Tex.

No. MC 107064 (Sub-No. E543), filed January 19, 1976. Applicant: STEERE TANK LINES, INC., P.O. Box 2998, Dallas, Tex. 75221. Applicant's representative: H. L. Rice, Jr. (same as above). *Fertilizer and fertilizer ingredients* (except petroleum products and potash), from points in Florida to points in Colorado. The purpose of this filing is to eliminate the gateways of the plantsite and storage facilities of Occidental Chemical Co. in Hale County, Tex., and points in that part of Texas on and west of U.S. Highway 83, and the facilities of Goodpasture, Inc., in Terry and Castro Counties, Tex.

No. MC 107064 (Sub-No. E544), filed December 20, 1975. Applicant: STEERE TANK LINES, INC., P.O. Box 2998, Dallas, Tex. 75221. Applicant's representative: H. L. Rice, Jr. (same as above). *Fertilizer and fertilizer ingredients* (except petroleum products and potash), from points in Cochran, Hockley, Lubbock, Crosby, Dickens, Yoakum, Terry, Lynn, Garza, Kent, Gaines, Dawson, Borden, Seurry, Andrews, Martin, Howard, Mitchell, and Nolan Counties, Tex., and those points on and west of U.S. Highway 83 in King, Stonewall, Fisher, Jones, and Taylor Counties, Tex., to points in Nevada. The purpose of this filing is to eliminate the gateway of the facilities of Goodpasture, Inc., in Terry and Castro Counties, Tex.

No. MC 107064 (Sub-No. E545), filed December 20, 1975. Applicant: STEERE TANK LINES, INC., P.O. Box 2998, Dallas, Tex. 75221. Applicant's representative: H. L. Rice, Jr. (same as above). *Fertilizer and fertilizer ingredients* (except petroleum products and potash), from points in Oregon to points in Parmer, Castro, Swisher, Briscoe, Hall, Barley, Lamb, Hale, Floyd, Motley, Cochran, Hockley, Lubbock, Crosby, Dickens, Yoakum, Terry, Lynn, Garza, and Kent Counties, Tex., and those points on and west of U.S. Highway 83 in Childress, Cattle, King, and Stonewall Counties, Tex. The purpose of this filing is to eliminate the gateway of the plantsite and storage facilities of Occidental Chemical Co. in Hale County, Tex.

No. MC 107064 (Sub-No. 546), filed December 20, 1975. Applicant: STEERE TANK LINES, INC., P.O. Box 2998, Dallas, Tex. 75221. Applicant's representative: H. L. Rice, Jr. (same as above). *Fertilizer and fertilizer ingredients* (except petroleum products and potash), from points in Parmer, Castro, Swisher, Briscoe, Hall, Bailey, Lamb, Hale, Floyd, Motley, Cochran, Hockley, Lubbock, Crosby, Dickens, Yoakum, Terry, Lynn, Garza, and Kent Counties, Tex., and points on and west of U.S. Highway 83 in Childress, Cattle, King, and Stonewall Counties, Tex., to points in Oregon. The purpose of this filing is to eliminate the gateway of the plantsite and storage facilities of Occidental Chemical Co. in Hale County, Tex.

No. MC 107064 (Sub-No. 547), filed December 20, 1975. Applicant: STEERE TANK LINES, INC., P.O. Box 2998, Dallas, Tex. 75221. Applicant's representative: H. L. Rice, Jr. (same as above). *Fertilizer and fertilizer ingredients* (except petroleum products and potash), from points in Parmer, Castro, Swisher, Briscoe, Hall, Bailey, Lamb, Hale, Floyd, Motley, Cochran, Hockley, Lubbock, Crosby, Dickens, Yoakum, Terry, Lynn, Garza, and Kent Counties, Tex., and those points on and west of U.S. Highway 83 in Childress, Cattle, King, and Stonewall Counties, Tex., to points in Oregon. The purpose of this filing is to eliminate the gateway of the plantsite and storage facilities of Occidental Chemical Co. in Hale County, Tex.

No. MC 107515 (Sub-No. E552), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 30050. Applicant's representative: R. M. Tettebaum, Suite 375, 3379 Peachtree Rd. NE., Atlanta, Ga. 30326. (1) *Frozen foods* from the plantsite of (a) Food Specialties of Kentucky, Division of Oscar Ewing, Inc., in Jefferson County, Ky., to Nevada, Oregon, Utah, Idaho, Wyoming, Montana, and Wash-

ington, (b) from Louisville, Ky. to Nevada, Oregon, Utah, Idaho, Wyoming, Montana, and Washington, restricted to traffic originating at the plantsite of Standard Foods, Inc., and (2) *frozen meats, meat products, meat by-products, dairy products and articles* distributed by meat packinghouses, as described in Sections A, B, and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766 (except commodities in bulk and hides), from Louisville, Ky. to Nevada, Oregon, Utah, Idaho, Wyoming, Montana, and Washington, restricted (a) to the transportation of shipments originating at the facilities of Armour & Co., at Louisville, Ky., at the facilities of Wilson Certified Foods, Inc., at Louisville, Ky. The purpose of this filing is to eliminate the gateway of Columbus, Ohio.

No. MC 107515 (Sub-No. E560), filed January 27, 1975. Applicant: REFRIGERATED TRANSPORT CO., INC., P.O. Box 308, Forest Park, Ga. 30050. Applicant's representative: R. M. Tettebaum, Suite 375, 3379 Peachtree Road, NE., Atlanta, Ga. 30326. (1) *Frozen agricultural commodities, frozen packinghouse products, and frozen groceries and canned goods* in vehicles equipped with mechanical refrigeration (a) from Philadelphia, York, and Scranton, Pa., Baltimore, Md., and New York, N.Y., to points in New Mexico, Arizona, California, Nevada, Utah, Colorado, Washington, Oregon, Wyoming, Montana, and Idaho, (b) from Harrisburg, Pa. to points in New Mexico, Arizona, California, Nevada, Oregon, Washington, Idaho; points in Colorado on or west of a line beginning at the Kansas-Colorado state line and extending along U.S. 50 to junction Colo. 71; thence along Colo. 71 to the Colorado-Nebraska State line; points in Wyoming on or west of a line beginning at the Wyoming-Colorado State line and extending along U.S. 287 to junction U.S. 20, thence along U.S. 20 to junction U.S. 310, thence along U.S. 310 to the Wyoming-Montana State line; and to points in that part of Montana on or west of a line beginning at the Wyoming-Montana State line and extending along U.S. 310 to junction U.S. 87, thence over U.S. 87 to junction Montana 19, thence over Montana 19 to junction U.S. 191, thence over U.S. 191 to junction Montana 242, thence over Montana 242 to the U.S.-Canadian Boundary Line near Morgan, Mont., and (2) *meats, meat products, meat by-products and articles* (except in bulk) distributed by meat packinghouses, as described in Section A of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 20, and 766, fresh and frozen, in vehicles equipped with mechanical refrigeration, from Baltimore, Md., New York,

N.Y., Harrisburg, York, Scranton, and Philadelphia, Pa.; to points in Oregon, Washington, and California. The purpose of this filing is to eliminate the gateways of Richmond, Va. and the State of Tennessee.

No. MC 108676 (Sub-No. E18) (Part II Sec. K., (Correction)), filed June 4, 1974, published in the FEDERAL REGISTER, issue of December 8, 1977, and partially republished, as corrected, this issue. Applicant: A. J. METLER HAULING & RIGGING, 117 Chlcamauga Avenue, Knoxville, Tenn. 37917. Applicant's representative: A. J. Metler (same as above). *Coal and coke mining machinery, equipment, and vehicles and mine cars consisting of maintenance machinery and equipment, and parts, accessories, and attachments* therefor (not including contractors' machinery and equipment), *iron or steel conveying, dredging, dumping, or hoisting buckets, dippers, or skips, consisting of construction machinery, tools, and equipment, and parts, accessories, and attachments* therefor (not including contractors' machinery and equipment), *maintenance machinery, tools, and equipment, and parts, accessories, and attachments* therefor (not including contractors' machinery and equipment), *power distribution machinery, tools, and equipment, and parts, accessories, and attachments* therefor (not including contractors' machinery and equipment), and *plant machinery, tools, and equipment, and parts, accessories, and attachments* therefor (not including contractors' machinery and equipment), (K)(1) between points in Tennessee in or north of Weakley, Henry, Benton, Humphreys, Dickson, Williamson, Rutherford, Cannon, Warren, Van Buren, Bledsoe, Rhea, and Meigs Counties, and from the Meigs-Bradley County line to the Tennessee-North Carolina State line, points in Tennessee located north or northeast of a line beginning at the Tennessee-North Carolina State line extending along Tennessee Highway 60 and U.S. Highway 64, on the one hand, and, on the other, points in Georgia (2) between points in Tennessee in or north of Dyer, Gibson, Carroll, Benton, Humphreys, Dickson, Williamson, Rutherford, Cannon, Warren, Van Buren, Bledsoe, Rhea, and Meigs Counties, and from the Meigs-Bradley County line to the Tennessee-North Carolina State line, all points in Tennessee north or northeast of a line extending along Tennessee Highway 60 and U.S. Highway 64, on the one hand, and, on the other, points in Georgia, except those in or west of Polk, Paulding, Douglas, Coweta, Merriwether, Talbott, Marion, Webster, Randolph, Calhoun, Early, Miller, and Seminole Counties; (3) between points in Tennessee in or north of Dyer, Crockett, Madison, Henderson, Decatur, Hum-

phreys, Dickson, Williamson, Rutherford, Cannon, Warren, Van Buren, Bledsoe, Rhea, and Meigs-Bradley County line to the Tennessee-North Carolina State line, points in Tennessee north or northeast of a line extending along Tennessee Highway 60 and U.S. Highway 64, on the one hand, and, on the other, points in Georgia except those in or west of Polk, Paulding, Douglas, Coweta, Merriwether, Talbott, Marion, Webster, Randolph, Calhoun, Baker, and Decatur Counties. The purpose of this partial republication is to correct the territorial description. The remainder of this letter-notice remains as previously published.

No. MC 114019 (Sub-No. E465), filed December 20, 1976. Applicant: MID-WEST EMERY FREIGHT SYSTEM, INC., 7000 South Palaski Road, Chicago, Ill. 60629. Applicant's representative: Arthur J. Sibik (same as above). (1) *Meats, meat products and meat by-products*, and *articles* distributed by meat packinghouses, as described in Sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766, from points in Wisconsin and Iowa to points in New York, Massachusetts, Connecticut, Rhode Island, New Jersey, and points in that part of Pennsylvania on and south of U.S. Highway 22 from the Ohio-Pennsylvania State Line to Nanty-Glo and on and west of U.S. Highway 219 from Nanty-Glo to the Pennsylvania-Maryland State Line. (2) *Meats, meat products and meat by-products*, and *articles* distributed by meat packinghouses, as described in Sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766, except hides and commodities in bulk, (a) from points in Wisconsin and those points in that part of Iowa on, north and west of a line beginning at the Illinois-Iowa State Line and its junction with U.S. Highway 61, thence south along U.S. Highway 61 to its junction with Iowa Highway 78, thence west along Iowa Highway 78 to its junction with Iowa Highway 1, thence south along Iowa Highway 1 to its junction with U.S. Highway 34, thence west along U.S. Highway 34 to its junction with U.S. Highway 63, thence south along U.S. Highway 63 to its junction with Iowa Highway 2, thence west along Iowa Highway 2 to its junction with Iowa Highway 5, thence south along Iowa Highway 5 to the Iowa-Missouri State Line to points in Maine, Vermont, New Hampshire, Delaware and points in that part of Pennsylvania on and north of U.S. Highway 22 from the Ohio-Pennsylvania State Line to Nanty-Glo and on and west of U.S. Highway 219 from Nanty-Glo to the Pennsylvania-Maryland State Line, points in that part of Maryland on and

east of U.S. Highway 15, points in that part of West Virginia on and east of a line beginning at the Ohio-West Virginia State Line and junction West Virginia Highway 18, thence south along West Virginia Highway 18 to its junction with U.S. Highway 33, thence west along U.S. Highway 33 to its junction with West Virginia Highway 5, thence south along West Virginia Highway 5 to its junction with U.S. Highway 19, thence south along U.S. Highway 19 to its junction with U.S. Highway 60, thence south along U.S. Highway 60 to its junction at the West Virginia-Virginia State Line and its junction with U.S. Highway 60 and Virginia Highway 311, thence south along Virginia Highway 311 to its junction with U.S. Highway 220, thence south along U.S. Highway 220 to its junction at the Virginia-North Carolina State Line and the District of Columbia; and (b) from points in Iowa on, south and east of a line beginning at the Illinois-Iowa State Line and its junction with U.S. Highway 61, thence south along U.S. Highway 61 to its junction with Iowa Highway 78, thence west along Iowa Highway 78 to its junction with Iowa Highway 1, thence south along Iowa Highway 1 to its junction with U.S. Highway 34, thence west along U.S. Highway 34 to its junction with U.S. Highway 63, thence south along U.S. Highway 63 to its junction with Iowa Highway 2, thence west along Iowa Highway 2 to its junction with Iowa Highway 5, thence south along Iowa Highway 5 to its junction at the Iowa-Missouri State Line to points in Vermont, New Hampshire, Maine, Pennsylvania, Delaware, Maryland (except those on and west of U.S. Highway 15), points in West Virginia on and east of a line beginning at the Ohio-West Virginia State Line at its junction with West Virginia Highway 18, thence south along West Virginia Highway 18 to its junction with U.S. Highway 50, thence along U.S. Highway 50 to its junction with U.S. Highway 19, thence south along U.S. Highway 19 to its junction with U.S. Highway 33, thence east along U.S. Highway 33 to its junction with U.S. Highway 219, thence south along U.S. Highway 219 to its junction with West Virginia Highway 39, thence east along West Virginia Highway 39 to its junction at the West Virginia-Virginia State Line and points in that part of Virginia on and east of a line beginning at the West Virginia-Virginia State Line and its junction with Virginia Highway 39, thence east along Virginia Highway 39 to its junction with U.S. Highway 60, thence east along U.S. Highway 60 to its junction with U.S. Highway 501, thence south along U.S. Highway 501 to its junction with U.S. Highway 29, thence south along U.S. Highway 29 to its junction at the Virginia-North Carolina State

Line and the District of Columbia. Restricted to the transportation of the commodities described above when moving from, to, or between warehouses and wholesale, retail, or chain outlets of food business houses, or when moving from, to, or between food processing plants, warehouses or other facilities of such plants. The purpose of this application is to eliminate the Chicago, Ill., and Union City, Ohio, gateways.

No. MC 114019 (Sub-No. E466), filed December 20, 1976. Applicant: MID-WEST EMERY FREIGHT SYSTEM, INC., 7000 South Palaski Road, Chicago, Ill. 60629. Applicant's representative: Arthur J. Sibik (same as above). *Such foodstuffs* as is dealt in by wholesale food business houses, (A) Between points in Kenosha, Racine and Milwaukee Counties, Wis., on the one hand, and, on the other, points in that part of Illinois on and south of a line beginning at Lake Michigan and extending west along Illinois Highway 68 to its junction with Illinois Highway 53, thence south along Illinois Highway 53 to its junction with U.S. Highway 30, thence west along U.S. Highway 30 to its junction with U.S. Highway 51, thence south along U.S. Highway 51 to its junction with Illinois Highway 92, thence west along Illinois Highway 92 to the Mississippi River. (B) Between points in Walworth County, Wis., on the one hand, and, on the other, points in that part of Illinois, on and south of a line beginning at Lake Michigan, and extending west along Illinois Highway 68 to its junction with Illinois Highway 53, thence south along Illinois Highway 53 to its junction with U.S. Highway 6, thence west along U.S. Highway 6 to its junction with U.S. Highway 34, thence west along U.S. Highway 34 to the Mississippi River. (C) Between points in Waukesha County, Wis., on the one hand, and, on the other, points in that part of Illinois on and south of a line beginning at Lake Michigan and extending west along Illinois Highway 68 to its junction with Illinois Highway 53, thence south along Illinois Highway 53 to its junction with U.S. Highway 24, thence west along U.S. Highway 24 to the Mississippi River. (F) Between points in Dane, Columbia, Dodge, Fond du Lac, Marquette and Green Lake, Wis., and points in that part of Wisconsin on and west of U.S. Highway 45 beginning at Fond du Lac and extending to the Wisconsin-Michigan State line and on and east of Wisconsin Highway 13 beginning at the Wisconsin Dells and extending to the Wisconsin-Minnesota State Line, and points in and north of Columbia, and Dodge Counties, Wis., on the one hand, and, on the other, points in that part of Illinois on and south of a line beginning at Lake Michigan and extending west along Illinois Highway 68 to its junction with Illinois Highway 53, thence south along Illinois Highway 53 to its junction with U.S. Highway 66, thence south along U.S. Highway 66 to its junction with U.S. Highway 136, thence west along U.S. Highway 136 to its junction with U.S. Highway 24, thence west along U.S. Highway 24 to the Mississippi River. (G) Between points in Illinois on and south of a line beginning at Lake Michigan and extending west along Illinois Highway 68 to its junction with Illinois Highway 53, thence south along Illinois Highway 53 to its junction with U.S. Highway 66, thence south along U.S. Highway 66 to its junction with U.S. Highway 36, thence west along U.S. Highway 36 to the Mississippi River. (H) Between points in that part of Wisconsin on and west of Wisconsin Highway 13 be-

ginning at Wisconsin Dells and extending to the Wisconsin-Michigan State line and on and north of U.S. Highway 16 beginning at Wisconsin Dells and extending to the Mississippi River on the one hand, and, on the other, points in that part of Illinois on and south of a line beginning at Lake Michigan and extending west along Illinois Highway 68 to its junction with Illinois Highway 53, thence south along Illinois Highway 53 to its junction with U.S. Highway 66, thence south along U.S. Highway 66 to its junction with Illinois Highway 48, thence south along Illinois Highway 48 to its junction with U.S. Highway 36, thence west along U.S. Highway 36 to the Mississippi River. (E) Between points in Jefferson County, Wis., and points in that part of Wisconsin on, north and east of a line beginning at Lake Michigan, and extending west along Wisconsin Highway 190 to its junction with U.S. Highway 16, thence west along U.S. Highway 16 to its junction with Wisconsin Highway 19, thence west along Wisconsin Highway 19 to its junction with Wisconsin Highway 73, thence north along Wisconsin Highway 73 to its junction with Wisconsin Highway 49, thence north along Wisconsin Highway 49 to junction Wisconsin Highway 29, thence west along Wisconsin Highway 29 to junction U.S. Highway 51, thence north along U.S. Highway 51 to the Michigan-Wisconsin State line on the one hand, and, on the other, points in that part of Illinois on and south of a line beginning at Lake Michigan and extending west along Illinois Highway 68 to its junction with Illinois Highway 53, thence south along Illinois Highway 53 to its junction with U.S. Highway 66, thence south along U.S. Highway 66 to its junction with U.S. Highway 136, thence west along U.S. Highway 136 to its junction with U.S. Highway 24, thence west along U.S. Highway 24 to the Mississippi River. (F) Between points in Dane, Columbia, Dodge, Fond du Lac, Marquette and Green Lake, Wis., and points in that part of Wisconsin on and west of U.S. Highway 45 beginning at Fond du Lac and extending to the Wisconsin-Michigan State line and on and east of Wisconsin Highway 13 beginning at the Wisconsin Dells and extending to the Wisconsin-Minnesota State Line, and points in and north of Columbia, and Dodge Counties, Wis., on the one hand, and, on the other, points in that part of Illinois on and south of a line beginning at Lake Michigan and extending west along Illinois Highway 68 to its junction with Illinois Highway 53, thence south along Illinois Highway 53 to its junction with U.S. Highway 66, thence south along U.S. Highway 66 to its junction with U.S. Highway 136, thence west along U.S. Highway 136 to its junction with U.S. Highway 24, thence west along U.S. Highway 24 to the Mississippi River. (G) Between points in Illinois on and south of a line beginning at Lake Michigan and extending west along Illinois Highway 68 to its junction with Illinois Highway 53, thence south along Illinois Highway 53 to its junction with U.S. Highway 66, thence south along U.S. Highway 66 to its junction with U.S. Highway 36, thence west along U.S. Highway 36 to the Mississippi River. (H) Between points in that part of Wisconsin on and west of Wisconsin Highway 13 be-

ginning at Wisconsin Dells and extending to the Wisconsin-Michigan State line and on and north of U.S. Highway 16 beginning at Wisconsin Dells and extending to the Mississippi River on the one hand, and, on the other, points in that part of Illinois on and south of a line beginning at Lake Michigan and extending west along Illinois Highway 68 to its junction with Illinois Highway 53, thence south along Illinois Highway 53 to its junction with U.S. Highway 66, thence south along U.S. Highway 66 to its junction with U.S. Highway 36, thence west along U.S. Highway 36 to the Mississippi River. (H) Between points in that part of Wisconsin on and north and east of a line beginning at Lake Michigan and extending west along Wisconsin Highway 33 to its junction with Wisconsin Highway 26, thence north along Wisconsin Highway 26 to its junction with U.S. Highway 45, thence north along U.S. Highway 45 to the Wisconsin-Michigan State line on the one hand, and, on the other, points in that part of Illinois on, and south of a line beginning at Lake Michigan and extending west along Illinois Highway 68 to its junction with Illinois Highway 53, thence south along Illinois Highway 53 to its junction with U.S. Highway 6, thence west along U.S. Highway 6 to its junction with U.S. Highway 34, thence west along U.S. Highway 34 to the Mississippi River. (I) Between points in that part of Wisconsin beginning at the Illinois-Wisconsin State Line and extending north along Wisconsin Highway 69 to its junction with U.S. Highway 12, thence north along U.S. Highway 12 to its junction with U.S. Highway 16, thence west along U.S. Highway 16 to the Mississippi River, thence south along the Mississippi River to the Illinois-Wisconsin State Line, thence east along the Illinois-Wisconsin State line to point of beginning on the one hand, and, on the other, points in that part of Illinois on and south of a line beginning at Lake Michigan and extending west along Illinois Highway 68 to its junction with Illinois Highway 53, thence south along Illinois Highway 53 to its junction with U.S. Highway 66, thence south along U.S. Highway 66 to the Mississippi River. The purpose of this application is to eliminate the Chicago and Lansing, Ill., gateways.

No. MC 114019 (Sub-No. E467), filed December 20, 1976. Applicant: MID-WEST EMERY FREIGHT SYSTEM, INC., 7000 South Palaski Road, Chicago, Ill. 60629. Applicant's representative: Arthur J. Sibik (Same as above). *Metal pans, tee bars, and accessories, insulating materials, board (building, fibre, straw, pulp, and mineral, straight or combined), perlite products and diatomaceous earth and asbestos combined*, from Chicago, Ill., to points

[Notice No. 13TA]
MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS
FEBRUARY 2, 1978.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an ap-

plication may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 720 (Sub-No. 44TA), filed January 26, 1978. Applicant: BIRD TRUCKING CO., INC., P.O. Box 227, Waupun, Wis. 53968. Applicant's representative: Anthony C. Vance, 1300 Old Chain Bridge Road, McLean, Va. 22101. Authority sought to transport, in interstate or foreign commerce, as a common carrier by motor vehicle, over irregular routes, such commodities as are dealt in by wholesale, retail, chain grocery, food business houses, and drug stores (except commodities in bulk) between Bedford Park, Ill., on the one hand, and, on the other, points in Brown, Calumet, Columbia, Dane, Dodge, Door, Fond du Lac, Green, Green Lake, Jefferson, Kewaunee, Manitowoc, Marquette, Outagamie, Ozaukee, Rock, Sauk, Sheboygan, Walworth, Washington, Waushara, Waupaca, Waushara, and Winnebago Counties, Wis., points in Kenosha County, Wis., on and west of U.S. Highway 45, and points in Racine County, Wis., on and west of U.S. Highway 45 (except Milwaukee, Wis., and points within its commercial zone), restricted to the transportation of shipments originating at or destined to the facilities of Bristol-Myers Co. at Bedford Park, Ill., for 180 days. Supporting shipper: Bristol-Myers Co., 345 Park Avenue, New York, N.Y. 10022 (Blaine Ross). Send protests to: Mrs.

Gail Daugherty, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, U.S. Federal Building and Courthouse, 517 East Wisconsin Avenue, room 619, Milwaukee, Wis. 53202.

No. MC 2368 (Sub-No. 74TA), filed January 27, 1978. Applicant: BRALLEY-WILLETT TANK LINES, INC., 2212 Deepwater Terminal Road, Richmond, Va. 23204. Applicant's representative: William T. Marshburn, P.O. Box 495, Richmond, Va. 23204. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Fertilizer in bulk, in dump vehicles, from Richmond, Va., and its commercial zone to points in North Carolina, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: J. Calvin Halley, Corporate Secretary, Richmond Guano Co., P.O. Box 544, Richmond, Va. 23204. Send protests to: District Supervisor, Paul D. Collins, Bureau of Operations, Interstate Commerce Commission, room 10-502 Federal Building, 400 North 8th Street, Richmond, Va. 23240.

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

FEBRUARY 3, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the

provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information. Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined of the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 2850 (Sub-No. 165TA), filed January 3, 1978. Applicant: NATIONAL FREIGHT, INC., 57 West Park Avenue, Vineland, N.J. 08360. Applicant's representative: Albert Bowman, 71 West Park Avenue, Vineland, N.J. 08360. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, from Bettendorf, Iowa, to points in the States of Illinois, Indiana, Kentucky, Michigan, Ohio, and points in that part of Pennsylvania on and west of a line beginning at the Pennsylvania-Maryland State line (near Hancock, Md.), thence along U.S. Highway 522 to junction U.S. Highway 322 (near Lewistown, Pa.), thence along U.S. Highway 322 to junction Pennsylvania Highway 144 (at Potters Mills), thence along Pennsylvania Highway 144 to U.S. Highway 6, thence along U.S. Highway 6 to Pennsylvania Highway 449, thence along Pennsylvania Highway 449 to the Pennsylvania-New York State line (near Genesee, Pa.), for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shippers: General Foods Corp., 250 North Street, White Plains, N.Y. 10624. Send protests to: District Supervisor, Inter-

state Commerce Commission, 428 East State Street, Room 204, Trenton, N.J. 08608

No. MC 51146 (Sub-No. 568TA), filed January 18, 1978. Applicant: SCHNEIDER TRANSPORT, INC., P.O. Box 2298, 2661 South Broadway, Green Bay, Wis. 54306. Applicant's representative: Wayne Downing (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Containers and container ends, and materials and supplies* used in the manufacture and distribution of containers and container ends (except commodities in bulk), between the warehouses and the facilities of or utilized by Jos. Schlitz Brewing Co. located at or near Milwaukee and Oak Creek, Wis.; Memphis, Tenn.; Longview, Tex.; Tampa, Fla.; Syracuse, N.Y.; Winston-Salem, N.C.; Chatsworth and Van Nuys, Calif.; and Fairport, N.Y., for 180 days. Supporting shipper(s): Jos. Schlitz Brewing Co., 235 West Galena Street, Milwaukee, Wis. 53212 (Joseph R. Erwin). Send protests to: Gail Daugherty, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, U.S. Federal Building and Courthouse, 517 East Wisconsin Avenue, Room 619, Milwaukee, Wis. 53202.

No. MC 55896 (Sub-No. 61TA), filed January 5, 1978. Applicant: R-W SERVICE SYSTEM, INC., 20225 Goddard Road, Taylor, Mich. 48180. Applicant's representative: Martin J. Leavitt, 22375 Haggerty Road, P.O. Box 400, Northville, Mich. 48167. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Mufflers, brackets and parts therefor*, from the facilities of International Stamping Co. in Hartford, Wis., to Toledo and Perrysburg, Ohio, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shippers: International Stamping Co., a division of Midas International Corp., 339 Grant Street, Hartford, Wis. 53027. Gilbert Green, Traffic Manager. Send protests to: Erma W. Gray, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 604 Federal Building, and U.S. Courthouse, 231 West Lafayette Boulevard, Detroit, Mich. 48226.

No. MC 88203 (Sub-No. 9TA), filed January 6, 1978. Applicant: OTIS WRIGHT & SONS, INC., 1127 East Albert, Box 277, Lima, Ohio 45802. Applicant's representative: Earl N. Merwin, 86 East Gay Street, Columbus, Ohio 43215. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Soaps, textile softeners, and cleaning, scouring and washing compounds*, between points in Allen

County, Ohio, on the one hand, and, on the other, points in Connecticut, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Virginia, under a continuing contract, or contracts, with the Procter & Gamble Distributing Co., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): The Procter & Gamble Distributing Co., P.O. Box 599, Cincinnati, Ohio 45201. Send protests to: Keith D. Warner, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 313 Federal Office Building, 234 Summit Street, Toledo, Ohio 43604.

No. MC 107403 (Sub-No. 1056TA), filed January 3, 1978. Applicant: MATELACK, INC., 10 West Baltimore Avenue, Lansdowne, Pa. 19056. Applicant's representative: Martin C. Hynes, Jr. (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Dry fertilizers*, in bulk, from the plantsite of Agric Chemical Co., at Melbourne, Ky., to points in Illinois, Indiana, Kentucky, Michigan, Ohio, Virginia, and West Virginia, restricted to the transportation of traffic originating at the above-mentioned plantsite, for 180 days. Supporting shipper(s): Agric Chemical Co., P.O. Box 3166, Tulsa, Okla. 74101. Send protests to: T. M. Esposito, Transportation Specialist, 600 Arch Street, Room 3238, Philadelphia, Pa. 19106.

No. MC 109692 (Sub-No. 53TA), filed January 20, 1978. Applicant: GRAIN BELT TRANSPORTATION CO., 340 North James Street, Kansas City, Mo. 66118. Applicant's representative: Warren H. Sapp, 4420 Madison, Suite 230, Kansas City, Mo. 64111. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Animal feeds and feed ingredients* (except in bulk), from the plantsite and storage facilities of Harvest Brands, a Division of Harvest Industries, Inc., located at or near Pittsburg, Kans., to points in Arkansas, Illinois, Indiana, Iowa, Kentucky, Michigan, Minnesota, Missouri, Nebraska, New Mexico, Ohio, Oklahoma, South Dakota, Texas, Wisconsin, and that part of Tennessee located on and west of U.S. Highway 231, for 180 days. Supporting shipper(s): Harvest Brands, a Division of Harvest Industries, Inc., P.O. Box 46, Pittsburg, Kans. 66762. Send protests to: Vernon V. Coble District Supervisor, Interstate Commerce Commission, 600 Federal Building, 911 Walnut St., Kansas City, Mo. 64106.

No. MC 113666 (Sub-No. 121TA), filed January 6, 1978. Applicant: FREEPORT TRANSPORT, INC., 1200 Butler Road, Freeport, Pa. 16229.

Applicant's representative: Daniel R. Smetanick (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Lumber*, from ports of entry between the United States and Canada located in Buffalo and Niagara Falls, N.Y., to points in Delaware, Maryland, New Jersey, New York, Ohio, Pennsylvania, Virginia, West Virginia, and the District of Columbia, restricted to shipments originating at the plantsite or storage facilities of Snavely Forest Products, Inc., located in Ontario, Canada, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Snavely Forest Products, Inc., P.O. Box 9808, Pittsburgh, Pa. 15227. Send protests to: John J. England District Supervisor, Interstate Commerce Commission, 2111 Federal Building, 1000 Liberty Avenue, Pittsburgh, Pa. 15222.

No. MC 114211 (Sub-No. 338TA), filed January 10, 1978. Applicant: WARREN TRANSPORT, INC., P.O. Box 420, 324 Manhard Street, Waterloo, Iowa. 50704. Applicant's representative: Daniel Sullivan, Suite 1600, 10 South La Salle, Chicago, Ill. 60604. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Lumber, lumber mill products, forest and wood products*, from the International boundary line between the United States and Canada, located at Noyes, Minn., to points in North Dakota, South Dakota, Nebraska, Kansas, Missouri, Iowa, Minnesota, Wisconsin, Illinois, Indiana, Michigan and Ohio, restricted to movements, from the facilities utilized by Manitoba Forestry Resources, Ltd., located in the provinces of Canada, for 180 days. [Notice No. 16TA]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

FEBRUARY 7, 1978.

The following are notices of filing of applications for temporary authority under section 210(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information. Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment re-

sulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Filed Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 52917 (Sub-No. 65TA) (correction), filed December 8, 1977, published in the FEDERAL REGISTER issue of January 20, 1978, and republished as corrected this issue. Applicant: CHESAPEAKE MOTOR LINES, INC., 6748 Dorsey Road, Baltimore, Md. 21740. Applicant's representative: Charles E. Creager, Esq., 1329 Pennsylvania, P.O. Box 1417, Hagerstown, Md. 21740. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foods and foodstuffs* (except bananas), in vehicles equipped with temperature control, between points in Frederick, Anne Arundel, Howard, Prince Georges, Washington, and Baltimore Counties, Md.; Delaware; New Jersey; Baltimore, Md.; Washington, D.C.; New York, N.Y.; Nassau, Suffolk, and Westchester Counties, N.Y.; points in Virginia or and east of Interstate Highway 95; and points in Stafford, Prince William, and Fairfax Counties, Va. west of Interstate Highway 95; and points in Pennsylvania east of the Susquehanna River, restricted against the transportation of canned goods from Cheriton and Hopeton, Va. to points in New York, New Jersey, and Pennsylvania, and further restricted against the transportation of frozen foods from points in New Jersey and Pennsylvania (except Philadelphia) to points in New York, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shippers: There are approximately (16) statements of support attached to this application which may be examined at the field office named below. Send protests to: William L. Hughes, District Supervisor, Interstate Commerce Commission, 814-B Federal Building, Baltimore, Md. 21201. The purpose of this republication is to add a State that was inadvertently omitted.

No. MC 106674 (Sub-No. 279TA), filed January 18, 1978. Applicant: SCHILLI MOTOR LINES, INC., P.O. Box 123, Remington, Ind. 47977. Applicant's representative: Linda J. Sundy, (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Building materials and materials, equipment and supplies* used in the manufacture and installation of building materials (except commodities in bulk), from Franklin,

Ohio (Warren County), to Rock Hill, Mo. (St. Louis County), for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Bird & Son, Inc., Washington Street, East Walpole, Mass. 02032. Send protests to: J. H. Gray, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 343 West Wayne Street, Suite 113, Fort Wayne, Ind. 46802.

No. MC 111302 (Sub-No. 115TA), filed January 18, 1978. Applicant: HIGHWAY TRANSPORT, INC., P.O. Box 10470-1500 Amherst Road, Knoxville, Tenn. 37921. Applicant's representative: David A. Petersen (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Vegetable oil*, in bulk, in tank vehicles, from the plant-site of Cargill, Inc., in Gainesville, Ga., to points in Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia, for 180 days. Supporting shipper: Cargill, Inc., P.O. Box 1298, Gainesville, Ga. 30501. Send protests to: Joe J. Tate, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Suite A-422, U.S. Courthouse, 801 Broadway, Nashville, Tenn. 37203.

No. MC 111401 (Sub-No. 510TA), filed January 20, 1978. Applicant: GROENDYKE TRANSPORT, INC., 2510 Rock Island Boulevard, P.O. Box 632, Enid, Okla. 73701. Applicant's representative: Victor R. Comstock (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lubricating oil*, in bulk, in tank vehicles, from St. Louis, Mo., to Arkansas, Colorado, Iowa, Kansas, Louisiana, Nebraska, Minnesota, Mississippi, Oklahoma, Tennessee, and Texas, for 180 days. Supporting shipper: Ashland Petroleum Co., division of Ashland Oil, Inc., P.O. Box 391, Ashland, Ky. 41101. Send protests to: Connie Stanley, Transportation Assistant, Room 240 Old Post Office and Courthouse Building, 215 Northwest 3d, Oklahoma City, Okla. 73102.

No. MC 113828 (Sub-No. 250TA), filed January 16, 1978. Applicant: O'BOYLE TANK LINES, INC., P.O. Box 30006, Washington, D.C. 20014. Applicant's representative: Michael A. Grimm (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Bulk and package calcium aluminate cement*, from Norfolk, Va., to Colorado, New Mexico, North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, Texas, Louisiana, Arkansas, Missouri, Iowa, Minnesota, Wisconsin, Michigan,

Illinois, Mississippi, Vermont, Maine, New Hampshire, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Lone Star LaFarge, Inc., 18 Koger Executive Center, Suite 18 Norfolk, Va. 23502. Send protests to: Interstate Commerce Commission, 12th and Constitution Avenue NW., Room 1413, District Supervisor, W. C. Hersman, Washington, D.C. 20423.

No. MC 115654 (Sub-No. 73TA), filed January 11, 1978. Applicant: TENNESSEE CARTAGE CO., INC., P.O. Box 23193, Nashville, Tenn. 37202. Applicant's representative: Henry E. Seaton, 915 Pennsylvania Building, 13th and Pennsylvania Avenue, NW., Washington, D.C. 20004. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Printed matter*, from the facilities of Baird-Ward Printing Co. at Nashville, Tenn., to Effingham, Mattoon, Chicago, and Forest Park, Ill.; Indianapolis, Ind.; Cincinnati, Columbus, Cleveland, and Lima, Ohio; and Detroit, Mich., and their respective commercial zones, for 180 days. Supporting shipper: Baird-Ward Printing Co., P.O. Box 539, Nashville, Tenn. 37202. Send protests to: Joe J. Tate, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Suite A-422, U.S. Court House, 801 Broadway, Nashville, Tenn. 37203.

No. MC 119903 (Sub-No. 12TA), filed January 18, 1978. Applicant: D. J. WALRAVEN, P.O. Box 1045, 501 S. Broad Street, Rome, Ga. 30161. Applicant's representative: Archie B. Culbreth, Suite 202, 2200 Century Parkway, Atlanta, Ga. 30345. Authority sought to operate as a *tract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Aluminum extrusions, aluminum doors, and aluminum windows*, (2) *scrap aluminum* and (3) *paint and chemicals* used in the manufacture of the commodities in (1) above (except in bulk), on shipper owned trailers, between the plantsite of V. E. Anderson Mfg. Co., at Rome, Ga. on the one hand and, on the other, points in Indiana; and between the plantsite of V. E. Anderson Mfg. Co., at Warsaw, Ind. on the one hand and, on the other, points in Alabama, Florida, Georgia, Kentucky, Louisiana, Minnesota, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: V. E. Anderson Mfg. Co., P.O. Box 121, Rome, Ga. 30161. Send protests to: Sara K. Davis, Transportation Assistant, Bureau of Operations, Interstate Commerce Commission, 1252 W. Peachtree St., NW., rm. 300, Atlanta, Ga. 30309.

No. MC 124078 (Sub-No. 777TA), filed January 18, 1978. Applicant: SCHWERMANN TRUCKING CO., 611 South 28 Street, Milwaukee, Wis. 53246. Applicant's representative: Richard H. Prevette (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Magnetite*, in bulk, in tank vehicles, from Bristol, Tenn. and the facilities of Reiss Viking Corp. at or near Monongah, W. Va., to points in Ill., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Reiss Viking Corp., P.O. Box 688, Sheboygan, Wis. 53081. (Peter A. DeWitt.) Send protests to: Gail Daugherty, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, U.S. Federal Bldg. and Courthouse, 517 East Wisconsin Avenue, Room 619, Milwaukee, Wis. 53202.

No. MC 124554 (Sub-No. 18TA), filed January 17, 1978. Applicant: LANG CARTAGE CORP., 338 South 17th Street, P.O. Box 2055, Milwaukee, Wis. 53201. Applicant's representative: Richard C. Alexander, 710 N. Plankinton Avenue, Milwaukee, Wis. 53203. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Such merchandise as is dealt in by a retail mail-order house* (except furniture), from LaCrosse and Milwaukee, Wis. to points in Wisconsin, the Upper Peninsula of Michigan, and in Dakota, Dodge, Fillmore, Freeborn, Goodhue, Houston, Mower, Olmstead, Steele, Wabasha, Waseca, and Winona Counties, Minn., under a continuing contract or contracts with Alden's, Inc., for 180 days. [Notice No. 11TA]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

FEBRUARY 1, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount the type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 1824 (Sub-No. 80TA), filed January 3, 1978. Applicant: PRESTON TRUCKING CO., INC., 151 Easton Boulevard, Preston, Md., 21655. Applicant's representative: Frank V. Klein (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Meat products, and meat by-products, dairy products, and commodities or articles distributed by meat packinghouses*, (except hides and commodities in bulk, in tank vehicles), as described in Sections A, B, and C of Appendix to the report in Descriptions in Motor Carrier Certificates, 81 M.C.C. 209 and 766, from Smithfield, Va., to points in the States of Connecticut, Maryland, Massachusetts, New Jersey, New York, Rhode Island, Pennsylvania, and District of Columbia, for 180 days. Supporting

shipper(s): Trevor H. Tucker, director of distribution, Swift Processed Meats Co., A division of Swift & Co., 115 W. Jackson Boulevard, Chicago, Ill. 60604 and William H. Dodson, Jr., manager of distribution, ITT Gwaltney, Inc., P.O. Box 489, Smithfield, Va. 23430. Send Protests to: William H. Hughes, District Supervisor, Interstate Commerce Commission, 814-B Federal Building, Baltimore, Md. 21201.

No. MC 2900 (Sub-No. 321TA), filed January 3, 1978. Applicant: RYDER TRUCK LINES, INC., 2050 Kings Road, P.O. Box 2408R, Jacksonville, Fla. 32209. Applicant's representative: John Carter, 2050 Kings Road, P.O. Box 2408R, Jacksonville, Fla. 32203. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Lumber, lumber mill products, particleboard, wooden fencing, and wood products*, from Post Falls, Coeur d'Alene, St. Maries, Santa, Potlatch, Lewiston, Spalding, Kamlah, and Jaype, Ind. to Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio, Pennsylvania, West Virginia, and Wisconsin, restricted to the transportation of shipments originating at Potlatch Corp. millsites at the named origins and destined to points in the named destination states, for 180 days. Supporting shipper(s): Potlatch Corp., Box 1016, Lewiston, Ind. 83501. Send protests to: G. H. Fauss, Jr., District Supervisor, Bureau of Operations, Interstate Commerce Commission, Box 35008, 400 West Bay Street, Jacksonville, Fla. 32202.

No. MC 30618 (Sub-No. 11TA), filed January 3, 1978. Applicant: HENRY V. RABOUIN, P.O. Box 204, Old Richmond Road, Pittsfield, Mass. 01201. Applicant's representative: Harris N. Aaronson, 57 Wendell Avenue, Pittsfield, Mass. 01201. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Talc tailings*, in bulk, from each of the following points: West Windsor, Ludlow and Gassetts, all in Vermont, to any and all points within the following described areas: the entire state of New Jersey; S. E. Pennsylvania in the area south of Interstate Route 76 and East of Route 15; southern New York south of Interstate Route 84; and in Western Connecticut west of Interstate Route 91, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Windsor Minerals, Inc., P.O. Box 680, Windsor, Vt. 05089. Send protests to: J. D. Perry, Jr., Acting District Supervisor, Interstate Commerce Commission, 436 Dwight Street, Room 338, Springfield, Mass. 01103.

No. MC 52729 (Sub-No. 25TA), filed January 6, 1978. Applicant: FIOROT

TRUCKING, INC., West Main Street, P.O. Box 43, Pen Argyl, Pa. 18072. Applicant's representative: Dominic J. Ferraro, 124 S. Main Street, Nazareth, Pa. 18064. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Agricultural fertilizers*, for Lebanon Chemical Corp., from Baltimore, Md., and Wilmington, Del., to points in the States of Pennsylvania, New Jersey, and New York, for Lebanon Chemical Corp., from Allentown, Pa., to points in the States of Maryland, New Jersey, and New York, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Lebanon Chemical Corp., 19th & Lawrence Streets, P.O. Box 1378, Allentown, Pa. 18105. Send protests to: T. M. Esposito, Transportation Assistant, 600 Arch Street, Room 3238, Philadelphia, Pa. 19106.

No. MC 52917 (Sub-No. 65TA), (Correction), filed December 8, 1977, published in the FEDERAL REGISTER issue of January 20, 1978, and republished as corrected this issue. Applicant: CHESAPEAKE MOTOR LINES, INC., 6748 Dorsey Road, Baltimore, Md. 21227. Applicant's representative: Charles E. Creager, 1329 Pennsylvania, P.O. Box 1417, Hagerstown, Md. 21740. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *Foods and foodstuffs* (except bananas), in vehicles equipped with temperature control, between points in Frederick, Anne Arundel, Howard, Prince George's, Washington, and Baltimore Counties, Md.; Delaware; New Jersey; Baltimore, Md.; Washington, D.C.; New York, N.Y.; Nassau, Suffolk, and Westchester Counties, N.Y.; points in Virginia on and east of U.S. Interstate Route 95; points in Stafford, Prince William and Fairfax Counties, Va. west of U.S. Interstate Route 95; and points in Pennsylvania east of the Susquehanna River, restricted against the transportation of canned goods, from Cheriton and Hopeton, Va., to points in New York, New Jersey, and Pennsylvania, and further restricted against the transportation of frozen foods, from points in New Jersey and Pennsylvania (except Philadelphia), to points in New York, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): There are approximately (16) statements of support attached to this application which may be examined at the field office named below. Send protests to: William L. Hughes, District Supervisor, Interstate Commerce Commission, 814-B Federal Building, Baltimore, Md. 21201. The purpose of this republication is to complete the territorial description in this proceeding.

No. MC 99388 (Sub-No. 12TA), filed December 30, 1977. Applicant: ALL-TRANS EXPRESS U.S.A., INC., 925 Westchester Avenue, Suite 105, White Plains, N.Y. 10604. Applicant's representative: S. S. Eisen, 370 Lexington Avenue, New York, N.Y. 10017. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: *General Commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, frozen foods, and commodities in bulk), which are at the time moving on bills of lading of Freight Forwarders operating pursuant to Part IV of the Interstate Commerce Act, (A) between Baltimore, Md.; Boston, Mass.; New Haven, Conn.; New York, N.Y.; and (B) between Baltimore, Md.; Boston, Mass.; Chicago, Ill.; Milwaukee, Wis.; New Haven, Conn.; New York, N.Y.; Philadelphia, Pa.; St. Louis, Mo., and Chicago, Ill.; Milwaukee, Wis.; St. Louis, Mo.; and Los Angeles, Calif.; Oakland, Calif.; Phoenix, Ariz.; Portland, Oreg.; Salt Lake City, Utah; San Francisco, Calif.; and Seattle, Wash.; for 180 days. Supporting shipper(s): There are approximately (5) statements of support attached to the application which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: Maria B. Kejss Transportation Assistant, Interstate Commerce Commission, 26 Federal Plaza, New York, N.Y. 10007.

NOTE.—Application also includes authority to serve all points in terminal areas of points shown in A and B.

No. MC 102560 (Sub-No. 13TA), filed December 29, 1977. Applicant: FREILER TRUCK LINES, INC., P.O. Box 636, Amite, La. 70422. Applicant's representative: Harold R. Ainsworth, 2307 American Bank Building, New Orleans, La. 70130. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: (1) *Lumber, particleboard and wood paneling*, from plantsites or facilities of Georgia Pacific Corp. located in Arkansas and Louisiana, to points in Arkansas, Louisiana, Texas, Oklahoma, Kansas, New Mexico, Colorado, and those points in Missouri located on and south of Interstate 70, and (2) *Materials, equipment, and supplies* used in the manufacture of the commodities in No. 1, from points in the destination states in No. 1 to the plantsites or facilities of Georgia Pacific Corp., for 180 days. [Notice No. 12TA]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

FEBRUARY 2, 1978.

The following are notices of filing of applications for temporary authority under section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 19778 (Sub-No. 101TA), filed December 28, 1977. Applicant: MILWAUKEE MOTOR TRANSPORTATION CO., 516 W. Jackson Blvd., Suite 508, Chicago, Ill. 60606. Applicant's representative: W. E. Gallagher (same as above). [I.C.C. Order No. 49 under revised Service Order No. 1252]

REROUTING TRAFFIC

To all railroads: In the opinion of Joel E. Burns, Agent, the Chicago and North Western Transportation Co. is unable to transport traffic currently over its line between Trimont, Minn., and Estherville, Iowa, because of heavy snow.

It is ordered, That: (a) *Rerouting traffic*. The Chicago and North Western Transportation Co. being unable to transport traffic currently over its line between Trimont, Minn., and Estherville, Iowa, because of heavy snow, that line is authorized to divert or reroute such traffic via any available route to expedite the movement. Traffic necessarily diverted by authority of this order shall be rerouted so as to preserve as nearly as possible the participation and revenues of other carriers provided in the original routing.

(b) *Concurrence of receiving roads to be obtained*. The railroad rerouting cars in accordance with this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) *Notification to shippers*. Each carrier rerouting cars in accordance with this order, shall notify each shipper at the time each shipment is rer-

outed or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic. Divisions shall be during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) Effective date: This order shall become effective at 10:30 a.m., January 31, 1978.

(g) Expiration date: This order shall expire at 11:59 p.m., February 10, 1978, unless otherwise modified, changed, or suspended.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., January 31, 1978.

[Amendment No. 1 to I.C.C. Order No. 47 under revised Service Order No. 1252]

REROUTING TRAFFIC

To all railroads: Upon further consideration of I.C.C. Order No. 47 (Chicago, Milwaukee, St. Paul and Pacific Railroad Co.) and good cause appearing therefor:

It is ordered, That: I.C.C. Order No. 47 is amended by substituting the following paragraph (g) for paragraph (g) thereof:

(g) Expiration date: This order shall expire at 11:59 p.m., February 10, 1978, unless otherwise modified, changed, or suspended.

It is further ordered, That this amendment shall become effective at

11:59 p.m., February 3, 1978, and that this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

TRANSPORTATION OF "WASTE" PRODUCTS FOR REUSE OR RECYCLING

Special Certificate Letter Notice(s)

The following letter notices request participation in a Special Certificate of Public Convenience and Necessity

for the transportation of "waste" products for reuse or recycling in furtherance of a recognized pollution control program under the Commission's regulations (49 CFR 1062) promulgated in "Waste" Products, Ex Parte No. MC 85, 124 MCC 583 (1976).

An original and one copy of protests (including protestant's complete argument and evidence) against applicant's participation may be filed with the Interstate Commerce Commission by February 27, 1978. A copy must also be served upon applicant or its representative. Protests against the applicant's participation will not operate to stay commencement of the proposed operation.

If the applicant is not otherwise informed by the Commission, operations may commence within 30 days of the date of its notice in the FEDERAL REGISTER, subject to its tariff publication effective date.

P-30-77 (Special certificate—waste products), filed November 18, 1977. Applicant: ST. LAWRENCE FREIGHTWAYS, INC., 650 Cooper Street, Watertown, N.Y. 13601. Applicant's representative: Roy D. Pinsky, 345 South Warren Street, Syracuse, N.Y. 13202. Authority sought to operate pursuant to a certificate of public convenience and necessity authorizing operations in interstate or foreign commerce as a common carrier, over irregular routes, transporting: *Waste products*, including waste paper, newspapers and magazines, used cartons, pressed box waste, shredded waste, scrap containers, used aluminum cans, discarded aluminum utensils for reuse or recycling, between points in Connecticut, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, and the District of Columbia, in furtherance of a recognized pollution control program sponsored by Empire Recycling Corp. of Utica, N.Y., for the purpose of transporting waste paper and nonferrous metals, and used aluminum containers and utensils.

P-31-77 (Special certificate—waste products), filed November 22, 1977. Applicant: PALMER MOTOR EXPRESS, INC., P.O. Box 130, Old Dean Forest Road, Savannah, Ga. 31402. Applicant's representative: W. W. Palmer, Jr. (same address as applicant). Authority sought to operate pursuant to a certificate of public convenience and necessity authorizing operations in interstate or foreign commerce, as a common carrier, by motor vehicle, over irregular routes, transporting: *Waste products*, for recycling or reuse, between points in the United States including Alaska and Hawaii, in furtherance of a recognized pollution control program sponsored by Union Camp Corp. of Savannah, Ga., for the purpose of recycling waste paper.

P-32-77 (Special certificate—waste products), filed December 19, 1977. Applicant: INTERSTATE DISTRIBUTOR CO., 8311 Durango Street SW., Tacoma, Wash. 98499. Applicant's representative: George R. LaBissoniere, 1100 Norton Building, Seattle, Wash. 98104. Authority sought to operate pursuant to a certificate of public convenience and necessity authorizing operations in interstate or foreign commerce, as a common carrier, by motor vehicle, over irregular routes, transporting: *Waste paper and recyclable paper*, for recycling or reuse, from points in Idaho and Washington, to the plantsite facilities of Western Kraft Corp. at Albany, Oreg., in furtherance of a recognized pollution control program of western Kraft Corp. of Albany, Oreg., for the purpose of transporting material for reuse or recycling.

P-33-77 (Special certificate—waste products), filed December 27, 1977. Applicant: TRANS-TECH, INC., 516 Cerre, St. Louis, Mo. 63102. Applicant's representative: Robert Nieheiser (same address as applicant). Authority sought to operate pursuant to a certificate of public convenience and necessity authorizing operations in interstate or foreign commerce as a common carrier, by motor vehicle, over irregular routes, transporting: *Waste paper and cardboard for recycling and reuse*, between points in Illinois, Indiana, Iowa, Ohio, Kentucky, Tennessee, Alabama, Mississippi, Louisiana, Arkansas, Texas, Oklahoma, Kansas, Nebraska, Missouri, Wisconsin, and Michigan, in furtherance of a recognized pollution control program sponsored by: (1) Alton Box Board Co. of Alton, Ill., for the purpose of transporting are recycling waste paper and cardboard; and (2) Fibron Corp., St. Louis Division, of St. Louis, Mo., for the purpose of transporting are recycling waste paper.

By the Commission.

[Notice No. 10TA]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

FEBRUARY 3, 1978.

The following are notices of filing of applications for temporary authority under Section 210(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provided that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 41849 (Sub-No. 39TA), filed January 23, 1978. Applicant: KEIGHTLEY BROS., INC., 1601 South 39th Street, St. Louis, Mo. 63110. Applicant's representative: Patrick M. Browne (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Sea coal, from St. Louis, Mo., to Camden, Tenn., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): M. A.

Bell Co., 217 Lombard, St. Louis, Mo. 63102. Send protests to: Peter E. Binder, Acting District Supervisor, Room 1465, 210 N. 12th Street, St. Louis, Mo. 63101.

No. MC 48958 (Sub-No. 147TA) (correction), filed November 14, 1977, published in the FEDERAL REGISTER issue of December 20, 1977, and republished as corrected this issue. Applicant: ILLINOIS-CALIFORNIA EXPRESS, INC., 510 East 51st Avenue, P.O. Box 16404, Denver, Colo. 80216. Applicant's representative: Lee E. Lucero (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over regular routes, transporting: General commodities (except those of unusual value, class A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading, (1) between Denver, Colo., and Cheyenne, Wyo., serving the intermediate point of Fort Collins, Colo. (and its commercial zone) only; From Denver, Colo., over U.S. Highway 287 to Fort Collins, Colo., thence over Colorado State Highway 14 to junction Interstate Highway 25, thence over Interstate Highway 25 to Cheyenne, Wyo., and return over the same route. (2) Between Greeley, Colo., and Fort Collins, Colo. (and its commercial zone), serving no intermediate points: From Greeley, Colo., over U.S. Highway 34 to junction Interstate Highway 25, thence over Interstate Highway 25 to junction Colorado State Highway 68, thence over Colorado State Highway 68 to junction U.S. Highway 287, thence over U.S. Highway 287 to Fort Collins, and return over the same route. (3) Between Greeley, Colo., and Fort Collins, Colo. (and its commercial zone), serving no intermediate points: From Greeley, Colo., over U.S. Highway 34 to junction Interstate Highway 25, thence over Interstate Highway 25 to junction Prospect Street (or over Interstate Highway 25 to junction Colorado State Highway 14), thence over Prospect Street or Colorado State Highway 14 to Fort Collins, and return over the same route. (4) Between Eaton, Colo., and Fort Collins, Colo. (and its commercial zone), serving no intermediate points: From Eaton, Colo., over Weld County Road 74 and Colorado State Highway 68 to junction U.S. Highway 287, thence over U.S. Highway 287 to Fort Collins, and return over the same route. (5) Between Eaton, Colo., and Fort Collins, Colo. (and its commercial zone), serving no intermediate points: From Eaton, Colo., over Weld County Road 75 to junction Interstate Highway 25, thence over Interstate Highway 25 to junction Prospect Street (or over Interstate Highway 25 to junction Colo-

rado State Highway 14), thence over Prospect Street or Colorado State Highway 14 to Fort Collins, and return over the same route. (6) Between Ault, Colo., and Fort Collins, Colo. (and its commercial zone), serving no intermediate points: From Ault, Colo., over Colorado State Highway 14 to Fort Collins, Colo., and return over the same route. (7) Between Denver, Colo., and Fort Collins, Colo. (and its commercial zone), serving no intermediate points: From Denver, Colo., over U.S. Highway 87 (Interstate Highway 25) to junction Colorado State Highway 68, Prospect Road or Colorado State Highway 14, thence over Colorado State Highway 14 to Fort Collins, and return over the same route for 180 days. Applicant also requests authority to tack. Supporting shippers: There are approximately (56) statements of support attached to the application which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: Roger L. Buchanan, District Supervisor, Interstate Commerce Commission, 492 U.S. Customs House, Denver, Colo. 80202. The purpose of this republication is to (1) to indicate regular routes, in lieu of irregular routes, which was published in error before; and (2) to show that applicant requests tacking.

No. MC 61396 (Sub-No. 342TA), filed January 23, 1978. Applicant: HERMAN BROS., INC., 2565 St. Marys Avenue, P.O. Box 129, Omaha, Nebr. 68101. Applicant's representative: John E. Smith, II (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Liquid fertilizer, in bulk, in tank vehicles, from Optic, Nebr., to points in Kansas and Colorado, for 180 days. Supporting shipper(s): Rodney W. Johnson, Traffic Manager, Nutra-Flo Chemical Co., 1919 Grand Avenue, Sioux City, Iowa 51107. Send protests to: Carroll Russell, District Supervisor, Interstate Commerce Commission, Suite 620, 110 North 14th St., Omaha, Nebr. 68102.

No. MC 107295 (Sub-No. 72TA), filed January 11, 1978. Applicant: PRE-FAB TRANSIT CO., P.O. Box 146, 100 South Main Street, Farmer City, Ill. 61842. Applicant's representative: Duane Zehr (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Composition board, from Burns Harbor, Ind., to points in Arkansas, Illinois, Iowa, Kansas, Kentucky, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New York, Ohio, Oklahoma, Pennsylvania, Tennessee, and Wisconsin.

for 180 days. Supporting shipper(s): J. A. Cairns, Vice President, Allied International, Inc., P.O. Box 56, Charlestown, Mass. 02129. Send protests to: Charles D. Little, District Supervisor, Interstate Commerce Commission, 414 Leland Office Building, 527 East Capitol Avenue, Springfield, Ill. 62701.

No. MC 114725 (Sub-No. 81TA), filed January 19, 1978. Applicant: WYNNE TRANSPORT SERVICE, INC., 2222 North 11th Street, Omaha, Nebr. 68110. Applicant's representative: Donald F. Swerczek (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Liquid fertilizer, in bulk, in tank vehicles, from Optic, Nebr., to Kansas and Colorado, for 180 days. Supporting shipper: Rodney W. Johnson, Traffic Manager, Nutra-Flo Chemical Co., 1919 Grand Avenue, Sioux City, Iowa 51107. Send protests to: Carroll Russell, District Supervisor, Interstate Commerce Commission, Suite 620, 110 North 14th Street, Omaha, Nebr. 68102.

No. MC 123048 (Sub-No. 385TA), filed January 20, 1978. Applicant: DIAMOND TRANSPORTATION SYSTEM, INC., 5021 21st Street, P.O. Box A, Racine, Wis. 53401. Applicant's representative: Paul L. Martinson (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Lumber and forest products, from Fargo, N. Dak., to Illinois, Indiana, Iowa, Michigan, Missouri, Ohio, and Wisconsin. Restricted to shipments having a prior movement by rail or truck, from Manitoba Forestry Resources, Ltd., located in Manitoba, Canada, for 180 days. Supporting shipper(s): Manitoba Forestry Resources, Ltd., 902-213 Notre Dame Avenue, Winnipeg, Manitoba, Canada R3B 1N3 (Herbert A. Schon). Send protests to: Mrs. Gail Daugherty, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, U.S. Federal Building and Courthouse, 517 East Wisconsin Avenue, Room 619, Milwaukee, Wis. 53202.

No. MC 124078 (Sub-No. 773TA), filed January 11, 1978. Applicant: SCHWERMANN TRUCKING CO., 611 South 28 Street, Milwaukee, Wis. 53246. Applicant's representative: Richard H. Prevette (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Dry fertilizer and dry fertilizer materials, in bulk, from Cairo, Ohio to points in Michigan and Indiana, for 180 days. Supporting shipper(s): Agricor Chemical Co., P.O. Box 3166, Tulsa, Okla. 74101. (J. J. Stefanec, Director, Transportation Legislation and

Research.) Send protests to: John E. Ryden, District Supervisor, Interstate Commerce Commission, Bureau of Operations, U.S. Federal Building and Courthouse, 517 East Wisconsin Avenue, Room 619, Milwaukee, Wis. 53202.

No. MC 138991 (Sub-No. 23TA), filed January 24, 1978. Applicant: K. J. TRANSPORTATION, INC., 100 Jefferson Road, Rochester, N.Y. 14623. Applicant's representative: S. Michael Richards/Raymond A. Richards, 44 North Avenue, Webster, N.Y. 14580. Authority sought to operate as a contract carrier, by motor vehicle, over irregular routes, transporting: Dry beverage preparations, from Northfield, Ill., to Geneva, Ohio and Hightstown, N.J., under a continuing contract or contracts with Coca-Cola Foods Division, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Coca-Cola Foods Division, 480 Mercer Street, Hightstown, N.J. 08520. Send protests to: Interstate Commerce Commission, U.S. Courthouse and Federal Bldg., 100 South Clinton St., Room 1259, Syracuse, N.Y. 13260.

No. MC 140010 (Sub-No. 12TA) (partial correction), filed November 23, 1977, published in the FEDERAL REGISTER issue of January 20, 1978, and republished as corrected this issue. Applicant: JOSEPH MOVING & STORAGE CO., INC., doing business as ST. JOSEPH MOTOR LINES, 573 Dutch Valley Road NE., Atlanta, Ga. 30309. Applicant's representative: Richard M. Tittlebaum, Suite 375, 3379 Peachtree Road NE., Atlanta, Ga. 30326.

NOTE.—The purpose of this partial correction is to indicate applicant's correct assigned MC Number. No. MC 140010 (Sub-No. 12TA), in lieu of No. MC 140040 (Sub-No. 12TA), which was previously published in error, the rest of the publication remains the same.

No. MC 140768 (Sub-No. 14TA), filed January 11, 1978. Applicant: AMERICAN TRANS-FREIGHT, INC., P.O. Box 796, Manville, N.J. 08833. Applicant's representative: Eugene M. Malkin, Suite 6193, 5 World Trade Center, New York, N.Y. 10048. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Heating equipment, stoves, fireplaces, furnaces and incinerators, from Athens and Huntsville, Ala., to Fort Smith and Little Rock, Ark., Jacksonville and Orlando, Fla., Atlanta, Ga., Carbondale and Chicago, Ill., Baton Rouge, La., Jackson, Miss., Albany, N.Y., Portland, Oreg., Scranton, Pa., Nashville, Tenn., Beaumont, Carrollton, Corpus Christi, Fort Worth, and Houston, Tex., Alexandria and Vienna, Va., Seattle and Spokane, Wash., for 180 days. Applicant has also filed an underlying ETA

seeking up to 90 days of operating authority. Supporting shipper: Martin Industries, P.O. Box 128, Florence, Ala. 35630. Send protests to: Robert S. H. Vance, District Supervisor, Interstate Commerce Commission, 9 Clinton Street, Newark, N.J. 07102.

No. MC 141197 (Sub-No. 20TA), filed January 24, 1978. Applicant: FLEMING-BABCOCK, INC., 4106 Mattox Road, Riverside, Mo. 64150. Applicant's representative: Tom B. Kretzinger, 910 Brookfield Building, 101 West 11th Street, Kansas City, Mo. 64105. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Coal, from Bourbon, Crawford, and Cherokee Counties, Kans., to Kansas City, Mo., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Fuel Dynamics, P.O. Box 308, Oswego, Kans. Send protests to: Vernon V. Coble, District Supervisor, Interstate Commerce Commission, 600 Federal Building, 911 Walnut Street, Kansas City, Mo. 64106.

No. MC 141532 (Sub-No. 17TA), filed December 1, 1977. Applicant: PACIFIC STATES TRANSPORT, INC., 35433, 16th Avenue South, Federal Way, Wash. 98003. Applicant's representative: Henry C. Winters, 235 Evergreen Building, Renton, Wash. 98055. Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Pipe and pipe fittings, couplings, connections and accessories (except iron or steel and commodities which because of size and weight require the use of special equipment), from the plant or warehouse facilities of Armco Steel Corp. in Madera County, Calif., to points in Arizona, Colorado, Idaho, Kansas, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, and Wyoming, restricted to traffic originating at the above plants or warehouse sites and destined to points indicated above, and further restricted against the transportation of oilfield commodities as defined in Mercer-Extension-Oilfield Commodities, 74 MCC 459, for 180 days. Supporting shipper: Armco Steel Corp., C. W. Hall, Director of Transportation, 24 North Main Street, Middletown, Ohio 45043. Send protests to: District Supervisor Hugh H. Chaffee, Interstate Commerce Commission, Bureau of Operations, 858 Federal Building, Seattle, Wash. 98174.

No. MC 141853 (Sub-No. 2TA) (correction), filed December 15, 1977, published in the FEDERAL REGISTER issue of January 20, 1978, and republished as corrected this issue. Applicant: C-B-C TRANSPORTS, INC., 845 Percy Street, P.O. Box 1143, Greenville,

Miss. 38701. Applicant's representative: Douglas C. Wynn, P.O. Box 1295, Greenville, Miss. 38701. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except cement in containers, commodities in bulk, household goods as defined by the Commission, and commodities which, because of size, weight, or value, require the use of special equipment), (1) between points in Washington and Bolivar Counties, Miss., on the one hand, and, on the other, points in Mississippi on the west of U.S. Highways 51 and 1-55 and on and north of U.S. Highways 80 and I-20; (3) between Belzoni, Rolling Fork, and Yazoo City, Miss., on the one hand, and, on the other, Jackson and Vicksburg, Miss.; serving all Mississippi points in the Commercial zones of all points in the above territories described above, including Belzoni, Rolling Fork, Yazoo City, Jackson, and Vicksburg, Miss. Restricted to the transportation of traffic having a prior or subsequent movement by rail, water or motor vehicle, for 180 days. Supporting shippers: There are (51) statements of support attached to this application which may be examined at the field office named below. Send protests to: Alan C. Tarrant, District Supervisor, Interstate Commerce Commission, Room 212, 145 East Amite Building, Jackson, Miss. 39201. The purpose of this republication is (1) to show applicant's correct name C-B-C Transport, Inc., in lieu of M.A. Creekmore and Jasper V. Bennett, C-B-C Transport, Co.; and (2) to complete the territorial description.

No. MC 142891 (Sub-No. 1TA) (correction) filed December 15, 1977, published in the FEDERAL REGISTER issue of January 18, 1978, and republished as corrected this issue. Applicant: A AND H, INC., Box 346, Footville, Wis. 53537. Applicant's representative: Charles W. Beinhauer, Suite 4959, Trade World Center, New York, N.Y. 10048. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs* (except commodities in bulk, from the facilities of George A. Hormel and Co., at or near Beloit, Wis., to points in Ohio, New York, Pennsylvania, New Jersey, Delaware, Virginia, Kentucky, Michigan, Maine, Indiana, Maryland, and Massachu-

setts. Restricted to product originating at the named origin and destined to the named points, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): George A. Hormel and Co., P.O. Box 800, Austin, Minn. 55912. Send protests to: Ronald A. Morken, District Supervisor, 139 West Wilson Street, Room 202, Madison, Wis. 52703. The purpose of this republication is to include the State of Maryland, which was previously omitted in error.

No. MC 143822TA, filed October 3, 1977 (Republication). Applicant: Y's TRUCKING CO., INC., 2378 Caladium Drive, N.E., Atlanta, Ga. 30345. Applicant's Representative: Virgil H. Smith, Suite 12, 1587 Phoenix Boulevard, Atlanta, Ga. 30349. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Plastic articles*, from the plantsite of Rehrg Pacific Co. at or near Doraville (Gwinnett County), Ga., to points in Alabama, North Carolina, South Carolina, Florida, Mississippi, Louisiana, Arkansas, Oklahoma, Texas, Tennessee, Kentucky, Illinois, Indiana, Ohio, and St. Louis, Mo., under a continuing contract, or contracts, with Rehrg Pacific Co., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Rehrg Pacific Co., 100 Piedmont County, Atlanta, Ga. 30340. The above-described request for authority was published in the FEDERAL REGISTER November 25, 1977, but the destination State of Missouri was shown in lieu of Mississippi, and the destination State of Kentucky was not included. The entire authority, as corrected, was granted by the Commission, Motor Carrier Board, by order entered December 30, 1977. Insofar as the authority to serve points in Mississippi and Kentucky is concerned, any interested party may file a petition for reconsideration 15 calendar days from the date this notice is published. Send petitions for reconsideration to: The Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

No. MC 144090TA, filed December 8, 1977. Applicant: RED LETTER TRUCKING CO., 250 Mount Lebanon Boulevard, Pittsburgh, Pa. 15234. Applicant's representative: Stanley E.

Levine, Esq., Wick, Vuono & Lavelle, 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Animal and poultry feed and feed ingredients*, from Frankfort, Indianapolis, Logansport, and Decatur, Ind.; Danville, Ill.; Bellevue, Delphos, Fostoria, Marion, and Perrysburg, Ohio; Blissfield and Hillsdale, Mich.; and Ports of Entry on the International Boundary Line between Canada and the United States on the Detroit River, restricted to international traffic, to points in Pennsylvania, points in Chataqua, Cattaraugus, and Erie Counties, N.Y., and points in Washington and Frederick Counties, Md. (2) *Fertilizer* from Maumee and Washington Court House, Ohio to the destination area described in (1) above, for 180 days. Supporting shipper(s): Jesse C. Stewart Co., 250 Mount Lebanon Boulevard, Pittsburgh, Pa. 15234. Send protests to: John J. England, Transportation Specialist, Interstate Commerce Commission, 2111 Federal Building, 1000 Liberty Avenue, Pittsburgh, Pa. 15222.

No. MC 144220TA, filed January 23, 1978. Applicant: STEVE RUNYON, doing business as RUNYON TRUCKING, Route 1, Box 10, Bidwell, Ohio 45614. Applicant's representative: John M. Friedman, 2930 Putnam Avenue, Hurricane, W. Va. 25526. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Coal*, in bulk, in dump vehicles, from mine sites in Athens, Hocking Perry, and Vinton Counties, Ohio to West Columbia, W. Va., having subsequent movement by barge, under a continuing contract or contracts with Raven Hocking Coal Corp., for 180 days. Supporting shipper(s): Francis A. Zuspan, Vice President, Raven Hocking Coal Corp., Box 108, Mason, W. Va. 25260. Send protests to: Frances A. Ciccarello, Secretary, Interstate Commerce Commission, 3108 Federal Office Building, 500 Quarrier Street, Charleston, W. Va. 25301.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

12

SECURITIES AND EXCHANGE COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 43FR 4539, February 2, 1978.

CHANGES IN THE MEETING SCHEDULE: Additional items considered.

The following items were considered by the Commission at an open meeting on Thursday, February 9, 1978, at 2:30 p.m.:

1. Consideration of the issuance of an order of a public hearing and a release describing the procedures of the hearing on outstanding proposed rules relating to accounting practices of oil and gas producers.
2. Consideration of the issuance of an order extending for 60 days the period for conclusion of disapproval proceedings in respect of a rule proposal by the American Stock Exchange ("AMEX") regarding alternate criteria for listing foreign issues and a rehearing on the Commission's earlier decision to disapprove the AMEX proposal regarding alternate criteria for listing stock of issuers which cannot meet the AMEX's current earning requirements.

The following items were considered by the Commission at the closed meeting on Thursday, February 9, 1978, at 4:20 p.m.:

- Settlement of administrative proceedings.
- Freedom of Information Act Request.
- Other litigation matter.
- Referral of investigative files to Federal, state or self-regulatory authorities.

The General Counsel of the Commission, or his designee, certified that, in his opinion, the items considered at the closed meeting were so considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4) (8) (9)(A), and (10) and 17 CFR 200.402(a) (8), (9), (9), and (10).

Chairman Williams and Commissioners Loomis and Pollack determined that Commission business required that the additional matters be considered and that no earlier notice thereof was possible.

VETERANS ADMINISTRATION

[38 CFR Part 21]

VETERANS EDUCATION

Educational Assistance Benefits

AGENCY: Veterans Administration.

ACTION: Proposed regulations.

SUMMARY: The following regulatory provisions, implementing the Veterans' Education and Employment Assistance Act of 1976, provide for increases in monthly rates and other significant changes in the educational assistance and vocational rehabilitation programs. Some of the changes are liberalizing and some are restrictive, while others codify policies and practices already in use. Additional changes are of a minor or technical nature. The effect of this change is to implement this law.

DATES: Comments must be received on or before March 16, 1978. It is proposed to make these provisions effective the dates shown below in accordance with Pub. L. 94-502 which amends chapters 31, 34, 35, and 36, title 38, United States Code:

October 1, 1976: Rate increases, increased basic entitlement, various provisions affecting the determination and extension of delimiting periods under chapter 35, reimbursement to State approving agencies for work that is subcontracted out, and increase in the reporting fees.

October 15, 1976: Provisions for payment of benefits for certain break periods, completion of work-study contracts when the student ceases to be a full-time student, elimination of the termination dates for chapter 31 training for the blinded and seriously disabled service-connected veterans, definitions of "institution of higher learning" and "standard college degree," redesignation of the title of the chapter 35 program and the redesignation of the titles to be used for the beneficiaries, permitting inspection of records of all students by authorized Government representatives to administer title 38 education programs, repeal of the requirements as to the Attorney General's list, establishing standards of compliance survey activities by the Veterans Administration, and other minor gender and technical changes not otherwise mentioned in this paragraph.

November 1, 1976: Termination of enrollment and reenrollments in the Predischarge Education Program for chapter 34.

December 1, 1976: Prohibition of payment of benefits for audited courses, no payment of benefits for courses the grades for which do not count toward graduation nor for

PROPOSED RULES

courses from which withdrawn without mitigating circumstances, correspondence courses or parts of courses by correspondence that are less than 6 months in length barred, new provisions as to barring attorneys-in-fact as addressees for delivery of benefits checks, changes in the 85-15 percent provisions, new provisions for measurement of training in accredited non-college degree courses, new approval criteria, amendment of the 2 years of operation rule, required retention of advertising, sales and enrollment materials, amended statutory provisions as to standards of progress and conduct, and training of chapter 31 trainees in Federal agencies without pay.

January 1, 1977: Termination of chapter 34 eligibility for those entering on active duty on or after that date (with limited exception for persons in programs such as Delayed Enlistment Program (DEP) and Reserve Officers' Training Corps (ROTC)), provisions of a final cutoff date for chapter 34 of December 31, 1989.

June 1, 1977: Bars to the prepayment of educational benefits, requirement that the student specifically request an advance payment (no need requirement), requirement that the school certify it agrees to, and can comply with, the requirements of the advance payment law.

ADDRESSES: Send written comments to: Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420.

Comments will be available for inspection at the address shown above during normal business hours until March 27, 1978.

FOR FURTHER INFORMATION CONTACT:

June C. Schaeffer, Assistant Director for Policy and Program Administration, Education and Rehabilitation Service, Department of Veterans Affairs, Veterans Administration, Washington, D.C. 20420, 202-389-2092.

ADDITIONAL COMMENT INFORMATION

Interested persons are invited to submit written comments, suggestions, or objections regarding these documents to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420. All written comments received will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays), until March 27, 1978. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Service Unit in room 132. Such visitors to any

VA field station will be informed that the records are available for inspection only in Central Office and furnished the address and the above room number.

Approved: February 6, 1978.

By direction of the Administrator.

RUFUS H. WILSON
Deputy Administrator.

1. Sections 21.41 and 21.42 are revised to read as follows:

§ 21.41 Extension of training.

(a) *General.* A veteran may be provided training beyond his or her basic termination date in accordance with dates set forth in § 21.42 when he or she was prevented from timely entering, or having entered, from completing vocational rehabilitation for one of the following reasons:

(1) *Physical or mental condition prevented timely entrance.* His or her physical or mental condition was such as to make training medically infeasible during all or any part of the critical period, as set forth in § 21.42, for qualifying to enter training in order to permit pursuit of a program during the 4-year period immediately preceding his or her basic termination date.

(2) *Physical or mental condition prevented completion.* He or she timely entered training but was prevented from completing his or her planned course because of physical or mental condition and through no fault of his or her own.

(3) *Discharge.* Discharge from service was such as to meet the eligibility requirements for vocational rehabilitation for the first time on or subsequent to the beginning date of the applicable critical period as set forth in § 21.42.

(4) *Service-connected disability.* He or she first established the existence of a service-connected compensable disability on or subsequent to the beginning date of the applicable critical period as set forth in § 21.42.

(5) *Increase in degree of disablement.* Subsequent to the beginning day of his or her critical period he or she has established the existence of an increase in the degree of disabling effect of service-connected disability which warrants a current finding that need for vocational rehabilitation exists and is attributable to the change.

(b) *Seriously disabled (including blinded) veterans.* A veteran who is blinded or otherwise seriously disabled as a result of service-connected disability may be provided training beyond the termination date otherwise applicable if:

(1) He or she has not previously been rehabilitated, or

(2) His or her disability has worsened, or he or she has developed a secondary service-connected condition resulting from service-connected disability

PROPOSED RULES

ity after he or she was declared rehabilitated, to the extent that he or she is now precluded from performing the duties of the occupation for which previously trained.

(3) However, a counseling psychologist within the Veterans Services Division must determine that training is necessary based upon the veteran's disability and need for vocational rehabilitation.

(c) *Determination of serious disability.* For purposes of paragraph (b) of this section, serious disability includes:

(1) Service-connected blindness defined as visual acuity no better than 20/200 in the better eye after correction, or a field of vision restricted to an angle of 15 degrees or less.

(2) Service-connected disability evaluated singly or in combination at 50 percent or more, except convalescent

ratings, prestabilization ratings, and ratings based on hospitalization.

(3) Service-connected disability evaluated singly or in combination at 30 percent or 40 percent if, because of such disability, the veteran is unable to get and/or hold competitive employment. Service-connected disabilities evaluated singly or in combination at less than 30 percent do not constitute serious disability.

§ 21.42 Dates of eligibility.

Basic dates			Extension under § 21.41(a) (1) through (5)		Training under § 21.41(b)
(1) Date disability incurred.	(2) Date of discharge. ¹	(3) Basic termination date (Last pay date).	(4) If the basic termination date is less than 4 years away or has already passed, consideration should first be given for the 4-year extension and § 21.41(a) (1) through (5). See columns (4) and (5).	(5) Beginning and ending date of critical period § 21.41(a) (1) through (5).	(6) Extended termination date under § 21.41(a) (1) through (5). (Last pay date).
(a) 9-16-40 to 7-25-47.	After 9-15-40.	9 years after discharge date.	4 years and 9 months to 5 years after discharge date.	13 years after discharge date.	If veteran does not have sufficient training time for completion of rehabilitation by his or her basic termination date or by any applicable extension under § 21.41(a) (1) through (5) and is seriously disabled or blinded as provided in § 21.41(b) and (c), training after the otherwise applicable termination date shall be provided, or such periods as determined necessary based upon the disability and need for training.
(b) 7-26-47 to 6-26-50.	Before 10-15-62 After 10-14-62.	10-14-71 9 years after discharge date.	7-14-67 to 10-14-67. 4 years and 9 months to 5 years after discharge date.	10-14-75 13 years after discharge date.	
(c) 6-27-50 to 1-31-55.	After 6-26-50.	9 years after discharge date.	4 years and 9 months to 5 years after discharge date.	13 years after discharge date.	
(d) After 1-31-55.	Before 10-15-62. After 10-14-62.	10-14-71 9 years after discharge date.	7-14-67 to 10-14-67. 4 years and 9 months to 5 years after discharge date.	10-14-75 13 years after discharge date.	

¹ Date of discharge refers to the first unconditional discharge or release following the period of service in which the disability occurred.

² Critical period is the 90-day period immediately preceding the date falling exactly 4 years prior to the veteran's basic termination date. It is a 90-day period which permits the veteran time to complete counseling and select an objective which can be reached within the 4-year period immediately following.

³ When extended termination date under § 21.41(a) (1) through (5) for these service dates has expired, further extension may only be granted if the veteran qualifies under § 21.41(b) and (c).

⁴ In no case was basic termination date (last pay date) earlier than 8-19-63 or extended termination date earlier than 8-19-67.

PROPOSED RULES

2. Section 21.130 is revised to read as follows:

§ 21.130 Subsistence allowance.

(a) *Payments.* Each veteran under chapter 31 will be paid a subsistence allowance at the rates specified in § 21.133. Final payment may be withheld until proof of continued enrollment is received and the account adjusted. Allowance will be paid while the veteran is in training status, including any period during which he or she is on authorized leave.

(1) A veteran is in training status during:

(i) Periods when he or she is in attendance; this includes weekends and legal holidays (or customary vacation periods connected therewith) and, as determined by the Administrator, periods when the schools are temporarily closed under an established policy based upon an Executive order of the President or due to an emergency situation.

(ii) Periods between consecutive terms within an enrollment period that do not exceed 1 full calendar month.

(iii) Periods between consecutive school terms when the veteran, as part of his or her approved program of vocational rehabilitation, transfers from one educational institution to another for the purpose of enrolling in and pursuing a similar course at the second institution, provided the period does not exceed 30 days.

(iv) Periods between a semester, term or quarter where the educational institution certifies the enrollment of the veteran on an individual semester, term or quarter basis, if the interval between such periods does not exceed 1 full calendar month.

(2) A veteran who is on approved leave will continue to be paid subsistence allowance even though he or she is hospitalized; receiving drill pay, flight pay or commuted rations as a member of a Reserve force; or while not on active duty, is receiving service department retirement or retiree pay. (38 U.S.C. 1780(a); Pub. L. 94-502, 90 Stat. 2383.)

(b) *Restrictions.* A person in training under chapter 31 will not be paid subsistence allowance when:

(1) He or she is hospitalized pending final discharge from active service.

(2) He or she is receiving Veterans Administration hospital or domiciliary care following discharge from service, except as provided in paragraph (a)(2) of this section. (The veteran is not precluded from receiving subsistence allowance if as a part of his or her training he or she is receiving certain assistance in the day clinic of the hospital but is providing his or her own room and board, either at home or otherwise.)

3. In § 21.131, paragraph (b)(1)(i) is revised to read as follows:

§ 21.131 Commencing dates.

The commencing date of an award or increased award of subsistence allowance will be determined under this section, but will not be authorized for any period prior to the earliest date for which disability compensation is payable, or would be payable except for the receipt of retirement pay.

(b) *Increase for dependent.* Latest of the following dates:

(1) Date of claim: This term means the following, listed in their order of applicability:

(i) Date of veteran's marriage, or birth of his or her child, or his or her adoption of a child, if the evidence of the event is received within 1 year of the event.

4. In § 21.132, paragraphs (e) and (g) are revised to read as follows:

§ 21.132 Reduction or discontinuance.

The effective date of reduction or discontinuance of subsistence allowance will be the earliest of the dates specified in these paragraphs. Where an award is reduced, the reduced rate will be effective the day following the date of discontinuance of the greater benefit.

(e) *"Interrupted", "discontinued", or "rehabilitated".*

(1) *Interrupted and rehabilitated.* Last day of attendance or last day of approved leave status, whichever is applicable.

(2) *Discontinued.* Last date of attendance or leave status whichever is applicable, except as follows:

(i) If the veteran is placed in discontinued status following withdrawal from all courses with nonpunitive grades or following completion of all courses with nonpunitive grades, and mitigating circumstances are not found by the Vocational Rehabilitation Specialist, benefits will be terminated effective the first date of the term or December 1, 1976, whichever is later.

(ii) If the veteran is placed in discontinued status following a term in which grades received include both those which count in grade point average and nonpunitive grades, and mitigating circumstances are not found: Subsistence allowance for courses in which nonpunitive grades were received will be terminated effective the first date of the term or December 1, 1976, whichever is later. Subsistence allowance for courses in which grades which count in grade point average were received will be terminated last date of attendance or leave status, whichever is applicable. (38 U.S.C. 1780(a); Pub. L. 94-502, 90 Stat. 2383.)

(g) *Reduction in rate of pursuit of course.* End of month in which reduction occurs, except that if the rate of pursuit is reduced as a result of the veteran's withdrawal from a course or courses with nonpunitive grade(s) or as a result of the completion of a course or courses with nonpunitive grade(s) (§ 21.4200(j)), benefits will be reduced as follows:

(1) If the Vocational Rehabilitation Specialist determines that there are mitigating circumstances:

(i) *Withdrawal with nonpunitive grades:* The end of the month of the end of the term in which withdrawal occurs, whichever is the earlier, unless the reduction occurs at the beginning of the term, in which case benefits will be reduced the first date of the term in which the withdrawal occurs or December 1, 1976, whichever is the later.

(ii) *Completion with nonpunitive grades:* No reduction required.

(2) If the Vocational Rehabilitation Specialist determines there are no mitigating circumstances reduction of benefits is effective the first date of the term in which the withdrawal or completion with nonpunitive grades occurs or December 1, 1976, whichever is the later. (38 U.S.C. 1780(a); Pub. L. 94-502, 90 Stat. 2383.)

5. Section 21.133 is revised to read as follows:

§ 21.133 Rates.

Subsistence allowance is payable at the following monthly rates effective October 1, 1976.

Type of training	Monthly rate of subsistence allowance			
	No dependents	1 dependent	2 dependents	Each additional dependent
Institutional				
Full time	\$226	\$280	\$329	\$24
1/2 time	170	210	247	18
1/4 time	113	140	16	12
Sheltered workshop, training in the home, independent instructor (full time only)	226	280	329	24
Farm cooperative apprentice or other on job (OJT) (full time only)	197	238	275	18

PROPOSED RULES

Type of training	Monthly rate of subsistence allowance			
	No dependents	1 dependent	2 dependents	Each additional dependent
Combination (institutional and OJT) (full time only):				
Institutional 1/2 time or more	226	280	329	24
Institutional less than 1/2 time	197	238	275	18
Cooperative (full time only):				
Institutional full time	226	280	329	24
Business/industry full time	197	238	275	18

*For on-job training, subsistence allowance may not exceed the difference between the monthly training wage, exclusive of overtime, and the entrance journeyman wage for the veteran's objective.

(38 U.S.C. 1504(b); Pub. L. 94-502, 90 Stat. 2383.)

6. In § 21.134, paragraph (c) is revised to read as follows:

§ 21.134 Postrehabilitation pay.

(c) *Farm cooperative, apprentice or other on-job.* The lump-sum payment will be twice the full-time monthly rate authorized for this kind of training including any additional amounts for dependents. The full-time rate will be the basis for payment without regard to the fact that the veteran may have been authorized less than the maximum subsistence allowance payable because of wages earned while pursuing on-the-job training.

7. In § 21.138, paragraphs (d) and (e) are added to read as follows:

§ 21.138 Advance payment.

(d) *Exception.* Notwithstanding any provision of this section or any other section of Title 38, Code of Federal Regulations, on and after June 1, 1977, no advance payment of benefits shall be made, unless the individual shall first specifically request such a payment and the educational institution at which the veteran is accepted or enrolled has agreed to, and can satisfactorily, carry out the provisions of 38 U.S.C. 1780(d)(5)(B) and (C) and (6) pertaining to receipt, delivery or return of advance checks and certifications of delivery and enrollment.

(e) *Time of payment.* Advance payment will only be authorized, at the beginning of an ordinary school year or at the beginning of any other enrollment period which begins after a break in enrollment of 1 full calendar month or longer. Furthermore, on and after June 1, 1977, all other payments shall be made at the end of the month in which the training for which payment is made shall have occurred. These exceptions are required by the provisions of Pub. L. 94-502, 90 Stat. 2383. See § 21.130.

8. In § 21.145, paragraph (a) is revised to read as follows:

§ 21.145 Veteran-student services.

(a) *Eligibility.* Veteran-students who are pursuing full-time programs of education or training under chapter 31 are eligible to receive a work-study allowance. In return for the veteran-student's agreement to perform services for the Veterans Administration totaling 250 hours during an enrollment period an allowance in the amount of \$625 will be paid. An advance payment of \$250 will be made for the first 100 hours agreed to be worked. Advances of lesser amounts may be made in return for agreements to perform services for periods of less than 100 hours. In the event the veteran ceases to be a full-time student before completing such an agreement, the veteran may, with the approval of the Director of the field station, or his or her designee, be permitted to complete that portion of an agreement that remains. If the veteran terminates all training he or she will be permitted to complete that portion of an agreement represented by the sum of money already advanced to the veteran for which no services have been performed. Portions of an agreement for which no advance has been made may not be authorized to be completed by those who have terminated all training. Students must complete portions of an agreement within the same or immediately following term, quarter or semester in which the student ceases to be a full-time student, but in no event later than 60 days after the date the student ceases to be a full-time student. (38 U.S.C. 1685; Pub. L. 94-502, 90 Stat. 2383.)

9. In § 21.201, paragraphs (e), (f)(1), (g)(1) and (5), and (b)(1) and (3) and the following portions of paragraph (i): Introductory portion preceding subparagraph (1); in subparagraph (2), the introductory portion preceding subdivision (i) and (2)(ii); in subparagraph (3), the introductory portion preceding subdivision (i), and subdivisions (iv), (v), (vi) and (vii), are revised to read as follows:

§ 21.201 Types of courses.

In prescribing the course for a particular veteran, that type or combination

of types will be selected which will make the veteran most satisfactorily employable in his or her selected occupation. The types of courses of vocational rehabilitation are:

(e) *Sheltered workshop course.* A full-time course of training on the job or combination of training on the job and supplemental related instruction. The disabled veteran is provided vocational training in a specific employment objective in a place where he or she is relatively sheltered from competition with the able bodied. He or she is not required to meet production standards which in ordinary on-the-job training situations would interfere with the restoration of employability. The course is provided through a charitable, religious, educational, governmental, or philanthropic organization which is not operated for profit but primarily to provide vocational training, rehabilitation, and employment to the physically and mentally handicapped. A sheltered workshop course is a vocational course of training. It will be strictly differentiated from a course of specialized restorative training offered in a workshop for the purpose of work adjustment or personal adjustment. A sheltered workshop course will be prescribed only in those cases in which the veteran's employability cannot be restored through pursuit of the usual course of vocational training in a school or in a training on-the-job establishment. Training under sheltered workshop conditions should give good promise of needed results not otherwise obtainable in the particular case.

(f) *Correspondence course.*

(1) A correspondence course may be prescribed as part of the course of vocational rehabilitation when it supplements the major part of the course to provide the veteran with theory or technical information directly related to and functional in the practice of the occupation for which he or she is being trained.

(g) *Training in the home.* A full-time course which a veteran pursues in his or her home with an individual instructor or instructors when:

(1) The limitations imposed by his or her disability prevent regular travel to and from a suitable training facility;

(5) There is evidence that upon completion of the training program the veteran will be suitably employable in his or her home or other place with reasonable assurance of continuing employment.

(h) *Independent instructor course.*

(1) An independent instructor course will be prescribed only when the course of vocational rehabilitation is not available through an established school, training on-the-job establishment, or sheltered workshop within a reasonable commuting distance from the veteran's home, and the handicap caused by the veteran's disability precludes requiring his or her going elsewhere for training.

(3) Since the customary channels opening into employment may not be readily available to a veteran pursuing an independent instructor course, arrangements for satisfactory employment upon completion of the training shall be thoroughly considered and found favorable before the veteran is approved for such training. The veteran will be encouraged to develop gradually a market for his or her products and services and to supply that market so that by the completion of the training program he or she will have been trained into employment.

(i) *Farm cooperative course.* A full-time course designed to restore employability by training a veteran to operate a farm over which he or she has control or to manage a farm as the employee of another. Such course shall be carefully planned and developed by the Veterans Administration in collaboration with the instructor to suit the needs of the individual veteran. Full consideration should be given to the size and character of the farm on which the veteran is to receive the farm part of his or her course. The veteran must become proficient in the type of farming for which he or she is training—in planning, producing, marketing, farm mechanics, conservation of farm resources, conservation of food, farm financing, farm management, and the keeping of farm and home accounts. Instruction will satisfy the requirements of paragraph (i)(1) or (2) of this section.

(2) Farm instruction of at least 200 hours per year (not less than 10 hours in any one month and sufficiently more in other months to aggregate the required 200 hours per year) given by a fully qualified individual instructor by contract either with an educational agency or directly with the individual instructor, when:

(ii) Such instruction is limited to situations where the veteran is being trained to operate a farm over which he or she has control.

(3) Where the course is designed to train a veteran to operate a farm under his or her own control the plan

for training developed by the Veterans Administration in collaboration with the instructor will satisfy the following requirements:

(iv) A detailed individual training program showing the kind and amount of instruction—classroom and individual, or farm group and individual, or individual.

(v) The operation of the farm shall be under the control of the veteran by ownership, lease, or other written tenure arrangement. Where the tenure arrangement is other than by ownership, the lease or other written agreement shall afford the veteran control of the farm at least until the completion of his or her course. The veteran's control must be such that he or she will be free to carry out the teachings of the training program and to operate a farm according to a farm and home plan developed by the Veterans Administration in collaboration with the instructor, the veteran, and, when appropriate, the landlord. Also, the lease or agreement must provide for capital improvements to be made which are necessary for carrying out the farm and home plan, with the veteran furnishing no greater portion of the costs thereof than the benefits accruing warrant. Furthermore, it must provide for the landlord to share the costs of improved practices put into effect in proportion to the returns he or she will receive from such practices. Ordinarily training will be approved for only one veteran on a single farm. However, where conditions of a particular farm are so highly favorable as to size, character, productivity, and equipment to assure the successful rehabilitation of a veteran in partnership with another person, such veteran may be placed in training with one, but not more than one, other veteran on a single farm, when the other veteran is, or immediately will be, in farm cooperative training or has satisfactorily pursued institutional farm training under laws administered by the Veterans Administration. There must be documentary evidence that the two principals have entered into a bona fide partnership agreement which provides for equal authority between the partners in the management and operation of the farm.

(vi) The farm at the time of induction of the veteran into training and throughout the period of training shall be of such size and character that, together with the instruction part of the course, it will occupy the full time of the veteran, will permit instruction in planning, management, and operation of most of the major farming enterprises in the veteran's farm and home plan and, at least by the end of the necessary minimum period of training, will assure him or

her a reasonably satisfactory living under normal economic conditions.

(vii) The farm must have the necessary buildings and equipment to enable the veteran satisfactorily to commence pursuit of the course of farm cooperative training, and there must be present conditions which give reasonable promise that any additional items required for pursuit of the course, including livestock, will be available as they become necessary.

10. In § 21.202, paragraph (a)(3) is revised to read as follows:

§ 21.202 Full-time vocational rehabilitation training.

(a) Full-time vocational rehabilitation training for disabled veterans having normal work tolerance will be:

(3) Farm cooperative training assessed in accordance with § 21.201(i).

11. In § 21.204, paragraph (b)(1), (2) and (3) is revised to read as follows:

§ 21.204 Duration of the course.

(b) *Providing vocational rehabilitation training when the program cannot be completed by the Veterans Administration.*

(1) There is a written agreement among the veteran, the Veterans Administration, and some other responsible agency or individual that, upon expiration of the veteran's entitlement under chapter 31, the responsible agency or person will provide the remaining amount of training necessary to restore the veteran to employability so long as his or her conduct and progress remain satisfactory. Such responsible agency or person may be the State rehabilitation agency or it may be the responsible official of a grant-in-aid fund which provides an amount that gives support to living expenses and for school training, tuition costs if any. The essential requirement is that support of a veteran's program will be reasonably assured and he or she agrees that it is sufficient to enable him or her to remain in the course to its completion. A veteran may enter training or reenter for a new objective only if there remains at least 3 months between the date of entrance or reentrance and the veteran's termination date.

(2) It is determined that the veteran who has entered into training properly planned for completion by his or her termination date will not reach employability by that date for reasons beyond his or her control and it is not

possible to arrange for completion of training by some other agency or individual. In such case the veteran will be allowed to continue the course for his or her selected objective to his or her termination date, at which time all obligation of the Veterans Administration will cease.

(3) The prescribed course of vocational rehabilitation leads to an objective the practice of which requires passing of an examination for license and the veteran is able to complete all of the course by his or her termination date but is unable to take the licensing examination by that date. The veteran will be notified that obtaining a license will not be the responsibility of the Veterans Administration.

12. Section 21.205 is revised to read as follows:

§ 21.205 Adjusting the duration of the course.

A course of training will be prescribed and arranged for which is necessary to restore employability in the occupation which has been selected. Although certificate B gives an estimated length of the course, the duration will be that period of training which is necessary to qualify for employment taking into account any applicable previous training or experience in the individual veteran's case. As the veteran proceeds with the course there will be a continuing appraisal of his or her progress toward satisfactory completion of training. Based on this appraisal, any necessary adjustments to lengthen or shorten the previously planned period of training will be made to assure that:

(a) The veteran upon completion of such training will be employable as a trained worker in the selected occupation; and

(b) The duration of the veteran's course will not exceed the period necessary to make him or her employable in his or her objective.

13. In § 21.206, the introductory portion of paragraph (a) preceding subparagraph (1) and paragraph (a)(3) are revised to read as follows:

§ 21.206 Approval of training in excess of 4 years.

(a) The veteran cannot be trained to employability in an occupation consistent with the vocational handicap resulting from his or her disability and suitable in terms of his or her aptitudes, abilities, and interests, without exceeding 4 years of training time, subject to the following:

(3) Where the veteran's selected objective is reasonable in terms of his or her educational background and dem-

onstrated abilities and he or she lacks the general education necessary for entrance into or satisfactory pursuit of his or her vocational course, general education on the elementary or secondary level may be provided if the general educational level to be attained can be reached in not to exceed 2 full school years—approximately 18 months—and the vocational course can be completed in not to exceed an additional 48 months.

14. Section 21.207 is revised to read as follows:

§ 21.207 Repetition of a course.

(a) A veteran having completed a course under chapter 31 according to the standards and practices of the institution ordinarily will not be authorized to pursue it again at the expense of the Government. However, repetition of the course or a particular part or parts of it may be approved when it is determined to be necessary to accomplish the veteran's vocational rehabilitation. A veteran repeating a course under chapter 31 is subject to the same requirements for satisfactory pursuit and completion of the course as are other students taking the course. (38 U.S.C. 1780(a) Pub. L. 94-502, 90 Stat. 2383)

(b) An eligible veteran who has completed a course of training under chapter 31 may pursue a review course if it is specifically organized and conducted as a review course. The number of repetitions of a review course which may be approved for a particular veteran will be determined on the basis of his or her need and a reasonable assurance that further repetition will restore employability.

(c) Audited courses, as defined in § 21.4200(i), may not be authorized as a part of a program of training under chapter 31. If an individual repeats a course, pursuant to paragraph (a) of this section, however, payment of benefits may be made, since the course is being pursued in the same manner as a credit course, whether or not credit is given, i. e., the individual is not merely a listener and must meet the same requirements as other students. (38 U.S.C. 1780(a); Pub. L. 94-502, 90 Stat. 2383)

15. Section 21.209 is revised to read as follows:

§ 21.209 Status "training declined."

(a) A veteran in status "induction pending" who has never been in vocational rehabilitation training will be changed to "training declined" when, after being properly notified that suitable training is available for him or her and instructed as to the next step he or she should take:

(1) Fails to respond; or

(2) Declines or refuses induction; or

(3) Defers induction for a period exceeding 30 days beyond the scheduled date of induction, except where such deferment is due to illness or other sufficient reason; or

(4) Has been given notice to report at a designated place and time to commence training, and he or she fails to report and fails to furnish satisfactory reasons for not reporting; or

(5) Commences or continues to pursue education or training under chapter 34 or 35.

(b) A veteran who is changed from status "induction pending" to status "training declined" will be informed that if his or her disability rating is reduced to less than compensable degree he or she will lose entitlement for vocational rehabilitation. The veteran will also be informed that if he or she requests training after 60 days from the time he or she is placed in "training declined" status the entire question of need for vocational rehabilitation will have to be reconsidered.

(c) Where the veteran requests induction into training within 60 days of the date he or she is placed in "training declined" status he or she may be entered into training without further counseling when:

(1) His or her disability has not been reduced to less than compensable degree, and

(2) There is no known reason why further counseling is needed.

16. In § 21.222, paragraph (f) is added to read as follows:

§ 21.222 Additional conditions for induction into training on the job.

(f) Training in an agency of the Federal Government, as permitted by § 21.223(c), will be in accord with the conditions and requirements of training on-the-job except that, when it is determined to be necessary to accomplish vocational rehabilitation, a veteran may be entered into training without compensation by the training establishment. The conditions applicable to such unpaid training are as follows:

(1) The determination as to the need for such training, as all or part of a veteran's program of vocational rehabilitation, will be made collaboratively by the Counseling Psychologist and Vocational Rehabilitation Specialist, based on an analysis of the veteran's needs, as indicated by his or her disability, education and work experience, employment goal, and other pertinent factors, in relation to available training resources and the requirements for restoration of employability.

(2) Unpaid training in a Federal agency may be used to prepare the veteran for employment in that agency, or, as appropriate, may be used as preparation for other public

employment or employment in the private sector.

(3) Unpaid training may be used to provide training in the areas of knowledge and the skills and competencies required for a specific occupation and/or to provide work experience when such work experience is needed for the purposes of adjustment or transition to render the veteran employable. (38 U.S.C. 1511; Pub. L. 94-502, 90 Stat. 2383)

17. In § 21.223, the headnote is changed, paragraph (a) is revised and paragraph (c) is added so that the revised and added material reads as follows:

§ 21.223 Induction into training on the job at subminimum wage rates or training at Federal facilities without pay.

(a) The Fair Labor Standards Act of 1938, as amended, requires a minimum wage with provision for an overtime rate, for most persons who are engaged in interstate commerce or in the production of goods for interstate commerce. The Administrator of the Wage and Hour Division, United States Department of Labor, may approve a subminimum hourly wage rate for handicapped workers where necessary in order to prevent curtailment of opportunities for employment. Similarly, the Walsh-Healey Public Contracts Act (Pub. L. 846, 74th Cong.) requires that all persons employed by a contractor on work subject thereto be paid not less than the applicable minimum wages as determined by the Secretary of Labor. When the hours of employment training exceed 40 in any one work week or 8 in any one day, employees not exempt must be paid not less than time and one-half. Questions of coverage in all doubtful cases will be cleared with the Wage and Hour Division's Regional Director before induction into training.

(c) Notwithstanding any other provision of law, the facilities of any agency of the United States may be used to provide unpaid training or work experience as part or all of a veteran's program of vocational rehabilitation when the Counseling Psychologist and Vocational Rehabilitation Specialist determine such training or work experience to be necessary to accomplish vocational rehabilitation in accordance with § 21.222(f)(1). While pursuing such training or work experience, an uncompensated veteran shall be deemed to be an employee of the United States for the purposes of benefits under chapter 81, title 5, United States Code, but not for the purposes of laws administered by the Civil Service Commission. (38 U.S.C. 1511; Pub. L. 94-502, 90 Stat. 2383)

18. Sections 21.260 and 21.261 are revised to read as follows:

§ 21.260 Introduction.

A veteran in a course of vocational rehabilitation may be granted leave of absence where such leave will not materially interfere with the pursuit of his or her course.

§ 21.261 Ordinary leave.

Ordinary leave will accrue at the rate of 2½ days per month during the entire time the veteran is in training status, including that time during which he or she is on approved leave of absence. Leave will not be accumulated to an amount in excess of 30 days. Accumulated leave will not be forfeited through interruption of training and may be carried over from one period of training to another and from one 12 successive months period of training to another. Similarly, where reentrance into training after rehabilitation or discontinuance is authorized, unused accumulated ordinary leave may be recredited to the veteran's account upon reentrance into training.

(a) *Granting of ordinary leave.* Ordinary leave of absence may be approved, as needed, in excess of amount of leave accrued to the credit of the veteran, but in no case may ordinary leave in excess of an aggregate of 30 days be authorized in any 12 months of training, beginning with the date of the veteran's entrance into training.

(1) The granting of such leave will not materially interfere with the pursuit of the prescribed course; and

(2) Except where the training establishment is not operating full time no ordinary leave will be granted which will require extending the veteran's training beyond 48 months, or further extending the training where in excess of 48 months already has been authorized.

(b) *Charging of ordinary leave.* Approved absences covering a period less than the standard school or work week of the training institution or establishment will be charged at the rate of 1 day for each school or working day of absence from the institution. Approved absences covering a period of 1 calendar week or more will be charged at the rate of 5 days for each 7 consecutive days of absence.

(1) For veterans enrolled in educational institutions, leave may not be authorized nor subsistence allowance paid for any period of more than 1 full calendar month between terms or other periods of instruction within a period of enrollment. When such interim period is 1 full calendar month or less subsistence allowance may be paid and leave will be charged for veterans enrolled in courses not leading to a standard college degree; there will be no charge against leave for veterans enrolled in courses leading to a standard college degree.

(2) If the veteran transfers, with vocational rehabilitation specialist approval, from one approved educational institution to another for the purpose of enrolling in and pursuing a similar course at the second institution during the next consecutive term, and the period between such consecutive terms does not exceed 30 days, such period will not be charged against leave for veterans pursuing a standard college degree program but will be charged against leave for veterans in courses not leading to a standard college degree. Leave may not be authorized, nor subsistence allowance paid, if the interval exceeds 30 days.

(3) If the educational institution certifies the enrollment of the veteran on an individual semester, term or quarter basis and the interval between such periods does not exceed 1 full calendar month, such period will not be charged against leave for veterans pursuing a standard college degree, but will be charged against leave for veterans in courses which do not lead to a standard college degree. Leave may not be authorized, nor subsistence allowance paid, if the interval exceeds 1 full calendar month.

(4) Leave will not be charged for periods where the school is temporarily closed under an established policy based upon an Executive order of the President or due to an emergency situation. (38 U.S.C. 1780(a); Pub. L. 94-502, 90 Stat. 2383)

(5) For veterans pursuing on-the-job training, no charge will be made for holidays established by Federal or State law but a charge will be made for periods during which vacations are granted to all employees at the same time; or periods during which the plant is shut down to undergo repairs or because of such things as fuel shortages, strikes, inclement weather, etc.

(6) For veterans pursuing institutional-on-farm training, leave will not be charged for routine absences from the farm required in the ordinary day-to-day conduct of the farm business or for absences from that part of an institutional on-farm course which is given at the educational institution. However, absences which materially interfere with the pursuit of the course or prevent the veteran from receiving the required amount of instruction will be cause for interruption or discontinuance of training.

(7) For veterans in programs of independent study which are not on a semester or quarter basis, leave between designated periods of study may be authorized and will be charged on same basis as leave between terms.

19. In § 21.262, the introductory portion preceding paragraph (a) and paragraph (b)(1) are revised to read as follows:

§ 21.262 Additional leave under exceptional circumstances.

Leave of absence in addition to ordinary leave may be approved under the

following conditions, provided it is reasonably certain that the veteran will return to the pursuit of his or her course not later than the close of the period for which leave is approvable.

(b) *Personal hardship.* (1) After all accrued ordinary leave has been exhausted, additional leave, not to exceed 30 days in each 12 months of training status beginning with the date of the veteran's entrance into training, may be granted for reasons other than personal illness, when failure to do so would cause personal hardship to the veteran. Satisfactory reasons under this category might include illness or death in the veteran's immediate family or other compelling conditions beyond the veteran's control which, in the opinion of the Veterans Administration, make it necessary that the veteran be permitted to absent himself or herself from training. Personal hardship leave will not be granted to cover periods between ordinary school years.

20. Section 21.701 is revised to read as follows:

§ 21.701 Need for vocational rehabilitation.

(a) A veteran having basic eligibility for whom training to employability is found medically and otherwise feasible may be afforded training if he or she is found in need of vocational rehabilitation because of the handicap of his or her service-connected disability.

(b) A veteran who has a service-connected disability of compensable degree which resulted from service in the Armed Forces on or after September 16, 1940, will be presumed to be in need of vocational rehabilitation. However, a veteran will be held not in need of training, if it is determined through counseling that the veteran's service-connected disability causes no limitations on potential employability or, if such limitations exist that he or she is employed or fully qualified for employment in a suitable occupation. An occupation in which a disabled veteran is employed or in which he or she could obtain and hold employment will be considered suitable when the following criteria are met:

(1) The occupation is one which is pursued by workers in the locality where the veteran resides; and

(2) The veteran can meet the requirements of the occupation with no great likelihood of aggravating the disability; and

(3) The occupation is one in which a trained worker normally pursues employment and earns a livelihood; and

(4) Job requirements are such that a period of training (over and beyond

vestibule training) is required to secure and hold employment in it; and

(5) The occupation is consistent with the veteran's aptitudes, abilities, interests, and capacities.

(c) The determination as to whether a disabled veteran is in need of vocational rehabilitation will be made by counseling psychologists in Veterans Services Divisions in field stations.

21. In § 21.1020, paragraph (b) is revised to read as follows:

§ 21.1020 Educational assistance.

(b) *45 Months limitation.* Educational assistance may not exceed a period of 45 months, or the equivalent in part-time training, except as specified in § 21.1041.

§ 21.1021 [Amended]

22. Immediately following § 21.1021, the cross reference is changed to read "Measurement of courses. See § 21.4270(c)".

23. In § 21.1040, the introductory portion preceding paragraph (a) and paragraph (a) are revised to read as follows:

§ 21.1040 Basic eligibility.

Basic eligibility for educational assistance for persons training under chapter 34, title 38, United States Code, including chapter 36 to the extent applicable, is subject to the following requirements:

(a) *Service.* An eligible veteran is a person with active duty service, including travel time which meets the requirements of § 3.6(b)(6) of this chapter, who has either:

(1) Served on active duty for a continuous period of 181 days or more, any part of which occurred on or after February 1, 1955, and before January 1, 1977,

(2) Served on active duty for a continuous period of 181 days or more, as a result of a contract with the Armed Forces in a program such as the DEP (Delayed Enlistment Program), or an ROTC (Reserve Officer's Training Corps) program for which a person enlisted in, or was assigned to, a reserve component prior to January 1, 1977, any part of which period of active duty commenced within 12 months after January 1, 1977, or

(3) Served on active duty for a period of less than 181 days any part of which period was performed, either after January 31, 1955 and before January 1, 1977 or if pursuant to a contract as provided in paragraph (a)(2) of this section, after January 1, 1977 and was discharged or released because of a service-connected disability.

(38 U.S.C. 1652; Pub. L. 94-502, 90 Stat. 2383.)

24. In § 21.1041, paragraphs (a) and (d) are revised to read as follows:

§ 21.1041 Periods of entitlement.

(a) *General.* (1) A veteran with less than 18 months active duty service or a person on active duty who meets the requirements of § 21.1040 will be entitled to full-time educational assistance for a period not in excess of 45 months computed on the basis of 1½ months (or the equivalent in part-time educational assistance) for each month or fraction of a month of service on active duty on or after February 1, 1955 up to and including the date of the veteran's first discharge or release after December 31, 1976, if he or she was in the active military service on December 31, 1976, or has eligibility as provided in § 21.1040(a)(2). First discharge or release means the first such discharge or release wherein the person is eligible for complete separation from active duty. There will be excluded from the period of entitlement the periods specified in § 21.1040 (b) and (c).

(2) A veteran who has served a continuous period of not less than 18 months of active duty on or after February 1, 1955, and who has been released from such service under conditions that satisfied his or her active duty obligation, will be entitled to full-time educational assistance for a period of 45 months (or the equivalent in part-time educational assistance). Service on or after January 1, 1977 may be included up to and including the date of the veteran's first discharge or release after December 31, 1976 if he or she was in the active military service on December 31, 1976 or has eligibility based upon section 1652(a)(1)(B), title 38, United States Code. (§ 21.1040(a)(2)). The periods specified in § 21.1040(b) will be excluded in computing the 18 months period.

(3) The veteran may use his or her entitlement at any time during the 10-year period determined under § 21.1042, but in no event shall education or training be afforded a veteran under chapter 34 or 36 after December 31, 1989. It is not required that the entitlement time be used in consecutive months.

(4) The 45 months limitation may be exceeded where an extension is authorized under paragraph (d) of this section, or where no charge against entitlement is made based on a course or courses pursued at a secondary school level, as provided in § 21.1045(a), pursued by a veteran under the Program of Special Assistance for the Educationally Disadvantaged or by a service-

(3) Child is enrolled and eligibility ceases because veteran is no longer rated permanently and totally disabled; extended to date specified in paragraph (e)(2) of this section without regard to whether the midpoint of the quarter, semester or term has been reached. See § 21.4135(o).

(4) Child is enrolled and eligibility ceases because the member of the Armed Forces upon whose service eligibility is based is no longer listed by the Secretary concerned in any of the categories specified in § 21.3021(a)(1)(iv); extended to date specified in paragraph (e)(2) of this section without regard to whether the midpoint of the quarter, semester or term has been reached. See § 21.4135(o).

34. Section 21.3044 is revised to read as follows:

§ 21.3044 Entitlement.

(a) Each eligible person is entitled to educational assistance for a period not in excess of 45 months, or the equivalent thereof in part-time training. No extension of entitlement will be authorized except as provided in paragraph (c) of this section. The period of entitlement when added to education or training received under any or all of the laws cited in § 21.4020 will not exceed 48 months of full-time educational assistance. The period of entitlement will not be reduced by any period during which subsistence allowance was paid after determination of employability following vocational rehabilitation. Where the period of entitlement is subject to reduction by reason of prior training the period of prior training will be converted to months and quarter fractions of a month before subtracting this period from the period of entitlement. In the conversion process a period of prior training less than a full month will be converted by using the table in § 21.1041(c).

(b) The 45-month period of entitlement is any 45 months within the period of eligibility. The eligible person is not required to pursue his or her program in the period of 45 consecutive months.

(c) The 45 months limitation may be exceeded only in the following cases:

(1) Where no charge against entitlement is made based on a course or courses pursued by a spouse or surviving spouse under the Special Assistance for the Educationally Disadvantaged program. (See § 21.4237); or

(2) Where special restorative training authorized under § 21.3300 exceeds 45 months.

35. Section 21.3046 is revised to read as follows:

§ 21.3046 Periods of eligibility: spouses and surviving spouses.

The period of eligibility cannot exceed 10 years and can be extended

only as provided in paragraph (c) of this section. If eligibility arises before October 24, 1972, educational assistance based on a course of apprentice or other on-the-job training, or correspondence approved under the provisions of §§ 21.4256, 21.4261 and 21.4262 will not be afforded later than October 23, 1982. The period of eligibility of a spouse computed under the provisions of paragraph (a) of this section, however, will be recomputed under the provisions of paragraph (b) of this section if her or his status changes to that of surviving spouse.

(a) *Spouses.* (1) If the permanent total rating is effective before December 1, 1968, the beginning date of the 10-year period of eligibility is December 1, 1968.

(2) If the permanent total rating is effective on or after December 1, 1968, or the notification to the veteran of such rating was on or after that date, the beginning date of the 10-year period of eligibility is the effective date of the rating or the date of notification, whichever is more advantageous to the spouse.

(3) If eligibility arises under § 21.3021(a)(3)(ii) the beginning date of the 10-year period is December 24, 1970, or the date the member of the Armed Forces on whose service eligibility is based was so listed by the Secretary concerned, whichever last occurs.

(b) *Surviving spouses.* (1) If the veteran's death occurred before December 1, 1968, the beginning date of the 10-year period is December 1, 1968.

(2) If the veteran's death occurred on or after December 1, 1968, the beginning date of the 10-year period is the date of death.

(c) *Extension to ending date.* Spouse is enrolled and eligibility ceases for a reason specified in paragraph (c)(1), (2) or (3) of this section; extended to end of quarter or semester for schools operating on quarter or semester system, or for schools not operating on quarter or semester system, to end of course or for 12 weeks, whichever is earlier. In a course pursued exclusively by correspondence, the period of eligibility will be extended to the end of the course or for the total additional amount of instruction that \$817 will provide, whichever is less. No extension may exceed maximum entitlement or extend beyond the 10-year delimiting date specified in paragraph (a) of this section. Extension is authorized without regard to whether the midpoint of the quarter, semester or term has been reached. No extension of the period of eligibility will be made where training is pursued in a training establishment as defined in § 21.4200(c).

(1) Veteran is no longer rated permanently and totally disabled.

(2) Spouse is divorced from veteran without fault on her or his part.

(3) Spouse no longer is listed in any of the categories of § 21.3021(a)(3)(ii). (38 U.S.C. 1711(b), 1712(b), 1732, 1786; Pub. L. 94-502, 90 Stat. 2383)

36. In § 21.3300, paragraph (c) is revised to read as follows:

§ 21.3300 Special restorative training.

(c) Special restorative training may be provided in excess of 45 months where an additional period of time is needed to complete such training. Entitlement, including any authorized in excess of 45 months, may be expended through an accelerated program requiring a rate of payment in excess of \$92 per calendar month. See §§ 21.3303 and 21.3333(b). (38 U.S.C. 1741(b), 1742; Pub. L. 94-502, 90 Stat. 2383)

37. In § 21.3303, the introductory portion preceding paragraph (a) and paragraphs (a) and (b) are revised to read as follows:

§ 21.3303 Extent of training.

Ordinarily special restorative training may not exceed 9 months. However, where it is determined that more than 9 months is necessary the program will be referred to Central Office for prior approval. Where the plan for a program of special restorative training of itself (not in combination with the program of education) will require more than 45 months (or its equivalent in accelerated payments) the plan will be included in the recommendation to Central Office for approval. The limitation at age 31 may not be exceeded. A course of special restorative training will be prescribed on a full-time basis as determined in each individual case in accordance with one of the following requirements:

(a) The course will require devotion of that amount of time per week which is commonly devoted to a full-time course at an educational institution in each case where, based on medical findings, it is determined that the physical or mental condition of the eligible person will permit the devotion of that amount of time to his or her training.

(b) The course will require devotion of the maximum amount of time per week which is determined by medical findings to be commensurate with the limitations imposed by the eligible person's disability in each case where medical authority determined that, due to such limitations, the time he or she should devote to his or her course is less than the amount of time indicated in paragraph (a) of this section.

38. In § 21.3304, paragraphs (b)(2), (c)(1) and (3) and (d) are revised to read as follows:

§ 21.3304 Assistance during training.

(b) Supervision will as a minimum consist of the following:

(2) The assisting of the eligible person and his or her instructor in all matters affecting training.

(c) When in the process of supervision it is determined that adjustments are needed in the course or in the training situation immediate action will be taken to bring about such adjustments in accordance with the following:

(1) When the eligible person or his or her instructor indicates dissatisfaction with elements of the program through personal discussion with the eligible person and/or his or her instructor, there will be effected if possible a correction of the difficulty through such means as making minor adjustments in the course or by persuading the eligible person to give more attention to performance.

(3) When in process of supervision it is determined that the eligible person is making progress much faster than was anticipated and it is clear that his or her course may be terminated with satisfactory results short of the time originally planned, action will be taken to terminate the course at the proper time so that the eligible person's entitlement to an educational program may be conserved.

(d) As long as the eligible person is making satisfactory progress toward the established objective of overcoming the effect of his or her handicap, the eligible person will be continued in his or her course of training without accounting for days of nonattendance within his or her authorized enrollment. However, in any instance where the eligible person's progress toward his or her objective is unsatisfactory or because of his or her negligence, lack of application or misconduct, his or her progress is being materially retarded his or her course of instruction will be interrupted.

39. In § 21.3305, paragraph (a) is revised to read as follows:

§ 21.3305 Status "interrupted."

(a) An eligible person once entered into special restorative training should pursue his or her course to completion without interruption. Wherever possible, continuous training shall be provided for each such eligible person, including training during the summer, except where, because of his or her physical condition or other good

reason, it would not be to his or her best interest to pursue training during the summer.

40. In § 21.3333, paragraphs (a) and (b) are revised to read as follows:

§ 21.3333 Rates.

(a) *Rates.* Special training allowance is payable at the following monthly rate except as provided in paragraph (c) of this section.

Course	Monthly rate	Accelerated charges
Special restorative training.	\$292	If costs for tuition and fees average in excess of \$92 per month, rate may be increased by such amount in excess of \$92.

(b) *Accelerated charges.* The additional monthly rate may be paid if the parent of guardian concurs in having the eligible person's period of entitlement reduced by 1 day for each \$9.76 that the special training allowance exceeds the basic monthly rate of \$292. Fractions of more than one-half day will be charged as 1 day; fractions of one-half or less will be disregarded. Charges will be recorded when the eligible person is entered into training. (38 U.S.C. 1742; Pub. L. 94-502, 90 Stat. 2383.)

41. In § 21.4130, the introductory portion preceding paragraph (a) is revised to read as follows:

§ 21.4139 Educational assistance allowance.

Educational assistance allowance will be paid at the rate specified in § 21.4136 or 21.4137 while the veteran or eligible person is pursuing a course of education. Except for apprenticeship and on-the-job training programs, no payment will be made based on a course not leading to a standard college degree for excessive absences as determined under § 21.4205(b). (See §§ 21.4136(i) and 21.4137(f) for proportionate reduction where less than 120 hours are completed during month in apprenticeship and on-job training programs.) Final payment may be withheld until proof of continued enrollment is received and the account adjusted.

42. In § 21.4135, paragraphs (e), (g), (s), and (v) are revised, paragraph (m) is revoked and paragraph (w) is added so that the revised and added material reads as follows:

§ 21.4135 Discontinuance dates.

The effective date of reduction or discontinuance of educational assistance allowance will be specified in this section. If more than one type of reduction or discontinuance is involved, the earliest date will control.

(e) *Course discontinued; course interrupted; course terminated; course not satisfactorily completed or withdrawn from* (§§ 21.4136 and 21.4137).

(1) If the individual withdraws from all courses or receives all nonpunitive grades and in either case there are no mitigating circumstances as provided in § 21.3136(k) or 21.4137(h), benefits will be terminated or reduced effective first date of the term in which the withdrawal occurs or the term for which the grades are assigned or December 1, 1976, whichever is the later.

(2) If the individual withdraws from all other courses other than courses in paragraph (e)(3) of this section and with mitigating circumstances, as provided in § 21.4136(k) or 21.4137(h), or withdraws from all courses such that a punitive grade is or will be assigned for those courses:

(i) Residence training: Last date of attendance.

(ii) Independent study: Official date of change in status under the practices of the institution.

(3) If the individual withdraws from correspondence, flight, farm cooperative, cooperative or job training, benefits will be terminated effective:

(i) Correspondence training: Date last lesson is serviced.

(ii) Flight training: Date of last instruction.

(iii) Job training: Date of last training.

(iv) Farm cooperative training: Date of last class attendance.

(v) Cooperative training: Date of last training. (38 U.S.C. 1780(a); Pub. L. 94-502, 90 Stat. 2383.)

(g) *Unsatisfactory progress* (§ 21.4277). The date the veteran's or eligible person's enrollment is discontinued by the school or the date determined under § 21.4277, whichever is earlier.

(n) [Revoked.]

(s) *Reduction in rate of pursuit of course* (§ 21.4270). (1) If the individual reduces training by withdrawing from part of a course because of mitigating circumstances, but continues training in part of the course, benefits will be reduced effective at the end of the month or the end of the term in which

PROPOSED RULES

withdrawal occurs, whichever is earlier, except first date of the term in which reduction occurs, if the reduction occurs at the beginning of the term.

(2) If the individual reduces training by withdrawing from a part of a course, without mitigating circumstances, the reduction is effective first date of enrollment of the term in which the reduction occurs or December 1, 1976, whichever is the later. See paragraphs (e) and (w) of this section also.

(v) *Remarriage of spouse or surviving spouse.* (1) Remarriage: Last date of attendance before remarriage.

(2) Conduct of spouse or surviving spouse: Last day of month before inception of relationship.

(w) *Nonpunitive grade.* (1) If the individual receives a nonpunitive grade

in a particular course, reduction will be effective last date of attendance, when mitigating circumstances are found.

(2) If the individual receives a nonpunitive grade in a particular course, reduction will be effective the first date enrollment for the term in which the grade applies, or December 1, 1976, whichever is later, when no mitigating circumstances are found. See paragraphs (e) and (s) of this section.

43. In § 21.4136, paragraphs (a), (c), (d), (f), (h), and (j)(2) are revised and paragraph (k) is added so that the revised and added material reads as follows:

§ 21.4136 Rates; educational assistance allowance; 38 U.S.C. Chapter 34.

(a) *Rates.* Educational assistance allowance is payable at the following monthly rates effective October 1, 1976:

Type of courses	Monthly rate			
	No dependent	1 dependent	2 dependents	Additional for each additional dependent
Institutional				
Full time	\$292	\$347	\$396	\$24
¾ time	219	260	297	18
½ time	146	174	198	12
Less than ½ but more than ¼ time	146			
¼ time or less	73			
Cooperative, other than farm cooperative (full time only)	235	276	313	18

¾ time	176	207	235	14
½ time	116	138	157	9

1. If a veteran under chapter 34 or an eligible person under chapter 35 receiving benefits under § 21.4280(b)(2) completes his or her program before the designated completion time, his or her award will be recomputed to permit payment of tuition and fees not to exceed \$146 or \$73 as appropriate per month if the maximum allowance was not initially authorized.

2. See paragraph (b) of this section.

3. See footnote 3 of § 21.4270(d) for measurement of full time and paragraph (i) of this section for proportionate reduction in award for completion of less than 120 hr per month.

4. Established charge means the charge for the course or courses determined on the basis of the lowest extended time payment plan offered by the institution and approved by the appropriate State approving agency or the actual cost for the eligible veteran whichever is the lesser. Enrollments before Jan. 1, 1973, will receive 100 pct of the established charges.

(38 U.S.C. 1677, 1682, 1786, 1787; Pub. L. 94-502, 90 Stat. 2383.)

(c) *Active duty.* The monthly rate for an individual who is pursuing a program of education while on active duty may not exceed the monthly rate of the cost of the course as specified in paragraph (b) of this section. For the

purpose of a course pursued under the provisions of § 21.4235(a)(1) "cost of the course" shall include the cost of books and supplies peculiar to the course which the institution requires similarly circumstanced nonveterans

enrolled in the same or a similar course to have. Where there is no same program, the cost of the course will be established by the Veterans Administration based on a report from the State approving agency showing the estimated cost for operation of the program and the anticipated enrollment. Subject to these limitations, the rate will be:

Measurement	Rates
Full time	\$292
¾ time	219
½ time	146
Less than ½ but more than ¼ time	146
¼ time or less	73

(38 U.S.C. 1682; Pub. L. 94-502, 90 Stat. 2383.)

(d) *June 1966.* A veteran who commenced a course prior to June 1, 1966, will not be paid for any part of the month of June 1966, unless his or her course continues through June 30, 1966. (Sec. 12(a), Pub. L. 89-358, 80 Stat. 28.)

(f) *Dependents.* The term "dependent" means a spouse, child or dependent parent who meets the definitions of relationship specified in §§ 3.50, 3.51, 3.57 and 3.59 of this chapter. A child adopted outside the veteran's family is included only if the veteran is contributing to the child's support.

(h) *Payment.* Educational assistance allowance at the rates specified in paragraphs (b) and (c) of this section for servicemen or servicewomen on active duty, other than those training under the Predischarge Education Program who qualify for an advance payment under paragraph (j) of this section and who are training on a less than half-time basis, will be paid to or on behalf of the trainee enrolled in an institution operating on a term, quarter or semester basis in a lump sum for the entire quarter, semester or term. These payments will be made during the month immediately following the month in which certification is received from the educational institution that the veteran has enrolled in and is pursuing a program at the institution.

(j) *Advance payment.* . . .

(2) *Payment.* Upon receipt of an application and if there is no evidence in

the veteran's, serviceman's, or servicewoman's file showing that he or she is not eligible for such an advance the check for the allowance, made payable to the veteran, serviceman or servicewoman shall be mailed to the institution for delivery to the veteran, serviceman or servicewoman upon registration. No delivery by the institution shall be made more than 30 days in advance of commencement of his or her program. If delivery is not made within 30 days after commencement of the program, the institution shall return the check to the Veterans Administration. The Director of the regional office or Veterans Administration center of jurisdiction may direct that advance payments shall not be made to veterans and other eligible persons if the institution demonstrates an inability to comply with these requirements, if the institution fails to adequately provide for the safekeeping of the checks prior to delivery to the student or return to the Veterans Administration, or if he or she determines, based upon compelling evidence, that the institution demonstrates its inability to discharge its responsibilities under the advanced payment program.

(i) *Veterans.* The amount of the payment is not to exceed the allowance for the month or fraction thereof in which the course will commence plus the allowance for the following month. Subsequent payments shall be made each month in accordance with provisions set out in § 21.4138, 21.4203, 21.4204, and 21.4205. Final payment may be withheld until certification is received that the veteran pursued his or her course and any necessary adjustments made.

(ii) *Servicemen and servicewomen on active duty.* The payment will be in a lump sum based upon the amount payable for the entire quarter, semester, or term, as applicable. The application must be endorsed by the school to verify information needed to determine the lump-sum payment.

(iii) *Exception.* Notwithstanding any provision of this section or any other section of Title 38, Code of Regulations, on and after June 1, 1977, no advance payment of benefits shall be made, unless the individual shall first specifically request such a payment and the educational institution at which the veteran or eligible person is accepted or enrolled has agreed to, and can satisfactorily, carry out the provisions of 38 U.S.C. 1780(d) (5) (B) and (C) and (6) pertaining to receipt, delivery or return of advance checks and certifications of delivery and enrollment. Furthermore, all other payments made on or after that date shall be made only at the end of the month in which the training for which payment is made shall have occurred.

(iv) *Time of payment.* Advance payment will only be authorized at the be-

ginning of an ordinary school year or at the beginning of any other enrollment period which begins after a break in enrollment of 1 full calendar month or longer. Furthermore, on and after June 1, 1977, all other payments shall be made only at the end of the month in which the training for which payment is made shall have occurred. These exceptions are required by the provisions of Pub. L. 94-502, 90 Stat. 2383. (See §§ 21.4137 and 21.4138.)

(k) *Mitigating circumstances.* Unless there are mitigating circumstances, benefits will not be paid to any veteran for a course from which the student withdraws or receives a nonpunitive grade which is not used in computing the requirements for graduation. Mitigating circumstances shall include but not be limited to:

(1) Continuous pursuit of the program of training is precluded because of illness of the veteran or other eligible person or because of illness or death in his or her immediate family.

(2) Unavoidable conditions arise in connection with the veteran's or eligible person's employment which preclude continuous pursuit of the program. Such conditions are a geographical transfer or a change in the hours or conditions of employment.

(3) Immediate family or financial obligations beyond the control of the veteran or other eligible person require him or her to suspend pursuit of the program of training to obtain employment which precludes the continuous pursuit of the training.

(4) The course is being pursued by a student under subchapter V, ch. 34, title 38, United States Code, who fails to satisfactorily complete a course without fault.

(5) Discontinuance of a course by a school.

(6) Unanticipated active duty military service, including active duty for training. (38 U.S.C. 1780(a); Pub. L. 94-502, 90 Stat. 2383.)

44. In § 21.4137, paragraph (a) is revised and paragraphs (g)(4) and (5) and (h) are added so that the revised and added material reads as follows:

§ 21.4137 Rates; educational assistance allowance; 38 U.S.C. ch. 35

(a) *Rates.* Educational assistance allowance is payable at the following monthly rates:

Type of courses	Monthly rate—effective Oct. 1, 1976
Institutional:	
Full time	\$292
¾ time	219
½ time	146
Less than ½ but more than ¼ time	146
¼ time or less	73
Cooperative, other than farm cooperative (full time only)	235

Type of courses Monthly rate—effective Oct. 1, 1976

Apprentice or on-job (full time only but see footnote 1 below)	
Payment designated training assistance allowance:	
1st 6 mo	212
2d 6 mo	159
3d 6 mo	106
4th 6 mo and succeeding periods	53
Farm cooperative:	
Full time	35
¾ time	176
½ time	118
Correspondence:	
90 per centum of the established charge for number of lessons completed by eligible spouse or surviving spouse and serviced by the school minus allowance paid quarterly.	

1. See footnote 5 of § 21.4270(h) for measurement of full time and paragraph (f) of this section for proportionate reduction in award for completion of less than 120 hours per month.

2. Established charge means the charge for the course or courses determined on the basis of the lowest extended time payment plan offered by the institution and approved by the appropriate State approving agency or the actual cost for the eligible spouse or surviving spouse whichever is the lesser.

(38 U.S.C. 1682, 1732, 1786, 1787; Pub. L. 94-502, 90 Stat. 2383.)

(g) *Advance payment.* . . .

(4) *Exception.* Notwithstanding any provision of this section or any other section of Title 38, Code of Federal Regulations, on and after June 1, 1977, no advance payment of benefits shall be made, unless the individual shall first specifically request such a payment and the educational institution at which the veteran or eligible person is accepted or enrolled has agreed to, and can satisfactorily carry out the provisions of 38 U.S.C. 1780(d) (5) (B) and (C) and (6), pertaining to receipt, delivery or return of checks and certifications of delivery and enrollment. Furthermore, all other payments made on or after that date shall be made only at the end of the month in which the training for which payment is made shall have occurred.

(5) *Time of payment.* Advance payment will only be authorized at the beginning of an ordinary school year or at the beginning of any other enrollment period which begins after a break in enrollment of 1 full calendar month or longer. Furthermore, on and after June 1, 1977, all other payments shall be made only at the end of the month in which the training for which payment is made shall have occurred. These exceptions are required by the provisions of Pub. L. 94-502, 90 Stat. 2383. See §§ 21.4136 and 21.4138.

(h) *Mitigating circumstances.* Unless there are mitigating circumstances, benefits will not be paid to any eligible person for a course from which the student withdraws or receives a nonpunitive grade which is not used in computing the requirements for graduation. Mitigating circumstances shall include but not be limited to:

(1) Continuous pursuit of the program of training is precluded because

of illness of the eligible person or because of illness or death in his or her immediate family.

(2) Unavoidable conditions arise in connection with the eligible person's employment which preclude continuous pursuit of the program. Such conditions are a geographical transfer or a change in the hours or conditions of employment.

(3) Immediate family or financial obligations beyond the control of the eligible person require him or her to suspend pursuit of the program of training to obtain employment which precludes the continuous pursuit of the training.

(4) The course is being pursued by a student under subchapter V, chapter 35, or under section 1733, Title 38, United States Code, who fails to satisfactorily complete a course without fault.

(5) Discontinuance of a course by a school.

(6) Unanticipated active duty military service, including active duty for training. (38 U.S.C. 1780(a); Pub. L. 94-502, 90 Stat. 2383.)

45. Section 21.4138 is revised to read as follows:

§ 21.4138 Certifications and release of payments.

Educational assistance allowance will be paid to or on behalf of a veteran or eligible person under chapter 34 or 35 on the basis of the appropriate certification required in §§ 21.4136, 21.4137, 21.4203, 21.4204, and 21.4205 concerning enrollment in or the pursuit of a course during the reporting period.

(a) *Lump sum—in advance.* A certification by an institution that the eligible individual has enrolled will be sufficient to release a lump-sum payment to or on behalf of the individual for the entire quarter, semester or term no earlier than 30 days prior to the date the program of training is to begin, provided that the payment is made before June 1, 1977, and provided the individual is:

(1) A serviceman or servicewoman on active duty training on a half-time or greater basis, or

(2) A serviceman or servicewoman on active duty training in a Predischarge Education Program course, regardless of the training time.

(b) *Lump sum—in month following.* Such a certification by an institution will be sufficient to release the payment of a lump sum to or on behalf of the individual for the entire quarter, semester or term in the month following the receipt of the certification by the Veterans Administration, provided the individual is:

(1) A serviceman or servicewoman who is on active duty and who is training in a non-Predischarge Education Program course on a less than half-time basis,

(2) A veteran or other eligible person who is not on active duty and who is training on a less than half-time basis.

(3) An individual referred to in paragraph (a) of this section who is receiving payment after June 1, 1977, and who has not specifically requested an advance payment as provided in paragraph (d) of this section.

(c) *Payment released prior to June 1, 1977.* Such a certification by an institution will be sufficient to release the payment of educational assistance allowance for the month or fraction thereof in which the course will commence plus the allowance for the following month, to a veteran or other eligible person who is not on active duty and who is training at a half-time or greater rate, provided the payment is made prior to June 1, 1977. Payment for months subsequent to those represented by the advance payment shall be made each month in advance of that month's training subject to submission of reports required from the school and student by §§ 21.4203, 21.4204, and 21.4205, but if the month for which such payment is made is subsequent to May 1977, the payment shall be made in the month immediately following the month in which the training occurs and is certified to the Veterans Administration.

(d) *Payment released subsequent to June 1, 1977.* On and after June 1, 1977, no advance payment will be made to any person who otherwise qualifies for one under either paragraph (a) or (c) of this section, unless the individual specifically requests an advance payment. On and after that date no individual shall be entitled to receive prepayment of benefits for training which occurs in months for which no advance payment is payable and no request for such a payment will be honored.

(e) *Payment for last month of training.* Payment for the last month of the enrollment period will not be released to an individual pursuing an institutional course not leading to a standard college degree until the Veterans Administration has received final certification as required by §§ 21.4203 and 21.4205.

(f) *Payment for intervals between terms.* A certification such as described by this section will result in payment for intervals between individual terms, quarters or semesters in accordance with the following rules:

(1) Payments will be made for such intervals during periods when the schools are temporarily closed under an established policy based upon an Executive order of the President or due to an emergency situation, and such periods shall not be counted as absences for the purposes of § 21.4205.

(2) Payments will be made for intervals between consecutive school terms, quarters or semesters where the veter-

an or other eligible person transfers from one approved educational institution for the purpose of enrolling in and pursuing a similar course at the second institution, provided that the interval does not exceed 30 days. The days for which such a payment is made will count as absences for the purposes of § 21.4205. If the transfer is made to another school and the program in which the student will be enrolled at the second institution is different from that he or she was pursuing at the first school, no payment may be made for the interval.

(3) Payments will be made for periods between a semester, term, or quarter where the educational institution certifies the enrollment of the veteran or eligible person on an individual term, quarter or semester basis, if the interval does not exceed 1 full calendar month, except as provided in paragraph (f)(3) (i) through (iii) of this section. The days for which payment is made will count as absences for the purposes of § 21.4205.

(i) No payment will be made for an interval between terms, quarters or semesters, if the student is training at less than a half-time rate, or is on active duty, even if the interval does not exceed 1 full calendar month.

(ii) No payment will be made for an interval between terms, quarters or semesters, if the student requests, prior to authorization of an award or prior to negotiating the check, that no benefits be paid for the interval period.

(iii) No payment will be made for an interval between terms, semesters, or quarters, if the veteran or eligible person will exhaust his or her entitlement by receipt of such a payment and it is to the advantage of the individual not to receive payment. (38 U.S.C. 1780; Pub. L. 94-502, 90 Stat. 2383.)

CROSS REFERENCE.—Lump-sum payments. See §§ 21.4136(h) and 21.4137(e) Advance payments and prepayments. See §§ 21.4136(j) and 21.4137(g).

46. In § 21.4145, paragraph (a) is revised to read as follows:

§ 21.4145 Veteran-student services.

(a) *Eligibility.* Veteran-students who are pursuing full-time programs of education or training under chapter 34 are eligible to receive a work-study allowance. In return for the veteran-student's agreement to perform services for the Veterans Administration totaling 250 hours during an enrollment period an allowance in the amount of \$625 will be paid. An advance payment of \$250 will be made for the first 100 hours agreed to be worked. Advances of lesser amounts may be made in return for agreements to perform services for periods of less than 100 hours. In the event the veteran ceases to be a full-time student

before completing such an agreement, the veteran may, with the approval of the Director of the field station, or his or her designee, be permitted to complete that portion of an agreement that remains. Students must complete portions of an agreement within the same or immediately following term, quarter or semester in which the student ceases to be a full-time student. If the veteran terminates all training he or she will be permitted to complete that portion of an agreement represented by the sum of money already advanced to the veteran for which no services have been performed. Portions of an agreement for which no advance has been made may not be authorized to be completed by those who have terminated all training. (38 U.S.C. 1685; Pub. L. 94-502, 90 Stat. 2383)

47. Section 21.4146 is added to read as follows:

§ 21.4146 Assignments of benefits prohibited.

(a) *General.* Section 3101(a), title 38, United States Code, provides that payments of benefits due or to become due under the laws administered by the Veterans Administration shall not be assigned, except to the extent specifically authorized by law. No law specifically authorizes assignments of educational assistance allowances payable under chapters 34, 35 and 36, title 38, United States Code, and therefore none shall be made.

(b) *Designating an attorney-in-fact.* In any case where a payee of an educational assistance allowance has designated the address of an attorney-in-fact as the payee's address for the purpose of receiving his or her benefit check and has executed a power of attorney giving the attorney-in-fact authority to negotiate such benefit check, such action shall be deemed to be an assignment and is prohibited.

(c) *Arrangements amounting to an assignment.* Payments may be made to a post office box address or a bank address only if the educational institution attests that it has not entered into an assignment agreement with the student, and is not the attorney-in-fact of the student with power to negotiate an educational assistance check on behalf of the student and is not otherwise able to control the proceeds of the benefits check. Such statements shall be subject to review and when determined to be false, may be cause for creation of an overpayment to the account of the veteran or other eligible person, for which the educational institution may be liable under the provisions of § 21.4009.

(d) *Correspondence school addresses.* A request by a veteran or other eligi-

ble person to send the benefit check payable to him or her at an address which is an educational institution primarily engaged in correspondence course instruction will be presumed not to be the actual address of the veteran or other eligible person and will not be honored. Benefits checks will not be sent to the veteran or other eligible person in that event until a new address is provided designating the individual's mailing address.

(e) *Referral to Committee on Educational Allowances.* When the evidence of record indicates that an educational institution has violated the terms of this section, the matter will be referred to the field station Committee on Educational Allowances as provided in §§ 21.4207 and 21.4202(b)(4). (38 U.S.C. 3101(a); Pub. L. 94-502, 90 Stat. 2383)

48. In § 21.4153, paragraph (c)(3) is revised and (c)(4) is added so that the revised and added material reads as follows:

§ 21.4153 Reimbursement of expenses.

(c) *Reimbursable expenses.* * * *

(3) *Administrative expenses.* An allowance for administrative expenses for which payment may be authorized will be determined in accordance with the formula contained in this subparagraph. Salary cost includes basic salary plus fringe benefits such as Social Security retirement, and health, accident or life insurance which is provided all similarly circumstanced State employees.

Total salary cost reimbursable	Allowable for administrative expense
\$5,000 or less.....	\$600.
Over \$5,000 but not exceeding \$10,000.....	\$1,080.
Over \$10,000 but not exceeding \$35,000.....	\$1,080 for the first \$10,000 plus \$1,000 for each additional \$5,000 or fraction thereof.
Over \$35,000 but not exceeding \$40,000.....	\$6,535.
Over \$40,000 but not exceeding \$75,000.....	\$6,535 for the first \$40,000 plus \$855 for each additional \$5,000 or fraction thereof.
Over \$75,000 but not exceeding \$80,000.....	\$12,960.
Over \$80,000.....	\$12,960 for the first \$80,000 plus \$755 for each additional \$5,000 or fraction thereof.

(4) *Subcontracts.* The State approving agency may also be reimbursed for work performed by a subcontractor provided:

(i) The work has a direct relationship to the requirements of chapters

32, 34, 35, or 36 of title 38, United States Code, and

(ii) The Director, Education and Rehabilitation Service has approved the subcontract in advance. (38 U.S.C. 1774; Pub. L. 94-502, 90 Stat. 2383.)

49. In § 21.4200, paragraph (e) is revised and paragraphs (h), (i), (j), (k) and (l) are added so that the added and revised material reads as follows:

§ 21.4200 Definitions.

(e) *Standard college degree.* The term means an associate or higher degree awarded by:

(1) An institution of higher learning that is accredited as a collegiate institution by a recognized regional or national accrediting agency; or

(2) An institution of higher learning that is a "candidate" for accreditation, as that term is used by the regional or the national accrediting agencies; or

(3) An institution of higher learning upon completion of a course which is accredited by an agency recognized to accredit specialized degree-level programs. (38 U.S.C. 1652; Pub. L. 94-502, 90 Stat. 2383.)

(h) *Institution of higher learning.* The term means a college, university, or similar institution, including a technical or business school, offering post-secondary level academic instruction that leads to an associate or higher degree if the school is empowered by the appropriate State education authority under State law to grant an associate or higher degree. When there is no State law to authorize the granting of a degree, the school may be recognized as an institution of higher learning if it is accredited for degree programs by a recognized accrediting agency, or, it is a recognized candidate for accreditation as a degree-granting school by one of the national or regional accrediting associations and has been licensed or chartered by the appropriate State authority as a degree-granting institution. Such term shall include a hospital offering medical-dental internships or residencies approved in accordance with § 21.4265(a) without regard to whether the hospital grants a postsecondary degree. (38 U.S.C. 1652; Pub. L. 94-502, 90 Stat. 2383.)

(i) *Audited course.* The term means any credit course which a student attends as a listener only with a prior understanding between school officials and the student that such attendance will not result in credit being granted toward graduation. See § 21.4252(i). (38 U.S.C. 1780(a)(3); Pub. L. 94-502, 90 Stat. 2383.)

(j) *Nonpunitive grade.* The term means any grade assigned for pursuit of a course, whether upon completion of the course or at the time of withdrawal from the course, which has the effect of excluding the course from any consideration in determining progress toward fulfillment of requirements for graduation. No credit toward the school's requirements for graduation is granted for such a grade, nor does the grade affect any other criteria for graduation by the policies of the school, such as a grade point average. Therefore, it has the same effect as an audited course. See § 21.4135(e). (38 U.S.C. 1780(a)(4); Pub. L. 94-502, 90 Stat. 2383.)

(k) *Punitive grade.* The term means a grade assigned for pursuit of a course which is used in determining the student's overall progress toward completion of the school's requirements for graduation. Unlike the nonpunitive grade, the punitive grade does affect the criteria to be met by the student for graduation, i.e., it is a factor in computing the student's grade average or grade point average, for example. For this reason it is not the same as an audited course, since it does have an effect upon the student's ability to meet the school's criteria for graduation. See § 21.4135(e). (38 U.S.C. 1780(a)(4); Pub. L. 94-502, 90 Stat. 2383.)

(l) *Drop-add period.* The term means a reasonably brief period at the beginning of a term, not to exceed 30 days, officially designated by a school for unrestricted enrollment changes by students. (38 U.S.C. 1780(a)(4); Pub. L. 94-502, 90 Stat. 2383.)

50. Section 21.4201 is revised to read as follows:

§ 21.4201 Restrictions on enrollment; percentage of students receiving financial support.

(a) *General.* No enrollment in any course may be approved for an eligible veteran, not already enrolled, for any period during which more than 85 percent of the students enrolled in the course are having all or part of their tuition, fees, or other charges paid to or for them by the educational institution, the Veterans Administration pursuant to title 38, United States Code, and/or the grants of any other Federal agency, except:

(1) This restriction shall not apply to any farm cooperative course, any course of Special Assistance for the Educationally Disadvantaged, offered pursuant to subchapter V, chapter 34, title 38, United States Code, or any approved course offered under contract with the Department of Defense which is on or immediately adjacent to a military base and which is available only to active-duty military personnel and their dependents and has been approved by the State approving agency

of the State where the base is located or the State of the parent school if the course is offered overseas.

(2) The restriction may be waived in whole or part.

(b) *Status of school.* The requirements of this section apply to courses offered by all educational institutions except those set out in paragraph (a)(1) of this section, regardless of whether the institution is degree-granting, proprietary profit, proprietary nonprofit, public and/or tax-supported.

(c) *Identification of affected courses.* An 85-15 percent ratio must be computed for each course of study or curriculum leading to a separate approved educational or vocational objective. Computations will not be made for unit subjects, unless only one unit subject is approved by the State approving agency to be offered at a separate branch or extension of a school. Courses or curricula which are offered at separately approved branches or extensions must have an 85-15 percent ratio computed separately from the same course offered at the parent institution. The count of students attending the branch may not be added to those attending the parent institution even for the same courses or curricula. However, the count of those attending courses or curricula offered at an additional facility, as opposed to a branch or extension, must be added to those attending the same course at the parent institution. Pursuit of a course or curriculum that varies in any way from a similar course, although it may have the same designation as the other similar course or curriculum, will require a separate 85-15 percent computation. A course or curriculum will be considered to vary from another if there are different attendance requirements, required unit subjects are different, required completion length is different, etc.

(1) Separate courses for computation purposes in institutions of higher learning will be determined by general curriculum only until the point at which it is reasonable to assume a major field would be declared and after that point by specific curriculum.

(i) In 2-year institutions of higher learning, general curricula such as AA (Associate of Arts) or AS (Associate of Science) degrees with no major specified, will require separate computations for each curriculum. Terminal 2-year courses (i.e., AAS (Associate of Applied Science), dental technology or auto mechanics certificate) and other associate degree courses where a field is specified must be computed separately for each objective.

(ii) Students attending 4-year institutions of higher learning and graduate schools may be counted in general curricula such as BA (Bachelor of Art)

and BS (Bachelor of Science) only until the normal point at which the school requires the student to declare a major subject. Then the 85-15 percent computation must be made for each specific curriculum, i.e., BS (Bachelor of Science) in electrical engineering, MA (Master of Arts) in English, etc.

(2) NCD (Noncollege degree) courses must be computed separately by approved vocational objective. If several curricula lead to the same coded vocational objective, each must meet the 85-15 percent requirement separately, unless it can be shown that two or more courses are identical in all respects (scheduling, hours devoted to each unit subject etc.). Branch or extension courses will be computed separately from courses at the main campus. Courses offered on a full- and part-time basis which are identical in length and content will be combined for computing the ratio.

(d) *Waivers by the Administrator.* The following waivers have been granted by the Administrator:

(1) Waive counting all graduate students in receipt of any Federal assistance (other than veterans Administration benefits) and any support from the institution. No specific application for this waiver is required from the school.

(2) Waive counting all undergraduate and noncollege degree students, receiving any assistance provided by an institution, if the institutional policy for determining the recipients of such aid is equal with respect to veterans and nonveterans alike. An application will not be required for this type of waiver.

(3) Waive counting students in receipt of all types of Federal assistance other than Basic Educational Opportunity Grants and Supplementary Educational Opportunity Grants. Specific examples of this type of waiver are benefits administered by the Social Security Administration, Federal grants supporting specific programs such as law enforcement (LEEP, Safe Cities Act grants), nursing, Government Employees' Training Act support and tuition aid paid by an armed service to active duty personnel. No specific application is required for this waiver.

(4) Waive counting students enrolled in all courses of flying clubs established, organized, and operated pursuant to regulations of a military department of the Armed Forces as "nonappropriated sundry fund activities" which are governmental instrumentalities.

(5) Waive application of the formula to courses open only to military personnel, their dependents, and civilian employees of a military installation, when the course is offered on or adjacent to the base, under contract with

the Department of Defense, and the branch or extension is approved by the State approving agency in the State where the military installation is located. In the case of foreign military installations, approval will be by the State approving agency in the State where the parent school is located. If the course is offered to other students, the 85-15 percent requirement must be met. A specific application will not be required for this waiver.

(e) *Waivers by field station Directors.* Field station Directors are delegated authority to grant waivers under the following conditions:

(1) Notwithstanding any type of waiver provided for in paragraphs (d) and (e) of this section, station Directors are authorized to waive 85-15 percent computations for institutions which certify that 35 percent or less of their enrollment receives Veterans Administration educational assistance (compute main campuses and branches separately). Such certifications must be provided to the Veterans Administration on a continuing basis in accordance with the time limits shown in paragraph (e)(2)(iii) of this section. Such waiver will not be granted for any course in which percentage of Veterans Administration-supported veterans enrolled exceeds 85 percent. Station Directors are responsible for taking forceful action to identify specific courses of study which may exceed 85 percent Veterans Administration-supported enrollment even if such courses are offered by schools having 35 percent or fewer veterans in the total school population. All station Directors will require full 85-15 percent ratio computations for courses with extraordinarily disproportionate Veterans Administration-supported enrollments, to show compliance with the law.

(2) Waive computation of the 85-15 percent ratio, as to undergraduate or noncollege students, in any course offered by an institution of highest learning or noncollege degree school if 35 percent or fewer of the students in the course receive Veterans Administration education benefits, and the percentage of Veterans Administration-supported students in the course plus the percentage of the school's total enrollment in all courses at all locations receiving Basic Educational Opportunity Grants or Supplementary Educational Opportunity Grants totals 85 percent or less. For example, if a school finds that 29 percent of the enrollees in an AA (Associate of Arts) in business degree curriculum receive Veterans Administration payments and 52 percent of the school's total enrollment receives Basic Educational Opportunity Grants and Supplementary Educational Opportunity Grants support, the total of the percentages (81 percent) qualifies that AA (Asso-

ciate of Arts) in business degree for a waiver of any further 85-15 percent ratio computation.

(i) Satisfactory compliance with the 85-15 percent requirements is assumed when the preceding conditions of paragraph (e)(2) of this section are fulfilled. If the total of the two percentages exceeds 85 percent, the ratio must be computed for that course with Basic Educational Opportunity Grants and Supplementary Educational Opportunity Grants recipients included in the 85 percent portion of the ratio.

(ii) When more than 35 percent of the students enrolled in a course receive Veterans Administration assistance, the ratio must be computed for that course with Basic Educational Opportunity Grants and Supplementary Educational Opportunity Grants recipients included in the 85 percent portion of the ratio unless waiver has been granted under paragraph (e)(1) of this section.

(iii) This count of Veterans Administration-supported students, school-supported students, and Basic Educational Opportunity Grants or Supplementary Educational Opportunity Grants recipients must be computed within 30 days of the beginning of each regular academic term (summer sessions excluded) for application to the next term for the purpose of waiving the computation of an 85-15 percent ratio for each affected course. For schools not operating on a term basis, counts as of the last day of the quarter must be completed within 30 days of the end of each calendar quarter (March, June, September, December). If this count is not submitted to the field station Director for a course which previously had its ratio computation waived, under paragraph (e)(1) or (2) of this section, a complete computation will be required before any new enrollment of eligible veterans may be processed for that course.

(3) Schools which offer courses not meeting the 85-15 percent requirement for any reason may apply to the appropriate station Director for a total waiver of the requirements except for Veterans Administration benefits. The school must state the specific basis of the total waiver request, show the computation of the ratio for the affected course, and submit sufficient information to allow the field station Director to judge the merits of the request against the criteria shown in paragraph (e)(3)(i) through (v) of this section. The Director should use all Veterans Administration sources as well as data and statements submitted by the school when considering a total waiver request in relation to these criteria:

(i) Availability of comparable alternative educational facilities effectively open to veterans in the vicinity of the school requesting a waiver.

(ii) Status of the school requesting a waiver as a developing institution primarily serving a disadvantaged population. The school should enclose a copy of the notification of developing status from the Office of Education, if applicable. Otherwise, the school should submit data sufficient to allow the field station Director to judge whether the school is similar to officially classified developing institutions according to the criteria and data categories published in Part 169, Subpart B, Title 45, Code of Federal Regulations. The requirements of those criteria that a school be a "public or nonprofit" institution need not be met.

(iii) Previous compliance history of the school, including such factors as false or deceptive advertising complaints, enrollment certification timeliness and accuracy, and amount of school liability indebtedness to the Veterans Administration.

(iv) General effectiveness of the school's program in providing educational and employment opportunities to the particular veteran population it serves. Factors to be considered should include the percentage of veteran students completing the first year of the course of study and completing the entire course, results of the 50 percent employment survey for vocational objective courses, ratio of educational and general expenditures to full-time equivalency enrollment, etc.

(v) Waivers will not be granted by the field station Director for courses in which the percentage of veterans enrolled exceeds 85 percent, except in courses offered by military aero clubs or in courses exempted by law in paragraph (a)(1) of this section. If more than 85 percent of the students in any other course are receiving benefits from the Veterans Administration and the school applied for a waiver, the field station Director will submit the matter with his or her recommendation to the Director, Education and Rehabilitation Service for a determination.

(4) All submissions required for limited waiver of 85-15 percent requirements under the criteria in paragraph (e)(3)(i) through (v) or otherwise under paragraph (e) of this section will be made by schools to Directors of the respective field stations of jurisdiction. If a school disagrees with a Director's determination concerning waiver, it may request that the application along with the Director's recommendation be forwarded to Central Office for administrative review.

(f) *Records of waivers.* All waivers of 85-15 percent requirements, whether limited or total and whether granted by a field station Director under the authority delegated to him or her by the Administrator or by a Central Office decision upon administrative review, will be made part of the school

folder and will be subject to annual review for continuation.

(g) *Countable assistance for 85-15 percent computations.* In conjunction with the waivers provided for in paragraphs (d) and (e) of this section, the following forms of assistance must be counted for determining compliance with 85-15 percent requirements unless computation is waived under paragraph (e)(1) of this section:

(1) Accredited graduate and advanced professional courses: Count only Veterans Administration assistance provided under chapters 31, 32, 34, and 35, except for courses offered on or adjacent to a military installation as explained in paragraphs (a)(1) of this section.

(2) All other courses:

(i) Count Veterans Administration assistance provided under chapters 31, 32, 34, and 35, except farm cooperative, assistance under subchapter V of chapter 34, and courses offered on or adjacent to a military base open to only active duty personnel and their dependents (and civilian employees of the base, if waived by the field station Director or Central Office upon administrative review).

(ii) Count Basic Educational Opportunity Grants and Supplementary Educational Opportunity Grants as Federal assistance, unless computation for a course is waived by the field station Director (see paragraph (e)(2) of this section) under authority delegated by Central Office.

(iii) Count all support offered by the institution, unless covered by Administrator's waiver under paragraph (d)(2) of this section or waived by the field station Director or Central Office.

(h) *Computation of 85-15 percent ratio.* To determine if the requirement has been met (except as provided in paragraph (e)(2) of this section) the number of students in a course who are not veterans, are not receiving a form of Federal or institutional aid (exclusive of waivers and statutory exemptions), or are receiving a form of aid but have been waived as provided in paragraph (d) or (e) of this section, will be compared to the total number of students enrolled in the course. If the non-Veterans Administration, non-supported students, and supported but waived students do not comprise at least 15 percent of the total enrollment, the 85-15 percent requirement has not been met for that course.

(1) If all students in a course are full-time trainees, the ratio is computed simply by dividing the sum of all non-Veterans Administration, non-supported and supported but waived students by the total number of students: e.g. 20 non-Veterans Administration, non-supported and waived students divided by 100 total students equals .20; the 15 percent requirement would be met in this case.

(2) Ratios which include less than full-time students may be computed by comparing full-time equivalent non-Veterans Administration, non-supported and waived students to the total number of full-time equivalent students. For example, assume that there are 100 students enrolled in a particular course of study; 75 are full-time students and 25 are half-time. The total full-time equivalency enrollment would be 75 plus 12.5 or 87.5. Similarly, if 20 non-Veterans Administration, non-supported or waived students are full-time trainees and five are half-time students, the non-Veterans Administration, non-supported or waived full-time equivalency would be 20 plus 2.5 or 22.5. The ratio is computed by dividing non-Veterans Administration, non-supported and waived equivalencies by total full-time equivalencies: 22.5 divided by 87.5 equals .26. In this example the 15 percent non-Veterans Administration requirement would be fulfilled.

(3) The 85-15 percent ratio for flight courses shall be computed by comparing the number of hours of training received by countable students in the preceding 30 days to the total number of hours of training received by all students in the same period. Hours of training:

(i) In the private pilot's course shall be excluded;

(ii) Considered for students enrolled in courses approved under Part 141, Title 14, Code of Federal Regulations (the Federal Aviation Administration Regulations) shall be actual hours of logged instructional flight time or charges; and

(iii) Considered for students enrolled in courses not approved under Part 141, Title 14, Code of Federal Regulations, such as in courses for navigator or flight engineer, shall include ground training time in addition to actual logged instructional flight time or charges.

(i) *Certifications of 85-15 percent compliance.* Results of the ratio computation for each affected course must be submitted to the appropriate field station no later than 30 days after the beginning of each regular school term (excluding summer sessions) or before the beginning date of the next term, whichever occurs first. Certification for courses not offered on a term basis must be received by the Veterans Administration no later than 30 days after the end of each calendar quarter.

(1) New enrollments of eligible veterans in a course will be processed by the Veterans Administration based on submission of the most recent available computation and satisfactory 85-15 percent ratio. However, no benefit will be paid for the term when the most recent computation establishes that the school does not have a satisfactory 85-15 percent ratio, except for

those enrollments which have a beginning date prior to or the same as the date the school completed this computation. If a school fails to submit a timely computation, no benefits will be paid for any enrollment with a beginning date subsequent to the end of the last period for which a satisfactory computation was in force until a satisfactory computation has been certified by the school. Further enrollments for the current or future terms may be processed once again only after the school submits a certification showing that the proper ratio has been reestablished. When a school shows a reestablished 85-15 percent ratio, each new veteran enrollment submitted after reestablishment must be individually computed into the ratio to ensure that the 85 percent limitation is not again immediately exceeded. Individual computations will be required until the end of the term for which the ratio was reestablished.

(2) No student will be counted more than one time in any computation of an 85-15 percent ratio. If a student receives both Veterans Administration or other countable benefits and a non-countable or waived type of benefit, that student must be included in the countable (85 percent) portion of the ratio.

(3) Once a student is properly enrolled in a course, either before December 1, 1976, or after November 30, 1976, in a course which meets the 85-15 percent requirement, such a student may not have benefits for that course terminated because the 85-15 percent requirement is subsequently not met, as long as the student's enrollment remains continuous. A student enrolled in an institution organized on a term basis need not attend summer sessions in order to maintain continuous enrollment. An enrollment may also be considered continuous if a "break" in enrollment is wholly due to circumstances beyond the student's control such as serious illness. (38 U.S.C. 1673(d); Pub. L. 94-502, 90 Stat. 2383)

51. In § 21.4202, paragraph (c) is revised to read as follows:

§ 21.4202 Overcharges; restrictions on enrollments.

• • • • •

(c) *Restrictions; proprietary schools.* Enrollment will not be approved for any veteran or eligible person under the provisions of chapter 34 or 35 respectively, in any proprietary school of which the veteran or eligible person is an official authorized to sign certificates of enrollment or monthly certificates of attendance, an owner or an officer.

52. In § 21.4203, paragraphs (b)(1) and (c) are revised and paragraph (d) (3) is added so that the added and revised material reads as follows:

§ 21.4203 Reports by schools; requirements.

• • • • •

(b) *Entrance or reentrance.* • • •

(1) Schools organized on a term, quarter or semester basis shall generally report enrollment for the term, quarter, semester, ordinary school year or ordinary school year plus summer term. If a certification covers two or more terms, the school will report the dates for the break between terms if a term ends and the following term does not begin in the same or the next calendar month. No allowances are payable for these intervals. The school will report the period between each term, quarter or semester, if the eligible veteran or student elects not to be paid for the intervals between terms. Where the student is a veteran or eligible person pursuing a program on a less than half-time basis or is a serviceman or servicewoman, a separate enrollment certification will be required for each term, quarter, or semester.

(i) At the discretion of the Administrator, payment may be made for breaks, including intervals between terms, within a certified period of enrollment during which the school is closed under an established policy based upon an order of the President or due to an emergency situation.

(ii) Where a veteran or an eligible person, who is pursuing a course leading to a standard college degree, transfers between consecutive school terms from one approved institution to another approved institution, for the purpose of enrolling in, and pursuing, a similar course at the second institution, the veteran or eligible person shall, for the purpose of entitlement to the payment of educational assistance allowance, be considered to be enrolled at the first institution during the interval, if the interval does not exceed 30 calendar days, following the termination date of the school term of the first institution. (38 U.S.C. 1780; Pub. L. 94-502, 90 Stat. 2383)

• • • • •

(c) *Course changes.* Any changes in the number of credit hours or the clock hours of attendance or instruction or any other modification in the course as certified at enrollment, including nonpunitive grades, must be reported promptly to the Veterans Administration. In institutions this reporting requirement will be satisfied if the official date of the change of status is reported in accordance with § 21.4253(d) or 21.4254(c)(7).

(d) *Interruptions and terminations.* When a veteran or eligible person interrupts or terminates his or her training for whatever reason, including unsatisfactory conduct or progress, this

fact must be reported promptly to the Veterans Administration.

• • • • •

(3) If the educational institution is making a report pursuant to this paragraph or paragraph (c) of this section, a statement of mitigating circumstances known to the educational institution, where appropriate, shall be included. Mitigating circumstances are relevant to changes in status which are withdrawals. They are also relevant to changes in status resulting from nonpunitive grades.

53. In § 21.4205, paragraph (c)(5) is added to read as follows:

§ 21.4205 Absences.

• • • • •

(c) *Reporting.* • • •

(5) Where a veteran or eligible person, who is pursuing a course not leading to a standard college degree, transfers between consecutive school terms within a school year from one approved institution to another institution, for the purpose of enrolling in, and pursuing, a similar course at the second institution, the veteran or eligible person shall, for the purpose of entitlement to the payment of the educational assistance allowance, be considered to be enrolled at the first institution during the interval if the interval does not exceed 30 calendar days following the termination date of the school term of the first institution, but such periods shall be counted as absences for the purposes of this section. (38 U.S.C. 1780(a); Pub. L. 94-502, 90 Stat. 2383.)

54. In § 21.4206, paragraph (a) is revised to read as follows:

§ 21.4206 Reporting fee.

• • • • •

(a) Except as provided in paragraph (b) of this section, the reporting fee will be computed for each calendar year by multiplying \$5 by the number of eligible veterans and eligible persons enrolled under chapter 34, chapter 35, or chapter 36 on October 31 of that year.

• • • • •

55. In § 21.4208, paragraph (a) is revised to read as follows:

§ 21.4208 Central Office Education and Training Review Panel.

(a) *Purpose.* The panel will receive evidence and hear the testimony of witnesses and the arguments of interested parties regarding matters considered by the field station Committee on Educational Allowances and make rec-

ommendations to the Director, Education and Rehabilitation Service, in connection with such matters which are before him or her for final administrative determination under § 21.4201, 21.4202, or 21.4207.

• • • • •

56. In § 21.4209, paragraphs (a), (b)(2), and (f) are revised and paragraph (b)(4), (5), (6), and (7) is added so that the added and revised material reads as follows:

§ 21.4209 Examination of records.

(a) *Availability.* Notwithstanding any other provision of law, the records and accounts of educational institutions pertaining to eligible veterans or eligible persons who received educational assistance under chapters 31, 32, 34, 35, or 36, title 38, United States Code, as well as the records of other students which are necessary to enable the Veterans Administration to ascertain institutional compliance with the requirements of these chapters, shall be available for examination by duly authorized representatives of the Government. (38 U.S.C. 1790; Pub. L. 94-502, 90 Stat. 2383.)

(b) *Type of records.* Each school will upon request of duly authorized representatives of the Government make available for examination all appropriate records and accounts, including but not limited to:

• • • • •

(2) Records of previous education or training of veterans and eligible persons at the time of admission as students and records of advance credit, if any, granted by the school at the time of admission.

• • • • •

(4) Records of all advertising, sales or enrollment materials as required by § 21.4252(h) and section 1796(b), title 38, United States Code.

(5) Records and computations showing compliance with the requirements of § 21.4201 regarding the 85-15 percent ratio of students for each course.

(6) Records necessary to demonstrate compliance with the requirements of § 21.4252(e) pertaining to the time necessary to complete a correspondence course.

(7) Records necessary to demonstrate compliance with the requirements of § 21.4252(g) pertaining to employment of graduates of the course.

• • • • •

(f) *Retention of records.* The records and accounts, including those pertaining to students not receiving benefits from the Veterans Administration, as described in this section, pertaining to each period of enrollment of a veteran

or eligible person, will be kept intact and in good condition at the school for at least 3 years following the termination of such enrollment period. Longer retention will not be required unless a written request is received from the General Accounting Office or the Veterans Administration not later than 30 days prior to the end of the 3-year period.

57. In § 21.4235, paragraph (a)(1) is revised and paragraph (j) is added so that the revised and added material reads as follows:

§ 21.4235 Predischage Education program (PREP) and Special Assistance for Educationally Disadvantaged Veterans; Chapter 34.

9(a) *Enrollment.* Enrollment of a veteran may be approved in any elementary, secondary, preparatory, refresher, remedial, deficiency, or special educational assistance course not otherwise prohibited, regardless of his or her previous educational experience;

(1) While he or she is on active duty and meets the eligibility requirements of § 21.1040(e)(3) and chapter 32, title 38, United States Code, if such course or courses (but not including correspondence courses) are required to receive a secondary school diploma, or if such course or courses (including individual unit subjects within a General Education Development (G.E.D.) examination program) are required for or preparatory to the pursuit of an appropriate course or training program in an approved educational institution or training establishment; or

(j) *Enrollment restrictions.* After October 31, 1976, no person other than a member of the Armed Forces described in section 1631(b), title 38, United States Code, shall be permitted to enroll or reenroll in any course provided under the authority of subchapter VI, chapter 34, title 38, United States Code. See § 21.5040. (38 U.S.C. 1696(d); Pub. L. 94-502, 90 Stat. 2383.)

58. In § 21.4236, paragraphs (c) and (d) are revised to read as follows:

§ 21.4236 Special supplemental assistance (tutorial).

(c) *Educational assistance allowance.* In addition to payment of educational assistance allowance at the monthly rates specified in § 21.4136 or § 21.4137 the cost of such tutorial assistance in an amount not to exceed \$65 per month will be authorized.

(d) *Entitlement charge.* No charge will be made against the period of the veteran's entitlement as computed under § 21.1041 or the eligible person's

entitlement as computed under § 21.3044. Special supplemental assistance provided under this section will not exceed a maximum of \$780. (38 U.S.C. 1690, 1692, 1693; Pub. L. 94-502, 90 Stat. 2383.)

59. In § 21.4251, paragraphs (a) and (f) are revised to read as follows:

§ 21.4251 Period of operation of course.

(a) *General.* A course offered by a school other than a job training establishment will be appropriate for the enrollment of a veteran or eligible person only if it has been in operation for 2 years or more immediately prior to the date of enrollment of such person, except that this provision does not apply to:

(1) Any course to be pursued in a public or other tax-supported educational institution including the flying clubs which are the subject of § 21.4201(d)(4);

(2) Any course which is similar in character to instruction previously offered by the school for more than 2 years;

(3) Any course which has been offered by a school for a period of more than 2 years, notwithstanding that the school has moved to another location within the same general locality, or where the school has made a complete move with substantially the same faculty, curricula, and students, without a change in ownership;

(4) Any course which is offered by a nonprofit school of college level and which is recognized for credit toward a standard college degree;

(5) Any course for the educationally disadvantaged or Predischage Education Program offered by a proprietary nonprofit educational institution, at the principal or branch location, when the institution offering the course has been in operation for more than 2 years; or

(6) Any course offered by an educational institution under a contract with the Department of Defense that (i) is given on, or immediately adjacent to, a military base, (ii) is available only to active duty military personnel and/or their dependents and (iii) has been approved by the State approving agency of the State in which the base is located or by the State approving agency in the State having jurisdiction over the educational institution offering the course when the course is a degree course being taught outside the United State. See paragraph (f) of this section for specific additional requirements as to branch location schools. A course is being given at a location immediately adjacent to a military base if the facilities are clearly neighboring to the base or are in close proximity to it and must be easily accessible to active duty personnel. The location must be under effective supervision of the base military authorities. (38

U.S.C. 1789(b); Pub. L. 94-502, 90 Stat. 2383.)

(f) *Subsidiary branch or extension.* Notwithstanding the provisions of paragraph (a)(1), (2), (3), or (4) of this section the 2-year period of operation requirement will apply to courses at subsidiary branches or extensions as provided in the following subparagraphs:

(1) This requirement will apply to any course offered by a branch or extension of a public or other tax-supported institution where the branch or extension is located outside of the area of the taxing jurisdiction providing support to such institution;

(2) This requirement will apply to any course offered by a branch or extension of a proprietary profit or proprietary nonprofit educational institution where the branch or extension is located beyond the normal commuting distance of such institution and to a proprietary profit educational institution, even if the branch or extension is located within commuting distance;

(3) Additional facilities acquired by a school in the same general locality because of space limitations will not be considered to be a subsidiary branch or extension and will not be subject to the 2-year limitation if all of the following conditions are met:

(i) The school has been in operation for a period of 2 years or more;

(ii) The school has reached the limit of its enrollment capacity in its present facilities;

(iii) The courses to be offered at the additional facilities are the same as those given in the present facilities; and

(iv) The additional facilities are within normal commuting distance of the present facilities.

(4) The State approving agency shall not approve a course offered at a branch or extension, whether the course is or is not subject to the 2-year period of operation requirement, unless the school:

(i) Designates a named certifying official for each branch or extension,

(ii) Provides the branch or extension with administrative capability to furnish all reports and certifications to the Veterans Administration without the necessity of referring to the parent school's facilities,

(iii) Maintains at the branch or extension location records and files required for all Veterans Administration purposes for each student enrolled in the course, and

(iv) Has a local mailing address for each branch or extension location.

(5) A branch or extension, and additional facilities referred to in paragraph (f)(3) of this section are required to be within the same general locality from which the students of

the parent school are drawn. This distance may vary according to the unique geography of the area in which the parent school is located and the proximity and availability of other institutions offering similar courses. Ordinarily a location more than 55 miles (88.5 kilometers) from the parent school's campus will be considered to be beyond normal commuting distance. (38 U.S.C. 1789; Pub. L. 94-502, 90 Stat. 2383.)

60. In § 21.4252, paragraph (e), (f)(1), and (h) are revised and paragraphs (i) and (j) are added so that the added and revised material reads as follows:

§ 21.4252 Courses precluded.

(e) *Correspondence courses.* Enrollment in such courses will not be approved for eligible children under chapter 35. Nor shall any veteran or eligible spouse or surviving spouse be enrolled in a program of education exclusively by correspondence as authorized under section 1786, title 38, United States Code, and § 21.4256 or for the pursuit of a correspondence portion of a combination correspondence-residence course leading to a vocational objective as authorized under § 21.4279 if the normal period of time required to complete the correspondence course or portion of the course is less than 6 months in duration. The normal completion time will be considered to be 6 months or more if 80 percent or more of those completing the correspondence course over the past 2 years have required 6 months or more to complete all lessons. See §§ 21.4256 and 21.4279. (38 U.S.C. 1780(a); Pub. L. 94-502, 90 Stat. 2383.)

(f) *Courses on secondary level; chapter 35.* (1) A curriculum offered by a public or private school at the secondary school level leading to the completion of the eligible child's regular secondary school education, that is, leading to a high school diploma or its equivalent, may not be pursued as a program of education or as part of a course of education of an eligible child under chapter 35. An eligible spouse or surviving spouse may pursue secondary school courses only under the Special Assistance for the Educationally Disadvantaged program. See § 21.4237.

(g) *Erroneous, deceptive, misleading practices.* Enrollment will not be approved in any course offered by an institution which utilizes advertising, sales, or enrollment practices of any type which are erroneous, deceptive, or misleading either by actual statement, omission, or intimidation. The services and facilities of the Federal

Trade Commission shall be utilized by the Veterans Administration, where appropriate, pursuant to an agreement to carry out investigations and to make determinations under this paragraph as provided by section 1796, title 38, United States Code. To ensure compliance with this section, any institution offering courses approved for the enrollment of veterans or eligible persons shall maintain a complete record of all advertising, sales, or enrollment materials (and copies of each) utilized by or on behalf of the institution during the preceding 12-month period. Such record shall be available for inspection by the State approving agency or the Veterans Administration. Such materials shall include but are not limited to any direct mail pieces, brochures, printed literature used by sales persons, films, video tapes, and audio tapes disseminated through broadcast media, material disseminated through print media, tear sheets, leaflets, handbills, fliers, and any sales or recruitment manuals used to instruct sales personnel, agents or representatives of the educational institution. (38 U.S.C. 1796; Pub. L. 94-502, 90 Stat. 2383.)

(i) *Audited courses.* The school's certifications shall exclude courses which are being audited by the veteran or eligible person, since no educational assistance allowances shall be paid for such courses. (38 U.S.C. 1780(a); Pub. L. 94-502, 90 Stat. 2383.)

(j) *Nonpunitive graded courses.* The school shall report any course for which a nonpunitive grade is assigned and no payment shall be authorized for such a course. If payment has already been made, in whole or in part, by the Veterans Administration at the time the grade is assigned, an overpayment shall be created against the account of the student for such a course, unless the Veterans Administration determines there are mitigating circumstances. (38 U.S.C. 1780(a); Pub. L. 94-502, 90 Stat. 2383.)

61. In § 21.4253, paragraph (d) is revised to read as follows:

§ 21.4253 Accredited courses.

(d) *School qualification.* A school desiring to enroll veterans or eligible persons in accredited courses will make application for approval of such courses to the State approving agency. The State approving agency may approve the application of the school when the school and its accredited courses are found to have met the following criteria and additional reasonable criteria established by the State approving agency:

(1) The institution has submitted to the State approving agency copies of its catalog or bulletin which is certified as true and correct in content and

policy by an authorized representative and the publication contains:

(i) Institution policy and regulations relative to standards of progress required of the student by the institution (this policy will define the grading system of the institution, the minimum grades considered satisfactory, conditions for interruption for unsatisfactory grades or progress and a description of the probationary period, if any, allowed by the institution, and conditions of reentrance for those students dismissed for unsatisfactory progress. A statement will be made regarding progress records kept by the institution and furnished the student), and

(ii) Institution policy and regulations relating to student conduct and conditions for dismissal for unsatisfactory conduct.

(2) Adequate records are kept by the school to show the progress of each veteran or eligible person. The records must be sufficient to show continued pursuit at the rate for which enrolled and the progress being made. They must include final grade in each subject for each term, quarter, or semester; record of withdrawal from any subject to include the last date of attendance for a resident course; and record of reenrollment in subjects from which there was a withdrawal; and may include such records as attendance for resident courses, periodic grades and examination results.

(3) The school maintains a written record of previous education and training of the veteran or eligible person which clearly indicates that appropriate credit has been given by the school for previous education and training, with the training period shortened proportionately, and the person and the Veterans Administration so notified. The record must be cumulative in that the results of each enrollment period (term, quarter or semester) must be included so that it shows each subject undertaken and the final result, i.e., passed, failed, incomplete or withdrawn. (38 U.S.C. 1775(b).)

(4) The school enforces a policy relative to standards of conduct and progress required of the student. The school policy relative to standards of progress must be specific enough to determine the point in time when educational benefits should be discontinued, pursuant to 38 U.S.C. 1674 when the veteran or eligible person ceases to make satisfactory progress. The policy must include the grade or grade point average that will be maintained if the student is to graduate. For example, a 4-year college may require a 1.5 grade point average the first year, a 1.75 average at mid-year the second year, and a cumulative average of 2.0 thereafter on the basis of 4.0 for an A.

(5) The school maintains adequate attendance records for veterans and

§ 21.4253 Accredited courses.

(d) *School qualification.* A school desiring to enroll veterans or eligible persons in accredited courses will make application for approval of such courses to the State approving agency. The State approving agency may approve the application of the school when the school and its accredited courses are found to have met the following criteria and additional reasonable criteria established by the State approving agency:

(1) The institution has submitted to the State approving agency copies of its catalog or bulletin which is certified as true and correct in content and

PROPOSED RULES

eligible persons enrolled in resident courses not leading to a standard college degree.

62. Section 21.4256 is revised to read as follows:

§ 21.4256 Correspondence courses.

(a) A school desiring to enroll veterans under chapter 34 and spouses or surviving spouses under chapter 35 for correspondence courses or courses of combined correspondence-residence may have such courses approved when the courses and the school meet the requirements of §§ 21.4252, 21.4253, or 21.4254, and 21.4279 as applicable, and when its application demonstrates that the course is satisfactory in all elements, including a certification as to the normal period of time required to complete the course and proof that the certification has been submitted to the Veterans Administration. Such a course must require not less than 6 hours of preparation per week over any 26-week period and must require 6 or more months to complete. No more than 20 percent of the students pursuing such a course should be able to complete the course in less than 6 months for the normal length to be certified as 6 months or more. The determination of this factor shall be based upon the records of the school for the two immediately preceding years. (38 U.S.C. 1780(a)(5); Pub. L. 94-502, 90 Stat. 2383.)

(1) The enrollment agreement shall disclose fully the obligations of the in-

stitution and the veteran, spouse or surviving spouse and shall display in a prominent place on the agreement the conditions for affirmance, termination, refund, and payment of the educational allowance by the Veterans Administration.

(2) A copy of the agreement shall be given to the veteran, spouse or surviving spouse when it is signed.

(3) The agreement shall not be effective unless the veteran, spouse or surviving spouse after the expiration of 10 days after the agreement is signed, shall have signed and submitted to the Veterans Administration a written statement, with a signed copy to the institution, specifically affirming the agreement.

(4) Upon notification of the institution by the veteran, spouse or surviving spouse of an intention not to affirm the agreement, any fees paid by the individual shall be returned promptly in full to him or her.

(5) Upon termination of the affirmed agreement for training in an accredited course by the veteran, spouse or surviving spouse, without having completed any lessons, a registration fee not in excess of 10 percent of the tuition for the course or \$50, whichever is lesser, may be charged him or her. When the agreement is terminated after completion of less than 25 percent of the lessons of the course, the institution may retain the registration fee plus 25 percent of the tuition for the course. When the agreement is terminated after 25 percent but less than 50 percent of the

lessons are completed, the institution may retain the registration fee plus 50 percent of the tuition for the course. If 50 percent or more of the lessons are completed, no refund of tuition is required.

(6) Where the school either has or adopts an established policy for the refund of the unused portion of tuition, fees, and other charges subject to proration, which is more favorable to the veteran, spouse or surviving spouse than the pro rata basis as provided in paragraph (a)(5) of this section, such established policy will be applicable.

(7) Any institution which fails to forward any refund due to the veteran, spouse or surviving spouse within 40 days after receipt of a notice of termination or disaffirmance, shall be deemed, prima facie, to have failed to make a prompt refund, as required by this section.

(b) Whenever the State approving agency approves a correspondence course for training of veterans under chapter 34 and eligible spouses and surviving spouses under chapter 35, it shall immediately notify the Veterans Administration, identifying the school, the course or courses approved, and the educational or vocational objective of each approved course.

63. Section 21.4270 is revised to read as follows:

§ 21.4270 Measurement of courses.

Clock hours and class sessions mentioned in this table mean clock hours and class sessions per week.

PROPOSED RULES

COURSES		Full time	3/4 time	1/2 time	Less than 1/2 more than 1/4 time	1/4 time or less
Kind of school	Kind of course					
(a) Trade or technical - non-accredited (includes college courses not leading to a standard degree)	Shop practice an integral part of course	30 clock hours attendance with not more than 2 1/2 hours rest period allowance	22 through 29 clock hours attendance with not more than 1 1/4 hours rest period allowance	15 through 21 clock hours attendance with not more than 1 1/4 hours rest period allowance	8 through 14 clock hours attendance with not more than 3/4 hours rest period allowance	1 through 7 clock hours attendance
	Theory and class instruction predominates	25 clock hours net instruction	18 through 24 clock hours net instruction	12 through 17 clock hours net instruction	7 through 11 clock hours net instruction	1 through 6 clock hours net instruction
(b) Trade or technical - accredited (includes college courses not leading to a standard degree)	Shop practice an integral part of course	27 clock hours attendance with not more than 2 1/2 hours rest period allowance	20 through 26 clock hours attendance with not more than 1 1/4 hours rest period allowance	13 through 19 clock hours attendance with not more than 1 1/4 hours rest period allowance	7 through 12 clock hours attendance with not more than 3/4 hours rest period allowance	1 through 6 clock hours attendance
	Theory and class instruction predominates	22 clock hours net instruction	16 through 21 clock hours net instruction	11 through 15 clock hours net instruction	6 through 10 clock hours net instruction	1 through 6 clock hours net instruction
(c) High school	High school diploma or equivalent	25 clock hours net of instruction or 4 units per year or equivalent	18 through 24 clock hours net of instruction or 3 units per year or equivalent	12 through 17 clock hours net of instruction or 2 units per year or equivalent	7 through 11 clock hours net of instruction or 1 unit per year or equivalent	1 through 6 clock hours net of instruction
(d) Collegiate undergraduate	Standard collegiate courses including cooperative and external degree programs	14 semester hours or equivalent	10 through 13 semester hours or equivalent	7 through 9 semester hours or equivalent	4 through 6 semester hours or equivalent	1 through 3 semester hours or equivalent
(e) Collegiate graduate	Standard collegiate graduate courses including law and external degree programs	As in paragraph (d) of this section or certified by responsible official of school	As in paragraph (d) of this section or certified by responsible official of school	As in paragraph (d) of this section or certified by responsible official of school	As in paragraph (d) of this section or certified by responsible official of school	As in paragraph (d) of this section or certified by responsible official of school
(f) Professional (nonaccredited)	Law only	12 class sessions per week	9 through 11 class sessions per week	6 through 8 class sessions per week	4 through 5 class sessions per week	1 through 3 class sessions per week
(g) Professional (accredited and equivalent)	Internships and residencies: Medical, dental, osteopathic, nursing, X-ray, medical technology, medical record librarian, physical therapy	As established by accrediting association	Full time only			
(h) Training establishment	Apprentice or other on-the-job	Standard workweek	Full time only			
(i) Agricultural	Farm cooperative	10 clock hours net instruction	7 clock hours net instruction	5 clock hours net instruction	No provision	
(j) Elementary school	High school preparatory	25 clock hours net instruction	18 through 24 clock hours net instruction	12 through 17 clock hours net instruction	7 through 11 clock hours net instruction	1 through 6 clock hours net instruction

1. In measuring net instruction there will be included customary intervals not to exceed 10 minutes between classes. Shop or kitchen and rest periods are excluded. Supervised instruction periods in school's shops, in farm cooperative programs and the time involved in field trips and individual and group instruction may be included in computing the clock hour requirements.

2. Diploma course or equivalent based on completion of 16 instruction units. If student is pursuing course at rate which will result in an accredited high school diploma at end of 4 ordinary school years, he or she is considered in full-time training. High school diploma courses or equivalent available only for chapter 34 and eligible spouses and surviving spouses under chapter 35.

3. Cooperative courses may be pursued on full-time basis only.

Where the institution certifies that all undergraduate students enrolled for a minimum of 12 or 13 semester hours or the equivalent are (1) charged full-time tuition, or (2) considered full time for other administrative purposes, such minimum hours will establish the criteria for full-time measurement. The minimum for full time in either instance is 12 such hours. When 12 hours is properly certified as full time, 9 through 11 hours will be measured as 3/4 time, 6 through 8 hours will be measured as 1/2 time, 4 through 5 hours will be measured as less than 1/2 time and more than 1/4 time, and 1 through 3 hours will be measured as 1/4 time or less. All other undergraduate courses of less than full time will continue to be measured under paragraph (d) or (g) of this section as appropriate, but where 13 credit hours or the equivalent is certified as full time, 3/4 time will be 10 through 12 hours.

Upon request of a beneficiary, an increase in rates warranted under this criteria may be authorized to him or her effective March 26, 1970, if he or she was enrolled prior to that date and effective the date of enrollment if he or she was enrolled on or after March 26, 1970. The request of the beneficiary will not be required for other payments under this criteria.

To meet criteria for full-time measurement under 38 U.S.C. chapters 34 and 35 in standard collegiate courses which include required non-credit deficiency courses, in the absence of a certification under § 21.4272(f) the noncredit deficiency courses will be converted or the basis of the applicable measurement criteria, that is, 25 or 30 clock hours, 4 "Carnegie units", or 12, 13 or 14 (as appropriate) semester hours equal full time. The credit-hour equivalent of such noncredit courses may constitute any portion of the required hours for full-time measurement.

4. Class sessions measured on basis of not less than 50 minutes of classroom instruction. Supervised study periods, class breaks and rest periods are excluded.

5. Full-time training will consist of the number of hours which constitute the standard workweek of the training establishment, but not less than 30 hours unless a lesser number of hours is established as the standard workweek for the particular establishment through bona fide collective bargaining between employers and employees.

6. For full-time training the 440 clock hours a year may be prescheduled to provide not less than 80 clock hours in any 3-month period.

7. Independent study programs will be measured as less than 1/2 time unless a major portion of the credit hours are by classroom laboratory attendance. (§21.4280)

8. An educational institution offering courses not leading to a standard college degree may measure such courses on a quarter or semester-hour basis with full time measured on the same basis as provided by paragraph (d) of this section provided: (1) the academic portions of such courses must require outside preparation and be measured on a minimum of 50 minutes net of instruction per week for each quarter or semester hour of credit, (2) the laboratory portions of such courses must be measured on a minimum of 2 hours of attendance per week for each quarter or semester hour of credit, (3) the shop portions of such courses must be measured on a minimum of 3 hours of attendance per week for each quarter or semester hour of credit. In no event shall such courses be considered a full-time course when less than 22 hours per week of attendance is required. Not more than 2 hours rest period shall be allowed per week for courses in which shop practice is an integral part of full-time courses: 1-1/2 hours for 3/4 time courses of 16-21 clock hours; 1 hour for 1/2 time courses of 11-15 clock hours; or 1 1/2 hour for less than 1/2 time courses of 6-10 clock hours; no rest period shall be allowed for courses of less than 6 clock hours of attendance.

9. Supervised study must be excluded.

OFFICE OF MANAGEMENT AND
BUDGET

RESCISSIONS AND DEFERRALS

Cumulative Report for February 1978

This report is submitted in fulfillment of the requirements of section 1014(e) of the Impoundment Control Act of 1974 (Pub. L. 93-344). Section 1014(e) provides for a monthly report listing all budget authority for this fiscal year with respect to which, as of the first day of the month, a special message has been transmitted to the Congress.

This month's report gives the status as of February 1, 1978, of four rescissions contained in the fourteenth, fifteenth, and seventeenth special messages of fiscal year 1977 and four rescissions and 56 deferrals contained in the first five special messages for fiscal year 1978. These messages were transmitted to the Congress on July 19 (both the fourteenth and fifteenth messages), July 26, September 23, Oc-

NOTICES

tober 3, November 10, December 15, 1977, and January 27, 1978.

RESCISSIONS (TABLE A AND ATTACHMENT A)

Three rescissions totalling \$55.3 million in 1978 budget authority are presently pending before the Congress. Table A summarizes the status of rescissions proposed by the President as of February 1, 1978, while attachment A shows the history and status of each rescission proposed for fiscal year 1978. Also included are four rescission proposals totalling \$643.4 million made in fiscal year 1977 but carried into fiscal year 1978 and a single fiscal year 1978 rescission for \$2.7 million which has been reclassified as a deferral.

DEFERRALS (TABLE B AND ATTACHMENT B)

As of February 1, 1978, \$4,574.8 million in 1978 budget authority was being deferred from obligation and another \$1.7 million in 1978 obligations was being deferred from expenditure. Table B summarizes the status of de-

ferals reported by the President, and attachment B shows the history and status of each deferral reported during fiscal year 1978.

INFORMATION FROM SPECIAL MESSAGES

The special messages containing information on each of the rescissions and deferrals covered by the cumulative report are contained in the FEDERAL REGISTERS of:

Friday, July 22, 1977 (Vol. 42, No. 141, Part V) (both the fourteenth and fifteenth 1977 special messages)
Friday, July 29, 1977 (Vol. 42, No. 146, Part VIII) (seventeenth 1977 special message)
Thursday, September 29, 1977 (Vol. 42, No. 189, Part IX)
Friday, October 7, 1977 (Vol. 42, No. 195, Part IV)
Thursday, November 15, 1977 (Vol. 42, No. 220, Part IV)
Wednesday, December 21, 1977 (Vol. 42, No. 245, Part IV)
Wednesday, February 1, 1978 (Vol. 43, No. 22, Part VII)

JAMES T. MCINTYRE, Jr.,
Acting Director.

CUMULATIVE REPORT ON
RESCISSIONS AND DEFERRALS
February 1978

This report is submitted in fulfillment of the requirements of Section 1014(e) of the Impoundment Control Act of 1974 (Public Law 93-344). Section 1014(e) provides for a monthly report listing all budget authority for this fiscal year with respect to which, as of the first day of the month, a special message has been transmitted to the Congress.

This month's report gives the status as of February 1, 1978, of four rescissions contained in the fourteenth, fifteenth, and seventeenth special messages of FY 1977 and four rescissions and 56 deferrals contained in the first five special messages for fiscal year 1978. These messages were transmitted to the Congress on July 19 (both the fourteenth and fifteenth messages), July 26, September 23, October 3, November 10, December 15, 1977, and January 27, 1978.

Rescissions (Table A and Attachment A)

Three rescissions totalling \$55.3 million in 1978 budget authority are presently pending before the Congress. Table A summarizes the status of rescissions proposed by the President as of February 1, 1978, while Attachment A shows the history and status of each rescission proposed for FY 1978. Also included are four rescission proposals totalling \$643.4 million made in FY 1977 but carried into FY 1978 and a single FY 1978 rescission for \$2.7 million which has been reclassified as a deferral.

Deferrals (Table B and Attachment B)

As of February 1, 1978, \$4,574.8 million in 1978 budget authority was being deferred from obligation and another \$1.7 million in 1978 obligations was being deferred from expenditure. Table B summarizes the status of deferrals reported by the President, and Attachment B shows the history and status of each deferral reported during FY 1978.

Information from Special Messages

The special messages containing information on each of the rescissions and deferrals covered by the cumulative report are contained in the Federal Registers of:

Friday, July 22, 1977 (Vol. 42, No. 141, Part V)
(both the fourteenth and fifteenth 1977 special messages)
Friday, July 29, 1977 (Vol. 42, No. 146, Part VIII)
(seventeenth 1977 special message)
Thursday, September 29, 1977 (Vol. 42, No. 189, Part IX)
Friday, October 7, 1977 (Vol. 42, No. 195, Part IV)
Thursday, November 15, 1977 (Vol. 42, No. 220, Part IV)
Wednesday, December 21, 1977 (Vol. 42, No. 245, Part IV)
Wednesday, February 1, 1978 (Vol. 43, No. 22, Part VII)

TABLE A
STATUS OF 1978 RESCISSION PROPOSALS

	Amount (in millions of dollars)
Rescissions proposed by the President.....	\$501.3 1/
Reclassified (from R78-1 to D78-54) 2/.....	-2.7
Accepted by the Congress (GSA's repair and alteration program).....	-75.0
Rejected by the Congress (Military procurement).....	-568.4 3/
Pending before the Congress:	
(Special Message No. 5, transmitted on January 27, 1978).....	55.3

1/ This amount includes \$643.4 million in rescission proposals for FY 1977 which were still pending in FY 1978.

2/ This rescission proposal was transmitted in conjunction with a request for transfer (contained in H.R. 9375, the Supplemental Appropriations Act, 1978) of the same funds within the Department of Justice. This rescission proposal was superseded by a deferral (D78-54) submitted to report the extension of this withholding pending final Congressional action on the transfer request.

3/ As of February 1, 1978, proposals to rescind \$463.4 million of this amount were included in the Senate passed version of H.R. 9375, the Supplemental Appropriations Act, 1978.

* Detail does not add due to rounding.

TABLE B
STATUS OF 1978 DEFERRALS

	Amount (in millions of dollars)
Deferrals proposed by the President.....	\$4,764.8
Routine Executive releases.....	-149.5
Overtaken by the Congress.....	-38.8
Currently before the Congress.....	4,576.5 1/
1/ Includes \$1.7 million in outlays in a Treasury deferral, D78-28A.
